## LIST OF ACRONYMS

Acronym	Definition
AOC	Area of Concern
CAMP	Community Air Monitoring Plan
ELAP	Environmental Laboratory Accreditation Program
ELM	Environmental Liability Management, LLC
GQS	Groundwater Quality Standard
mcg/m <sup>3</sup>	Micrograms per cubic meter
mg/kg	Milligrams per kilogram
NYC DEP	New York City Department of Environmental Protection
NYC DOB	New York City Department of Building
NYC OER	New York City Office of Environmental Remediation
NYC VCP	New York City Voluntary Cleanup Program
NYSDEC	New York State Department of Environmental Reservation
PAHs	Polycyclic aromatic hydrocarbons
PCBs	Polychlorinated biphenyls
PCE	Tetrachloroethene
PID	Photoionization Detector
ppm	Parts per million
QA/QC	Quality Assurance/Quality Control
QEP	Qualified Environmental Professional
RAR	Remedial Action Report
RAWP	Remedial Action Work Plan
RCRA	Resource Conservation and Recovery Act
RI	Remedial Investigation
RIR	Remedial Investigation Report
SCG	Standards, Criteria and Guidance
SCO	Soil Cleanup Objective
SI	Site Investigation
SMMP	Soil/Materials Management Plan
SVOCs	Semi-Volatile Organic Compounds

<b>Acronym</b>	<b>Definition</b>
TAL	Target Analyte List
TCE	Trichloroethene
TCL	Target Compound List
TCLP	Toxicity Characteristic Leaching Procedure
TOGS	Technical & Operational Guidance Series
UST	Underground Storage Tank
ug/m3	Micrograms per cubic meter
VOCs	Volatile Organic Compounds

# CERTIFICATION

I, Ira Pierce, am currently a registered professional engineer licensed by the State of New York. I had primary direct responsibility for implementation of the remedial program for the 400 Rider Avenue Site 12CVCP059X.

I, Doug Harm, am a qualified Environmental Professional. I had primary direct responsibility for implementation remedial program for the 400 Rider Avenue Site 12CVCP059X.

I certify that the OER-approved Remedial Action Work Plan, dated May 2012, was implemented and that all requirements in those documents have been substantively complied with. I certify that contaminated soil, fill, liquids or other material from the property were taken to facilities licensed to accept this material in full compliance with applicable laws and regulations.

# **EXECUTIVE SUMMARY**

## **Site Location and Prior Usage**

The Site is located at 247-267 East 142<sup>nd</sup> Street, 400 Rider Avenue, and 262 East 143<sup>rd</sup> Street, Bronx, New York, and identified as Block 2334, Lots 38, 39, 40, 41, 43, 45 and 59, on the New York City Tax Map. Refer to Figure 1 - Site Location Map and Figure 2 - Tax Map. The Site is approximately 45,728 square feet and is bounded by the Lincoln Hospital parking garage to the north, residential structures to the east, a baseball field to the south, and light industrial and commercial structures to the west. The site was utilized as a vehicle parking garage.

## **Summary of Redevelopment Plan**

The Applicant proposed to construct two (2) adjoining six (6)-story buildings with below grade parking, first floor residential and commercial space, and five (5) floors of residential units. The second floor will contain above grade exterior recreational areas in the center of the building.

## **Summary of Past Uses of Site and Environmental Findings**

Based on information contained in the Phase I Environmental Site Assessment by Brinkerhoff Environmental Services, Inc. (Brinkerhoff), subject lots 39, 40, and 41 were developed primarily with dwellings from at least 1891 to 2006. Lot 38 was developed with a filling station from the early 1940s until the mid-1970s, after which time it became vacant. Lots 43 and 45 were developed with structures labeled Columbia Metal Box Co. from the early 1930s until the mid-1970s and became structures labeled Auto Repair since at least 1996. Lot 59 was developed with commercial structures labeled Auto Service from at least 1935 to 2006.

The following environmental findings were identified for the subject property:

1. The general elevation of the subject property is approximately 19 feet above sea level.
2. Depth to groundwater is 10 to 14 feet at the Site.

3. Groundwater flow is generally toward the south to southeast beneath the Site, based on topography.
4. Soils at the site consist of medium to fine brown sand and little silt intermixed with little marble gravel, with some brick at 2.5 feet, some wood debris at 4.5-5.0 feet, and green silt and clay at 14.0-14.5 feet.
5. Soil samples collected by Environmental Liability Management, LLC (ELM) indicate no samples exceed Unrestricted Use or Residential Restricted Use Soil Cleanup Objective (SCO) for Volatile Organic Compounds (VOCs) and Polychlorinated Biphenyls (PCBs). Semi-Volatile Organic Compounds (SVOCs), especially Poly-Aromatic Hydrocarbons (PAHs), were detected at concentrations exceeding both the Unrestricted Use and Restricted-Residential Use SCO in two (2) soil samples. Pesticides, including 4,4'-DDD (maximum of 0.008 milligrams per kilogram [mg/kg]), 4,4'-DDE (maximum of 0.0041 mg/kg) and 4,4'-DDT (maximum of 0.0068 mg/kg), were detected at concentrations exceeding the Unrestricted Use SCO in soil samples from all the borings. Metals, including mercury (maximum of 1.2 mg/kg), lead (ranged from 72.3 mg/kg to 3930 mg/kg), and zinc (maximum of 1690 mg/kg) were detected at concentrations exceeding Unrestricted Use or Residential Restricted Use SCO in 13 samples.

Soil samples collected by Brinkerhoff indicated that no sample exceeds Unrestricted Use SCO or Restricted-Residential Use SCO for SVOCs and PCBs. Methylene Chloride was identified at a concentration of 0.075 mg/kg, exceeding the Unrestricted Use SCO, in one (1) sample from the soil boring. Methylene Chloride is a common laboratory contaminant and, thus, is likely the result of the laboratory and not site conditions. The Pesticides 4,4'-DDE and 4,4'-DDT were detected exceeding Unrestricted Use SCO in one (1) sample from the test pit. Copper (63.8 mg/kg), Zinc (152 mg/kg), Lead (289 mg/kg to 565 mg/kg), and Mercury (0.264 mg/kg to 1.57 mg/kg) were detected exceeding Unrestricted Use SCO or Restricted-Residential Use SCO in two (2) soil samples.

6. Groundwater samples collected by ELM identified three (3) VOCs (Chloroform, Trichloroethene [TCE], and Tetrachloroethene [PCE]) exceeding New York State

Department of Environmental Conservation (NYSDEC) Technical and Operational Guidance Series (TOGS) 1.1.1 Groundwater Quality Standards (GQS). In addition, five (5) metals (Iron, Magnesium, Manganese, Lead and Sodium) were detected above GQS in groundwater samples.

Groundwater samples collected by Brinkerhoff showed no VOCs, SVOCs, Pesticides, or PCBs at concentrations exceeding GQS. Five (5) metals (Iron, Magnesium, Manganese, Selenium and Sodium) were detected in groundwater samples at concentrations exceeding their respective GQS. Dissolved metals (including Iron, Magnesium, Manganese and Sodium) exceeded GQS.

Soil vapor sampling results by ELM reported elevated levels of both TCE and PCE Brinkerhoff collected additional soil vapor samples. Soil vapor samples were designated SV-1, SV-2, SV-3, SV-4 and SV-5. Fifteen (15) VOCs were detected at less than 10 micrograms per cubic meter (ug/m<sup>3</sup>) in soil vapor, including Tert-butyl alcohol (0.67 ug/m<sup>3</sup> to 0.94 ug/m<sup>3</sup>), PCE (1.7 ug/m<sup>3</sup>) and TCE (0.27 ug/m<sup>3</sup> to 1.7 ug/m<sup>3</sup>). Benzene (5.0 ug/m<sup>3</sup> to 16.0 ug/m<sup>3</sup>) and Ethylbenzene (12 ug/m<sup>3</sup> to 17 ug/m<sup>3</sup>) were detected at low concentrations as well. Toluene and Total Xylenes were detected in soil vapor samples at higher concentrations, ranging from 52 ug/m<sup>3</sup> to 104 ug/m<sup>3</sup>.

### **Summary of the Remedial Action**

A Pre-Application Meeting was held in April 2012. A Remedial Investigation (RI) was performed in November 2008 and from February to March 2012, and a RI Report, dated May 2012, was prepared to evaluate data and information necessary to develop a Remedial Action Work Plan (RAWP). A Site Contact List was established and a RAWP, dated May 2012, was prepared and released with a Fact Sheet on May 9, 2012, for a 30-day public comment period. The RAWP and Stipulation List, dated May 2012, were approved by the New York City Office of Environmental Remediation (OER) on June 8, 2012. A Pre-Construction Meeting was held in June 2012. A Fact Sheet providing notice of the start of the remedial action was issued in May 2012, and the remedial action was begun in September 2012 and completed in March 2013.

