CERTIFICATION

I, Mohamed Ahmed, am a Qualified Environmental Professional, as defined in RCNY § 43-1402(ar). I have primary direct responsibility for implementation of the Remedial Investigation for the 911 Atlantic Avenue Site, (NYC OER Site No. 15EH-N524K). I am responsible for the content of this Remedial Investigation Report (RIR), have reviewed its contents and certify that this RIR is accurate to the best of my knowledge and contains all available environmental information and data regarding the property.

EXECUTIVE SUMMARY

The Remedial Investigation Report (RIR) provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy pursuant to RCNY§ 43-1407(f). The remedial investigation (RI) described in this document is consistent with applicable guidance.

Site Location and Current Usage

The Site is located at 911 Atlantic Avenue in the Clinton Hill neighborhood of Brooklyn and is identified as Block 2018, Lot 62 (formerly Lots 62, 63 and 64). Figure 1 shows the Site location. The Site is an irregularly-shaped parcel occupied by three buildings and is currently vacant. The westernmost part of the Site contains a three-story building with detached storage facilities. The center section contains a four-story building with a cellar and that was used as commercial space and residences. The eastern section contains a two-story commercial building that was occupied by a wire cutting company. The entire Site is approximately 12,714-square feet with approximately 100.5 feet of frontage along Atlantic Avenue and is approximately 100 feet to 138 feet deep. The Site is bounded by various mixed-use spaces. A map of the site boundary is shown on Figure 2.

Summary of Proposed Redevelopment Plan

The proposed project is entirely affordable housing and consists of a nine-story building with a cellar level. The cellar level will house the utilities rooms, staff lounge, bicycle storage room, fitness center and recreational area for residents. The building will encompass approximately two-thirds of the land area with an eight-foot set-back to the east and an open area to the rear (north) of the building. The bottom of bulk excavation will be approximately 14 feet below sidewalk grade (note that there is an approximately seven foot drop in grade from the southern to northern border). An elevator will be installed below this level along the western border.

Summary of Past Uses of Site and Areas of Concern

The earliest Sanborn map (1887) shows a two-story building with a carpentry shop and clothing manufacture on the western portion of the Site (formerly Lot 64) and residential buildings with stores on the remaining lots. Additional uses on the western portion included bookbinding (with a printing area shown in the eastern part of the Site in the 1915 map), unspecified manufacturing (1938 and 1950 maps), an electrical company (maps dated 1969 through 1988), and auto repair (maps dated 1989 through 2007, the date of the last available map). Maps dated 1938 through 2007 also show a small two-story building on the western portion of the Site with the ground floor marked “auto” and storage on the second floor. The center portion of the Site (formerly Lot 63) is shown with residential and unspecified commercial uses on all maps; however, the city directory includes a 1928 listing for an auto radiator works, as well as listings indicating sale and/or storage of auto parts between 1934 and 1992. The eastern portion of the Site (formerly Lot 62) was originally developed with dwellings and a first floor store, with first floor wagon storage shown in 1904 and 1915, and auto repair (fender works), depicted on maps dated 1950 through 2007. Auto repair operations on the eastern portion of the Site are further documented by the 1934-1997 city directory listings, and the 1944 C of O, which references auto repair, welding, and a paint spray booth at this location.

Summary of the Work Performed under the Remedial Investigation

Tenen performed the following scope of work:

1. Conducted a Site inspection to identify AOCs and physical obstructions (i.e. structures, buildings, etc.);
2. Installed 10 soil borings across the entire project Site, and collected 18 soil samples for chemical analysis from the soil borings to evaluate soil quality;
3. Installed 3 groundwater monitoring wells throughout the Site to establish groundwater flow and collected 1 groundwater samples for chemical analysis to evaluate groundwater quality;

-
4. Installed 6 soil vapor probes around Site perimeter and collected 6 samples for chemical analysis.

Summary of Environmental Findings

1. Elevation of the property is approximately 82 feet.
2. Depth to groundwater is 68.58 feet at the Site.
3. Groundwater flow is assumed to be towards west beneath the Site.
4. Depth to bedrock is approximately 200 feet at the Site.
5. The stratigraphy of the site, from the surface down, consists of fill material that is typical of that encountered in New York City (asphalt, concrete chips, brick fragments, ash, cinders, coal fragments, silty sand), and extends to a depth of approximately two to five feet below grade (ft-bg). The native material consists of sand, silt and cobbles.
6. Soil/fill samples results were compared to New York State Department of Environmental Conservation (NYSDEC) Unrestricted Use Soil Cleanup Objectives and Restricted Residential Use Soil Cleanup Objectives (SCOs) as presented in 6NYCRR Part 375-6.8 and CP51. Soil/fill samples showed trace concentrations of VOCs, but none above Unrestricted Use SCOs. Several SVOCs consisting of Polycyclic Aromatic Hydrocarbons (PAHs) were detected with benz(a)anthracene (max. of 13 mg/kg), benzo(a)pyrene (max. of 12 mg/kg), benzo(b)fluoranthene (max. of 14 mg/kg), benzo(k)fluoranthene (max. of 3.9 mg/kg), chrysene (max. of 14 mg/kg), dibenz(a,h)anthracene (max. of 1.6 mg/kg), and indeno(1,2,3-cd)pyrene (7.4 mg/kg), exceeding Restricted Residential Use SCOs within shallow soil samples. Two pesticides, 4,4-DDE (0.00575 mg/kg) and 4,4-DDT (0.0108 mg/kg) were detected in two shallow samples above the Unrestricted Use SCOs. One pesticide, Arclor 1260 was detected in one shallow sample (0.142 mg/kg) above the

Unrestricted Use SCO. Several metals including arsenic, (28 mg/kg), barium (640 mg/kg) cadmium (max. of 2.8 mg/kg), copper (max. of 170 mg/kg), lead (max. of 1200 mg/kg), mercury (max. of 9.6 mg/kg), nickel (39 mg/kg) and zinc (max. of 2,500 mg/kg) exceeded Unrestricted Use SCOs in shallow samples. Of these metals, arsenic, barium, lead, and mercury also exceeded Restricted Residential Use SCOs. Overall, the soil data results were consistent with data identified at sites with urban fill material in NYC.

7. Groundwater sample results were compared to New York State 6NYCRR Part 703.5 Class GA groundwater quality standards (GQS). Groundwater results showed no SVOCs, PCBs, or pesticides in the one sample. Trace concentrations of VOCs were detected but only 2-Butanone was detected above its GQS at 61 ug/L. Several metals were identified in groundwater, but only aluminum (5350 ug/L), iron (40,400 ug/L), manganese (15,750 ug/L), and nickel (312.2 ug/L) exceeded their respective GQS in dissolved samples.
8. Soil vapor samples collected during the RI were compared to the compounds listed in Table 3.1 Air Guideline Values Derived by the NYSDOH located in the New York State Department of Health (NYSDOH) Final Guidance for Evaluating Soil Vapor Intrusion dated October 2006. Soil vapor samples collected during the RI showed low levels of petroleum-related VOCs and chlorinated VOCs. The total concentration of petroleum-related VOCs (BTEX) ranged from 6.19 $\mu\text{g}/\text{m}^3$ to 23.74 $\mu\text{g}/\text{m}^3$. Tetrachloroethylene (PCE) was detected in two of the six samples with a maximum concentration of 4.91 $\mu\text{g}/\text{m}^3$. The chlorinated VOCs, 1,1,1-trichloroethane (TCA), carbon tetrachloride, and trichloroethylene (TCE) were not detected in any of the six samples.

REMEDIAL INVESTIGATION REPORT

1.0 SITE BACKGROUND

Athena Housing Associates, LLC has enrolled in the New York City Voluntary Cleanup Program (NYC VCP) to investigate and remediate a 13,952 square foot site located at 911 Atlantic Avenue in the Clinton Hill section of Brooklyn, New York. Residential use is proposed for the property. The RI work was performed between September 2015 and October 2015. This RIR summarizes the nature and extent of contamination and provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy that is protective of human health and the environment consistent with the use of the property pursuant to RCNY§ 43-1407(f).

1.1 Site Location and Current Usage

The Site is located at 911 Atlantic Avenue in the Clinton Hill section in Brooklyn, New York and is identified as Block 2018 and Lot 62 (formerly Lots 62, 63 and 64) on the New York City Tax Map. Figure 1 shows the Site location. The Site is 12,714-square feet and is bounded by residential units to the north, Atlantic Avenue to the south, and mixed-use commercial and residential units to the east and west. Currently, the Site is vacant and contains three buildings. The westernmost part of the Site contains a three-story building with detached storage facilities. The center section contains a four-story building with a cellar and that was used as commercial space and residences. The eastern section contains a two-story commercial building that was occupied by a wire cutting company. A map of the site boundary is shown in Figure 2.

1.2 Proposed Redevelopment Plan

The proposed project is entirely affordable housing and consists of a nine-story building with a cellar level. The cellar level will house the utilities rooms, staff lounge, bicycle storage room, fitness center and recreational area for residents. The building will encompass approximately two-thirds of the land area with an eight-foot set-back to the

east and an open area to the rear (north) of the building. The bottom of bulk excavation will be approximately 14 feet below sidewalk grade (note that there is an approximately seven foot drop in grade from the southern to northern border). An elevator will be installed below this level along the western border.

1.3 Description of Surrounding Property

Figure 3 shows the surrounding land use. The north adjoining properties are residential, the east and west adjoining properties are mixed-use commercial and residential. The Site is bounded to the south by Atlantic Avenue. The majority of the surrounding properties are zoned as residential, with some commercial overlay along Atlantic Avenue.

Based on a review of OER's Searchable Property Environmental E-Database (SPEED), no hospitals or schools are present within 500 feet of the Site. One daycare facility, Ft. Greene Senior Council, Inc., is located on Fulton Street approximately 500 feet north of the Site; the daycare facility is presumed to be in the upgradient direction.

2.0 SITE HISTORY

2.1 Past Uses and Ownership

The earliest Sanborn map (1887) shows a two-story building with a carpentry shop and clothing manufacture on the western portion of the Site (formerly Lot 64) and residential buildings with stores on the remaining lots. Additional uses on the western portion included bookbinding (with a printing area shown in the eastern part of the Site in the 1915 map), unspecified manufacturing (1938 and 1950 maps), an electrical company (maps dated 1969 through 1988), and auto repair (maps dated 1989 through 2007, the date of the last available map). Maps dated 1938 through 2007 also show a small two-story building on the western portion of the Site with the ground floor marked “auto” and storage on the second floor. The center portion of the Site (formerly Lot 63) is shown with residential and unspecified commercial uses on all maps; however, the city directory includes a 1928 listing for an auto radiator works, as well as listings indicating sale and/or storage of auto parts between 1934 and 1992. The eastern portion of the Site (formerly Lot 62) was originally developed with dwellings and a first floor store, with first floor wagon storage shown in 1904 and 1915, and auto repair (fender works), depicted on maps dated 1950 through 2007. Auto repair operations on the eastern portion of the Site are further documented by the 1934-1997 city directory listings, and the 1944 C of O, which references auto repair, welding, and a paint spray booth at this location.

2.2 Previous Investigations

A Phase I Environmental Site Assessment (Phase I ESA) and a Phase II due diligence investigation were completed by Tenen at the Site. All documents pertaining to these investigations are included in Appendix B. The following is a list of the documents, followed by summaries of each report:

-
- Phase I Environmental Site Assessment, dated March 2015, prepared by Tenen;
 - Phase II Due Diligence Investigation, dated March 2015, prepared by Tenen; and
 - Phase II Work Plan (Short Form), dated June 2015, prepared by Tenen.

The Phase I ESA identified the following Recognized Environmental Conditions (RECs):

- historic use of the Site for auto repair, printing, and manufacturing;
- historic uses of adjacent and surrounding properties which likely involved the use and disposal of hazardous materials including paints, solvents, metals and petroleum products; and,
- a historic, potentially existing, underground gasoline storage tank on the property directly west of the Site.

Tenen completed a Phase II due diligence investigation in order to investigate potential environmental impacts from historic on-site/off-site uses, and operations. The investigation identified the following:

- two 275-gallon capacity ASTs are present at the Site;
- no evidence of a major petroleum release was detected during the subsurface investigation;
- fill material containing ash and cinders was observed to a depth of approximately two feet below grade in the parking area;
- soil sampling indicated the presence of fill-related impacts, in particular elevated metals, above Restricted-Residential SCOs. Toxic Characteristic Leaching Procedure (TCLP) analysis indicated that metals concentrations in these samples were not hazardous;
- soil vapor samples were collected below the existing buildings, and,
- groundwater was not sampled.

The soil vapor and soil results are incorporated into the results discussed below. Tenen completed a Phase II Work Plan (Short Form) to develop a scope of work to characterize potential environmental impacts from historic on-site/off-site uses and operations. The Work Plan proposed sampling of the soil, soil vapor and groundwater and was designed to address both RECs and historic fill, and to provide general horizontal/vertical characterization across the site for development purposes. The work plan was approved by OER on June 21, 2015.

2.3 Site Inspection

A Site inspection was completed on December 23, 2014 by Kristen Meisner of Tenen Environmental.

The westernmost portion of the Site (911 Atlantic Avenue) contains a three-story building occupied by H. Schact Electrical Supply, and includes an office and storage located on the first floor, and storage on the second and third floors. A steam boiler was observed in the cellar. Two 275-gallon capacity fuel oil aboveground storage tanks (ASTs) were located in the cellar. A four-story building with cellar (915 Atlantic Avenue) is currently used as storage/commercial space on the first floor, with one residential unit located on each of the three aboveground floors. A two-story commercial building (917 Atlantic Avenue) currently contains machinery used for wire cutting.

2.4 Areas of Concern

The AOCs identified for this site include:

1. Two 275-gal capacity ASTs previously located at the Site.
2. Previous Site uses including auto repair, auto storage, paint spraying and welding.
3. Presence of historic fill material.

Phase 1 Report is presented in Appendix C.

3.0 PROJECT MANAGEMENT

3.1 Project Organization

The Qualified Environmental Profession (QEP) responsible for preparation of this RIR is Matthew Carroll, P.E.

3.2 Health and Safety

All work described in this RIR was performed in full compliance with applicable laws and regulations, including Site and OSHA worker safety requirements and HAZWOPER requirements.

3.3 Materials Management

All material encountered during the RI was managed in accordance with applicable laws and regulations.

4.0 REMEDIAL INVESTIGATION ACTIVITIES

Tenen performed the following scope of work:

1. Conducted a Site inspection to identify AOCs and physical obstructions (i.e. structures, buildings, etc.);
2. Installed 10 soil borings across the entire project Site, and collected 18 soil samples for chemical analysis from the soil borings to evaluate soil quality;
3. Installed 3 groundwater monitoring wells throughout the Site to establish groundwater flow and collected 1 groundwater samples for chemical analysis to evaluate groundwater quality;
4. Installed 6 soil vapor probes around Site perimeter and collected 6 samples for chemical analysis.

4.1 Borings and Monitoring Wells

Drilling and Soil Logging

Ten soil borings (SS-1 through SS-8, SS-2A and SS-3A) were advanced at the Site to a depth ranging from 2 ft-bg to 13 ft-bg. Three soil samples (SB-1 through SB-3) were collected at the groundwater interface during the geotechnical well installation. Boring locations are shown on Figure 2. A table detailing the boring locations and sample designations is included below.

Soil Sample Borings, Sample Designations and Descriptions of Location

Boring Location	Sample Name	Description of Location
SS-1	SS-1(0-2)	Entrance to storage facility, parking lot
SS-2	SS-2(0-2)	Parking area; southeast, center
SS-3	SS-3(0-2)	Parking area; southwest, center
SB-1	SB-1	Driveway to parking area; south, center; geotechnical well GW-1
SB-2	SB-2	Driveway to parking area, north, center; geotechnical well GW-2
SB-3	SB-3(60-62)	Parking area, southwest, center; geotechnical well GW-3
SS-2A	SS-2A(6-8)	Parking area, southeast, center
SS-3A	SS-3A(6-8)	Parking area, southwest, center
SS-4	SS-4(0-2)	Parking area; north, center
	SS-4(6-8)	
SS-5	SS-5(0-2)	Center, basement level of 911 Atlantic Avenue
	SS-5(4-6)	

Boring Location	Sample Name	Description of Location
SS-6	SS-6(0-2)	Center, basement level of 917 Atlantic Avenue
	SS-6(4-5)	
SS-7	SS-7(0-2)	Driveway to parking area, north, center
	SS-7(9-11)	
SS-8	SS-8(0-2)	Driveway to parking area, south, center
	SS-8(11-13)	

A hand auger was used to collect five soil samples (SS-1 through SS-3, SS-5 and SS-6). A handheld Geoprobe® unit operated by Zebra was used to advance the remaining soil borings. Soil samples were obtained by using two-inch diameter by five-foot long steel macro core samplers that contained a dedicated acetate liner. Each sampler was driven through the subsurface soil to collect samples.

Soil samples were collected under six inches of concrete at the surface interval (0-2 feet) at three locations (SS-1 through SS-3). Two soil samples were collected from each of the remaining locations; one sample from the surface interval (0-2 feet) and one from the subsurface interval with the highest suspected contamination. If no field contamination (elevated PID readings, staining and/or odors) was observed in any two-foot interval, the second sample was collected from the first apparent interval of native material. Three soil samples (SB-1 through SB-3) were collected at the groundwater interface during the installation of the geotechnical wells. Sufficient sample volume was collected for each analysis, with additional sample volume collected for reanalysis, if necessary. Soil samples were collected in glass containers.

The soil was field screened using a PID. PID readings noted non-detect results for all soil borings. A PID reading at SS-4 of 3.4 parts per million (ppm) was noted within the interval of 1-2 ft-bg.

No grossly contaminated soil cuttings were encountered during this investigation; therefore, cuttings were not drummed. Following the completion of the soil sampling, boreholes were backfilled with clean cuttings/sand and sealed with a concrete patch.

Boring logs were prepared by an engineer and are attached in Appendix A. A map showing the location of soil borings and monitor wells is shown in Figure 2.

Groundwater Monitoring Well Construction

Three two-inch diameter wells (GW-1 through GW-3) were installed by Craig Geotechnical Drilling Co., Inc. during Site geotechnical investigations; due to drilling fluid encountered in wells GW-1 and GW-3, only well GW-2 was sampled as part of this Phase II subsurface investigation. Groundwater was encountered at a depth of 68.58 ft-bg in well GW-2. Details regarding groundwater sampling are provided below.

Well Location	Description of Location
GW-2	Driveway to parking area, north, center

A truck-mounted auger was used to install wells GW-1 through GW-3. No evidence of petroleum impacts was observed in the purged groundwater. Due to incomplete well development due to drilling fluid, Tenen was only able to successfully sample one well, GW-2. Field instrumentation was employed to measure water temperature, pH and

turbidity at the sampled well in order to stabilize parameters before sample collection. Sampling was completed using a low-flow bladder pump.

Monitor well locations are shown in Figure 2.

