

MANAGED LONG TERM CARE MODELS IN NEW YORK STATE

Managed Long-Term Care (MLTC) provides coordinated health and long-term care services, such as home care and adult day care, to consumers who are chronically ill or have disabilities and need health and long-term care services in order to stay in their homes and communities for as long as possible. There are three (3) Managed Long-Term Care models in New York State:

PACE (Program for All Inclusive Care for the Elderly)

PACE provides a comprehensive health care plan for persons age 55 and older who are Medicaid and/or Medicare eligible and eligible for nursing home admission. Both Medicaid and Medicare pay for PACE services. PACE members are required to use PACE doctors. PACE is responsible for arranging all primary, in-patient hospital and long-term care services that are required by their members. In order to be eligible, consumers must require nursing home level of care.

MLTC Medicaid Plan

MLTC plans provide long-term care services for Medicaid eligible persons age 18 and older. Services include home health care, nursing and personal care. Additionally, the MLTC plans provide medically necessary services that include dental care as well as medical equipment.

Medicaid Advantage Plus Plans:

Medicaid Advantage Plus Plans are available to Medicaid and Medicare eligible consumers who are eligible to enroll in the same health plan for most of their Medicare and Medicaid benefits. Dual eligible consumers enroll in the same plan's Medicare Advantage and Medicaid Advantage Plus Plan products. The benefit of this program is the coordination of services under one service provider. Medicaid Advantage Plus Plans cover both acute and long-term care. To be eligible for the Medicaid Advantage Plus Plan, the consumer must be eligible for nursing home level of care.