1. Prepared a Community Protection Statement and implemented a Citizen Participation Plan.
2. Established Track 4 SCOs.
3. Mobilized for remedial action involving site security, equipment mobilization, utility mark outs, and marking and staking excavation areas.
4. Soil/fill was excavated to a depth of 13 feet from grade beneath the area of the new building. A total of 23,037 tons of soil/fill were excavated and removed from the property. Soil/fill was disposed at Malanka Landfill Facility.
5. Collected and analyzed end-point samples. Achieved Track 1 SCO for Site.
6. Performed a Community Air Monitoring Program (CAMP) for particulates and volatile organic carbon compounds.
7. All excavated soil/fill material was screened during intrusive work for indications of contamination by visual means, odor, and monitoring with a photoionization detector (PID).
8. Sampled and analyzed excavated media as required by disposal facilities. Appropriately segregated excavated media on site prior to disposal.
9. Transported and disposed all soil/fill material at permitted facilities in accordance with applicable laws and regulations for handling, transport, and disposal, and the Remedial Action Work Plan (RAWP).
10. As part of development, constructed an engineered Composite Cover System consisting of four (4) inches of concrete slab underlain by four (4) inches of compacted gravel and a vapor barrier underneath the building and outside the foundation walls to prevent human exposure to residual soil/fill remaining under the Site.
11. As part of development, installed a Vapor Barrier System that consisted of VaporBlock Plus VBP 20-mil vapor barrier manufactured by Raven Industries beneath the footprint of the building and the SonoShield® HLM 5000® waterproofing manufactured by BASF and the CCW MiraDRAIN 6200 manufactured by Carlisle Coatings & Waterproofing outside the foundation sidewalls. The contractor for construction of the Vapor Barrier System was Joy Construction Co.

12. Implemented storm-water pollution prevention measures in compliance with applicable laws and regulations.
13. Performed all activities required for the Remedial Action, including permitting requirements and pretreatment requirements, in compliance with applicable laws and regulations.
14. Submitted a Remedial Action Report (RAR) that describes the Remedial Action, certifies that the remedial requirements defined in the RAWP have been achieved, defines the Site boundaries, and lists any changes from this RAWP.

# **REMEDIAL ACTION REPORT**

## **1.0 SITE BACKGROUND**

Azimuth Development Group, LLC has enrolled in the New York City Voluntary Cleanup Program (NYC VCP) to investigate and remediate a property located at 400 Rider Avenue in the Mott Haven section of Bronx, New York. The boundaries of the property subject to this Remedial Action are shown in Figure 1 and include, in their entirety, Bronx Block 2334, Lots 38, 39, 40, 41, 43, 45 and 59.

The Remedial Action was performed pursuant to the OER-approved RAWP in a manner that has rendered the property protective of public health and the environment consistent with its intended use. This Remedial Action Report (RAR) describes the remedial action performed under the RAWP. The remedial action described in this document provides for the protection of public health and the environment and complies with applicable environmental standards, criteria, and guidance and applicable laws and regulations.

### **1.1 SITE LOCATION AND PRIOR USAGE**

The Site is located at 247-267 East 142<sup>nd</sup> Street, 400 Rider Avenue, and 262 East 143<sup>rd</sup> Street, Bronx, New York, and is identified as Block 2334, Lots 38, 39, 40, 41, 43, 45 and 59, on the New York City Tax Map. Refer to Figure 1 - Site Location Map and Figure 2 - Tax Map. The Site is approximately 45,728 square feet and is bounded by the Lincoln Hospital parking garage to the north, residential structures to the east, a baseball field to the south, and light industrial and commercial structures to the west. The Site was utilized as a vehicle parking garage.

### **1.2 REDEVELOPMENT PLAN**

The Applicant constructed two (2) adjoining six (6)-story buildings with below grade parking, first floor residential and commercial space, and five (5) floors of residential units. The second floor will contain above grade exterior recreational areas in the center

of the building. The development, called Morris Court Apartments is known as Building “A” with an address of 250 E. 144<sup>th</sup> Street and Building “B” with an address of East 142<sup>nd</sup> Street.

Building A contains below grade parking for up to 46 automobiles. There are also mechanical rooms and a small storage area for bicycles along the western side of the cellar. On the first floor, Building “A” has retail space along East 144<sup>th</sup> Street and residential units along Rider Avenue.

Building “B”, which joins Building “A” to the north, also contains below grade parking for up to 67 automobiles. Mechanical rooms and a bicycle storage area are present in Building “B”, located northwestern side of the cellar. Architectural drawings showing a site plan, cellar and first floor designs for each building are provided in Appendix I.

### **1.3 DESCRIPTION OF SURROUNDING PROPERTY**

The subject site is adjoined to the north (across East 144<sup>th</sup> Street) by the Lincoln Hospital and the Lincoln Hospital parking garage. To the south of the site is a baseball field. Adjacent and to the east of the site are some residential dwellings. Adjacent to the west of the site are light industrial and commercial structures.

### **1.4 REMEDIAL INVESTIGATION**

An RI was performed and the results are documented in a report entitled “Remedial Investigation Report, 400 Rider Avenue” dated May 2012 (RIR).

#### **Summary of Past Uses of Site and Areas of Concern (AOCs)**

Based on information contained in the Phase I Environmental Site Assessment by Brinkerhoff, subject lots 39, 40, and 41 were developed primarily with dwellings from at least 1891 to 2006. Lot 38 was developed with a filling station from the early 1940s until the mid-1970s, after which time it became vacant. Lots 43 and 45 were developed with structures labeled COLUMBIA METAL BOX CO. from the early 1930s until the mid-1970s and became structures labeled AUTO REPAIR since at least 1996. Lot 59 was

developed with commercial structures labeled AUTO SERVICE from at least 1935 to 2006.

The following AOCs were identified during completion of the Phase I Environmental Site Assessment.

1. A review of various databases identified that Lots 38, 39, 40, 41, 43, 45 and 59 of Block 2334 contained an “E” Designation for Hazardous Materials Testing. This requires completion of a Phase II Site Investigation (SI) and preparation of a RAWP for submittal to the NYC OER prior to issuance of building permits.
2. Brinkerhoff observed floor drains connected to a possible oil/water separator. This unit may be the source of the Tetrachloroethene (PCE) and Trichloroethene (TCE) detected in the groundwater and soil vapor samples.
3. Lot 38 was a former gasoline service station which once contained three (3) gasoline underground storage tanks (USTs). It could not be confirmed that the USTs had been removed or if any discharge had occurred.
4. A Phase II SI conducted by Environmental Liability Management, LLC (ELM) in 2008 identified TCE and PCE in the groundwater and soil vapor. Further investigation was needed to confirm the results obtained by ELM.

### **Summary of the Work Performed under the Remedial Investigation**

The following work has been performed at the site:

1. Conducted a Site inspection to identify AOCs and physical obstructions (i.e., structures, buildings, etc.);
2. Installed one (1) soil boring and one (1) test pit at the Site and collected four (4) soil samples from the soil borings for chemical analyses to evaluate soil quality;
3. Installed one (1) temporary well point and collected one (1) groundwater sample to investigate the subsurface groundwater quality at the property;
4. Installed five (5) soil vapor/sub-slab sample probes and collected five (5) soil vapor samples for laboratory analysis; and,

5. As part of ELM's previous investigation, four (4) groundwater samples, 47 soil samples, and 15 soil vapor samples were collected for laboratory analysis.

### **Summary of Environmental Findings**

1. The general elevation of the subject property is approximately 19 feet above sea level.
2. Depth to groundwater is 10 to 14 feet at the Site.
3. Groundwater flow is generally toward the south to southeast beneath the Site, based on topography.
4. Soils at the Site consist of medium to fine brown sand and little silt intermixed with little marble gravel, with some brick at 2.5 feet, some wood debris at 4.5-5.0 feet, and green silt and clay at 14.0-14.5 feet.
5. Soil samples collected by ELM indicate that no samples exceed Unrestricted Use or Residential Restricted Use SCO for Volatile Organic Compounds (VOCs) and Polychlorinated Biphenyls (PCBs). Semi-Volatile Organic Compounds (SVOCs), especially Poly-Aromatic Hydrocarbons (PAHs), were detected at concentrations exceeding both the Unrestricted Use and Restricted-Residential Use SCO in two (2) soil samples. Pesticides, including 4,4'-DDD (maximum of 0.008 mg/kg), 4,4'-DDE (maximum of 0.0041 mg/kg) and 4,4'-DDT (maximum of 0.0068 mg/kg), were detected at concentrations exceeding the Unrestricted Use SCO in soil samples from all the borings. Metals, including mercury (maximum of 1.2 mg/kg), lead (ranged from 72.3 mg/kg to 3930 mg/kg), zinc (maximum of 1690 mg/kg) were detected at concentrations exceeding Unrestricted Use or Residential Restricted Use SCO in 13 samples.

Soil samples collected by Brinkerhoff indicated that no sample exceeds Unrestricted Use SCO or Restricted-Residential Use SCO for SVOCs and PCBs. Methylene Chloride was identified at a concentration of 0.075 mg/kg, exceeding the Unrestricted Use SCO, in one (1) sample from the soil boring. Methylene Chloride is a common laboratory contaminant and, thus, is likely the result of the

laboratory and not site conditions. The Pesticides 4,4-DDE and 4,4-DDT were detected exceeding Unrestricted Use SCO in one (1) sample from the test pit. Copper (63.8 mg/kg), Zinc (152 mg/kg), Lead (289 mg/kg to 565 mg/kg), and Mercury (0.264 mg/kg to 1.57 mg/kg) were detected exceeding Unrestricted Use SCO or Restricted-Residential Use SCO in two (2) soil samples.