4.2 Sample Collection and Chemical Analysis

Sampling performed as part of the field investigation was conducted for all Areas of Concern and also considered other means for bias of sampling based on professional judgment, area history, discolored soil, stressed vegetation, drainage patterns, field instrument measurements, odor, or other field indicators. All media including soil, groundwater and soil vapor have been sampled and evaluated in the RIR. Discrete (grab) samples have been used for final delineation of the nature and extent of contamination and to determine the impact of contaminants on public health and the environment. The sampling performed and presented in this RIR provides sufficient basis for evaluation of remedial action alternatives, establishment of a qualitative human health exposure assessment, and selection of a final remedy.

Soil Sampling

Soil samples collected by Tenen were containerized in accordance with EPA analytical protocols. Each sample was labeled, sealed, and placed in a chilled cooler for shipment to the laboratory. A record of each sample, including notation of any odors, color, and sample matrix, was kept in the sampler's field log book. A chain of custody was maintained throughout the field sampling, transport of samples to the laboratory, and lab analysis. A field blank and trip blanks were collected by Tenen for quality assurance/quality control (QA/QC) purposes. The soil samples collected by Tenen were analyzed for Target Compound List (TCL) VOCs by EPA Method 8260, TCL semivolatile organic compounds (SVOCs) by EPA Method 8270, pesticides/polychlorinated biphenyls (PCBs) by EPA Methods 8081/8082 and Target Analyte List (TAL) metals by EPA Method 6010.

18 soil samples were collected for chemical analysis during this RI. Data on soil sample collection for chemical analyses, including dates of collection and sample depths,

is reported in Tables 2 through 5. Figure 2 shows the location of samples collected in this investigation. Laboratories and analytical methods are shown below.

Groundwater Sampling

Chain of custody documents was completed before shipment. The groundwater sample was placed in ice and secured in a cooler during shipment to the laboratory and analyzed by Alpha for TCL VOCs by EPA Method 8260, TCL SVOCs by EPA Method 8270, pesticides/ PCBs by EPA Methods 8081/8082 and total and dissolved TAL metals by EPA Method 6010.

One (1) groundwater sample was collected for chemical analysis during this RI. Groundwater sample collection data is reported in Tables 6 through 9. Sampling logs with information on purging and sampling of groundwater monitor wells is included in Appendix B. Figure 2 shows the location of groundwater sampling. Laboratories and analytical methods are shown below.

Soil Vapor Sampling

6 soil vapor probes were installed and 6 soil vapor samples were collected for chemical analysis during this RI. Soil vapor sampling locations are shown in Figure 2. Soil vapor sample collection data is reported in Table 1.. Methodologies used for soil vapor assessment conform to the *NYS DOH Final Guidance on Soil Vapor Intrusion, October 2006*.

Six soil vapor points were installed below the cellar concrete slabs within the three buildings fronting Atlantic Avenue. Two points were installed at the north and south ends of each building.

The soil vapor samples were collected from approximately six inches below the basement slab, which was found to be approximately four to five inches thick. A table detailing the locations and sample designations for each soil vapor point is included below.

Soil Vapor Sampling Points, Sample Designations and Locations

Samp ling Point	Sample Designation	Description of Location
SV-1	911SV-1	South end, basement level of 911 Atlantic Avenue
SV-2	911SV-2	North end, basement level of 911 Atlantic Avenue
SV-3	915SV-3	North end, basement level of 915 Atlantic Avenue
SV-4	915SV-4	South end, basement level of 915 Atlantic Avenue
SV-5	917SV-5	South end, basement level of 917 Atlantic Avenue
SV-6	917SV-6	North end, basement level of 917 Atlantic Avenue

A handheld hammer drill operated by Tenen was used to install soil vapor sampling probes at locations SV-1 through SV-6. At each soil vapor sampling location, access to the subsurface soil was gained by hammering through the four- to five-inch basement slab. Subsequently, a ½ inch diameter, 6-inch long perforated soil vapor sampling probe was placed at the bottom of the boring. Soil vapor sampling probes were installed and placed at approximately 6 inches below the ground surface.

The soil vapor sampling probe was connected to ¼-inch diameter polyethylene tubing that was extended to grade. Fine #00 sand was placed in the annular space around the probe and tubing to grade. The borehole above the sampling probe to grade was sealed using an inert sealant (bentonite, wetted at the surface) to prevent ambient air mixing with the soil vapor. In accordance with the New York State Department of Health (NYSDOH) October 2006 Final Guidance for Evaluating Soil Vapor Intrusion in the State of New York (Soil Vapor Guidance) protocols, a tracer gas (helium) was used to

verify the integrity of the soil vapor probe and sampling tube seals. A plastic chamber was sealed above the borehole. The sampling tube was pushed through the top of the sealed chamber. The atmosphere inside the chamber was enriched with the tracer gas (helium). A portable helium monitor was attached to the sampling tube to measure a vapor sample from the probe for the presence of high concentrations (>10%) of the tracer gas.

Soil vapor was purged from the boring hole by attaching the surface end of the polyethylene tube to an air valve and then to a vacuum pump. The vacuum pump removed one to three volumes of air (volume of the sample probe and tube) prior to sample collection. The flow rate for both purging and sample collection did not exceed 0.2 liter per minute.

The soil vapor sample was first screened for organic vapors using a photoionization detector (PID). Pre-soil vapor sample PID readings yielded all non-detect readings [0.0 parts per million (ppm)]. Soil vapor samples were collected in 2.75-liter Summa canisters using two-hour regulators and analyzed for volatile organic compounds (VOCs) using EPA Method TO-15.

Field notes were maintained summarizing sample identification, date and time of sample collection, sampling depth, identity of samplers, sampling methods and devices, soil vapor purge volumes, volume of the soil vapor extracted, vacuum of canisters before and after the samples were collected and chain of custody protocols.

Chemical Analysis

Chemical analytical work presented in this RIR has been performed in the following manner:

Factor	Description
Quality Assurance Officer	The chemical analytical quality assurance is directed by Mohamed Ahmed.

<p>Chemical Analytical Laboratory</p>	<p>Chemical analytical laboratory used in the RI is NYS ELAP certified and was Alpha Analytical.</p>

Results of Chemical Analyses

Laboratory data for soil, groundwater and soil vapor are summarized in Tables 2 through 5, respectively. Laboratory data deliverables for all samples evaluated in this RIR are provided in digital form in Appendix E.

5.0 ENVIRONMENTAL EVALUATION

5.1 Geological and Hydrogeological Conditions

Stratigraphy

The Site is mapped on the Brooklyn Quadrangle 7.5 Minute Topographic Map, published by the United States Geological Survey (USGS) (Figure 1). Review of the topographic map reveals that the Site is located at approximately 82 feet above the National Geodetic Vertical Datum of 1929 (an approximation of mean sea level) (USGS). The surface topography at the Site and surrounding area is relatively flat.

During environmental sampling, the subsurface lithology was determined to be fill underlain by native material. The fill material at the Site is typical of fill encountered in New York City (asphalt, concrete chips, brick fragments, ash, cinders, coal fragments, silty sand), and extends to a depth of approximately two to five feet below grade (ft-bg). The native material consists of sand, silt and cobbles. Lithologic logs are presented in Appendix A.

Hydrogeology

Groundwater was encountered at 68.58 ft-bg with an assumed westerly flow direction. The groundwater flow is consistent with that estimated in the 2009 United States Geologic Survey (USGS) publication, *Water-Table and Potentiometric-Surface Altitudes in Upper Glacial, Magothy and Lloyd Aquifers Beneath Long Island, New York, March-April 2006*. Groundwater is not used as a source of potable water in this area of Brooklyn. The nearest surface water body is the Gowanus Canal located roughly 6,800 feet to the west of the Site.

5.2 Soil Chemistry

Soil analytical results are summarized in Tables 2 through 5; laboratory qualifiers are summarized in Table 10. The laboratory analytical report is included in Appendix E. The maximum PID reading in soil was 3.4 ppm.

No VOCs were detected at concentrations above Unrestricted Use SCOs.

SVOCs typically related to historic fill were detected in three samples, SS-8(0-2), SS-4(0-2) and SS-6(0-2), at levels above the Restricted-Residential Use SCO. The SVOC compounds were all polycyclic aromatic hydrocarbons (PAHs), including benzo(a)anthracene [max: 13 milligrams per kilogram (mg/kg)], benzo(a)pyrene (max: 12 mg/kg), benzo(b)fluoranthene (max: 14 mg/kg), chrysene (max: 14 mg/kg) and indeno(1,2,3-cd)pyrene (max 7.4 mg/kg). Dibenz(a,h)anthracene was detected in two samples, SS-4(0-2) and SS-6(0-2) at a maximum concentration of 1.6 mg/kg. The SVOC benzo(k)fluoranthene (max: 3.9 mg/kg), was detected above the Unrestricted Use SCO in samples SS-8(0-2), SS-6(0-2) and SS-4(0-2). Chrysene was detected in sample SS-8(0-2) at a concentration of 2.6 mg/kg, above the Unrestricted Use SCO but below the Restricted-Residential SCO. All other samples contained concentrations of SVOCs below the Unrestricted Use SCOs. Each of the above samples has been vertically delineated to below the Unrestricted Use SCOs.

The following metals were identified above the Restricted-Residential Use SCOs: arsenic, barium, cadmium, lead and mercury. The highest concentrations were detected in sample SS-3(0-2), with the exception of the highest lead concentration, which was detected in sample SS-6(0-2). Arsenic was detected at a concentration of 28 milligrams per kilogram (mg/kg), above the Restricted-Residential Use SCO of 16 mg/kg. Barium was detected at a concentration of 640 mg/kg above the Restricted-Residential Use SCO of 350 mg/kg. Cadmium was detected at a concentration of 2.8 mg/kg above the Restricted-Residential Use SCO of 2.5 mg/kg. Lead was detected at a concentration of 1,200 mg/kg above the Restricted-Residential SCO of 400 mg/kg. TCLP analysis of metals was run on sample SS-6(0-2) and no concentrations were hazardous. Mercury was detected at a concentration of 9.6 mg/kg above the Restricted-Residential SCO of 0.81 mg/kg. Copper, nickel and zinc were detected above the Unrestricted Use SCOs, but below the Restricted-Residential Use SCOs.

Concentrations of the pesticide 4,4'-DDE was detected at a concentration above the Unrestricted Use SCOs, but below the Restricted-Residential SCOs in samples SS-3(0-2) and SS-4(0-2), within the shallow fill material. Concentrations of the pesticide 4,4'-DDT was detected at a concentration above the Unrestricted Use SCOs, but below the Restricted-Residential SCOs in sample SS-4(0-2), within the shallow fill material.

Concentrations of the polychlorinated biphenyl (PCB) Aroclor 1260 was detected at a concentration above the Unrestricted Use SCOs, but below Restricted-Residential SCOs in sample SS-3(0-2), within the shallow fill material.

Data collected during the RI is sufficient to delineate the vertical and horizontal distribution of contaminants in soil/fill at the Site.

5.3 Groundwater Chemistry

Groundwater analytical results are summarized in Tables 6 through 9; laboratory qualifiers are summarized in Table 10. The laboratory analytical report is included in Appendix E.

No SVOCs, pesticides or PCBs were detected above the Class GA Standards in the groundwater sample.

Two VOCs, acetone and 2-butanone, were detected above the Class GA Standards. Acetone was detected at a concentration of 270 micrograms per liter (ug/l), above Class GA Standard of 50 ug/l, and is considered to be a laboratory artifact. 2-Butanone was detected at a concentration of 51 ug/l, above the Class GA Standard of 50 ug/l.

The following filtered (dissolved) metals were detected above the Class GA Standards: aluminum, iron, manganese and nickel. In addition, the following unfiltered (total) metals: aluminum, chromium, iron, magnesium, manganese and nickel. These compounds are likely related to soil particles in the groundwater sample. The detected compounds are common earth metals, and are likely unrelated to Site uses.

Data collected during the RI is sufficient to delineate the distribution of contaminants in groundwater at the Site. Exceedence of applicable groundwater standards are shown.

5.4 Soil Vapor Chemistry

Soil vapor analytical results are included as Table 1 and the laboratory analytical report is included in Appendix E. Laboratory qualifiers are summarized in Table 10. Pre-sampling soil vapor readings yielded non-detect results.

Several compounds were detected in the soil vapor samples collected at the Site. No compounds were detected above the NYSDOH AGVs. Tetrachloroethene (PCE) was detected in to be the highest at 911SV-1 with a concentration of 4.88 micrograms per cubic meter (ug/m³), well below the NYSDOH AGV of 30 ug/m³. According to the NYSDOH matrix associated with PCE (Matrix 2), no monitoring or mitigation is required.

Acetone, a common laboratory artifact, was detected at all six locations. Three petroleum-related compounds were detected above the highest background concentrations: 1,3-butadiene (max 8.78 ug/m³ at 911SV-2); 1,2,4-trimethylbenzene (max 55.1 ug/m³ at 911SV-1); and 1,3,5-trimethylbenzene (max 3.7 ug/m³ at 911SV-2). These concentrations may be related to minor impacts from the nearby ASTs or boiler room.

Data collected during the RI is sufficient to delineate the distribution of contaminants in soil vapor at the Site.

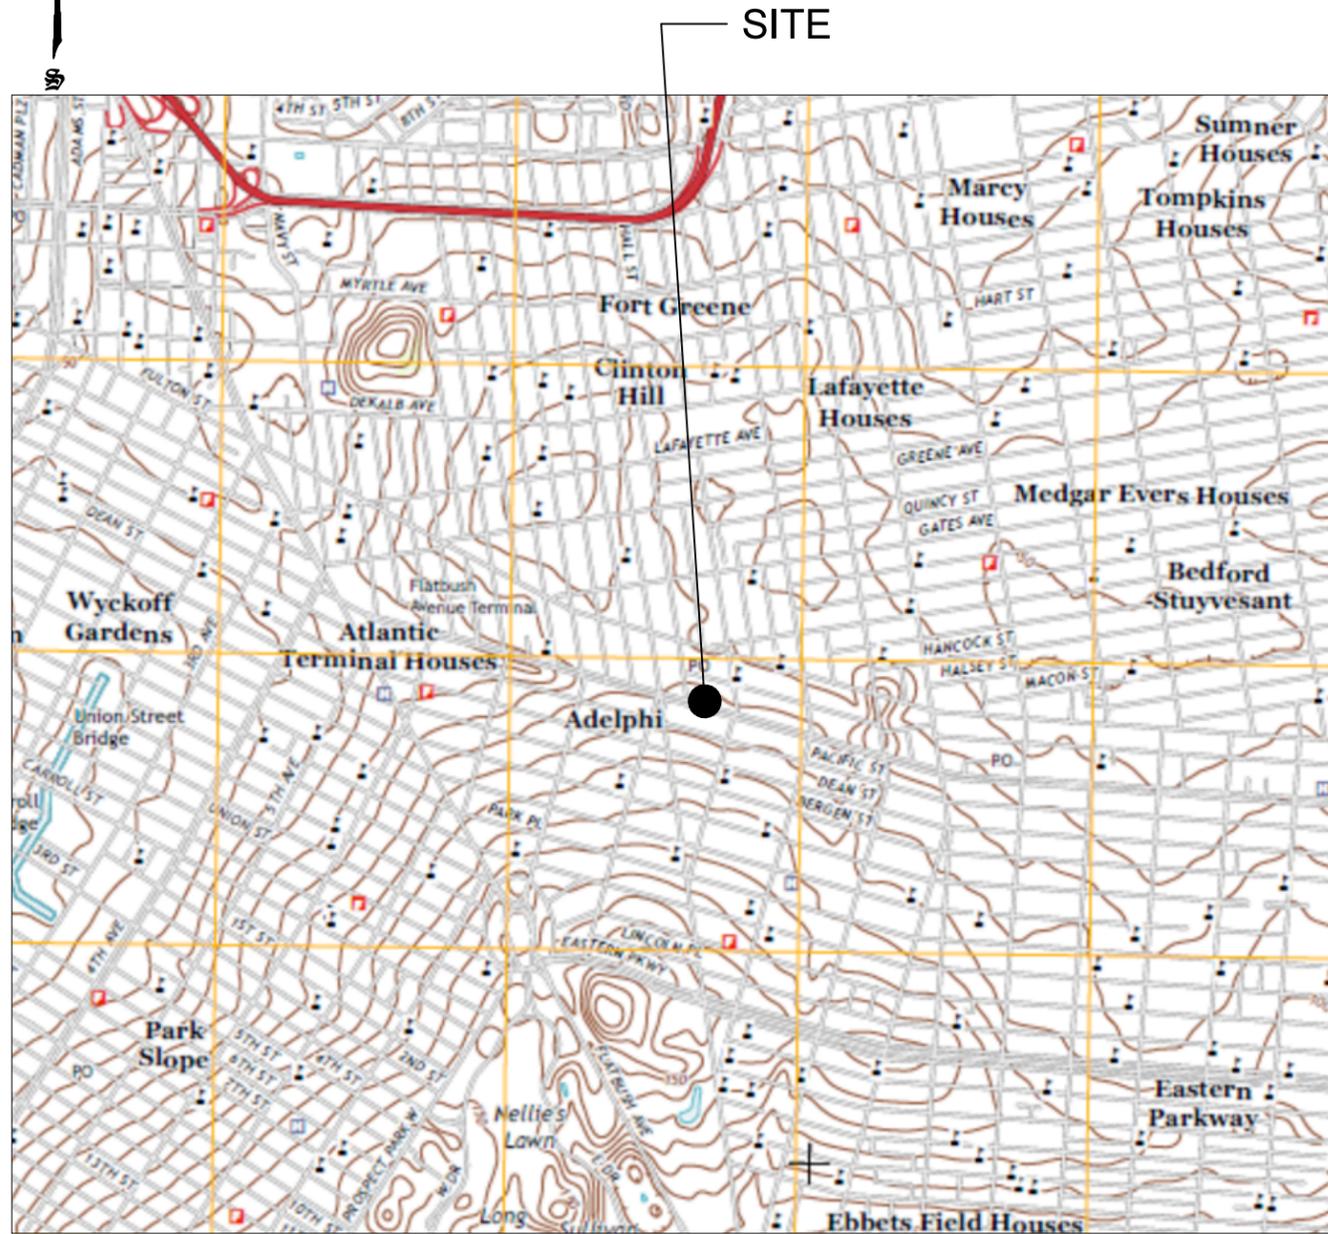

5.5 Prior Activity

Based on an evaluation of the data and information from the RIR, disposal of significant amounts of hazardous waste is not suspected at this site.