6. Groundwater samples collected by ELM identified three (3) VOCs (Chloroform, TCE, and PCE) exceeding New York State Department of Environmental Conservation (NYSDEC) Technical and Operational Guidance Series (TOGS) 1.1.1 Groundwater Quality Standards (GQS). In addition, five (5) metals (Iron, Magnesium, Manganese, Lead, and Sodium) were detected above GQS in groundwater samples.

Groundwater samples collected by Brinkerhoff showed no VOCs, SVOCs, Pesticides, or PCBs at concentration exceeding GQS. Five (5) metals (Iron, Magnesium, Manganese, Selenium and Sodium) were detected in groundwater samples at concentrations exceeding their respective GQS. Dissolved metals, including Iron, Magnesium, Manganese and Sodium, exceeded GQS.

7. Soil vapor sampling results by ELM reported elevated levels of both TCE and PCE. Brinkerhoff collected additional soil vapor samples. Soil vapor samples were designated SV-1, SV-2, SV-3, SV-4 and SV-5. Fifteen (15) VOCs were detected at less than 10 micrograms per cubic meter (ug/m<sup>3</sup>) in soil vapor, including Tert-butyl alcohol (0.67 ug/m<sup>3</sup> to 0.94 ug/m<sup>3</sup>), PCE (1.7 ug/m<sup>3</sup>), and TCE (0.27 ug/m<sup>3</sup> to 1.7 ug/m<sup>3</sup>). Benzene (5.0 ug/m<sup>3</sup> to 16.0 ug/m<sup>3</sup>) and Ethylbenzene (12 ug/m<sup>3</sup> to 17 ug/m<sup>3</sup>) were detected at low concentrations as well. Toluene and Total Xylenes were detected in soil vapor samples at higher concentrations, ranging from 52 ug/m<sup>3</sup> to 104 ug/m<sup>3</sup>.

Based on an evaluation of the data and information from the RIR and the RAWP, disposal of significant amounts of hazardous waste is not identified at this site.

## **2.0 DESCRIPTION OF REMEDIAL ACTIONS**

The Remedial Action was performed pursuant to the OER-approved RAWP in a manner that has rendered the property protective of public health and the environment consistent with its intended use. This RAR describes the remedial action performed under the RAWP. The remedial action described in this document provides for the protection of public health and the environment and complies with applicable environmental standards, criteria, and guidance and applicable laws and regulations.

The Remedial Action was evaluated in an alternatives analysis and was determined to be protective of human health and the environment, compliant with standards, criteria, and guidelines (SCGs), effective in the short-term, effective in the long-term, capable of attaining appropriate levels of reduction of toxicity, mobility, or volume of contaminated material, implementable, cost effective, acceptable to the community, consistent with land uses, and sustainable.

A general summary of the Remedial Action is as follows:

- A Pre-Application Meeting was held (April 2012).
- An RI was performed and a RIR was prepared (May 2012).
- A RAWP was prepared (May 2012).
- An Application Fact Sheet was released announcing a 30-day public comment period on the RAWP (May 9, 2012).
- The RAWP and Stipulation List (May 2012) was approved by the New York City Office of Environmental Remediation (June 8, 2012).
- A Pre-Construction Meeting was held (June 2012).
- A Fact Sheet providing notice of the start of the Remedial Action was issued May 2012.
- Remedial Action was begun in September 2012 and completed in March 2013.

The following Remedial Actions were completed in this program:

1. Prepared a Community Protection Statement and implemented a Citizen Participation Plan.
2. Established Track 4 SCOs.
3. Mobilized for remedial action involving site security, equipment mobilization, utility mark outs, and marking and staking excavation areas.
4. Soil/fill was excavated to a depth of between 9 feet on the western and southern portions of the site and 13 feet on the western and northern portions of the site. This was due to a change in topography across the site. This was to allow below grade parking. A total of 23,037 tons of soil/fill were excavated and removed from the property. Soil/fill was disposed at Malanka Landfill Facility.
5. Collected and analyzed end-point samples. Achieved Track 1 SCO for Site.
6. Performed a Community Air Monitoring Program (CAMP) for particulates and volatile organic carbon compounds.
7. All excavated soil/fill material was screened during intrusive work for indications of contamination by visual means, odor, and monitoring with a photoionization detector (PID).
8. Sampled and analyzed excavated media as required by disposal facilities. Appropriately segregated excavated media on site prior to disposal.
9. Transported and disposed all soil/fill material at permitted facilities in accordance with applicable laws and regulations for handling, transport, and disposal, and the RAWP.
10. As part of development, constructed an engineered Composite Cover System consisting of four (4) inches of concrete slab underlain by four (4) inches of compacted gravel and a vapor barrier underneath the building and outside the foundation walls to prevent human exposure to residual soil/fill remaining under the Site.
11. As part of development, installed a Vapor Barrier System that consisted of VaporBlock Plus VBP 20-mil vapor barrier manufactured by Raven Industries beneath the footprint of the building and the SonoShield<sup>®</sup> HLM 5000<sup>®</sup> waterproofing manufactured by BASF and the CCW MiraDRAIN 6200 manufactured by Carlisle Coatings & Waterproofing outside the foundation

sidewalls. The contractor for construction of the Vapor Barrier System was Joy Construction Co.

12. Implemented storm-water pollution prevention measures in compliance with applicable laws and regulations.
13. Performed all activities required for the Remedial Action, including permitting requirements and pretreatment requirements, in compliance with applicable laws and regulations.
14. Submitted an RAR that describes the Remedial Action; certifies that the remedial requirements defined in the RAWP have been achieved; defines the Site boundaries; and lists any changes from this RAWP.

## **3.0 COMPLIANCE WITH REMEDIAL ACTION WORK PLAN**

### **3.1 HEALTH & SAFETY PLAN**

The remedial construction activities performed under this program were in compliance with the Health and Safety Plan and applicable laws and regulations. The Site Safety Coordinator was Isabel Su.

### **3.2 COMMUNITY AIR MONITORING PLAN**

The Community Air Monitoring Plan (CAMP) provided for the collection and analysis of air samples during remedial construction activities to ensure proper protections were employed to protect workers and the neighboring community. Monitoring was performed in compliance with the CAMP in the approved RAWP. The Community Air monitoring is shown in Appendix II.

### **3.3 SOIL/MATERIALS MANAGEMENT PLAN**

The Soil/Materials Management Plan (SMMP) provided detailed plans for managing all soil/materials that were disturbed at the Site, including excavation, handling, storage, transport, and disposal. It also included a series of controls to assure effective, nuisance free remedial activity in compliance with applicable laws and regulations. Remedial construction activities performed under this program were in compliance with the SMMP in the approved RAWP. The SMMP is provided in Appendix III.

### **3.4 STORM WATER POLLUTION PREVENTION**

Storm water pollution prevention included physical methods and processes to control and/or divert surface water flows and to limit the potential for erosion and migration of Site soils via wind or water. Remedial construction activities performed under this program were in full compliance with methods and processes defined in the RAWP for storm water prevention and applicable laws and regulations.

### **3.5 DEVIATIONS FROM THE REMEDIAL ACTION WORK PLAN**

All work performed was in accordance with the OER approved RAWP at this Site.

## **4.0 REMEDIAL PROGRAM**

### **4.1 PROJECT ORGANIZATION**

Principal personnel who will participate in the remedial action include Professional Engineer Ira N. Pierce, PE, and Qualified Environmental Professional (QEP) Doug Harm, Registered Professional Geologist.

### **4.2 SITE CONTROLS**

#### **Site Preparation**

Prior to the initiation of the remedial activities, the Site was secured with fencing around the perimeter of the Site. Excavation activities at the Site began in August 2012. Joy Construction Co. was contracted to perform the site excavation activities.

According to the RAWP, real-time air monitoring for VOCs and particulate levels at the perimeter of the exclusion zone or work area was warranted during all intrusive soil excavation work. As part of the CAMP highlighted in the RAWP, Brinkerhoff utilized a TSI DustTrak II Aerosol Monitor 8530, a portable real-time dust particulate meter monitor with data-logging capabilities to monitor the particulate concentration during the soil excavation at the subject site. Additionally, Brinkerhoff utilized a photoionization detector (PID) to monitor VOC concentration.

NYC OER fact sheets and an OER Project Notice were posted at the project entrance and were in place during all phases of the Remedial Action.

#### **Soil Screening**

Soil excavation at the Site began in August 2012. During excavation activities, Brinkerhoff conducted visual/olfactory inspections of the soil being removed from the Site. No issues of visual/olfactory contamination were encountered. Additionally, a portable PID was utilized to screen for the presence of volatile organic vapors within the work zone. Each day, prior to initiating the excavation activities, calibration of the PID was performed and the background VOC concentration of the work zone was established. No exceedances in VOC concentrations were detected during excavation activities at the Site.

## **Stockpile Management**

Approximately 23,037 tons of soils were excavated from the Site. The soils were either directly loaded onto the trucks or temporarily stockpiled on Site for off-site disposal. All stockpiles were covered with weatherproof tarps upon completion of daily excavation activities. Soil stockpiles were appropriately graded to control any potential run-off.

## **Site Security**

The excavation site was secured with fencing along the perimeter of the Site.

## **Nuisance Controls**

No issues of odors, dust circulation, or neighborhood complaints were encountered throughout the duration of excavation activities at the Site.

## **Reporting**

As requested by the OER, daily field reports were provided to the OER project manager as appropriate. The reports included a summary of daily field activities, locations of work zones, quantities of soils excavated, status of on-site stockpiles, description of CAMP equipment location, photographs of notable site conditions and activities, and all relevant OER identification numbers specific to the site. All daily and monthly reports and digital photographs of the Remedial Action are included in Appendix IV.

## **4.3 MATERIALS EXCAVATION AND REMOVAL**

Track 4 soil cleanup standards were proposed for the excavation at the Site. The entire site was excavated, and approximately 23,037 tons of soil were excavated from the site. The excavated soils were disposed of at the Malanka Landfill Facility located in Secaucus, New Jersey. Copies of the soil disposal waste manifests are provided in Appendix V. Prior to the disposal, proper approvals were obtained from the facility accepting soils from the Site for disposal.

Excavation began in September 2012 with approximately five (5) feet of material removed from across most of the site. By October 15, 2012, soil had been excavated to the final construction depth of between nine (9) and 15 feet, depending on the location throughout the northern and western portions of the site. By December 13, 2012, the

entire site had been excavated to the required depth for site development. A map showing the excavation timeline is provided in Figure 3.

### **End Point Sample Results**

Following the completion of the site excavation to a required depth of between nine (9) and 13 feet below grade, Brinkerhoff collected post-excavation end point soil samples. Six (6) from six (6) locations in accordance with the OER-approved endpoint sampling plan. The endpoint samples SS-2, SS-4, SS-5 and SS-6 were collected on October 5, 2012; SS-1 and SS-3 were collected on November 28, 2012. The location of the samples is shown on Figure 3.

The samples were submitted to York Analytical Laboratories of Connecticut (an Environmental Laboratory Accreditation Program [ELAP]-certified laboratory) for analysis. The endpoint and Quality Assurance/Quality Control (QA/QC) samples were analyzed for Target Analyte List (TAL) metals, Target Compound List (TCL) volatiles and semi-volatiles, TCL pesticides, and PCBs in accordance with the approved RAWP. The laboratory analytical reports are provided in Appendix VI.

The laboratory analytical results were compared to the NYSDEC 6NYCRR Part 375 SCOs for Unrestricted Use. A map of end-point sample locations is shown on Figure 3. A tabulation of the laboratory analytical results and a comparison to the SCOs is provided in Table 1. The analytical results revealed that end point samples substantively achieved Track 1 Unrestricted SCOs for soil remaining on the property.

### **4.4 MATERIALS DISPOSAL**

On August 20, 2012, Brinkerhoff collected five (5) composite soil samples from five (5) test pits excavated at the Site. Once collected, the samples were submitted to a New York State Department of Health certified laboratory, and analyzed for Toxicity Characteristic Leaching Procedure (TCLP) metals, total RCRA metals, VOCs and SVOCs, Resource Conservation and Recovery Act (RCRA) characteristics, PCBs, and petroleum hydrocarbons via QAM Method. One (1) sample was also analyzed for full TCLP. The result showed no compound or analyte was detected above the level which would classify the material as a hazardous waste.

On August 24, 2012, Manlanka Landfill of Secaucus, New Jersey, approved the

application of a total of 25,000 cubic yards of construction fill to be disposed at the facility. The soil excavation and disposal was performed during September 2012 to March 2013.

The material type, quantity and disposal location of material removed and disposed off site is presented below:

<b>Disposal Location/Address</b>	<b>Type of Material</b>	<b>Quantity</b>
Malanka Landfill Facility, Secaucus, New Jersey	Construction Fill	23,000 tons

Letters from Joy Construction to the disposal facility providing materials type, source and data, and acceptance letters from disposal facility stating it is approved to accept above materials are attached in Appendix VII. Manifests are included in Appendix V. Characterization sample results are presented in Table 2. The laboratory analytical reports are provided in Appendix VIII.

## **5.0 ENGINEERING CONTROLS**

A Track 1 Remedial Action was achieved and Engineering Controls are not required. However, as part of construction, several protective systems were installed. These are:

- (1) a Composite Cover System consisting of asphalt covered roads, concrete covered sidewalks, and concrete building slabs;
- (2) Vapor Barrier System; and,
- (3) Sub-Grade Ventilated Parking.

### **Composite Cover System**

An engineered Composite Cover System has been built on the Site. This Composite Cover System is comprised of a 4-inch concrete building slab underlain by 4 inches of compacted gravel and a vapor barrier underneath. The contractor for construction of the Composite Cover System was Joy Construction Co.

Appendix IX shows the as-built design for each remedial cover type used on this Site. Photographs of construction and the Composite Cover System are included in Appendix X.

### **Vapor Barrier System**

Exposure to soil vapor is prevented by a Vapor Barrier System that has been built on the Site. This Vapor Barrier System consists of VaporBlock Plus VBP 20-mil vapor barrier manufactured by Raven Industries beneath the footprint of the building, and the SonoShield<sup>®</sup> HLM 5000<sup>®</sup> waterproofing manufactured by BASF and CCW MiraDRAIN 6200 manufactured by Carlisle Coatings & Waterproofing outside the foundation sidewalls. The contractor for construction of the Vapor Barrier System was Joy Construction Co.

Appendix XI shows the as-built design for the Vapor Barrier System used on this Site. Photographs of installation of the Vapor Barrier System are included in Appendix X. Product specification and an inspection letter certified by a professional engineer is included in Appendix XI.

### **Sub-Grade Ventilated Parking**

As part of the development plan for sub-grade parking, a sub-grade ventilation system in the parking cellar will be operated in accordance with the NYC Department of Buildings (DOB) requirements.

## **6.0 INSTITUTIONAL CONTROLS**

A Track 1 Remedial Action was achieved in the Remedial Action, and Institutional Controls are not required.