5.6 Impediments to Remedial Action

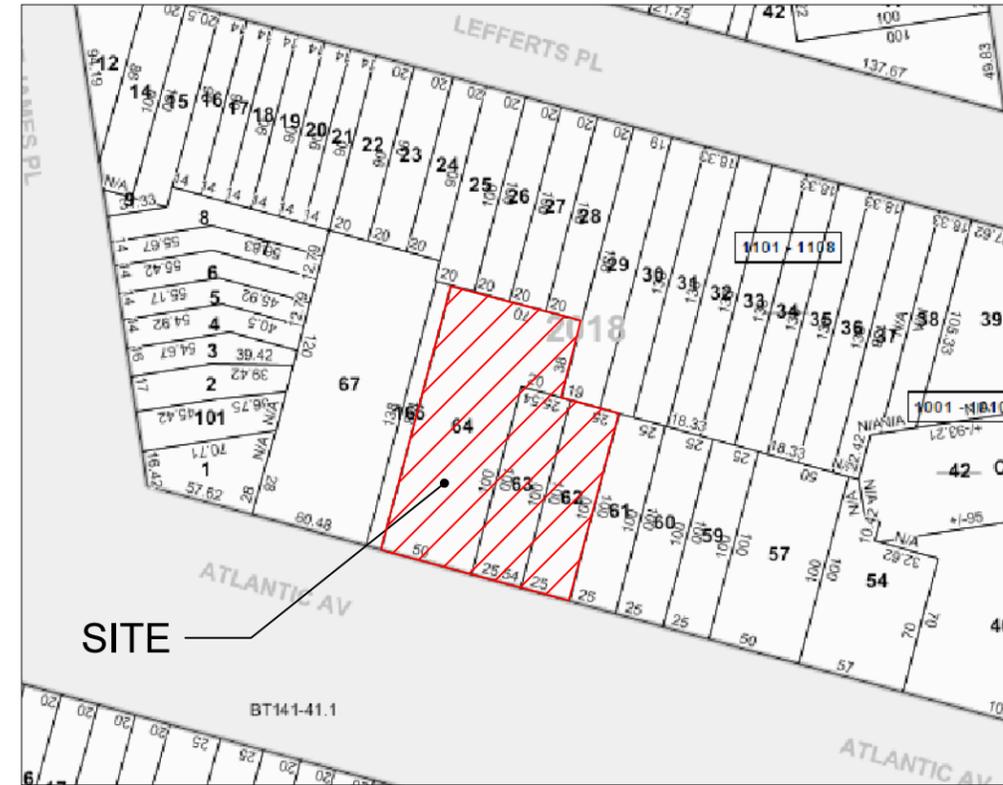

There are no known impediments to remedial action at this property.

Notes:
 NY-RESR: Residential Criteria, New York Restricted use current as of 5/2007
 NY-UNRES: New York Unrestricted use Criteria current as of 5/2007
 NY-RESRR: New York Restricted-Residential Criteria, New York Restricted use current as of 5/2007
 Cells highlighted in yellow indicate concentrations above the NY-UNRES
 Cells highlighted in orange indicate concentrations above the NY-RESRR
 Cells shaded in grey indicate MDL values above the NY-RESR or NY-UNRES
 DUP = designation for duplicate sample
 MDL = Maximum Detection Limit
 RL = Reporting limit
 NA - Not Analyzed
 Qual = Laboratory Data Qualifier
 For U qualified entries, the MDL is shown
 U = not detected at or above the MDL
 For J qualified entries, the estimated concentration is shown
 J = estimated value, indicating the detected value is below the RL, but above the MDL
 P - The RPD between the results for the two columns exceeds the method-specified criteria
 I - The lower value for the two columns has been reported due to obvious interference
 -- = No standard
 Results and MDL values are in milligrams per kilogram

Table 2 - Volatile Organic Compounds in Soil

Notes:
 NY-RESR: Residential Criteria, New York Restricted use current as of 5/2007
 NY-UNRES: New York Unrestricted use Criteria current as of 5/2007
 NY-RESRR: New York Restricted-Residential Criteria, New York Restricted use current as of 5/2007
 Cells highlighted in yellow indicate concentrations above the NY-UNRES
 Cells highlighted in orange indicate concentrations above the NY-RESRR
 Cells shaded in grey indicate MDL values above the NY-RESR or NY-UNRES
 DUP = designation for duplicate sample
 MDL = Maximum Detection Limit
 RL = Reporting limit
 NA - Not Analyzed
 Qual = Laboratory Data Qualifier
 For U qualified entries, the MDL is shown
 U = not detected at or above the MDL
 For J qualified entries, the estimated concentration is shown
 J = estimated value, indicating the detected value is below the RL, but above the MDL
 P - The RPD between the results for the two columns exceeds the method-specified criteria
 I - The lower value for the two columns has been reported due to obvious interference
 -- = No standard
 Results and MDL values are in milligrams per kilogram

Notes:

NY-RESR: Residential Criteria, New York Restricted use current as of 5/2007
 NY-UNRES: New York Unrestricted use Criteria current as of 5/2007
 NY-RESRR: New York Restricted-Residential Criteria, New York Restricted use current as of 5/2007
 Cells highlighted in yellow indicate concentrations above the NY-UNRES
 Cells highlighted in orange indicate concentrations above the NY-RESRR
 Cells shaded in grey indicate MDL values above the NY-RESR or NY-UNRES
 DUP = designation for duplicate sample
 MDL = Maximum Detection Limit
 RL = Reporting limit
 NA - Not Analyzed
 Qual = Laboratory Data Qualifier
 For U qualified entries, the MDL is shown
 U = not detected at or above the MDL
 For J qualified entries, the estimated concentration is shown
 J = estimated value, indicating the detected value is below the RL, but above the MDL
 P- The RPD between the results for the two columns exceeds the method-specified criteria
 I- The lower value for the two columns has been reported due to obvious interference
 -- = No standard
 Results and MDL values are in milligrams per kilogram

NY-RESR: Residential Criteria, New York Restricted use current as of 5/2007
 NY-UNRES: New York Unrestricted use Criteria current as of 5/2007
 NY-RESRR: New York Restricted-Residential Criteria, New York Restricted use current as of 5/2007
 Cells highlighted in yellow indicate concentrations above the NY-UNRES
 Cells highlighted in orange indicate concentrations above the NY-RESRR
 Cells shaded in grey indicate MDL values above the NY-RESR or NY-UNRES
 DUP = designation for duplicate sample
 MDL = Maximum Detection Limit
 RL = Reporting limit
 NA = Not Analyzed
 Qual = Laboratory Data Qualifier
 For U qualified entries, the MDL is shown
 U = not detected at or above the MDL
 For J qualified entries, the estimated concentration is shown
 J = estimated value, indicating the detected value is below the RL, but above the MDL
 P = The RPD between the results for the two columns exceeds the method-specified criteria
 I = The lower value for the two columns has been reported due to obvious interference
 -- = No standard
 Results and MDL values are in milligrams per kilogram

Notes:
 NY-RESR: Residential Criteria, New York Restricted use current as of 5/2007
 NY-UNRES: New York Unrestricted use Criteria current as of 5/2007
 NY-RESRR: New York Restricted-Residential Criteria, New York Restricted use current as of 5/2007
 Cells highlighted in yellow indicate concentrations above the NY-UNRES
 Cells highlighted in orange indicate concentrations above the NY-RESRR
 Cells shaded in grey indicate MDL values above the NY-RESR or NY-UNRES
 DUP = designation for duplicate sample
 MDL = Maximum Detection Limit
 RL = Reporting limit
 NA = Not Analyzed
 Qual = Laboratory Data Qualifier
 For U qualified entries, the MDL is shown
 U = not detected at or above the MDL
 For J qualified entries, the estimated concentration is shown
 J = estimated value, indicating the detected value is below the RL, but above the MDL
 P = The RPD between the results for the two columns exceeds the method-specified criteria
 I = The lower value for the two columns has been reported due to obvious interference
 -- = No standard
 Results and MDL values are in milligrams per kilogram

Notes:

- NY-RESR: Residential Criteria, New York Restricted use current as of 5/2007
- NY-UNRES: New York Unrestricted use Criteria current as of 5/2007
- NY-RESRR: New York Restricted-Residential Criteria, New York Restricted use current as of 5/2007
- Cells highlighted in yellow indicate concentrations above the NY-UNRES
- Cells highlighted in orange indicate concentrations above the NY-RESRR
- Cells shaded in grey indicate MDL values above the NY-RESR or NY-UNRES
- DUP = designation for duplicate sample
- MDL = Maximum Detection Limit
- RL = Reporting limit
- NA = Not Analyzed
- Qual = Laboratory Data Qualifier
- For U qualified entries, the MDL is shown
- U = not detected at or above the MDL
- For J qualified entries, the estimated concentration is shown
- J = estimated value, indicating the detected value is below the RL, but above the MDL
- P - The RPD between the results for the two columns exceeds the method-specified criteria
- I - The lower value for the two columns has been reported due to obvious interference
- = No standard
- Results and MDL values are in milligrams per kilogram

Notes:

NY-RESR: Residential Criteria, New York Restricted use current as of 5/2007

NY-UNRES: New York Unrestricted use Criteria current as of 5/2007

NY-RESRR: New York Restricted-Residential Criteria, New York Restricted use current as of 5/2007

Cells highlighted in yellow indicate concentrations above the NY-UNRES

Cells highlighted in orange indicate concentrations above the NY-RESRR

Cells shaded in grey indicate MDL values above the NY-RESR or NY-UNRES

DUP = designation for duplicate sample

MDL = Maximum Detection Limit

RL = Reporting limit

NA - Not Analyzed

Qual = Laboratory Data Qualifier

For U qualified entries, the MDL is shown

U = not detected at or above the MDL

For J qualified entries, the estimated concentration is shown

J = estimated value, indicating the detected value is below the RL, but above the MDL

P - The RPD between the results for the two columns exceeds the method-specified criteria

I - The lower value for the two columns has been reported due to obvious interference

-- = No standard

Results and MDL values are in milligrams per kilogram

Notes:

*NY-TOGS-GA: New York TOGS 111 Groundwater Effluent Limitations criteria reflects all addendum to criteria through June 2004.

NY-AWQS = New York State Ambient Water Quality Standard

Cells highlighted in yellow indicate concentrations above the NY-AWQS

Cells shaded in grey indicate MDL values above the NY-AWQS

DUP = designation for duplicate sample

MDL = Maximum Detection Limit

RL = Reporting limit

NA - Not Analyzed

Qual = Laboratory Data Qualifier

For U qualified entries, the MDL is shown

U = not detected at or above the MDL

For J qualified entries, the estimated concentration is shown

J = estimated value, indicating the detected value is below the RL, but above the MDL

-- = No standard

Results and MDL values are in micrograms per liter (µg/L)

EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was performed in accordance with ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The Phase I ESA was performed by Mr. Matthew Carroll of Tenen Environmental, LLC (Tenen), an Environmental Professional as defined in 40 CFR 312. The Site reconnaissance was conducted by Ms. Kristen Meisner on December 23, 2014. The purpose of this ESA was to assist the client in developing information to identify recognized environmental conditions (RECs) in connection with the Site. An REC means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

The Site, located at 911-917 Atlantic Avenue, Brooklyn, New York, is an irregular-shaped parcel of approximately 13,952 square feet, which lies along the north side of Atlantic Avenue between St. James Place and Grand Avenue. The Site has approximately 100.5 feet of frontage along Atlantic Avenue. The Site depth ranges from approximately 100 feet (Lots 62 and 63) to 138 feet (Lot 64). Other addresses associated with the Site are 907-911 Atlantic Avenue, 911 (Rear) Atlantic Avenue and 915 (Rear) Atlantic Avenue. The tax map designation of the property is Block 2018, Lots 62, 63, and 64. The property is currently occupied by three commercial buildings. Lot 64, the westernmost part of the Site, contains a three-story building with detached storage facilities. A four-story building with a cellar (Lot 63) is currently used as commercial space and residences. The two-story commercial building at 917 Atlantic Avenue (Lot 62) is occupied by a wire cutting company.

The site and surrounding areas have been developed urban land since at least 1887. The Site was initially developed with a two-story building with a carpentry shop and clothing manufacture on Lot 64 and residential buildings with stores on the remaining lots. Subsequent uses of Lot 64 included bookbinding, (including a printing area shown in the eastern part of the Site) (1915 map), manufacturing (1938 and 1950 maps), an electrical company (1969–1988 maps), and auto repair (1989–2007 maps). A small two-story building on the eastern part of Lot 64 with notations for “auto” and storage” is shown on maps dated 1938 through 2007. Lot 63 is shown with residential and unspecified commercial uses on all maps; however, the city directory includes a 1928 listing for an auto radiator works, and listings indicating sale and/or storage of auto parts between 1934 and 1992. Non-residential uses of Lot 62 include wagon storage (1904-1915, and auto repair (1950 through 2007). Based historic information and the Site reconnaissance, a paint spray booth was also located on this lot.

The lots to the north have been primarily residential since at least 1887. The south adjacent properties were initially developed with dwellings and stores, and, by 1934, with commercial and industrial uses, primarily auto-related. Later uses include plumbing (1960-1976), sewer cleaning (1960), packing (1949-1985), garage (1934), auto repair (1945-1992), refrigerator manufacture (1997), mechanical company (1992-1997), industrial laundry (1960), and furniture refinishing (1970-1973). By 1887, the east adjacent lot had been developed with a dwelling and store. Prior to 1950, an auto repair shop began operations on this lot, continuing through at least 2007. Additional uses, noted in the city directories, include oil and electrical companies (1934), welding (1940), woodworking (2005, 2013), restaurant supply (2005-2013), and an HVAC contractor (2008). The west adjacent property was vacant until prior to 1938, when it was developed with a large building used for tire service and repair; the Sanborn maps through 1986 show a 1,000-gallon underground gasoline tank in the western part of the building. Later maps are illegible and it is unknown if the tank was present after that date. Other uses of this property have included an auto service station/garage (1928), auto salvage (1940), canvas products (1945) photography lab (1949),

plastics company (1960), roofing contractor (1980-2013), ceramics (1985-1997), and building supply (1985 and 2013).

The earlier maps show the area already developed with dwellings, stores and some institutional uses, and, by 1938, with increased industrial and vehicle-related uses. These included a vulcanizing operation to the west on the Site block (later replaced by a tinsmith, and, subsequently, by a tire service), a commercial garage to the north and a large service station/repair shop (with two gasoline tanks and a paint spray booth) on the east adjacent block. Maps dated 1950 through 1979 show additional auto repair shops to the east on the Site block, and auto repair and a filling station south of the Site along Atlantic Avenue. While uses of individual lots may have changed, the nature of the surrounding area remained relatively constant through 2007, the date of the last available map.

Regarding the site and adjacent/surrounding properties, the results of the city directory, historic topographic map and aerial photograph review are generally consistent with the usage depicted on the historic Sanborn maps, with the city directory listings providing additional information on Site and adjacent property uses. A review of the historic information identified a gasoline storage tank on the west adjacent lot and historic uses of the Site and adjacent and surrounding properties which likely involved the use and disposal of hazardous materials, including paints, solvents, metals and petroleum products. These historic uses are considered RECs.

The database search indicated numerous listings of properties within the standard search radii on multiple regulatory databases. Many of these listings are located a significant distance from and/or downgradient of the Site. All three Site lots are listed on the EDR E-DESIGNATION database, indicating that E-designation E-138 for Underground Tanks Testing Protocol (i.e., hazardous materials) and window-wall attenuation (i.e., noise) has been placed on the Site. The listing of a property on the E-DESIGNATION database is not considered a REC. Two offsite RECs, the listings for 921 and 923 Atlantic Avenue on the US Hist Auto Stat database, were identified based upon a review of the regulatory database.

Tenen has performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM E 1527-13 of 911-917 Atlantic Avenue in Brooklyn, New York (the Property). Any exceptions to, or deletions or deviations from, this practice are described in Section 1.4 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the property, with the exception of the following:

- historic use of the Site for auto repair, printing, and manufacturing
- historic uses of adjacent and surrounding properties which likely involved the use and disposal of hazardous materials, including paints, solvents, metals and petroleum products
- a historic, potentially existing, underground gasoline storage tank on the property directly west of the Site

1.0 INTRODUCTION

1.1 Site Description

The Site, located at 911-917 Atlantic Avenue, Brooklyn, New York, is an irregular-shaped parcel of approximately 13,952 square feet, which lies along the north side of Atlantic Avenue between St. James Place and Grand Avenue. The Site has approximately 100.5 feet of frontage along Atlantic Avenue and is approximately 100 feet (Lots 62 and 63) to 138 feet deep (Lot 64). Other addresses associated with the Site are 907-911 Atlantic Avenue, 911 Rear Atlantic Avenue and 915 Rear Atlantic Avenue. The tax map designation of the property is Block 2018, Lots 62, 63, and 64. Lot 64, the westernmost part of the Site, contains a three-story building with a cellar along with associated detached storage facilities. A four-story building with a cellar (Lot 63) is currently used as storage/commercial space on the first floor, with one residential unit located on each of the three aboveground floors. A two-story building with cellar is located at 917 Atlantic Avenue (Lot 62) and is currently being used for commercial space with machinery used for wire cutting.

All Site lots are zoned R7-A and Lot 64 is also zoned R6-B, designations which denote medium density areas with high lot coverage buildings. The Site also has a C2-4 commercial overlay, which allows for commercial uses that serve local residential needs. A Site location figure is included in Appendix A and photographs from the Site reconnaissance are included in Appendix B.

1.2 Scope of Services

This Phase I Environmental Site Assessment (ESA) was performed in accordance with ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify recognized environmental conditions (RECs) in connection with the Site. This was undertaken through user-provided information; a regulatory database review; historical and physical records review; interviews; and a visual non-invasive reconnaissance of the Site and adjoining properties. Limitations, ASTM deviations, and significant data gaps are evident from reviewing the applicable scope of services and the report text.

1.3 Standard of Care

This ESA was performed in accordance with ASTM E1527-13 and generally accepted practices used in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this Site, are of limited scope, are noninvasive and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the Site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records, some of which may document environmental concerns, were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property and the performance of a Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the Site or otherwise uses the report for any other

purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment.

1.4 Additional Scope Limitations, ASTM Deviations and Significant Data Gaps

This ESA did not include subsurface or other invasive assessments, business environmental risk evaluations or other services not particularly identified and discussed herein. Reasonable attempts were made to obtain information within the scope and time constraints; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder.

No significant data gaps were identified in the performance of this Phase I ESA.

The significance of these limitations and missing information, if any, with respect to the findings of this Phase I ESA has been evaluated and it has been determined that no significant data gap is present. However, it should be recognized that an evaluation of the significance of these data gaps is based on the information available at the time of report issuance and an evaluation of information received after the report issuance date may result in revisions to the findings of this Phase I ESA.

This report represents the final document; its text may not be altered after final issuance. Findings in this report are based upon the Site's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after Site renovation or development). Further, the contents of this Phase I ESA are not to be construed as legal interpretation or advice.

1.5 Reliance

This Phase I ESA report is prepared for the exclusive use and reliance of The Hudson Companies. Use or reliance by any other party is prohibited without the written authorization of the above entities. The User has requested this Phase I ESA as part of due diligence in order to qualify for Landowner Liability Protections (LLPs) under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

Continued viability of this report is subject to ASTM E1527-13 Sections 4.6 and 4.8. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user's responsibilities in Section 6 of ASTM E1527-13.

1.6 Client-Provided Information

Mr. Joseph Kohl-Riggs, a representative of the User, completed a Phase I ESA User Questionnaire to provide the following information relative to the Site. The User Questionnaire is provided in Appendix E.

1.6.1 Knowledge of Environmental Liens or Activity and Use Limitations (AULs)

The User is not aware of any environmental liens filed or recorded under federal, state, or local law.