## **7.0 SITE MANAGEMENT PLAN**

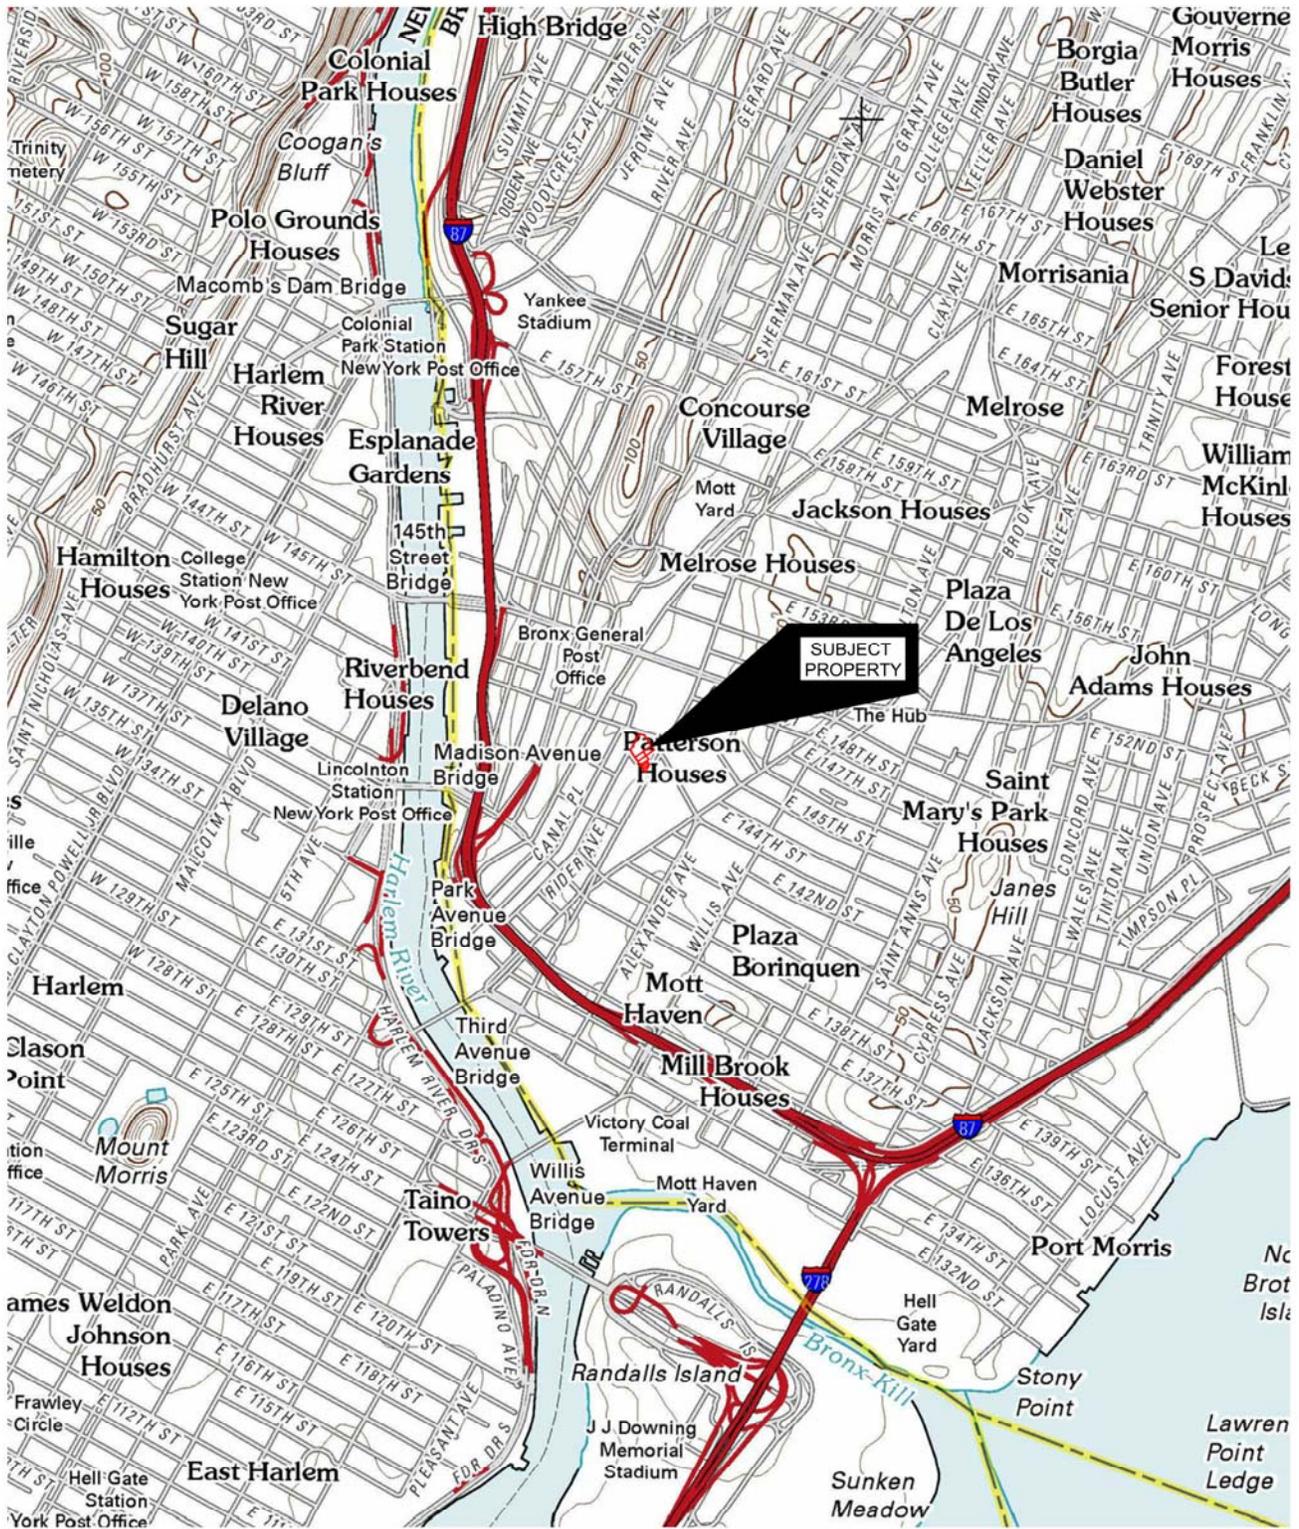

A Track 1 Remedial Action was achieved, and Site Management is not required.

## **8.0 SUSTAINABILITY REPORT**

Multiple sustainability efforts were incorporated into the remedial action completed at the site. The site utilizes natural gas for heating purposes, thus providing a smaller carbon footprint than fuel oil.

A total of 23,037 tons of historic fill contaminated soil were transported for beneficial reuse as landfill cover at the Malanka Landfill site in Secaucus, New Jersey.

The building constructed on the site covers the entire site, thus eliminating the potential for recontamination of this site and/or off-site migration of contamination. Trees will be planted along the sidewalk areas. The number and location of trees is being worked out with the NYC Parks Department. The developer entered into a Green Development Agreement with the NYC housing Preservation and Development to add various green designs to the site development. These green designs included categories such as Integrative Design, Location and Neighborhood Fabric, Site Improvements, Water Conservation, Energy Efficiency, Materials Beneficial to the Environmental and Healthy Living Environmental. The designs incorporated into each of the categories outlined above are presented in Appendix XII.

Q - Qualifiers

E - Concentration exceeds highest calibration standard

B - Indicates compound found in associated blank

D - Indicates result is based on a dilution

H - Alternate peak selection upon analytical review

J - Indicates estimated value for TICs and all results when detected below the RL

U - Indicates compound analyzed for but not detected

## APPENDIX II

# **COMMUNITY AIR MONITORING PLAN**

Real-time air monitoring for VOCs and particulate levels at the work area will be performed. Continuous monitoring will be performed for all ground intrusive activities and during the handling of contaminated or potentially contaminated media. Ground intrusive activities include, but are not limited to, soil/waste excavation and handling, test pit excavation or trenching, and the installation of soil borings or monitoring wells.

Periodic monitoring for VOCs will be performed during nonintrusive activities such as the collection of soil and sediment samples or the collection of groundwater samples from existing monitoring wells. Periodic monitoring during sample collection, for instance, will consist of taking a reading upon arrival at a sample location, monitoring while opening a well cap or overturning soil, monitoring during well baling/purging, and taking a reading prior to leaving a sample location. Depending upon the proximity of potentially exposed individuals, continuous monitoring may be performed during sampling activities. Examples of such situations include groundwater sampling at wells on the curb of a busy urban street in the midst of a public park or adjacent to a school or residence. Exceedances of action levels observed during performance of the CAMP will be reported to the OER Project Manager and included in the Daily Report.

## **VOC MONITORING, RESPONSE LEVELS, AND ACTIONS**

The monitoring work will be performed using equipment appropriate to measure the types of contaminants known or suspected to be present. The equipment will be calibrated at least daily.

- If the ambient air concentration of total organic vapors at the downwind perimeter of the work area exceeds five (5) parts per million (ppm) above background for the 15-minute average, work activities will be temporarily halted and monitoring continued. If the total organic vapor level readily decreases (per instantaneous readings) below five (5) ppm over background, work activities will resume with continued monitoring.

- If total organic vapor levels at the downwind perimeter of the work area or exclusion zone persist at levels in excess of five (5) ppm over background, but less than 25 ppm, work activities will be halted, the source of vapors identified, corrective actions taken to abate emissions, and monitoring continued. After these steps, work activities will resume provided that the total organic vapor level 200 feet downwind of the exclusion zone or half the distance to the nearest potential receptor or residential/commercial structure, whichever is less (but in no case less than 20 feet) is below five (5) ppm over background for the 15-minute average.
- If the organic vapor level is above 25 ppm at the perimeter of the work area, activities will be shut down.

All 15-minute readings must be recorded and be available for OER personnel to review. Instantaneous readings, if any, used for decision purposes will also be recorded.

## **PARTICULATE MONITORING, RESPONSE LEVELS, AND ACTIONS**

Particulate concentrations will be monitored continuously at the upwind and downwind perimeters of the exclusion zone at temporary particulate monitoring stations. The particulate monitoring will be performed using real-time monitoring equipment capable of measuring particulate matter less than 10 micrometers in size (PM-10) and capable of integrating over a period of 15 minutes (or less) for comparison to the airborne particulate action level. The equipment will be equipped with an audible alarm to indicate exceedance of the action level. In addition, fugitive dust migration should be visually assessed during all work activities.

- If the downwind PM-10 particulate level is 100 milligrams per cubic meter ( $\text{mcg}/\text{m}^3$ ) greater than background (upwind perimeter) for the 15-minute period or if airborne dust is observed leaving the work area, then dust suppression techniques will be employed. Work will continue with dust suppression techniques provided that downwind PM-10 particulate levels do not exceed 150  $\text{mcg}/\text{m}^3$  above the upwind level and provided that no visible dust is migrating from the work area.
- If, after implementation of dust suppression techniques, downwind PM-10

particulate levels are greater than  $150 \text{ mcg/m}^3$  above the upwind level, work will be stopped and a reevaluation of activities initiated. Work will resume provided that dust suppression measures and other controls are successful in reducing the downwind PM-10 particulate concentration to within  $150 \text{ mcg/m}^3$  of the upwind level and in preventing visible dust migration.

All readings will be recorded and be available for OER personnel to review.

## APPENDIX III

# **SOIL/MATERIALS MANAGEMENT PLAN**

## **1.1 SOIL SCREENING METHODS**

Visual, olfactory and PID soil screening and assessment will be performed under the supervision of a Qualified Environmental Professional and will be reported in the RCR. Soil screening will be performed during invasive work performed during the remedy and development phases prior to issuance of the Notice of Completion.

## **1.2 STOCKPILE METHODS**

Excavated soil from suspected areas of contamination (e.g., hot spots, USTs, drains, etc.) will be stockpiled separately and will be segregated from clean soil and construction materials. Stockpiles will be used only when necessary and will be removed as soon as practicable. While stockpiles are in place, they will be inspected daily, and before and after every storm event. Results of inspections will be recorded in a logbook and maintained at the Site and available for inspection by OER. Excavated soils will be stockpiled on, at minimum, double layers of 8-mil minimum sheeting, will be kept covered at all times with appropriately anchored plastic tarps, and will be routinely inspected. Broken or ripped tarps will be promptly replaced.

All stockpile activities will be compliant with applicable laws and regulations. Soil stockpile areas will be appropriately graded to control run-off in accordance with applicable laws and regulations. Stockpiles of excavated soils and other materials will be located at least 50 feet from the property boundaries, where possible. Hay bales or equivalent will surround soil stockpiles except for areas where access by equipment is required. Silt fencing and hay bales will be used as needed near catch basins, surface waters, and other discharge points.