1.6.2 Specialized Knowledge or Experience

The User does not have any specialized knowledge or experience related to the Site or nearby properties, such as knowledge of the chemicals or processes used by the current or former occupants of the Site or any adjoining property.

1.6.3 Significantly Lower Purchase Price

Based on information obtained from the User, the purchase price for the Site reasonably reflected the fair market value of the property.

1.6.4 Commonly Known or Reasonably Ascertainable Information

The User is not aware of any commonly known or reasonably ascertainable information about the Site that may help to identify conditions indicative of releases or threatened releases.

1.6.5 Obvious Indicators

The User is not aware of any obvious indicators that point to the presence or likely presence of contamination at the Site.

1.6.6 Proceedings Involving the Site

The User is not aware of any pending, threatened, or past environmental litigation, proceedings, or notices of possible violations of environmental laws or liability in connection with the Site.

2.0 PHYSICAL SETTING

According to the Brooklyn, New York Quadrangle USGS Topographic Map (2013), included in Figure 1 in Appendix A, the property lies at an elevation of approximately 82 feet above the National Geodetic Vertical Datum of 1929 (an approximation of mean sea level). The surface topography at the Site and surrounding area is relatively flat.

Groundwater is assumed to be between 51 and 75 feet below the ground surface. Groundwater flow is assumed to be locally east. Groundwater is not used as a source of potable water in this area of Brooklyn. The Gowanus Canal is the nearest surface water body, located roughly 6,800 feet to the west of the Site. The Federal Emergency Management Agency (FEMA) flood insurance rate map for the Site (Map Number 3604970212F) indicates that the Site is located outside Zone X, the 0.2% annual chance (or 500 year) floodplain. The FEMA map is not available due to the fact that Flood Insurance Rate Map (FIRM) Panels are not printed when there is no special flood hazard area present throughout the panel.

3.0 HISTORICAL USE INFORMATION

The following historical sources were reviewed: Sanborn fire insurance maps, aerial photographs, topographic maps and city directories. Copies of these resources are included in Appendix C. Additionally, records from New York City agencies were reviewed and copies of these documents are included in Appendix E. A summary of the historical review is included in Section 3.9.

3.1 Sanborn Fire Insurance Maps

Maps were available for the following years: 1887, 1888, 1904, 1906, 1915, 1938, 1950, 1969, 1977, 1979, 1980, 1981, 1982, 1985, 1986, 1987, 1988, 1989, 1991, 1992, 1993, 1994, 1995, 1996, 2001, 2002, 2003, 2004, 2005, 2006, and 2007. Please note that adjacent/surrounding properties south of the Site are not shown in maps dated 1906 through 1977. The results of the Sanborn map review are provided below

Sanborn Fire Insurance Maps

Map Date	Location Covered	Description
1887, 1888	Site	The westernmost Site lot (Lot 64 – 911-917 Atlantic Avenue) is shown with a two-story building used as a carpentry shop; the remaining lots are developed with four-story dwellings with stores on the first floor. A shed is shown behind the building on Lot 63 (915 Atlantic Avenue)
	Adjacent	The vacant rear portions of the dwelling lots along Lefferts Place border the Site to the north with a dwelling with a store to the east. The lot to the west is vacant. The 1888 map shows the areas to the south with dwellings, some with stores.
	Surrounding	The surrounding area is developed with dwellings, with many of the buildings along Atlantic Avenue with first floor stores. A “hothouse” is shown on the east adjacent block. The 1888 map shows the area south of the Site as primarily residential.
1904, 1904, 1915	Site	The 1904 map shows Lot 64 with a two-story building with a carpenter shop on the first floor and ladies wear manufacturing on the second; in 1915, this lot is occupied by a bookbinding company. The 1915 map also shows building material storage in the northern portion of Lot 64 and printing and storage on the eastern part of the lot, north of Lot 63. The first floor of the building on Lot 62 is shown with first floor wagon storage.
	Adjacent	Uses to the north, east and west are the same as the prior map. Uses to the south are not shown on the 1904 and 1915 maps, but are shown as residential on the 1906 map.
	Surrounding	Similar to prior maps. A large theater along Fulton Street and several coal sheds are shown on the north adjacent block. The 1906 map shows the area to the south as primarily residential.
1938	Site	Lot 64 is occupied by a three-story building with a store on the first floor and manufacturing above; a shed is shown behind the building. The eastern part of Lot 64 (north of Lot 63) is shown with a building marked “auto” with second floor storage. The remaining lots are shown with four-story buildings with stores.

Map Date	Location Covered	Description
	Adjacent	The area north of the Site is shown with dwellings. A dwelling with a store lies to the east and a large building used for tire service and repair is shown to the west; a 1,000-gallon underground gasoline storage tank is depicted below the west adjacent building along Atlantic Avenue.
	Surrounding	Similar to prior maps, with increasing vehicle-related uses. A lot with four gasoline tanks and one oil tank is shown on the northwest corner of Atlantic and Grand Avenues (East of the site on the Site block). A rubber vulcanizing operation is depicted to the west of the Site, also on the Site block. The theater to the north is shown as a commercial garage and a large auto service station and repair shop (with two gasoline tanks and a paint spray booth) is shown on the east adjacent block.
1950	Site	Same as prior map, except that Lot 62 is occupied by an auto fender works.
	Adjacent	Uses to the north are the same as prior map. An auto repair shop is shown to the east and the use of the former bookbinder/tire repair building to the west is shown as unspecified manufacturing. The gasoline tank is still shown.
	Surrounding	Additional auto-related uses (wheel alignment, tire service and seat cover manufacture) lie to the east on the site block. The vulcanizing operation to the west is shown as a tinsmith. The auto repair shop on the east adjacent block is shown as manufacturing; the gasoline tanks are still shown.
1969	Site	The Lot 64 building is occupied by an electrical company. Uses of the other lots are as shown in the prior map.
	Adjacent	Same as prior map. The western part of the west adjacent building is shown with a garage with the prior gasoline tank also shown.
	Surrounding	Similar to prior map. Additional auto repair shops are shown to the east on the Site block, along Atlantic Avenue; the filling station is shown, but the gasoline tanks are not depicted. The prior vulcanizing/tinsmith to the west on the Site block is shown as "tire sales". The former theater/garage on the north adjacent block has been replaced by a post office.
1977, 1979	Site	No change from prior map.
	Adjacent	Same as prior map, except that south adjacent uses are shown and include stores, furniture refinishing, plumbing and auto repair.
	Surrounding	Similar to prior map. Portions of the north adjacent block along Fulton Street are developed with parking and a city-run day care center. Uses on the south adjacent block, shown on the 1979 map, include auto repair, auto sales and service, an auto parts wholesaler, and a filling station.
1980, 1981, 1982, 1985, 1986, 1987, 1988, 1989	Site	Same as prior maps, except that Lot 64 is shown as an auto repair facility in the 1989 map.

Map Date	Location Covered	Description
	Adjacent	Similar to prior maps except that the 1987 and later maps show the building to the west as unspecified manufacturing. The area of the former tank is not legible and it is unclear if the tank is still shown.
	Surrounding	Similar to prior maps.
1991, 1992, 1993, 1994, 1995, 1996	Site	Same as prior map.
	Adjacent	No change from prior map.
	Surrounding	Similar to prior map.
2001, 2002, 2003, 2004, 2005, 2006, 2007	Site	Same as prior map.
	Adjacent	No change from prior map.
	Surrounding	Similar to prior map.

A review of the historic Sanborn maps indicates past use of the Site for auto repair, printing and unspecified manufacturing. Historic uses of the adjacent properties include auto repair, a garage (with an underground gasoline storage tank), furniture refinishing and manufacturing. These historic uses of the Site and adjacent/surrounding properties likely involved the use and disposal of hazardous materials, including paints, solvents, metals and petroleum products and are considered potential RECs.

3.2 Historical Topographic Maps

Tenen reviewed the topographic maps from 1900, 1924, 1947, 1956, 1967, 1979 and 1995. The Site and surrounding areas are shown as developed urban land since at least 1900. No specific uses can be determined.

No RECs were identified based upon the review of historic topographic maps.

3.3 Historical Aerial Photographs

Tenen reviewed aerial photographs from 1924, 1944, 1951, 1954, 1961, 1966, 1974, 1976, 1984, 1994, 2006, 2009 and 2011. The Site appears to have been developed since at least 1924; adjacent and surrounding areas similarly appear to be developed at this time. No specific uses can be determined.

No RECs were identified based upon the review of historic aerial photographs.

3.4 City Directories

Available city directory listings were provided by EDR for the following years: 1928, 1934, 1940, 1945, 1949, 1960, 1965, 1970, 1973, 1976, 1980, 1985, 1992, 1997, 2000, 2005, 2008 and 2013.

Site. Addresses associated with the Site are listed in all city directories. Information obtained from the Site city directory listings is summarized below.

911 Atlantic Avenue (Lot 64)

offices: 1928
 electrical supply co.: 1934, 1940, 1945, 1949, 1960, 1965, 1970, 1973, 1976, 1980, 1982, 1997, 2005, 2008, 2013
 Steampoint Corp: 1940, 1945, 1949, 1960
 realty company: 2005, 2008, 2013

915 Atlantic Avenue (Lot 63)

auto radiator works: 1928
 auto parts: 1934, 1940, 1945, 1949, 1960, 1965, 1970, 1973, 1976, 1980, 1985, 1992
 residential: 1934, 1992, 1997

917 Atlantic Avenue (Lot 62)

commercial: 1928, 1934
 residential: 1934, 2005
 auto repair: 1934, 1945, 1949, 1960, 1965, 1970, 1976, 1985, 1992, 1997
 auto claims adjustment: 1949
 business center: 2008
 auto/truck supplies: 1934, 1940

Adjoining Properties. City directory listings for the lots adjacent to the Site are summarized below.

28 Lefferts Place (north adjacent property)

residential: 1934-2005

30 Lefferts Place (north adjacent property)

residential: 1934-2005

34 Lefferts Place (north adjacent property)

residential: 1934-2005

36 Lefferts Place (north adjacent property)

residential: 1934-2005

38 Lefferts Place (northeast adjacent property)

residential: 1934-2005

948 Atlantic Avenue (south/southwest adjacent property)

residential: 1934, 1940, 1949, 1960, 1965, 1970, 1976
 industrial laundry: 1960
 furniture refinishing: 1970, 1973

950 Atlantic Avenue (south adjacent property)

auto radiator works: 1934
 residential: 1934, 1960, 1965, 1970, 1973, 1976, 1997, 2005
 transportation company: 1973
 emblem manufacturing: 1949

952 Atlantic Avenue (south adjacent property)

residential: 1934, 1940, 1949, 1960, 1965, 1970, 1976, 1985, 1997, 2005
 wheel and rim company: 1945
 alarm company: 1960, 1965, 1970, 1973
 restaurant supply: 2005

954 Atlantic Avenue (south adjacent property)

garage: 1934
 residential: 1949, 1960, 1965, 1992, 1997, 2005
 olive oil distribution: 1940, 1945
 packing company: 1949, 1960, 1965, 1970, 1973, 1976, 1985
 mechanical company: 1992, 1997
 locksmith: 1992
 alarm company: 1992

956 Atlantic Avenue (south adjacent property)

bicycle repair: 1949
 residential: 1934, 1960, 1965, 1970, 1992, 1997, 2005
 plumber: 1960, 1965, 1970, 1973, 1976
 exterminating company: 1960, 1965, 1970, 1973, 1976
 sewer cleaning company: 1960
 contractor: 1970, 1973, 1976
 mechanical company: 1985
 commercial (unspecified) 2005

958 Atlantic Avenue (south adjacent property)

commercial (unspecified) 1934
 auto spring company 1940, 1945, 1949, 1960, 1965, 1973, 1976
 refrigerator manufacture: 1997
 lift parts: 1976
 warehouse: 2005

919 Atlantic Avenue (east adjacent property)

residential: 1928
 oil company: 1934
 electrical company: 1934
 auto repair: 1940, 1949, 1960, 1965, 1973, 1976, 1985, 1992
 welder: 1940
 woodworking: 2005, 2013
 restaurant supply: 2005, 2008, 2013
 HVAC company: 2008

905 Atlantic Avenue (west adjacent property)

auto service station: 1928
 auto repair: 1928, 1934
 garage: 1928
 auto salvage: 1940
 canvas products: 1945
 photography lab: 1949
 plastics company: 1960
 auto accessories: 1965, 1970, 1973

commercial (unspecified):	1973, 1976, 2013
roofing contractor:	1980, 1985, 1992, 1997, 2005, 2008, 2013
valve products:	1973
ceramics:	1985, 1992, 1997
building supply:	1985, 2013
demolition contractor:	2008

The city directory listings for the Site indicate historic auto repair operations between 1934 and 1997. Listings for the adjacent properties indicate historic auto repair operations on the east adjacent lot between 1940 and 1992 and on the west adjacent property in 1928-1934. One 1928 listing also indicates use of the west adjacent lot as a service station. Other offsite uses of the adjacent properties include woodworking, furniture refinishing, industrial laundry, photo processing, and welding. These uses of the Site and adjacent properties may have involved the use and disposal of hazardous materials, including paints, solvents, metals and petroleum products. These historic uses are considered potential RECs.

3.5 New York City Department of Buildings

Information obtained from the New York City Department of Buildings (NYCDOB) Building Information System (BIS) was reviewed. The NYCDOB Property Profile Overviews indicate that E-designations for hazardous materials and noise have been placed on all three Site lots. The information provided on the one available Certificate of Occupancy (C of O) for Lot 64, dated in the early 1900s, was illegible. Information contained on C of Os for Lots 62 and 63 is summarized below.

Lot 62

C of O dated 4/4/38 - references a four-story building with a cellar and store on the first floor and dwellings on the second floor; floors three and four are to remain vacant.

Temporary C of O dated 1947 (exact date illegible) – references a one-story building; first floor used for auto repair and welding and an office located on the mezzanine. A note reads, “Spray booth not to be used during the term of this certificate.”

Lot 63

C of O dated 4/18/27 – references a four-story building with a cellar, a store on the first floor and dwellings on floors two through four.

C of O dated 1944 (exact date illegible) – references a four-story building with two stores on the first floor and dwellings on floors two and three; the fourth floor is vacant.

The 1947 temporary C of O for Lot 62 references auto repair operations, welding and a paint spray booth. These historic operations are potential RECs.

3.6 Title Search

Tenen reviewed documentation (deeds and easements) available from NYC ACRIS. This information does not indicate the presence of a REC.

3.7 Environmental Liens/Activity and Use Limitations

As detailed in Section 1.6.1, the User is not aware of any environmental liens or activity and use limitations.

3.8 Historical Interviews

The User requested information from the owner of the Site, including information listed in the interviews section and list of helpful documents included in ASTM 1527-05. The User completed a User Questionnaire and any additional information provided from the User is included in this Phase I ESA where appropriate. The Owner was not available for an interview, which is considered a data gap; based on the historical information available, this is not considered a significant data gap.

3.9 Historical Use Information Summary

Site. The site and surrounding areas are shown as developed urban land since at least 1887. The 1887 Sanborn map shows a two-story building with a carpentry shop and clothing manufacture on Lot 64 and residential buildings with stores on the remaining lots. Additional uses of Lot 64 included bookbinding, with a printing area shown in the eastern part of the Site (north of the current Lot 63) in the 1915 map, unspecified manufacturing (1938 and 1950 maps), an electrical company (maps dated 1969 through 1988), and auto repair (maps dated 1989 through 2007, the date of the last available map). Maps dated 1938 through 2007 also show a small two-story building on the eastern part of Lot 64 with the ground floor marked "auto" and storage on the second floor. Lot 63 is shown with residential and unspecified commercial uses on all maps; however, the city directory includes a 1928 listing for an auto radiator works, as well as listings indicating sale and/or storage of auto parts between 1934 and 1992. Lot 62 was originally developed with dwellings and a first floor store, with first floor wagon storage shown in 1904 and 1915, and auto repair (fender works), depicted on maps dated 1950 through 2007. Auto repair operations on this lot are further documented by the 1934-1997 city directory listings, and the 1944 C of O, which references auto repair, welding, and a paint spray booth at this location.

Adjoining and Surrounding Properties. The lots to the north are shown as primarily residential in maps dated 1887 through 2007, with the Site bordered by the vacant rear portions of the dwellings located along Lefferts Place. The available Sanborn maps for the south adjacent properties indicate that these lots were initially developed with dwellings and stores, and, by 1979, with commercial and industrial uses. City directory listings dated 1934 through 2005 indicates auto-related uses as early as 1934, with later uses including plumbing (1960-1976), sewer cleaning (1960), packing (1949-1985), garage (1934), auto repair (1945-1992), refrigerator manufacture (1997), mechanical company (1992-1997), industrial laundry (1960), and furniture refinishing (1970-1973). The Sanborn maps show the east adjacent lot with a dwelling and store from prior to 19887 through sometime prior to 1950, with maps dated 1950 through 2007 depicting an auto repair shop at this location. The city directories list additional uses, including oil and electrical companies (1934), welding (1940), woodworking (2005, 2013), restaurant supply (2005-2013), and an HVAC contractor (2008). The west adjacent property remained vacant until sometime between 1915 and 1938, with the 1938 map showing a large building used for tire service and repair with a 1,000-gallon underground gasoline tank. The tank is shown in all maps through 1986; the area of the tank is illegible in later maps. No additional changes in use of the west adjacent lot are shown through 2007. Based on the city directory listings, other uses of this property included an auto service station/garage (1928), auto salvage (1940), canvas products (1945) photography lab (1949), plastics company (1960), roofing contractor (1980-2013), ceramics (1985-1997), and building supply (1985 and 2013).

Regarding the surrounding properties, the earlier maps show the area already developed with dwellings, stores and some institutional uses. By 1938, increasing industrial and vehicle-related uses were present, including a vulcanizing operation to the west on the Site block, a commercial garage to the north and a large service station/repair shop (with two gasoline tanks and a paint spray booth) on the east adjacent block. Maps dated 1950 through 1979 show increasing auto-related uses, including additional auto repair

shops to the east on the Site block, and auto repair and a filling station south of the Site along Atlantic Avenue. While uses of individual lots may have changed, the nature of the surrounding area remained relatively constant through 2007, the date of the last available map.

Regarding the site and adjacent/surrounding properties, the results of the city directory, historic topographic map and aerial photograph review are generally consistent with the usage depicted on the historic Sanborn maps, although the city directory listings provide information on Site and adjacent property uses beyond that shown on the maps. A review of the historic information identified a gasoline storage tank on a west adjacent lot and historic uses of the Site and adjacent and surrounding properties which likely involved the use and disposal of hazardous materials, including paints, solvents, metals and petroleum products. These historic uses are considered potential RECs.

4.0 RECORDS REVIEW

Database information was provided by Environmental Data Resources (EDR) on December 19, 2014. Several available federal and state databases were searched using standard radii, as detailed in ASTM 1527-05. The database search report, including definitions and descriptions, is included in Appendix D.

4.1 Federal, State/Tribal and Proprietary Databases

Listings for the Site were identified on EDR's proprietary E-DESIGNATION database. The information reviewed indicates that E-designations for hazardous materials and noise have been placed on all three Site lots.

Records for surrounding properties show that multiple properties within the standard search radii are listed in the LTANKS, HIST LTANKS and NY Spills and NY Historic Spills, and NY/NJ manifest databases, and multiple nearby sites have registered storage tanks. Each of these categories is detailed below. The following databases contain sites within the standard search radii.

Summary of Databases with Identified Sites

Database	Description	Radius	Facilities
CERCLIS	The CERCLIS database contains data on potentially hazardous waste sites reported pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act, including sites which are either proposed to or on the NPL and sites which are in the screening and assessment phase for possible inclusion on the NPL.	0.5 mi	1
RCRA-LQG	RCRAInfo is USEPA's information system on sites that generate, transport, store treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators generate over 1,000 kg of hazardous waste or over 1 kg of acutely hazardous waste per month.	0.25 mi	4
RCRA-CESQG	RCRAInfo is USEPA's information system on sites that generate, transport, store treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). The RCRA-CESQG database includes conditionally-exempt small quantity generators (CESQGs) which generate less than 100 kilograms (kg) of hazardous waste or less than 1 kg of acutely hazardous waste, per month.	0.25 mi	5
SWF/LF	The SWF/LF database typically contains an inventory of solid waste disposal facilities or landfills.	0.5 mi	4
NY UST / NY AST	The NY UST and NY AST databases include site with registered USTs or ASTs, respectively.	0.25 mi	12(UST) 24(AST)
NY TANKS	The TANKS database contains records of facilities that are or have been regulated under the Bulk Storage Program. Tank information for these facilities may not be releasable by the state agency.	0.25mi	1

Database	Description	Radius	Facilities
NY LTANKS	The NY LTANKS database includes an inventory of reported leaking storage tank incidents from April 1, 1986 through present	0.5 mi	39
HIST UST	The HIST UST database is based on information in the NYSDEC PBS database and contains registered USTs prior to 2002; current data is included on the NY UST database	0.25 mi	5
NY SPILLS	The NY Spills database includes data on spills reported to the New York State Department of Environmental Conservation (NYSDEC).	0.125mi	11
RCRA-Non-Gen	RCRAInfo is USEPA's information system on sites that generate, transport, store treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). The RCRA-NonGen database includes sites that do not presently generate hazardous waste.	0.25 mi	37
NY/NJ MANIFEST	MANIFEST databases include documents that list and track hazardous waste from the generator through transporters to a storage or disposal facility.	0.25 mi	104
NY DRYCLEANERS	The DRYCLEANERS database contains a listing of all registered dry cleaning facilities	0.25 mi	1

4.1.1 Federal- and State-Listed Facilities

Site. All three Site lots are listed on the EDR proprietary E-DESIGNATION database. The information provided on the E-DESIGNATION database indicates that E-designation E-138 for Underground Tanks Testing Protocol (i.e., hazardous materials) and window-wall attenuation (i.e., noise) has been placed on the Site by the New York City Department of City Planning in conjunction with an area-wide rezoning. The listing of a property on the E-DESIGNATION database is not considered a REC.

Adjoining and Surrounding Properties. The database listings for adjoining and surrounding properties within the standard search radii were reviewed. Many of these listings pertain to locations that are downgradient or a considerable distance from the Site or reference leaking tank and spills cases that have been closed and listings with no recorded releases and/or violations. The following discussion focuses on listings for properties where the available information indicates the potential for migration of contaminants to the Site.

Con Edison – Manhole 14828 (960 Atlantic Avenue), located approximately .019 mile southwest and upgradient of the Site, is listed on the RCRA-LQG database. The information reviewed indicates that lead waste (D008) was generated at this location in 2009, likely as a result of manhole maintenance. No violations were noted and this listing is not considered a REC.

Grand Recycling Corporation (535 Grand Avenue), located approximately .12 mile gradient of the Site, is listed on both the SWF/LF and NY SPILLS databases. This location is an inactive transfer station and no violations were recorded. The NY SPILLS listing references Spill No. 0108870, which pertains to an abandoned drum on the property. Based on the records, no drum was located by NYSDEC and the spill number was closed on 5/1/02. These listings are not considered RECs.

921 Atlantic Avenue and 923 Atlantic Avenue are listed on the EDR proprietary US Hist Auto Stat database. The database records indicate historic auto repair at 921 Atlantic Avenue (.013 mile from the Site) in 1999, 2001 through 2005 and 2007 through 2009; and auto repair operations at 923 Atlantic

Avenue (.017 mile from the Site) in 2001. Both locations are east of the Site on the Site block and these listings are a potential REC.

Two potential offsite RECs, the listings for 921 and 923 Atlantic Avenue on the US Hist Auto Stat database, were identified based upon a review of the regulatory database.

4.1.2 FOIL Requests

On January 9, 2015, Freedom of Information Law (FOIL) requests for information pertaining to the Site were filed with the following state and city agencies: New York State Department of Environmental Conservation (NYSDEC), New York State Department of Health (NYSDOH), New York City Department of Environmental Protection (NYCDEP), New York City Department of Health and Mental Hygiene, (NYCDOHM) and the New York City Fire Department (FDNY). To date, responses have been received from NYSDEC and NYSDOH, indicating that no records have been located. If any future response changes the conclusions of this report, Tenen will issue an addendum to this Phase I ESA.

5.0 SITE RECONNAISSANCE

On December 23, 2014, Kristen Meisner of Tenen Environmental conducted Site reconnaissance at the subject property and adjoining properties. The weather was overcast and raining, in the mid 40-degrees Fahrenheit.

5.1 Site Observations

The Site, located at 911-917 Atlantic Avenue, Brooklyn, New York, is an irregular-shaped parcel of approximately 13,952 square feet, which lies along the north side of Atlantic Avenue between St. James Place and Grand Avenue. The Site is occupied by three buildings along Atlantic Avenue, as well as external storage facilities and parking space.

The westernmost portion of the Site (911 Atlantic Avenue) contains a three-story building with a cellar and associated detached storage facilities. The property is currently occupied by H. Schacht Electrical Supply, and includes an office and storefront space located on the first floor; the second and third floors are used as storage. A steam boiler located within the Boiler Room of the cellar space is used to heat all three floors; some staining was observed near the boiler. The Site Manager noted that the steam boiler utilized a beveled pitch to accumulate condensate, which would be flushed directly into the sewer, although this process has not occurred since the current management took over five years ago.

Two 275-gallon fuel oil aboveground storage tanks (ASTs) on lifts were located in the cellar. A conveyor belt was identified in the cellar leading up to the first floor; however, no hydraulic equipment was noted. Additionally, a freight elevator on the Site did not contain hydraulic equipment. The elevator shaft room was located on the roof; however, there was no access to this room during Site reconnaissance due to inclement weather.

A four-story building with a cellar (915 Atlantic Avenue) is currently used as storage/commercial space on the first floor, with one residential unit located on each of the three aboveground floors. During the Site reconnaissance, no representative apartments could be accessed. Each of the three residential spaces utilizes individual boilers located outside of each apartment. No staining was observed. Electrical panels for this property are located in the cellar space, which is additionally used for storage.

A two-story commercial building with cellar, located at 917 Atlantic Avenue, currently contains machinery used for wire cutting. The Site Manager noted that the space has previously been used as an auto shop with a back section of the property used for automotive primer spray painting. Electrical panels were identified in the cellar space.

An asphalt-paved alleyway is located between 911 and 915 Atlantic Avenue, leading to a back parking lot with access to two storage facilities identified as 913 Atlantic Avenue. Some staining was observed in these areas.

The Site is connected to public and/or publically regulated utilities, including electric, stormwater and sewer. Electricity is provided by Consolidated Edison (Con Ed). Additionally high-efficiency ballasts were identified for lighting throughout the Site. Electrical transformers were not identified on-Site.

The on-Site stormwater management consists of roof surface pitch to interior roof drains. The interior roof drains connect to the on-Site storm drain systems, which in turn connect to the outgoing sewer mains. The Site does not appear to accept stormwater drainage from off-Site sources. The storm water flow along the sidewalks fronting the property is diverted via sheet flow to municipal storm sewers.

A summary of the Site reconnaissance is included in the table below:

Summary of Site Reconnaissance Features

Feature	Present on-Site
Aboveground storage tanks (ASTs) or evidence of ASTs	Yes
Underground storage tanks (USTs) or evidence of USTs	No
Strong, pungent, or noxious odors	No
Pools of liquid likely to be hazardous materials or petroleum products	No
Drums	No
Unidentified substance containers	No
PCB-containing equipment	No
Subsurface hydraulic equipment	No
Heating/ventilation/air conditioning (HVAC)	Yes
Stains or corrosion on floors, walls, or ceilings (other than water)	Yes
Floor drains or sewer pit	No
Pits, ponds, or lagoons	No
Stained soil and/or pavement	No
Stressed vegetation	No
Waste or wastewater discharges to surface or surface waters on subject site (including stormwater)	No
Wells (irrigation, domestic, dry, injection, abandoned, monitoring)	No
Septic systems	No

No evidence of a REC was observed during Site reconnaissance.

5.2 Adjoining and Surrounding Properties

The surrounding area is predominantly a mixture of industrial and residential uses, with some commercial uses. The Site is bordered by Lefferts Place to the north, Atlantic Avenue to the south, Grand Avenue to the east, and St. James Place to the west. Adjoining properties include:

Direction	Use
East	1-story commercial property.
West	2-story Premier Roofing Co. commercial property.
North	4-story residential properties.
South	2- and 3- story commercial and residential spaces along the south side of Atlantic Avenue.

Fill ports were observed at several surrounding properties; however, there is no evidence of a release and the fill ports are not considered a REC.

5.3 Asbestos, Lead Paint and Radon

While not specifically included in the Phase I ESA scope of work, Tenen performed an assessment of the property for the potential presence of asbestos, lead paint and radon. The findings are described below.

5.3.1 Asbestos-Containing Material (ACM)

Several potential asbestos-containing materials (ACM) were observed, including pipe insulation, roofing materials and caulking. Based upon the age of the buildings, suspect ACM may also be located in inaccessible areas. No results or information regarding previous sampling for ACM was made available on Site.

5.3.2 Lead-Based Paint (LBP)

No evidence of lead-based paint (LBP) was observed; however, paint chipping was observed throughout indoor spaces. Based on the age of the buildings, LBP may be present in the buildings.

5.3.3 Radon

The site is located within EPA Zone 3 for radon. This zone contains an indoor average level of less than 2 picoCuries per liter, which is the lowest designation. Therefore, radon does not appear to be an environmental concern at this Site.

6.0 FINDINGS / OPINIONS

Tenen has conducted a review of ascertainable records and historical documentation in relation to the Site, adjacent properties and those within standard search radii. Site reconnaissance was conducted.

The Site, located at 911-917 Atlantic Avenue, Brooklyn, New York, is an irregular-shaped parcel of approximately 13,952 square feet, which lies along the north side of Atlantic Avenue between St. James Place and Grand Avenue. The property is currently occupied by three buildings. The westernmost portion of the Site (Lot 64) contains a three-story building with a cellar and associated detached storage facilities and is occupied by an electrical supply company. A four-story building with a cellar (Lot 63) is currently used as storage/commercial space on the first floor, with one residential unit located on each of the three aboveground floors. A two-story building with a cellar is located at 917 Atlantic Avenue (Lot 62) and currently contains machinery used for wire cutting. Information obtained during the Site reconnaissance indicates that this lot was previously used for auto repair, with spray painting operations in the rear section of the property. The prior use of a portion of the Site for auto repair operations is considered a REC.

The site and surrounding areas have been developed urban land since at least 1887. The Site was initially developed with a two-story building with a carpentry shop and clothing manufacture on Lot 64 and residential buildings with stores on the remaining lots. Subsequent uses of Lot 64 included bookbinding, (including a printing area shown in the eastern part of the Site) (1915 map), manufacturing (1938 and 1950 maps), an electrical company (1969–1988 maps), and auto repair (1989–2007 maps). A small two-story building on the eastern part of Lot 64 with notations for “auto” and storage” is shown on maps dated 1938 through 2007. Lot 63 is shown with residential and unspecified commercial uses on all maps; however, the city directory includes a 1928 listing for an auto radiator works, and listings indicating sale and/or storage of auto parts between 1934 and 1992. Non-residential uses of Lot 62 include wagon storage (1904-1915, and auto repair (1950 through 2007). Based historic information and the Site reconnaissance, a paint spray booth was also located on this lot.

The lots to the north have been primarily residential since at least 1887. The south adjacent properties were initially developed with dwellings and stores, and, by 1934, with commercial and industrial uses, primarily auto-related. Later uses include plumbing (1960-1976), sewer cleaning (1960), packing (1949-1985), garage (1934), auto repair (1945-1992), refrigerator manufacture (1997), mechanical company (1992-1997), industrial laundry (1960), and furniture refinishing (1970-1973). By 1887, the east adjacent lot had been developed with a dwelling and store. Prior to 1950, an auto repair shop began operations on this lot, continuing through at least 2007. Additional uses, noted in the city directories, include oil and electrical companies (1934), welding (1940), woodworking (2005, 2013), restaurant supply (2005-2013), and an HVAC contractor (2008). The west adjacent property was vacant until prior to 1938, when it was developed with a large building used for tire service and repair; the Sanborn maps through 1986 show a 1,000-gallon underground gasoline tank in the western part of the building. Later maps are illegible and it is unknown if the tank was present after that date. Other uses of this property have included an auto service station/garage (1928), auto salvage (1940), canvas products (1945) photography lab (1949), plastics company (1960), roofing contractor (1980-2013), ceramics (1985-1997), and building supply (1985 and 2013).

The earlier maps show the area already developed with dwellings, stores and some institutional uses, and, by 1938, with increased industrial and vehicle-related uses. These included a vulcanizing operation to the west on the Site block (later replaced by a tinsmith, and, subsequently, by a tire service), a commercial garage to the north and a large service station/repair shop (with two gasoline tanks and a paint spray booth) on the east adjacent block. Maps dated 1950 through 1979 show additional auto repair shops to the east on the Site block, and auto repair and a filling station south of the Site along Atlantic Avenue.

While uses of individual lots may have changed, the nature of the surrounding area remained relatively constant through 2007, the date of the last available map.

Regarding the site and adjacent/surrounding properties, the results of the city directory, historic topographic map and aerial photograph review are generally consistent with the usage depicted on the historic Sanborn maps, with the city directory listings providing additional information on Site and adjacent property uses. A review of the historic information identified a gasoline storage tank on the west adjacent lot and historic uses of the Site and adjacent and surrounding properties which likely involved the use and disposal of hazardous materials, including paints, solvents, metals and petroleum products. These historic uses are considered RECs.

The database search indicated numerous listings of properties within the standard search radii on multiple regulatory databases. Many of these listings are located a significant distance from and/or downgradient of the Site. All three Site lots are listed on the EDR E-DESIGNATION database, indicating that E-designation E-138 for Underground Tanks Testing Protocol (i.e., hazardous materials) and window-wall attenuation (i.e., noise) has been placed on the Site by the New York City Department of City Planning in conjunction with an area-wide rezoning. The listing of a property on the E-DESIGNATION database is not considered a REC. Two offsite RECs, the listings for 921 and 923 Atlantic Avenue on the US Hist Auto Stat database, were identified based upon a review of the regulatory database.

7.0 CONCLUSIONS

Tenen has performed a *Phase I Environmental Site Assessment*, in conformance with the scope and limitations of ASTM Practice E 1527-13, for 911-917 Atlantic Avenue, Kings County, New York. Any exceptions to, or deletions or deviations from this practice are described in Section 1.4 of this report. This assessment has revealed *no evidence of recognized environmental conditions* in connection with the property with the exception of the following:

- historic use of the Site for auto repair, printing, and manufacturing
- historic uses of adjacent and surrounding properties which likely involved the use and disposal of hazardous materials, including paints, solvents, metals and petroleum products
- a historic, potentially existing, underground gasoline storage tank on the property directly west of the Site

8.0 DECLARATION

I, Matthew Carroll, declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training and experience to assess a site of the nature, history and setting of the subject Site. I have developed and performed the All Appropriate Inquires in conformance with the standards and practice set forth in 40 CFR Part 312.

Matthew Carroll
Environmental Professional

Re: Due Diligence Investigation
911-917 Atlantic Avenue—Brooklyn, NY
Block 2018, Lots 62, 63 and 64

Dear Joseph,

This letter report summarizes the findings and recommendations pertaining to the Phase I Environmental Site Assessment (Phase I ESA) and investigation activities performed by Tenen Environmental (Tenen) at the above property (the Site). The report includes a description of the sampling methodology and discusses the analytical results.

Background

The Site, located at 911-917 Atlantic Avenue, Brooklyn, New York, is an irregular-shaped parcel of approximately 13,952 square feet, which lies along the north side of Atlantic Avenue between St. James Place and Grand Avenue. The Site has approximately 100.5 feet of frontage along Atlantic Avenue and is approximately 100 feet (Lots 62 and 63) to 138 feet deep (Lot 64). Other addresses associated with the Site are 907-911 Atlantic Avenue, 911 Rear Atlantic Avenue and 915 Rear Atlantic Avenue. The tax map designation of the property is Block 2018, Lots 62, 63 and 64. Lot 64, the westernmost part of the Site, contains a three-story building with a cellar along with associated detached storage facilities. A four-story building with a cellar (Lot 63) is currently used as storage/commercial space on the first floor, with one residential unit located on each of the three aboveground floors. A two-story building with cellar is located at 917 Atlantic Avenue (Lot 62) and is currently being used for commercial space with machinery used for wire cutting.

All Site lots are zoned R7-A and Lot 64 is also zoned R6-B, designations which denote medium density areas with high lot coverage buildings. The Site also has a C2-4 commercial overlay, which allows for commercial uses that serve local residential needs. A Site Location Map is included as Figure 1.

The Site has an e-designation placed on the property by the New York City Department of City Planning (NYCDCP). The presence of the e-designation will require implementation of an investigation work plan approved by the Mayor's Office of Environmental Remediation (OER) and in accordance with the City Environmental Quality Review (CEQR) Technical Manual.

The Site is located near several sub-grade transit structures, including the Long Island Rail Road (LIRR) Atlantic Branch along Atlantic Avenue and the NYC Subway C line along Fulton Street. The scope of work included shallow sampling only.

Based on the Phase I ESA performed by Tenen in January 2015, the following Recognized Environmental Conditions (RECs) were identified:

- historic use of the Site for auto repair, printing, and manufacturing;
- historic uses of adjacent and surrounding properties which likely involved the use and disposal of hazardous materials, including paints, solvents, metals and petroleum products; and,

- a historic, potentially existing, underground gasoline storage tank on the property directly west of the Site.

The scope of the due diligence investigation was designed to address the findings of Tenen’s Phase I ESA. This investigation did not meet all of the e-designation program requirements; however, samples were collected consistent with City Environmental Quality Review (CEQR) requirements in order that the data could be used as part of the e-designation investigation.

Site Geology and Hydrogeology. The scope of work included the collection of shallow soil samples to a depth of approximately two feet below grade. Approximately six inches of concrete was underlain by fill material including ash, cinders and fine to medium sand at each of the three locations.