### **1.3 CHARACTERIZATION OF EXCAVATED MATERIALS**

Soil/fill or other excavated media that is transported off-Site for disposal will be sampled in a manner required by the receiving facility and in compliance with applicable laws and regulations. Soils proposed for reuse on-Site will be managed as defined in this plan.

### **1.4 MATERIALS EXCAVATION, LOAD-OUT AND DEPARTURE**

The PE/QEP overseeing the remedial action will:

- Oversee remedial work and the excavation and load-out of excavated material;
- Ensure that there is a party responsible for the safe execution of invasive and other work performed under this work plan;
- Ensure that Site development activities and development-related grading cuts will not interfere with, or otherwise impair or compromise the remedial activities proposed in this RAWP;
- Ensure that the presence of utilities and easements on the Site has been investigated and that any identified risks from work proposed under this plan are properly addressed by appropriate parties;
- Ensure that all loaded outbound trucks are inspected and cleaned if necessary before leaving the Site;
- Ensure that all egress points for truck and equipment transport from the Site will be kept clean of Site-derived materials during Site remediation.

Locations where vehicles exit the Site shall be inspected daily for evidence of soil tracking off premises. Cleaning of the adjacent streets will be performed as needed to maintain a clean condition with respect to Site-derived materials.

Open and uncontrolled mechanical processing of historical fill and contaminated soil on-Site will not be performed without prior OER approval.

## **1.5 OFF-SITE MATERIALS TRANSPORT**

Loaded vehicles leaving the Site will comply with all applicable materials transportation requirements (including appropriate covering, manifests, and placards) in accordance with applicable laws and regulations, including use of licensed haulers in accordance with 6 NYCRR Part 364. If loads contain wet material capable of causing leakage from trucks, truck liners will be used. Queuing of trucks will be performed on-Site, when possible, in order to minimize off-Site disturbance. Off-Site queuing will be minimized.

Outbound truck transport routes are in the Section 5.8 of the RAWP. This routing takes into account the following factors: (a) limiting transport through residential areas and past sensitive sites; (b) use of mapped truck routes; (c) minimizing off-Site queuing of trucks entering the facility; (d) limiting total distance to major highways; (e) promoting safety in access to highways; and (f) overall safety in transport. To the extent possible, all trucks loaded with Site materials will travel from the Site using these truck routes. Trucks will not stop or idle in the neighborhood after leaving the project Site.

## **1.6 MATERIALS DISPOSAL OFF-SITE**

The following documentation will be established and reported by the PE/QEP for each disposal destination used in this project to document that the disposal of regulated material exported from the Site conforms with applicable laws and regulations: (1) a letter from the PE/QEP or Enrollee to each disposal facility describing the material to be disposed and requesting written acceptance of the material. This letter will state that material to be disposed is regulated material generated at an environmental remediation Site in New York under a governmental remediation program. The letter will provide the project identity and the name and phone number of the PE/QEP or Enrollee. The letter will include as an attachment a summary of all chemical data for the material being transported; and (2) a letter from each disposal facility stating it is in receipt of the correspondence (1, above) and is approved to accept the material. These documents will be included in the RCR.

The RCR will include an itemized account of the destination of all material removed from the Site during this remedial action. Documentation associated with disposal of all material will include records and approvals for receipt of the material. This information will be presented in the RCR.

All impacted soil/fill or other waste excavated and removed from the Site will be managed as regulated material and will be disposed in accordance with applicable laws and regulations. Historic fill and contaminated soils taken off-Site will be handled as solid waste and will not be disposed at a Part 360-16 Registration Facility (also known as a Soil Recycling Facility).

Waste characterization will be performed for off-Site disposal in a manner required by the receiving facility and in conformance with its applicable permits. Waste characterization sampling and analytical methods, sampling frequency, analytical results and QA/QC will be reported in the RCR. A manifest system for off-Site transportation of exported materials will be employed. Manifest information will be reported in the RCR. Hazardous wastes derived from on-Site will be stored, transported, and disposed of in compliance with applicable laws and regulations.

## **1.7 MATERIALS REUSE ON-SITE**

Soil and fill that is derived from the property that meets the soil cleanup objectives established in this plan may be reused on-Site. The soil cleanup objectives for on-Site reuse are listed in the RAWP. "Reuse on-Site" means material that is excavated during the remedy or development, does not leave the property, and is relocated within the same property and on comparable soil/fill material, and addressed pursuant to Engineering Controls. The PE/QEP will ensure that reused materials are segregated from other materials to be exported from the Site.

Organic matter (wood, roots, stumps, etc.) or other waste derived from clearing and grubbing of the Site will not be buried on-Site. Soil or fill excavated from the site for grading or other purposes will not be reused within a cover soil layer or within landscaping berms.

## **1.8 DEMARCATION**

After completion of hotspot removal and any other invasive remedial activities, and prior to backfilling, the top of the residual soil/fill will be defined by one of three methods: (1) placement of a demarcation layer. The demarcation layer will consist of geosynthetic fencing or equivalent material to be placed on the surface of residual soil/fill to provide an observable reference layer. A description or map of the approximate depth of the demarcation layer will be provided in the SMMP; or (2) a land survey of the top elevation of residual soil/fill before the placement of cover soils, pavement and associated sub-soils, or other materials or structures or, (3) all materials beneath the approved cover will be considered impacted and subject to site management after the remedy is complete. Demarcation may be established by one or any combination of these three methods. As appropriate, a map showing the method of demarcation for the Site and all associated documentation will be presented in the RCR.

This demarcation will constitute the top of the site management horizon. Materials within this horizon require adherence to special conditions during future invasive activities as defined in the Site Management Plan.

## **1.9 IMPORT OF BACKFILL SOIL FROM OFF-SITE SOURCES**

This Section presents the requirements for imported fill materials to be used below the cover layer and within the clean soil cover layer. All imported soils will meet OER-approved backfill and cover soil quality objectives for this Site.

A process will be established to evaluate sources of backfill and cover soil to be imported to the Site, and will include an examination of source location, current and historical use(s), and any applicable documentation. Material from industrial sites, spill sites, environmental remediation sites or other potentially contaminated sites will not be imported to the Site.

The following potential sources may be used pending attainment of backfill and cover soil quality objectives:

- Clean soil from construction projects at non-industrial sites in compliance with applicable laws and regulations;

- Clean soil from roadway or other transportation-related projects in compliance with applicable laws and regulations;
- Clean recycled concrete aggregate (RCA) from facilities permitted or registered by the regulations of NYSDEC.

All materials received for import to the Site will be approved by a PE/QEP and will be in compliance with provisions in this RAWP. The RCR will report the source of the fill, evidence that an inspection was performed on the source, chemical sampling results, frequency of testing, and a Site map indicating the locations where backfill or soil cover was placed.

### **1.10 SOURCE SCREENING AND TESTING**

Inspection of imported fill material will include visual, olfactory and PID screening for evidence of contamination. Materials imported to the Site will be subject to inspection, as follows:

- Trucks with imported fill material will be in compliance with applicable laws and regulations and will enter the Site at designated locations;
- The PE/QEP is responsible to ensure that every truck load of imported material is inspected for evidence of contamination; and
- Fill material will be free of solid waste including pavement materials, debris, stumps, roots, and other organic matter, as well as ashes, oil, perishables or foreign matter.

Composite samples of imported material will be taken at a minimum frequency of one sample for every 500 cubic yards of material. Once it is determined that the fill material meets imported backfill or cover soil chemical requirements, and is non-hazardous, and lacks petroleum contamination, the material will be loaded onto trucks for delivery to the Site.

Recycled concrete aggregate (RCA) will be imported from facilities permitted or registered by NYSDEC. Facilities will be identified in the RCR. A PE/QEP is

responsible to ensure that the facility is compliant with 6NYCRR Part 360 registration and permitting requirements for the period of acquisition of RCA. RCA imported from compliant facilities will not require additional testing, unless required by NYSDEC under its terms for operation of the facility. RCA imported to the Site must be derived from recognizable and uncontaminated concrete. RCA material is not acceptable for, and will not be used as, cover material.

### **1.11 FLUIDS MANAGEMENT**

All liquids to be removed from the Site, including dewatering fluids, will be handled, transported and disposed in accordance with applicable laws and regulations. Liquids discharged into the New York City sewer system will receive prior approval by New York City Department of Environmental Protection (NYC DEP). The NYC DEP regulates discharges to the New York City sewers under Title 15, Rules of the City of New York Chapter 19. Discharge to the New York City sewer system will require an authorization and sampling data demonstrating that the groundwater meets the City's discharge criteria. The dewatering fluid will be pretreated as necessary to meet the NYC DEP discharge criteria. If discharge to the City sewer system is not appropriate, the dewatering fluids will be managed by transportation and disposal at an off-Site treatment facility.

Discharge of water generated during remedial construction to surface waters (i.e., a stream or river) is prohibited without a SPDES permit issued by New York State Department of Environmental Conservation.

### **1.12 STORM-WATER POLLUTION PREVENTION**

Applicable laws and regulations pertaining to storm-water pollution prevention will be addressed during the remedial program. Erosion and sediment control measures identified in this RAWP (silt fences and barriers, and hay bale checks) will be installed around the entire perimeter of the remedial construction area and inspected once a week and after every storm event to ensure that they are operating appropriately. Discharge locations will be inspected to determine whether erosion control measures are effective in

preventing significant impacts to receptors. Results of inspections will be recorded in a logbook and maintained at the Site and available for inspection by OER. All necessary repairs shall be made immediately. Accumulated sediments will be removed as required to keep the barrier and hay bale check functional. Undercutting or erosion of the silt fence toe anchor will be repaired immediately with appropriate backfill materials. Manufacturer's recommendations will be followed for replacing silt fencing damaged due to weathering.

### **1.13 CONTINGENCY PLAN**

This contingency plan is developed for the remedial construction to address the discovery of unknown structures or contaminated media during excavation. Identification of unknown contamination source areas during invasive Site work will be promptly communicated to OER's Project Manager. Petroleum spills will be reported to the NYSDEC Spill Hotline. These findings will be included in the daily report. If previously unidentified contaminant sources are found during on-Site remedial excavation or development-related excavation, sampling will be performed on contaminated source material and surrounding soils and reported to OER. Chemical analytical testing will be performed for TAL metals, TCL volatiles and semi-volatiles, TCL pesticides and PCBs, as appropriate.

### **1.14 ODOR, DUST AND NUISANCE CONTROL**

#### **Odor Control**

All necessary means will be employed to prevent on- and off-Site odor nuisances. At a minimum, procedures will include: (a) limiting the area of open excavations; (b) shrouding open excavations with tarps and other covers; and (c) use of foams to cover exposed odorous soils. If odors develop and cannot otherwise be controlled, additional means to eliminate odor nuisances will include: (d) direct load-out of soils to trucks for off-Site disposal; and (e) use of chemical odorants in spray or misting systems.

This odor control plan is capable of controlling emissions of nuisance odors. If nuisance odors are identified, work will be halted and the source of odors will be

identified and corrected. Work will not resume until all nuisance odors have been abated. OER will be notified of all odor complaint events. Implementation of all odor controls, including halt of work, will be the responsibility of the PE/QEP's certifying the Remedial Closure Report.

### **Dust Control**

Dust management during invasive on-Site work will include, at a minimum:

- Use of a dedicated water spray methodology for roads, excavation areas and stockpiles.
- Use of properly anchored tarps to cover stockpiles.
- Exercise extra care during dry and high-wind periods.
- Use of gravel or recycled concrete aggregate on egress and other roadways to provide a clean and dust-free road surface.

This dust control plan is capable of controlling emissions of dust. If nuisance dust emissions are identified, work will be halted and the source of dusts will be identified and corrected. Work will not resume until all nuisance dust emissions have been abated. OER will be notified of all dust complaint events. Implementation of all dust controls, including halt of work, will be the responsibility of the PE/QEP responsible for certifying the Remedial Closure Report.

### **Other Nuisances**

Noise control will be exercised during the remedial program. All remedial work will conform, at a minimum, to NYC noise control standards.

Rodent control will be provided during Site clearing and grubbing and during the remedial program, as necessary, to prevent nuisances.

### **1.15 IMPORT OF CLEAN COVER**

No soil is anticipated to be imported to the Site for use as clean cover. In the event that the development plan changes and clean cover is necessary to cap any open space/residual fill, the following protocol will be used.

All imported soil will be uncontaminated, clean soil that meets the lesser of the appropriate NYSDEC 6 NYCRR Part 375-6.8 Restricted Use Class SCOs and the NYSDEC 6 NYCRR Part 375-6.8 groundwater protection SCO.

The imported uncontaminated, clean soil cover will be from an approved source/facility and will be evaluated by the PE/QEP to ensure:

- 1) That a segregated stockpile is properly maintained at the source and will not be comingled with any other material prior to importing and grading the clean soil material at the Site;
- 2) That the material does not include any solid waste, including construction and demolition material, as it's prohibited;
- 3) That screening for evidence of contamination by visual, olfactory and PID soil screening practices prior to testing at the source as well as upon importing to the Site for grading is completed; and
- 4) That a maximum five-part composite sample will be collected from the segregated stockpile at the source at a minimum frequency of one sample per 250 cubic yards and analyzed for the following Full List parameters:
  - VOCs by EPA Method 8260C (rev. 2006)
  - SVOCs by EPA Method 8270D (rev. 2007)
  - Pesticides by EPA Method 8081B (rev. 2000)
  - PCBs by EPA Method 8082A (rev. 2000)
  - TAL Metals by EPA Method 6010C (rev. 2007).

**Air Monitoring Log**  
Morris Avenue and Rider Avenue  
Bronx, New York

Date: 9/5/12-9/6/12

Weather Conditions: Cloudy warm humid, 75 °F

Wind Direction and Speed: West

<b>Monitoring Station</b>	<b>Sampled</b>	<b>PID Average</b> (in parts per million)	<b>Dust Average*</b> (in mg/m <sup>3</sup> )
AM-1	11:05-12:35	2.0	0.048
AM-2	12:42-14:22	3.5	0.106

\*Dust readings were collected using a Thermo MIE DR-4000.

Comments: About 50 loads of soil were excavated from 8/31/12 to 9/5/12. Water was sprayed during the truck loading process. Excavation is being performed on the upper 5 feet of the soil across the site. Dust Monitoring was conducted on 9/6/12, and the PID readings on each location were below 5.0 ppm, except that during 1:30-1:45pm, the PID readings on AM-2 were between 5.8-10.8 ppm. Since no odor was encountered, the excavation was not halted.

Description of Daily Site Activity:

Excavate was performed on the upper 5 feet of the soil across the site.

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

<p><b>Transporter's Certification</b></p> <p>The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.</p> <p>Drivers Name: <u>Cisco</u></p> <p>Driver's Signature: <u>[Signature]</u> Date: <u>09-18-12</u></p>	<p><b>Customer's Certification</b></p> <p>The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

**Transporter's Certification**

The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.

Drivers Name: MARK W. AQUINO

Driver's Signature: [Signature] Date: 08/16/12

**Customer's Certification**

The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.

Customer's Name: JOY LANT

Customer's Signature: [Signature] Date: 08-16-12

**Generator's Authorized Representative**

This is to certify that the above named materials are properly classified, and being shipped to the Malanka Landfill in accordance with the approval received from the Third Party Engineer and I am authorized to sign this Bill of Lading on behalf of Generator.

Name: [Signature]

Title: [Signature]

Signature: [Signature] Date: 08/16/12

**Facility Acceptance: Secaucus Brownfield Redevelopment, LLC**

Secaucus Brownfields Redevelopment, LLC agrees to accept the material manifested herein in accordance with the NJDEP approved Materials Acceptance Protocol, upon receipt of full payment for acceptance of material. If payment is not received, SBR does not accept the material and it shall be considered illegally dumped at the Malanka Landfill Facility by the Generator and Customer and said action shall be reported to the appropriate authorities.

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in it's sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.			
<p><b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b></p>			
<b>Transporter's Certification</b>  The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment. Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.				
<b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b>				
<b>Transporter's Certification</b>  The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment. <b>Grand Total</b>					
<p>Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in it's sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.</p>					
<p><b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b></p>

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in it's sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.			
<b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b>			
<b>Transporter's Certification</b>		<b>Customer's Certification</b>	
The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.		The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

**Transporter's Certification**

The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

**Transporter's Certification**

The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.

Drivers Name: \_\_\_\_\_  
 Driver's Signature: \_\_\_\_\_ Date: 09-18-12

**Customer's Certification**

The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.

Customer's Name: JOY COURT  
 Customer's Signature: \_\_\_\_\_ Date: 09-18-12

**Generator's Authorized Representative**

This is to certify that the above named materials are properly classified, and being shipped to the Malanka Landfill in accordance with the approval received from the Third Party Engineer and I am authorized to sign this Bill of Lading on behalf of Generator.

Name: \_\_\_\_\_

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

**Transporter's Certification**

The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.

Drivers Name: \_\_\_\_\_  
 Driver's Signature: [Signature] Date: 09/19/12

**Customer's Certification**

The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.

Customer's Name: [Signature]  
 Customer's Signature: [Signature] Date: 09/19/12

**Generator's Authorized Representative**

This is to certify that the above named materials are properly classified, and being shipped to the Malanka Landfill in accordance with the approval received from the Third Party Engineer and I am authorized to sign this Bill of Lading on behalf of Generator.

Name: [Signature]  
 Title: \_\_\_\_\_  
 Signature: [Signature] Date: 09/19/12

**Facility Acceptance: Secaucus Brownfield Redevelopment, LLC**

Secaucus Brownfields Redevelopment, LLC agrees to accept the material manifested herein in accordance with the NJDEP approved Materials Acceptance Protocol, upon receipt of full payment for acceptance of material. If payment is not received, SBR does not accept the material and it shall be considered illegally dumped at the Malanka Landfill Facility by the Generator and Customer and said action shall be reported to the appropriate authorities.