Groundwater was not encountered during due diligence investigations. Based on Tenen’s Phase I ESA, groundwater is expected to be between 51 and 75 feet below the ground surface. Groundwater flow is assumed to be locally east.

Sampling Methodology. The methodologies used to collect shallow soil and soil vapor samples are summarized below. The investigation was completed on January 9, 2015. A Site Map depicting all sampling locations is included in Figure 2.

Soil. A total of three exterior shallow soil samples were taken within the parking area at the Site from locations under six inches of concrete. Samples were collected using a hand auger. Refusal was encountered in each boring at approximately two feet below grade.

The soil was identified as fill material that was predominately sands, ash and cinders. No odors or staining was observed during due diligence investigations.

Soil Gas Sampling. A total of six soil vapor points were installed below the cellar concrete slabs within the three buildings fronting Atlantic Avenue; two points were installed per building, located at the north and south ends of each. One sample from each location was collected from approximately six inches below the basement slab. The basement slab was identified at a thickness of approximately four to five inches. Sample 911SV-1 was installed adjacent to two fuel oil aboveground storage tanks (ASTs) identified during the Phase I ESA.

Soil screening using a photoionization detector (PID) readings were recorded during the pre-sampling soil vapor point screening for all samples.

A summary of sample designations, media sampled and locations is shown below:

Sample Locations, Sample Designations and Media Sampled

Sample Name (Depth in ft-bg)	Sample Type	PID (ppm)	Description of Location
911SV-1	Soil Vapor	0.0	South end, basement level of 911 Atlantic Avenue
911SV-2	Soil Vapor	0.0	North end, basement level of 911 Atlantic Avenue
915SV-3	Soil Vapor	0.0	North end, basement level of 915 Atlantic Avenue
915SV-4	Soil Vapor	0.0	South end, basement level of 915 Atlantic Avenue
917SV-5	Soil Vapor	0.0	South end, basement level of 917 Atlantic Avenue
917SV-6	Soil Vapor	0.0	North end, basement level of 917 Atlantic Avenue
SS-1 (0-2)	Shallow Soil	0.0	Entrance of storage facility, parking lot

Sample Name	Sample	PID (ppm)	Description of Location
SS-2 (0-2)	Shallow Soil	0.0	Parking area; southwest, center
SS-3 (0-2)	Shallow Soil	0.0	Parking area; southeast, center

Analytical Results

The samples were preserved on ice and sent under chain-of-custody documentation to Alpha Analytical, Inc. (Alpha). Alpha is certified by the New York State Department of Health (NYSDOH) Environmental Laboratory Approval Program (ELAP) as LABIDs 11148 and 11627. Soil samples were analyzed for volatile organic compounds (VOCs), semivolatile organic compounds (SVOCs), pesticides, polychlorinated biphenyls (PCBs) and Target Analyte List (TAL) metals. Soil vapor samples were analyzed for TO-15 VOCs. Two samples with elevated lead were also analyzed for Toxicity Characteristic Leachate Procedure (TCLP) lead.

The soil results were compared to the New York State Department of Environmental Conservation (NYSDEC) Unrestricted Use soil cleanup objectives (SCOs) as listed in 6 NYCRR Part 375-6.8(a) and Restricted-Residential Use SCOs as listed in 6 NYCRR Part 375-6.8(b) and Commissioner's Guidance CP-51.

Soil vapor results were compared to the New York State Department of Health (NYSDOH) Air Guidance Values (AGVs), Soil Vapor/Indoor Air Matrices and three (3) databases based on background studies and referenced in the NYSDOH Soil Vapor Guidance, including the following:

- Upper fence indoor air values from Table C1, NYSDOH 2003: Study of Volatile Organic Chemicals in Air of Fuel Oil Heated Homes;
- 90th percentile indoor air values from Table C2, EPA 2001: Building Assessment and Survey Evaluation (BASE) Database, and
- 95th percentile indoor air values from Table C5, Health Effects Institute (HEI) 2005: Relationship of Indoor, Outdoor and Personal Air

Note that the AGVs and background values apply to indoor air concentrations; however, they are used in this report to screen the soil vapor results.

Soil vapor and soil sample results are included in Tables 1 through 5. Laboratory deliverables are included in Appendix 2.

Soil

No VOCs or SVOCs were detected in shallow soil samples at concentrations above the Unrestricted Use SCOs. Acetone was the only VOC detected in all three samples; however, concentrations are well below Unrestricted Use SCOs.

The following metals were identified above Restricted-Residential Use include the following: arsenic, barium, cadmium, iron, lead and mercury. The highest concentrations were detected in sample SS3 (0-2). Arsenic was detected at 28 milligrams per kilogram (mg/kg), above the Restricted-Residential SCO of 16 mg/kg. Barium was detected at 640 mg/kg, above the Restricted-Residential SCO of 350 mg/kg. Cadmium was detected at 2.8 mg/kg, above the Restricted-Residential SCO of 2.5 mg/kg. Iron was detected at 30,000 mg/kg, above the Restricted-Residential SCO of 2,000 mg/kg. Lead was detected at 1,100 mg/kg, above the Restricted-Residential SCO of 400 mg/kg. Mercury was detected at 9.6 mg/kg, above the Restricted-Residential SCO of 0.81 mg/kg. TCLP lead was detected at an estimated concentration of 0.20 milligrams per liter (mg/l) in sample SS1 (0-2) and an estimated concentration of 0.48 mg/l in sample SS3 (0-2); both concentrations are below the threshold of 5 mg/l SS1 (a hazardous designation).

At shallow soil location SS3 (0-2), two pesticides, 4,4'-DDE and 4,4'-DDT, were detected above the Unrestricted Use SCOs but well below Restricted-Residential Use SCOs. The PCB Aroclor 1260 was also detected above the Unrestricted Use SCOs but well below Restricted-Residential Use SCOs.

Soil Vapor

Several compounds were detected in the soil vapor samples collected at the Site. No compounds were detected above the NYSDOH AGVs. The only compound detected with an association to a NYSDOH Matrix includes tetrachloroethene, which was detected to be the highest at 911SV-1 with a concentration of 4.88 micrograms per cubic meter (ug/m³), well below the NYSDOH AGV of 30 ug/m³. The matrix associated with this compound (Matrix 2) indicates that no monitoring or mitigation is required for concentrations below 100 ug/m³.

Acetone, a common laboratory artifact, was detected at all six locations. Three petroleum-related compounds were detected above the highest background concentration: 1,3-butadiene (max 8.78 ug/m³ at 911SV2); 1,2,4-trimethylbenzene (max 55.1 ug/m³ at 911SV-1); and, 1,3,5-trimethylbenzene (max 3.7 ug/m³ at 911SV-2). These concentrations may be related to minor impacts from the nearby ASTs and/or boiler room.

Findings and Conclusions

The due diligence investigation indicated the following:

- two 275-gallon capacity ASTs are present at the Site;
- no evidence of a major petroleum release was detected during the subsurface investigation;
- fill material containing ash and cinders was observed to depth of approximately two feet below grade in the parking area. Refusal was met at approximately two feet in all borings;
- soil sampling indicated the presence of fill-related impacts, in particular elevated metals, above the Restricted-Residential SCOs. TCLP lead sampling indicated that these samples were not hazardous based on the lead concentrations; and,
- groundwater, which was not sampled, is estimated to be between 51 and 75 feet below grade.

Based on these findings, Tenen recommends the following:

- the results of the environmental investigation should be presented to OER along with a work plan to complete additional sampling. Sampling would include, at a minimum, deeper soil samples and groundwater samples. Deeper borings would need to be permitted by relevant transit authorities;
- once the building design is finalized, Remedial Action Plans (RAPs) and a Construction Health & Safety Plan (CHASP) should be developed to address each of the e-designations; and,
- the hazardous materials RAP should include managed off-site disposal of soil, removal of all ASTs in accordance with state and local regulations, implementation of a Community Air Monitoring Plan (CAMP) and installation of a composite cover system that includes a vapor barrier beneath all occupied spaces.

Please contact us if you need any additional information.

Sincerely,
Tenen Environmental, LLC

NY-UNRES = New York State Part 375 Unrestricted Use SCOs
 NY-RESR = New York State Part 375 Residential Criteria, NY Restricted Use SCOs
 SCO = Soil Cleanup Objective
 MDL = Maximum Detection Limit
 RL = Reporting Limit
 Qual = Laboratory Data Qualifier
 Cells highlighted in yellow indicate concentrations above Unrestricted Use SCOs
 Cells shaded in grey indicate detection limits above Unrestricted Use SCOs
 For U qualified entries, the MDL is shown
 U = not detected at or above the MDL
 For J qualified entries, the estimated concentration is shown
 J = estimated value, indicating the detected value is below the RL, but above the MDL
 Results and MDL values are in milligrams per kilogram (mg/kg)
 Soil sample depths shown in feet below grade
 -- = No standard

NYSDOH AGV = New York State Department of Health Air Guidance Values
NYSDOH Matrix = number of the Soil Vapor/Indoor Air decision matrix from the NYSDOH Soil Vapor Guidance, October 2006
NYSDOH AGV and Matrix values from NYSDOH Soil Vapor Guidance, October 2006, except for the revised NYSDOH AGV for PCE from Fact Sheet: Tetrachloroethene (PERC) in Indoor & Outdoor Air, September 2013
NYSDOH 2003 Fuel Oil Indoor Air = New York State Department of Health indoor air guidance value, Upper Fence background level
EPA 2001 Indoor Air = Environmental Protection Agency indoor air guidance value, 90th percentile background level
HEI 2005 = Health Effects Institute air guidance value, 95th percentile background level
Cells highlighted in yellow and in bold indicate concentrations above the NYSDOH AGV
Cells highlighted in yellow indicate concentrations above the highest of the background levels
Cells shaded in gray indicate MDL values above the AGV or the highest of the background levels
RL = Reporting Limit
Qual = Laboratory Data Qualifier
For U qualified entries, the RL is shown
U = not detected at or above the RL
Results and RL values are in micrograms per cubic meter (ug/m3)
Matrix actions are described in the report narrative and the NYSDOH Soil Vapor Guidance, October 2006

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Authorized Signature:  Cynthia McQueen

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

Report Format: DU Report with 'J' Qualifiers

Project Name: 911-917 ATLANTIC AVE.
Project Number: 917 ATLANTIC

Lab Number: L1501140
Report Date: 01/22/15

Data Qualifiers

- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

Last revised December 16, 2014

The following analytes are not included in our NELAP Scope of Accreditation:

Westborough Facility

EPA 524.2: Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

EPA 8260C: 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

EPA 8270D: 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

EPA 625: 4-Chloroaniline, 4-Methylphenol.

SM4500: Soil: Total Phosphorus, TKN, NO₂, NO₃.

EPA 9071: Total Petroleum Hydrocarbons, Oil & Grease.

Mansfield Facility

EPA 8270D: Biphenyl.

EPA 2540D: TSS

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water

EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

EPA 300.0: Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

EPA 332: Perchlorate.

Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Project Number: 917 ATLANTIC AVE

Lab Number: L1500504
Report Date: 01/16/15

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Case Narrative (continued)

Volatile Organics in Air

Canisters were released from the laboratory on January 8, 2015. The canister certification results are provided as an addendum.

The sample designated 917 SV-5 (L1500504-05) had a RPD for the pre- and post-flow controller calibration check (78% RPD) that was outside of the control limit (20% RPD). The initial flow rate for the flow controller was 17.7 mL/minute; the final flow rate was 7.8 mL/minute. The final pressure recorded by the laboratory of the associated canister was -5.1 inches of mercury.

The sample designated 917 SV-6 (L1500504-06) had a RPD for the pre- and post-flow controller calibration check (65% RPD) that was outside of the control limit (20% RPD). The initial flow rate for the flow controller was 17.9 mL/minute; the final flow rate was 35.0 mL/minute. The final pressure recorded by the laboratory of the associated canister was -5.7 inches of mercury.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Authorized Signature:  Christopher J. Anderson

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a "Total" result is defined as the summation of results for individual isomers or Aroclors. If a "Total" result is requested, the results of its individual components will also be reported. This is applicable to "Total" results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

Report Format: Data Usability Report

Project Name: 911-917 ATLANTIC AVE
Project Number: 917 ATLANTIC AVE

Lab Number: L1500504
Report Date: 01/16/15

Data Qualifiers

- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the reporting limit (RL) for the sample.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

Last revised December 16, 2014

The following analytes are not included in our NELAP Scope of Accreditation:

Westborough Facility

EPA 524.2: Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

EPA 8260C: 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

EPA 8270D: 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

EPA 625: 4-Chloroaniline, 4-Methylphenol.

SM4500: Soil: Total Phosphorus, TKN, NO₂, NO₃.

EPA 9071: Total Petroleum Hydrocarbons, Oil & Grease.

Mansfield Facility

EPA 8270D: Biphenyl.

EPA 2540D: TSS

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water

EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

EPA 300.0: Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

EPA 332: Perchlorate.

Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water

EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1: Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

EPA 624: Volatile Halocarbons & Aromatics,

EPA 608: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

EPA 625: SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

Microbiology: **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

2014 New York City Energy Conservation Code (NYCECC)

2011 NYCECC Continuous Air Barrier Requirement -

1. Except in unheated structures and as permitted by this section (Chapter 5 Commercial Energy Efficiency), a continuous air barrier shall be installed; sealing all seams, openings, and penetrations of the building and shall be sealed with caulking materials or closed with gasketing systems compatible with the construction materials and location.

2. Joints and seams shall be sealed in the same manner or taped or covered with a moisture vapor-permeable wrapping material. Sealing materials spanning joints between construction materials shall allow for expansion and contraction of the construction materials.

3. Such air barrier shall have all the following characteristics:
A. Continuous throughout the envelope with all joints and seams sealed and with sealed connections between all transitions in planes and changes in materials and at all penetrations.
B. Joined and sealed in a flexible manner to the air barrier component of adjacent assemblies, allowing for the relative movement of these assemblies and components.
C. Installed in accordance with the manufacturer's instructions and in such a manner as to achieve the performance requirements.
D. Penetrations of the continuous air barrier shall be made in a way such that the integrity of the continuous air barrier is maintained.

4. Compliance for continuous air barriers may be demonstrated using anyone of the following three methods:
A. Materials. Using individual materials that have an air permeability not to exceed 0.02 L/s m² under a pressure differential of 75 Pa [0.004 cfm/ft² under a pressure differential of 0.3 in. water (1.57 lb/ft²)] when tested in accordance with ASTM E 2178.
B. Assemblies. Assemblies of materials and components shall have an average air leakage not to exceed 0.2 L/s m² under a pressure differential of 75 Pa [0.04 cfm/ft² under a pressure differential of 0.3 in. water (1.57 lb/ft²)] when tested in accordance with ASTM E 2357 or ASTM E 1677. In addition these assemblies must meet the requirement for joints per Section 502.4.3.
C. Building. Testing the completed building and demonstrating that the air leakage rate of the building envelope does not exceed 2.0 L/s·m² under a pressure differential of 75 Pa [0.4 cfm/ft² under a pressure differential of 0.3 in. water (1.57 lb/ft²)] in accordance with ASTM E 779 or an equivalent approved method.

Building Envelope Insulation

1. In all cases where rigid insulation board is to be installed (e.g. below grade, above grade, roof), the insulation shall be tightly adjoined with no gaps between boards and flat against the respective substrate.

2. Interior and cavity insulation must be protected from air intrusion, moisture intrusion, and free of voids, gaps, and compression.

3. Cavity insulation must be in contact with the interior wall surface (e.g. drywall) and completely fill the interior wall cavity.

4. Batt insulation must be installed properly using splices to surround wires, electrical outlet/switch/junction boxes, pipes, and other obstructions within the insulated cavity.

5. Insulation that is intended to be continuous (interior or exterior) must be installed without breaks and at full thickness at all locations.

6. Insulation must be installed such that they achieve RESNET-defined Grade I installation or, alternatively, Grade II for walls with continuous insulation.

7. Metal-framed buildings must have continuous wall insulation.

8. Vapor impermeable air barriers for general coverage should only be specified on the warm side of insulation (i.e. interior side of insulation in predominately heating dominated climates). Vapor permeable air barriers should be specified in other cases.

Building Envelope Insulation

1. In all cases where rigid insulation board is to be installed (e.g. below grade, above grade, roof), the insulation shall be tightly adjoined with no gaps between boards and flat against the respective substrate.

2. Interior and cavity insulation must be protected from air intrusion, moisture intrusion, and free of voids, gaps, and compression.

3. Cavity insulation must be in contact with the interior wall surface (e.g. drywall) and completely fill the interior wall cavity.

4. Batt insulation must be installed properly using splices to surround wires, electrical outlet/switch/junction boxes, pipes, and other obstructions within the insulated cavity.

5. Insulation that is intended to be continuous (interior or exterior) must be installed without breaks and at full thickness at all locations.

6. Insulation must be installed such that they achieve RESNET-defined Grade I installation or, alternatively, Grade II for walls with continuous insulation.

7. Metal-framed buildings must have continuous wall insulation.

8. Vapor impermeable air barriers for general coverage should only be specified on the warm side of insulation (i.e. interior side of insulation in predominately heating dominated climates). Vapor permeable air barriers should be specified in other cases.

Exterior Air Barrier Application

1. **Sealant Materials:** Sealants shall have an expected life of at least 20 years as applied and be compatible with all substrate materials.

2. **Masonry Wall Preparation:** Ensure gaps are filled, joints struck, CMU is dry, and all snags are gone.

3. **General Coverage (Liquid Membrane):** Verify proper thickness of liquid-applied membranes using a wet mil gauge. At a minimum, substrate must not be visible.

4. **General Coverage at Adjacent Building Conditions (Liquid Membrane):** Where unable to install air barrier on the exterior of the building, a low VOC product shall be installed on the interior at full height (top of plank to bottom of plank at each floor). This shall happen before any interior framing is installed.

5. **General Coverage / Transition Membrane Seams:** Transition membranes shall be installed and sealed before insulation is installed on top. Seams shall be sealed with mastic type liquid membrane or with compatible sealant.

6. **Air Barrier Penetrations:** Air barrier penetrations shall be sealed with sealants compatible with all surfaces. Transition membranes shall be used to patch as necessary with seams sealed appropriately.

7. **Rough Openings (Concrete Masonry Construction) - Windows and Doors:**
A. Liquid air barrier shall wrap in at masonry rough openings to be flush with inside edge of window or door frame.
B. Sheet membrane or metal panel enclosure can be used as alternative as long as it is clear the air barrier is continuous and any gaps are sealed with back rod as necessary and sealant compatible with all surfaces.

8. **Rough Openings (Steel Stud Construction) - Windows and Doors:** Rough opening must be wrapped with sheet membrane all the way inside to be flush with inside edge.

9. **Rough Openings - Pipes, Conduits, Ducts, Etc:** Gaps shall be filled with backer rod as necessary and sealant compatible with all surfaces. Where smooth surfaces are present, mechanical gasket seals can be used.

10. **Rough Openings - Cast Stone Sills:** Cast stone sill shall be sealed to sill pan using compatible sealant where not sealed by grout.

11. **Rough Openings - Gap at Window Frames:** Gaps between window frame (header, jambs, sill) and rough opening shall be sealed on the interior with backer rod as necessary and sealant that is compatible with all surfaces.

12. **Rough Openings - Gap at Exterior Door Frames:** Gaps between door frame (header, jambs, threshold) and rough opening shall be sealed on the interior with backer rod as necessary and sealant that is compatible with all surfaces.

13. **Rough Openings - A/C Sleeves:**
A. Gaps between A/C sleeves and rough openings shall be sealed on the interior with backer rod as necessary and sealant that is compatible with all surfaces where not sealed by grout.
B. Insulated interior cover with compressible gasket must be provided for A/C sleeves.

14. **Plank Edges (Steel Stud Construction) - At plank / exterior sheathing joint:**
A. Transition membranes must be installed to span the sheathing / plank edge joint creating a bellows with backer rod. Transition membrane shall extend a minimum of 3" on each adjacent surface or per manufacturer's instructions.
B. Termination seams must be sealed with compatible sealant

15. **Plank Edges (Concrete Masonry Construction) - At plank / CMU joint**
A. Option 1 - If gap is greater than 1/4" Transition Membrane must be used to seal the gap with minimum 3" over lap
B. Option 2 - If gap is less than 1/4" Liquid Membrane can be used to seal the gap
C. Option 3 - When shelf angles are to be installed, through wall flashing must be draped from above to completely cover the joints at top and bottom edges of the plank and sealed to the shelf angle. The Liquid Membrane shall be installed continuously prior to shelf angle installation

16. **Plank Edges - At plank / steel girder joint**
A. Through wall flashing must be draped from above to completely cover this joint and the entire face of the girder and sealed to the shelf angle.
B. If the girder is solid and air tight, this detail can be sealed with a transition membrane spanning the top flange and interior underside of the plank if allowed by local code.

17. **Steel Columns - Steel / CMU joints:** Transition membrane to be installed after fire proofing has been applied, and span steel column and adhered to the adjacent CMU surfaces. Fire proofing may need to be applied thicker to keep the required R-Value.

18. **Wall to Roof Connections:** Liquid air barrier must be brought up over grout edge part of roof plank and shall be sealed over the plank / grout joint.

19. **All Exterior, Stairwell-Corridor, Apartment-Corridor, and any Door separating a space that is vented to the outdoors (Boiler room, meter room, etc)**
A. Install weatherstripping with rigid fastener and compressible closed cell foam insert
B. Sample manufacturers
a. Ultrafab Incorporated
b. Pemko Manufacturing Company Inc.
c. Accurate Metal Weather-Strip

Recessed Lighting

1. Recessed luminaires installed in the building thermal envelope shall be sealed to limit air leakage between conditioned and unconditioned spaces.

2. All recessed luminaires shall be IC-rated and labeled as meeting ASTM E 283 when tested at 1.57 psi (75 Pa) pressure differential with no more than 2.0 cfm (0.944 L/s) of air movement from the conditioned space to the ceiling cavity.

3. All recessed luminaires shall be sealed with a gasket or caulk between the housing and interior wall or ceiling covering.

Interior Air Tightness (Compartmentalization)

1. **Apartment Air Sealing Testing & Verification**
A. Apartments shall be sealed to reduce air exchange between the apartment and outside as well as the apartment and other adjacent spaces. Enclosed apartments must be fan pressure tested as an independent unit in accordance with either ASTM E779 2010 or ASTM E1827. The target maximum air leakage rate is 0.3 CFM per square foot of the enclosure bounding the apartment at an induced pressure difference of 50 pascals.

2. **Firestopping**
A. Ensure all penetrations in plank and CMU are sealed to reduce air infiltration and stack effect.

3. **Demising Wall between Units**
A. During drywall installation, leave space for demising wall drywall to be inserted.
B. Drywall sequence must take into account sealing the vertical joint of the demising wall drywall to the exterior wall. Use caulk or one component polyurethane foam along vertical joints.
C. Drywall sequence must also take into account sealing the portion of the demising drywall that becomes inaccessible once the perimeter drywall is installed (see figure below). Use a continuous bead of caulk or one component polyurethane foam to seal the inset portion of the drywall to the concrete plank/slab at the ceiling and floor.
D. All notches in drywall made for electrical cable, plumbing braces, etc. to be sealed with one component polyurethane foam or caulk.

4. **Party Wall within a Unit**
A. During drywall installation, leave space so that perimeter drywall is continuous.
B. Drywall sequence must take into account sealing the gap at the ceiling and floor between the layers of party wall drywall before the party wall is installed. Apply a continuous bead of sealant to all gaps between the drywall, ceiling and floor.
C. All notches in drywall made for electrical cable, plumbing braces, etc. to be sealed with one component polyurethane foam or caulk.

5. **Drywall to Concrete Floor Plank Connection Interior Partitions and Exterior Walls**
A. During installation of self-leveling compound, ensure that the gap between gypsum board and the concrete floor is completely sealed by the self-leveling compound.
B. Any remaining gaps must be sealed with caulk or foam sealant before baseboard heaters are installed on exterior walls.
C. If gap is 3/8" or less, use caulk. If gap is greater than 3/8", use foam.

6. **Drywall to Concrete Ceiling Plank Interior Partitions and Exterior Walls**
A. After installation of sheetrock, apply a continuous bead of sealant to the gap between the sheetrock and plank.
B. If installing a dropped ceiling, the concrete plank must be sealed to the drywall before installation of the dropped ceiling.

7. **Recessed Medicine Cabinets**
A. Seal all joints between gypsum board with tape and joint compound, foam, or caulk so the cavity is completely sealed before installing medicine cabinets.
8. **Interior Door Frames (Bathrooms, Closets, Bedrooms, etc.)**
A. Seal entire perimeter between door frame and drywall with caulk on both sides of all interior doors.

9. **Electrical and Telecommunication Panels**
A. Seal entire perimeter gap between panel and drywall using caulk.
B. Installed closed cell neoprene foam tape on the interior side of the panel door. Ensure door tightly seals to panel when closed.

10. **Outlet and Electrical Boxes - Exterior and Demising Walls**
A. Install Putty Pads
1. <http://www.acousticalsolutions.com/firestop-putty-pads3>
B. Use insulated, self closing outlet covers instead of conventional outlet covers
C. No outlets to be placed back to back on demising walls.

11. **A/C Sleeve and Interior Drywall**
A. Seal all joints between A/C sleeve and drywall with caulk. If necessary, insert backer rod into gap.

12. **Underside of Window Sill to Drywall Connection**
B. Seal joint between underside of the window sill and drywall with caulk.

13. **HVAC Access Doors**
A. Seal all gaps between the drywall and perimeter of the access door frame.
B. Add closed cell neoprene foam tape to an access door that is not originally weather stripped and ensure it closes tightly.

14. **Heating Pipe Penetrations**
A. Seal all heating pipe penetrations using foam or other sealant product rated for 200°F.

15. **Plumbing Penetrations**
A. Fill rough opening with gypsum compound, foam or caulk to seal plumbing penetrations before installation of escutcheon.
B. Areas include around shower heads, and under bathroom and kitchen sinks including around drain lines.

16. **Sprinkler, Gas Line, and Wiring Penetrations**
A. Fill opening with gypsum compound, foam or caulk to seal around all penetrations through drywall.

17. **Door Latch Hole**
A. If a blower test indicates significant leakage at this location, spray one part polyurethane foam above and below latch hole in door frame cavity. Cut away any foam that expands into operating area of the latch hole if necessary.

Damper Air Leakage Ratings

1. **Outdoor air intakes and exhaust openings**
A. Stair and elevator shaft vents and other outdoor air intakes and exhaust openings integral to the building envelope shall be equipped with not less than Class I motorized, leakagerated damper with a maximum leakage rate of 4 cfm per square foot (6.8 L/s · m²) at 1.0 inch water gauge (w.g.) (1250 Pa) when tested in accordance with AMCA 500D.
B. **Exception:** Gravity (nonmotorized) dampers are permitted to be used in buildings less than three stories in height above grade.

Duct Sealing

1. All ducts, air handlers and filter boxes shall be sealed. Joints and seams shall comply with Section 603.9 of the Mechanical Code of NYC and the NYC Construction Codes. Use low-VOC mastic or equivalent UL-181 compliant material and install according to manufacturer's requirement. Do not apply mastic below recommended temperature range.

2. Duct Tightness Verification and Balancing

A. Central exhaust ducts shall be tested by SWA after all take-offs are installed, but before enclosed with drywall.
B. Central exhaust duct leakage shall be no more than 10 CFM/floor/grill inclusive of roof curbs, take offs, etc. for Performance Path projects (5 CFM for Prescriptive Path projects)
C. After roof fan start-up, all fans shall be adjusted to achieve 0.2-0.3" WC static pressure at grille farthest from the fan.

3. **Traverse Joint Sealing**
A. Apply mastic continuously at all transverse joints including any gaps between the finished drywall and duct.
B. After starting the male fitting into the female fitting and prior to seating the joint; apply a 2" wide band of mastic 20 – 30 mils thick to the exposed part of the male fitting. Fully seat the joint and mechanically fasten with sheet metal screws or rivets. Next apply a 2.5" wide band of mastic 20 – 30 mils thick to the outside of the joint covering the screws or rivets and joint gap.

4. **Take Off Duct Sealing**
A. Apply mastic continuously around all joints between take-off ducts and shafts.
B. Apply mastic to the outside of joint in minimum 2" wide band covering the screws or rivets and joint gap.

5. **Roof Fan Curb Sealing**
A. Before installation of roof curbs, seal gaps between ductwork and roofing plank.

Exceptions:
A. Factory installed piping within HVAC equipment tested and rated in accordance with a test procedure referenced by this code.
B. Factory installed piping within room fan coils and unit ventilators tested and rated according to AHRI Standards 440 (except that the sampling and variation provisions of Section 6.5 shall not apply) and 840, respectively.
C. Piping that conveys fluids that have a design operating temperature range between 55 degrees Fahrenheit (13 degrees Celsius) and 105 degrees Fahrenheit (41 degrees Celsius).
D. Piping that conveys fluids that have not been heated or cooled through the use of fossil fuels or electric power.
E. Runout piping not exceeding 4 feet (1219 mm) in length and 1 inch (25 mm) in diameter between the control valve and HVAC coil.

· Piping shall be insulated prior to installation into hangers or other supports.

Cored holes drilled through the plank shall be large enough to allow the full thickness of insulation to pass through as required by pipe size and fluid type

Maintenance Information and Manuals

1. Maintenance instructions shall be furnished for equipment and systems that require preventive maintenance. Required regular maintenance actions shall be clearly stated and incorporated on a readily accessible label. The label shall include the title or publication number for the operation and maintenance manual for that particular model and type of product.

2. An operating and maintenance manual must be provided to the building owner by the mechanical contractor. The manual shall include, at least, the following:
A. Equipment capacity (input and output) and required maintenance actions.
B. Equipment operation and maintenance manuals.
C. HVAC system control maintenance and calibration information, including wiring diagrams, schematics, and control sequence descriptions. Desired or field-determined set points shall be permanently recorded on control drawings, at control devices or, for digital control systems, in programming comments.
D. A complete written narrative of how each system is intended to operate.

ACCESSIBILITY NOTES

NYCBC: 1104.2 CONNECTED SPACES. WHEN A BUILDING, OR PORTION OF A BUILDING, IS REQUIRED TO BE ACCESSIBLE, AN ACCESSIBLE ROUTE SHALL BE PROVIDED TO EACH PORTION OF THE BUILDING, TO ACCESSIBLE BUILDING ENTRANCES CONNECTING ACCESSIBLE PEDESTRIAN WALKWAYS AND THE PUBLIC WAY.

ADAAG: 206.2.2 WITHIN A SITE. AT LEAST ONE ACCESSIBLE ROUTE SHALL CONNECT ACCESSIBLE BUILDINGS, ACCESSIBLE FACILITIES, ACCESSIBLE ELEMENTS, AND ACCESSIBLE SPACES THAT ARE ON THE SAME SITE.
ADAAG: 206.2.5 RESTAURANTS AND CAFETERIAS. IN RESTAURANTS AND CAFETERIAS, AN ACCESSIBLE ROUTE SHALL BE PROVIDED TO ALL DINING AREAS, INCLUDING RAISED OR SUNKEN DINING AREAS, AND OUTDOOR DINING AREAS.

ADAAG: 303 CHANGES IN LEVEL.
303.2 VERTICAL. CHANGES IN LEVEL OF ¼ INCH (6.4 MM) HIGH MAXIMUM SHALL BE PERMITTED TO BE VERTICAL.
303.3 BEVELED. CHANGES IN LEVEL BETWEEN ¼ INCH (6.4 MM) HIGH MINIMUM AND ½ INCH (13 MM) HIGH MAXIMUM SHALL BE BEVELED WITH A SLOPE NOT STEEPER THAN 1:2.
303.4 RAMPS. CHANGES IN LEVEL GREATER THAN ½ INCH (13 MM) HIGH SHALL BE RAMPED.

ADAAG: 304 TURNING SPACE AS SHOWN IN THE DRAWINGS

ADAAG: PROTRUDING OBJECTS:
 307.3 POST-MOUNTED OBJECTS. FREE-STANDING OBJECTS MOUNTED ON POSTS OR PYLONS SHALL OVERHANG CIRCULATION PATHS 12 INCHES (305 MM) MAXIMUM WHEN LOCATED 27 INCHES (685 MM) MINIMUM AND 80 INCHES (2030 MM) MAXIMUM ABOVE THE FINISH FLOOR OR GROUND, WHERE A SIGN OR OTHER OBSTRUCTION IS MOUNTED BETWEEN POSTS OR PYLONS AND THE CLEAR DISTANCE BETWEEN THE POSTS OR PYLONS IS GREATER THAN 12 INCHES (305 MM), THE LOWEST EDGE OF SUCH SIGN OR OBSTRUCTION SHALL BE 27 INCHES (685 MM) MAXIMUM OR 80 INCHES (2030 MM) MINIMUM ABOVE THE FINISH FLOOR OR GROUND.

ADAAG: 308 REACH AS SHOWN IN THE DRAWINGS

ADAAG: 404 DOORS, DOORWAYS, AND GATES
404.2.3 CLEAR WIDTH. DOOR OPENINGS SHALL PROVIDE A CLEAR WIDTH OF 32 INCHES (815 MM) MINIMUM. CLEAR OPENINGS OF DOORWAYS WITH SWINGING DOORS SHALL BE MEASURED BETWEEN THE FACE OF THE DOOR AND THE STOP, WITH THE DOOR OPEN 90 DEGREES. OPENINGS MORE THAN 24 INCHES (610 MM) DEEP SHALL PROVIDE A CLEAR OPENING OF 36 INCHES (915 MM) MINIMUM. THERE SHALL BE NO PROJECTIONS INTO THE REQUIRED CLEAR OPENING WIDTH LOWER THAN 34 INCHES (865 MM) ABOVE THE FINISH FLOOR OR GROUND. PROJECTIONS INTO THE CLEAR OPENING WIDTH BETWEEN 34 INCHES (865 MM) AND 80 INCHES (2030 MM) ABOVE THE FINISH FLOOR OR GROUND SHALL NOT EXCEED 4 INCHES (100 MM).

404.2.9 DOOR AND GATE OPENING FORCE. FIRE DOORS SHALL HAVE A MINIMUM OPENING FORCE ALLOWABLE BY THE CODE IS ESSENTIAL TO THE FUNCTION OF THE WORK BEING PERFORMED.
405.3 CROSS SLOPE. CROSS SLOPE OF RAMP RUNS SHALL NOT BE STEEPER THAN 1:48.
405.6 RISE. THE RISE FOR ANY RAMP RUN SHALL BE 30 INCHES (760 MM) MAXIMUM.
405.8 HANDRAILS. RAMP RUNS WITH A RISE GREATER THAN 6 INCHES (150 MM) SHALL HAVE HANDRAILS.

EXCEPTION: WITHIN EMPLOYEE WORK AREAS, HANDRAILS SHALL NOT BE REQUIRED WHERE RAMPS THAT ARE PART OF COMMON USE CIRCULATION PATHS ARE DESIGNED TO PERMIT THE INSTALLATION OF COMPLIANT HANDRAILS.
405.9.2 CURB OR BARRIER. A CURB OR BARRIER SHALL BE PROVIDED THAT PREVENTS THE PASSAGE OF A 4 INCH (100 MM) DIAMETER SPHERE, WHERE ANY PORTION OF THE SPHERE IS WITHIN 4 INCHES (100 MM) OF THE FINISH FLOOR OR GROUND SURFACE.

ADAAG: 407 ELEVATORS
407.1 GENERAL. ELEVATORS SHALL COMPLY WITH ADAAG AND WITH ASME A17.1 (INCORPORATED BY REFERENCE, SEE "REFERENCED STANDARDS" IN CHAPTER 1). THEY SHALL BE PASSENGER ELEVATORS AS CLASSIFIED BY ASME A17.1. ELEVATOR OPERATION SHALL BE AUTOMATIC.

ADAAG: 503 PASSENGER LOADING ZONES
503.2 VEHICLE PULL-UP SPACE. PASSENGER LOADING ZONES SHALL PROVIDE A VEHICULAR PULL-UP SPACE 96 INCHES (2440 MM) WIDE MINIMUM AND 20 FEET (6100 MM) LONG MINIMUM.
503.3 ACCESS AISLE. PASSENGER LOADING ZONES SHALL PROVIDE ACCESS AISLES ADJACENT TO THE VEHICLE PULL-UP SPACE. ACCESS AISLES SHALL ADJOIN AN ACCESSIBLE ROUTE AND SHALL NOT OVERLAP THE VEHICULAR WAY.
503.3.1 WIDTH. ACCESS AISLES SERVING VEHICLE PULL-UP SPACES SHALL BE 60 INCHES (1525 MM) WIDE MINIMUM.
503.3.2 LENGTH. ACCESS AISLES SHALL EXTEND THE FULL LENGTH OF THE VEHICLE PULL-UP SPACES THEY SERVE.

ADAAG: 504 STAIRWAYS
504.2 TREADS AND RISERS. ALL STEPS ON A FLIGHT OF STAIRS SHALL HAVE UNIFORM RISER HEIGHTS AND UNIFORM TREAD DEPTHS. RISERS SHALL BE 4 INCHES (100 MM) HIGH MINIMUM AND 7 INCHES (180 MM) HIGH MAXIMUM. TREADS SHALL BE 11 INCHES (280 MM) DEEP MINIMUM.
504.5 NOSINGS. THE RADIUS OF CURVATURE AT THE LEADING EDGE OF THE TREAD SHALL BE ¼ INCH (3 MM) MAXIMUM. NOSINGS THAT PROJECT BEYOND RISERS SHALL HAVE THE UNDERSIDE OF THE LEADING EDGE CURVED OR BEVELED. RISERS SHALL BE PERMITTED TO SLOPE UNDER THE TREAD AT AN ANGLE OF 30 DEGREES MAXIMUM FROM VERTICAL. THE PERMITTED PROJECTION OF THE NOSING SHALL EXTEND ¼ INCHES (38 MM) MAXIMUM OVER THE TREAD BELOW.
504.7 WET CONDITIONS. STAIR TREADS AND LANDINGS SUBJECT TO WET CONDITIONS SHALL BE DESIGNED TO PREVENT THE ACCUMULATION OF WATER.