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

<b>Transporter's Certification</b>  The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.  Drivers Name: <u>William Kodrinsky</u> Driver's Signature: <u>[Signature]</u> Date: <u>09/14/12</u>	<b>Customer's Certification</b>  The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.  Customer's Name: <u>D.P. Ross</u> Customer's Signature: <u>[Signature]</u> Date: <u>09/14/12</u>

One Truck Load	16 cubic yards		Y	N	
<b>Grand Total</b>					
<p>Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.</p>					
<p><b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b></p>

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in it's sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

<p><b>Transporter's Certification</b></p> <p>The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.</p> <p>Drivers Name: <u>Kevin Watson</u></p> <p>Driver's Signature: <u>Kevin Watson</u> Date: <u>09/19/12</u></p>	<p><b>Customer's Certification</b></p> <p>The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.</p> <p>Customer's Name: <u>John Kost</u></p> <p>Customer's Signature: <u>John Kost</u> Date: <u>09/19/12</u></p>

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

<b>Transporter's Certification</b>	<b>Customer's Certification</b>

<p>Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.</p>					
<p><b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b></p>

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.					
<b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b>					
<b>Transporter's Certification</b>		<b>Customer's Certification</b>			
The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.		The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.					
<b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b>					
<b>Transporter's Certification</b>			<b>Customer's Certification</b>		
The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.			The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

<p>Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.</p>					
<p><b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b></p>					
<b>Transporter's Certification</b>			<b>Customer's Certification</b>		
<p>The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.</p>			<p>The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.</p>

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in it's sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.					
<b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b>					
<b>Transporter's Certification</b>			<b>Customer's Certification</b>		
The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.			The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

<p><b>Transporter's Certification</b></p> <p>The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.</p> <p>Drivers Name: <u>E. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.					
<p><b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b></p>					
<b>Transporter's Certification</b>			<b>Customer's Certification</b>		
The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.			The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.		
Drivers Name: <u>Frank McGinnis</u> Driver's Signature: _____ Date: <u>09-26-12</u>			Customer's Name: <u>JOY</u> Customer's Signature: _____ Date: <u>09-26-12</u>		
<b>Generator's Authorized Representative</b>			<b>Facility Acceptance: Secaucus Brownfield Redevelopment, LLC</b>		
This is to certify that the above named materials are properly classified, and being shipped to the Malanka Landfill in accordance with the approval received from the Third Party Engineer and I am authorized to sign this Bill of Lading on behalf of Generator.			Secaucus Brownfields Redevelopment, LLC agrees to accept the material manifested herein in accordance with the NJDEP approved Materials Acceptance Protocol, upon receipt of full payment for acceptance of material. If payment is not received, SBR does not accept the material and it shall be considered illegally dumped at the Malanka Landfill Facility by the Generator and Customer and said action shall be reported to the appropriate authorities.

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

<p><b>Transporter's Certification</b></p> <p>The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.</p> <p>Drivers Name: <u>Juan E. <p>Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.</p>			
<p><b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b></p>

<p>Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.</p>			
<p><b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b></p>

<p>Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.</p>					
<p><b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b></p>

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.				
<b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b>				
<b>Transporter's Certification</b>		<b>Customer's Certification</b>		
The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.		The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in it's sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.					
<b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b>					
<b>Transporter's Certification</b>  The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.  Drivers Name: <u>RAUL</u> Driver's Signature: <u>[Signature]</u> Date: <u>09/27/12</u>			<b>Customer's Certification</b>  The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified. <p>Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.</p>					
<p><b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b></p>

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.				
<b>Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.</b>				
<b>Transporter's Certification</b>		<b>Customer's Certification</b>

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

<p><b>Transporter's Certification</b></p> <p>The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.</p> <p>Drivers Name: <u>Stevan Pollich</u></p> <p>Driver's Signature: <u>[Signature]</u> Date: <u>10/22/12</u></p>	<p><b>Customer's Certification</b></p> <p>The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

Transporter's Certification	Customer's Certification
The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.	The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

Transporter's Certification	Customer's Certification
The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.  Drivers Name: <u>Ige Vendittel</u> Driver's Signature: <u>[Signature]</u> Date: <u>10/22/12</u>	The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.  Customer's Name: <u>Joy Court</u> Customer's Signature: <u>[Signature]</u> Date: <u>10/22/12</u>

Generator's Authorized Representative	Facility Acceptance: Secaucus Brownfield Redevelopment, LLC
This is to certify that the above named materials are properly classified, and being shipped to the Malanka Landfill in accordance with the approval received from the Third Party Engineer and I am authorized to sign this Bill of Lading on behalf of Generator.  Name: <u>[Signature]</u> Title: <u>Former</u> Signature: <u>[Signature]</u> Date: <u>10/22/12</u>	Secaucus Brownfields Redevelopment, LLC agrees to accept the material manifested herein in accordance with the NJDEP approved Materials Acceptance Protocol, upon receipt of full payment for acceptance of material. If payment is not received, SBR does not accept the material and it shall be considered illegally dumped at the Malanka Landfill Facility by the Generator and Customer and said action shall be reported to the appropriate authorities. Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

<b>Transporter's Certification</b> The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment. Drivers Name: <u>Uisey Jr</u> Driver's Signature: <u>[Signature]</u> Date: <u>10/22/12</u>	<b>Customer's Certification</b> The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified. Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

<p><b>Transporter's Certification</b></p> <p>The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.</p> <p>Drivers Name: <u>Paul Oneill</u></p> <p>Driver's Signature: <u>Paul Oneill</u> Date: <u>10/22/12</u></p>	<p><b>Customer's Certification</b></p> <p>The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

<p><b>Transporter's Certification</b></p> <p>The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.</p> <p>Drivers Name: <u>J. Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

Transporter's Certification	Customer's Certification

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in it's sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

<p><b>Transporter's Certification</b></p> <p>The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.</p> <p>Drivers Name: <u>FRANK PISCIONE</u></p> <p>Driver's Signature: <u>[Signature]</u> Date: <u>10/22/12</u></p>	<p><b>Customer's Certification</b></p> <p>The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.</p> <p>Customer's Name: <u>Joy Construction</u></p> <p>Customer's Signature: <u>[Signature]</u> Date: <u>10/22/12</u></p>

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in it's sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

<p><b>Transporter's Certification</b></p> <p>The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.</p> <p>Drivers Name: <u>M. Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

<p><b>Transporter's Certification</b></p> <p>The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.</p> <p>Drivers Name: <u>Carlo</u></p> <p>Driver's Signature: <u>[Signature]</u> Date: <u>11/14/12</u></p>	<p><b>Customer's Certification</b></p> <p>The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

<b>Transporter's Certification</b>  The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.  Drivers Name: <u>Victor Vasquez</u> Driver's Signature: <u>[Signature]</u> Date: <u>11/14/12</u>	<b>Customer's Certification</b>  The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.  Customer's Name: <u>Joy Court</u> Customer's Signature: <u>[Signature]</u> Date: <u>11/14/12</u>
---	--

<b>Generator's Authorized Representative</b>  This is to certify that the above named materials are properly classified, and being shipped to the Malanka Landfill in accordance with the approval received from the Third Party Engineer and I am authorized to sign this Bill of Lading on behalf of Generator.  Name: <u>Victor Vasquez</u> Title: <u>Foreman</u> Signature: <u>[Signature]</u> Date: <u>11/14/12</u>	<b>Facility Acceptance: Secaucus Brownfield Redevelopment, LLC</b>  Secaucus Brownfields Redevelopment, LLC agrees to accept the material manifested herein in accordance with the NJDEP approved Materials Acceptance Protocol, upon receipt of full payment for acceptance of material. If payment is not received, SBR does not accept the material and it shall be considered illegally dumped at the Malanka Landfill Facility by the Generator and Customer and said action shall be reported to the appropriate authorities.  Name: <u>Charles Lutke</u> Signature: <u>[Signature]</u> Date: <u>11-14-12</u>

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

Secaucus Brownfields Redevelopment, LLC (SBR) reserves the right to reject any material delivered to the Malanka Facility, in its sole and absolute discretion. If any material is rejected after it has been removed from the delivery truck, it shall be removed from the site within (48) hours at the sole cost and expense of the Customer. By signing this Bill of Lading, Customer and Generator confirm that the material being delivered has been approved by the Third Party Engineer and agrees to remove any fill material delivered that is rejected by SBR, at Customer's sole and exclusive cost and expense. If material is being delivered to the Malanka Facility based on volume, then the volume of each truck shall be agreed to by the Customer, Generator, and SBR. If Material is being delivered to the Malanka Facility on a weight basis, then each load shall be accompanied with a scaled weight ticket, inclusive of a tare weight for the vehicle delivering the material. No material can be delivered to Malanka unless accompanied by a Bill of Lading. Furthermore, no material may be off loaded at Malanka unless an authorized representative of SBR signs this Bill of Lading as noted below.

**Note: Only fill material that has been reviewed and approved by the designated Third Party Engineer will be accepted at the Malanka Landfill Facility. The material must be sampled in accordance with the NJDEP approved Materials Acceptance Protocol for Malanka Landfill.**

<p><b>Transporter's Certification</b></p> <p>The Transporter named herein hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been picked up from the Generator's site as listed on this Bill of Lading and that no additional material was added to this shipment.</p> <p>Driver's Name: <u>Jose Quintana</u></p> <p>Driver's Signature: <u>Jose Quintana</u> Date: <u>11/15/12</u></p>	<p><b>Customer's Certification</b></p> <p>The Customer hereby certifies that the material being delivered as represented on this Bill of Lading is the material that has been approved by the Third Party Engineer in accordance with the Materials Acceptance Protocol and Customer agrees to pay Secaucus Brownfields Redevelopment, LLC (SBR) for the acceptance of this material in accordance with the terms and conditions of the Agreement between the parties. Failure to pay SBR for the material shall be deemed illegal dumping and the appropriate authorities will be notified.</p> <p>Customer's Name: <u>Joy Construction</u></p> <p>Customer's Signature: <u>Pauline Thompson</u> Date: <u>11/15/12</u></p>