ADAAG: 505 HANDRAILS
505.4 HEIGHT. TOP OF GRIPPING SURFACES OF HANDRAILS SHALL BE 34 INCHES (865 MM) MINIMUM AND 38 INCHES (965 MM) MAXIMUM VERTICALLY ABOVE WALKING SURFACES, STAIR NOSINGS, AND RAMP SURFACES. HANDRAILS SHALL BE AT A CONSISTENT HEIGHT ABOVE WALKING SURFACES, STAIR NOSINGS, AND RAMP SURFACES.
505.5 CLEARANCE. CLEARANCE BETWEEN HANDRAIL GRIPPING SURFACES AND ADJACENT SURFACES SHALL BE 1½ INCHES (38 MM) MINIMUM.
505.7.1 CIRCULAR CROSS SECTION. HANDRAIL GRIPPING SURFACES WITH A CIRCULAR CROSS SECTION SHALL HAVE AN OUTSIDE DIAMETER OF 1¼ INCHES (32 MM) MINIMUM AND 2 INCHES (51 MM) MAXIMUM.
505.7.2 NON-CIRCULAR CROSS SECTIONS. HANDRAIL GRIPPING SURFACES WITH A NON-CIRCULAR CROSS SECTION SHALL HAVE A PERIMETER DIMENSION OF 4 INCHES (100 MM) MINIMUM AND 6¼ INCHES (160 MM) MAXIMUM, AND A CROSS-SECTION DIMENSION OF 2¼ INCHES (57 MM) MAXIMUM.
505.8
505.10.2 TOP EXTENSION AT STAIRS. AT THE TOP OF A STAIR FLIGHT, HANDRAILS SHALL EXTEND HORIZONTALLY ABOVE THE LANDING FOR 12 INCHES (305 MM) MINIMUM BEGINNING DIRECTLY ABOVE THE FIRST RISER NOSING. EXTENSIONS SHALL RETURN TO A WALL, GUARD, OR THE LANDING SURFACE, OR SHALL BE CONTINUOUS TO THE HANDRAIL OF AN ADJACENT STAIR FLIGHT.
505.10.3 BOTTOM EXTENSION AT STAIRS. AT THE BOTTOM OF A STAIR FLIGHT, HANDRAILS SHALL EXTEND AT THE SLOPE OF THE STAIR FLIGHT FOR A HORIZONTAL DISTANCE AT LEAST EQUAL TO ONE TREAD DEPTH BEYOND THE LAST RISER NOSING. EXTENSION SHALL RETURN TO A WALL, GUARD, OR THE LANDING SURFACE, OR SHALL BE CONTINUOUS TO THE HANDRAIL OF AN ADJACENT STAIR FLIGHT.

ADAAG: 604 WATER CLOSETS AND TOILET COMPARTMENTS
 SEE ADA DIAGRAMS THIS SHEET.

604.9 WATER CLOSETS AND TOILET COMPARTMENTS FOR CHILDREN'S USE.
604.9.1 LOCATION. THE WATER CLOSET SHALL BE LOCATED WITH A WALL OR PARTITION TO THE REAR AND TO ONE SIDE. THE CENTERLINE OF THE WATER CLOSET SHALL BE 12 INCHES (305 MM) MINIMUM AND 18 INCHES (455 MM) MAXIMUM FROM THE SIDE WALL OR PARTITION, EXCEPT THAT THE WATER CLOSET SHALL BE 17 INCHES (430 MM) MINIMUM AND 19 INCHES (485 MM) MAXIMUM FROM THE SIDE WALL OR PARTITION IN THE AMBULATORY ACCESSIBLE TOILET COMPARTMENT.
604.9.3 HEIGHT. THE HEIGHT OF WATER CLOSETS SHALL BE 11 INCHES (280 MM) MINIMUM AND 17 INCHES (430 MM) MAXIMUM MEASURED TO THE TOP OF THE SEAT. SEATS SHALL NOT BE SPRUNG TO RETURN TO A LIFTED POSITION.
604.9.5 FLUSH CONTROLS. FLUSH CONTROLS SHALL BE HAND OPERATED OR AUTOMATIC. HAND OPERATED FLUSH CONTROLS SHALL BE INSTALLED 36 INCHES (915 MM) MAXIMUM ABOVE THE FINISH FLOOR. FLUSH CONTROLS SHALL BE LOCATED ON THE OPEN SIDE OF THE WATER CLOSET.
604.9.6 DISPENSERS. TOILET PAPER DISPENSERS SHALL BE 7 INCHES (180 MM) MINIMUM AND 9 INCHES (230 MM) MAXIMUM IN FRONT OF THE WATER CLOSET MEASURED TO THE CENTERLINE OF THE DISPENSER. THE OUTLET OF THE DISPENSER SHALL BE 14 INCHES (355 MM) MINIMUM AND 19 INCHES (485 MM) MAXIMUM ABOVE THE FINISH FLOOR. THERE SHALL BE A CLEARANCE OF 1½ INCHES (38 MM) MINIMUM BELOW THE GRAB BAR. DISPENSERS SHALL NOT BE OF A TYPE THAT CONTROLS DELIVERY OR THAT DOES NOT ALLOW CONTINUOUS PAPER FLOW.

ADAAG: 606 LAVATORIES AND SINKS
606.3 HEIGHT. LAVATORIES AND SINKS SHALL BE INSTALLED WITH THE FRONT OF THE HIGHER OF THE RIM OR COUNTER SURFACES 34 INCHES (865 MM) MAXIMUM ABOVE THE FINISH FLOOR OR GROUND.
606.5 EXPOSED PIPES AND SURFACES. WATER SUPPLY AND DRAIN PIPES UNDER LAVATORIES AND SINKS SHALL BE INSULATED OR OTHERWISE CONFIGURED TO PROTECT AGAINST CONTACT. THERE SHALL BE NO SHARP OR ABRASIVE SURFACES UNDER LAVATORIES AND SINKS.

ADAAG: 607 BATHTUBS
607.2 CLEARANCE. CLEARANCE IN FRONT OF BATHTUBS SHALL EXCEED THE LENGTH OF THE BATHTUB AND SHALL BE 30 INCHES (760 MM) WIDE MINIMUM. A LAVATORY COMPLYING WITH 606 SHALL BE PERMITTED AT THE CONTROL END OF THE CLEARANCE, WHERE A PERMANENT SEAT IS PROVIDED AT THE HEAD END OF THE BATHTUB. THE CLEARANCE SHALL EXTEND 12 INCHES (305 MM) MINIMUM BEYOND THE WALL AT THE HEAD END OF THE BATHTUB.

ADAAG: 608 SHOWER COMPARTMENTS
608.2.1 TRANSFER TYPE SHOWER COMPARTMENTS. TRANSFER TYPE SHOWER COMPARTMENTS SHALL BE 36 INCHES (915 MM) BY 36 INCHES (915 MM) CLEAR INSIDE DIMENSIONS MEASURED AT THE CENTER POINTS OF OPPOSING SIDES AND SHALL HAVE A 36 INCH (915 MM) WIDE MINIMUM ENTRY ON THE FACE OF THE SHOWER COMPARTMENT. CLEARANCE OF 36 INCHES (915 MM) WIDE MINIMUM BY 48 INCHES (1220 MM) LONG MINIMUM MEASURED FROM THE CONTROL WALL SHALL BE PROVIDED.

608.3 GRAB BARS. GRAB BARS SHALL BE PROVIDED, WHERE MULTIPLE GRAB BARS ARE USED, REQUIRED HORIZONTAL GRAB BARS SHALL BE INSTALLED AT THE SAME HEIGHT ABOVE THE FINISH FLOOR.

ADAAG: 609 GRAB BARS
609.4 POSITION. GRAB BARS SHALL BE INSTALLED IN A HORIZONTAL POSITION, 33 INCHES (840 MM) MINIMUM AND 36 INCHES (915 MM) MAXIMUM ABOVE THE FINISH FLOOR MEASURED TO THE TOP OF THE GRIPPING SURFACE, EXCEPT THAT AT WATER CLOSETS FOR CHILDREN'S USE, GRAB BARS SHALL BE INSTALLED IN A HORIZONTAL POSITION 18 INCHES (455 MM) MINIMUM AND 27 INCHES (685 MM) MAXIMUM ABOVE THE FINISH FLOOR MEASURED TO THE TOP OF THE GRIPPING SURFACE.

EXCEPTIONS:
 1. GRAB BARS SHALL NOT BE REQUIRED TO BE INSTALLED IN A SHOWER LOCATED IN A BATHING FACILITY FOR A SINGLE OCCUPANT ACCESSED ONLY THROUGH A PRIVATE OFFICE, AND NOT FOR COMMON USE OR PUBLIC USE PROVIDED THAT REINFORCEMENT HAS BEEN INSTALLED IN WALLS AND LOCATED SO AS TO PERMIT THE INSTALLATION OF GRAB BARS.

2. IN RESIDENTIAL DWELLING UNITS, GRAB BARS SHALL NOT BE REQUIRED TO BE INSTALLED IN SHOWERS LOCATED IN BATHING FACILITIES PROVIDED THAT REINFORCEMENT HAS BEEN INSTALLED IN WALLS AND LOCATED SO AS TO PERMIT THE INSTALLATION OF GRAB BARS.

ADAAG: 703 SIGNS
703.1 GENERAL. WHERE BOTH VISUAL AND TACTILE CHARACTERS ARE REQUIRED, EITHER ONE SIGN WITH BOTH VISUAL AND TACTILE CHARACTERS, OR TWO SEPARATE SIGNS, ONE WITH VISUAL, AND ONE WITH TACTILE CHARACTERS, SHALL BE PROVIDED.
703.2 RAISED CHARACTERS. RAISED CHARACTERS SHALL BE DUPLICATED IN BRAILLE.
703.3 DEPTH. RAISED CHARACTERS SHALL BE 1/32 INCH (0.8 MM) MINIMUM ABOVE THEIR BACKGROUND.
703.2.2 CASE. CHARACTERS SHALL BE UPPERCASE.
703.2.3 STYLE. CHARACTERS SHALL BE SANS SERIF. CHARACTERS SHALL NOT BE ITALIC, OBLIQUE, SCRIPT, HIGHLY DECORATIVE, OR OF OTHER UNUSUAL FORMS.
703.2.5 CHARACTER HEIGHT. CHARACTER HEIGHT MEASURED VERTICALLY FROM THE BASELINE OF THE CHARACTER SHALL BE 5/8 INCH (16 MM) MINIMUM AND 2 INCHES (51 MM) MAXIMUM BASED ON THE HEIGHT OF THE UPPERCASE LETTER "I".

703.4.1 HEIGHT ABOVE FINISH FLOOR OR GROUND. TACTILE CHARACTERS ON SIGNS SHALL BE LOCATED 48 INCHES (1220 MM) MINIMUM ABOVE THE FINISH FLOOR OR GROUND SURFACE, MEASURED FROM THE BASELINE OF THE LOWEST TACTILE CHARACTER AND 60 INCHES (1525 MM) MAXIMUM ABOVE THE FINISH FLOOR OR GROUND SURFACE, MEASURED FROM THE BASELINE OF THE HIGHEST TACTILE CHARACTER.

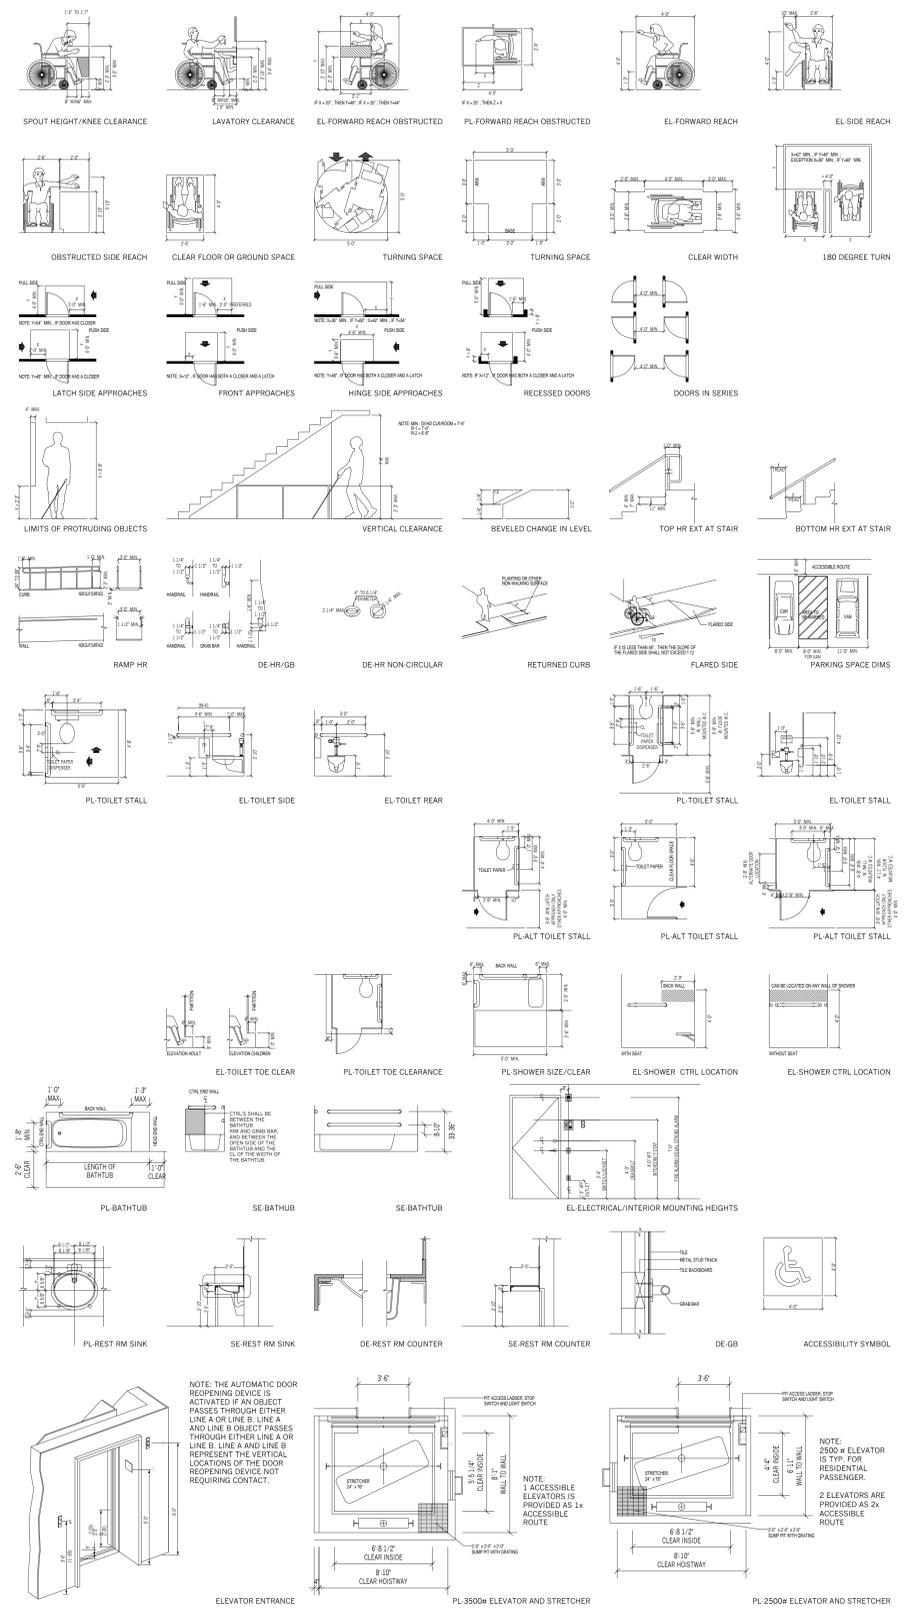

703.4.2 LOCATION. WHERE A TACTILE SIGN IS PROVIDED AT A DOOR, THE SIGN SHALL BE LOCATED ALONGSIDE THE DOOR AT THE LATCH SIDE, WHERE A TACTILE SIGN IS PROVIDED AT DOUBLE DOORS WITH ONE ACTIVE LEAF, THE SIGN SHALL BE LOCATED ON THE INACTIVE LEAF. WHERE A TACTILE SIGN IS PROVIDED AT DOUBLE DOORS WITH TWO ACTIVE LEAFS, THE SIGN SHALL BE LOCATED TO THE RIGHT OF THE RIGHT HAND DOOR, WHERE THERE IS NO WALL SPACE AT THE LATCH SIDE OF A SINGLE DOOR OR AT THE RIGHT SIDE OF DOUBLE DOORS. SIGNS SHALL BE LOCATED ON THE NEAREST ADJACENT WALL. SIGNS CONTAINING TACTILE CHARACTERS SHALL BE LOCATED SO THAT A CLEAR FLOOR SPACE OF 18 INCHES (455 MM) MINIMUM BY 18 INCHES (455 MM) MINIMUM, CENTERED ON THE TACTILE CHARACTERS, IS PROVIDED BEYOND THE ARC OF ANY DOOR SWING BETWEEN THE CLOSED POSITION AND 45 DEGREE OPEN POSITION.
 EXCEPTION:
 1107.2.1 TYPE B UNIT DOORS AND DOORWAYS IN R-2 OCCUPANCY. DOORS AND DOORWAYS AT THE ENTRANCES TO THE DWELLING OR SLEEPING UNIT SHALL HAVE MANEUVERING CLEARANCES AS SHOWN IN THE DRAWINGS.

EXCEPTIONS:
3. MANEUVERING CLEARANCE AT DOORS. WHERE PULL SIDE, LATCH APPROACH MANEUVERING CLEARANCE IS REQUIRED WITHIN THE DWELLING OR SLEEPING UNIT FOR A DOOR WITHOUT A CLOSER, THE MINIMUM MANEUVERING CLEARANCE PERPENDICULAR TO THE DOORWAY SHALL BE PERMITTED TO BE REDUCED TO 42 INCHES (1067 MM).
4. DOOR HARDWARE. DOOR HARDWARE ON DOORS WITHIN THE DWELLING OR SLEEPING UNIT, EXCEPT ON ENTRANCE DOORS, SHALL NOT BE REQUIRED TO COMPLY WITH SECTION 404.2.6 (DOOR HARDWARE) OF ICC A117.1 PROVIDED SUCH HARDWARE IS READILY REPLACEABLE WITHOUT THE REMOVAL OR REPLACEMENT OF THE DOOR.
5. FUTURE REVERSIBILITY FOR BEDROOM DOORS. BEDROOM DOORS AND FRAMES SHALL BE PERMITTED TO BE PROVIDED WITH MORTISED HINGE AND LATCH BLANKS TO PERMIT FUTURE REVERSAL OF THE DOOR ON THE SAME FRAME USING COMMON HAND TOOLS AND WITHOUT FURTHER ALTERATIONS TO THE DOOR AND FRAME, PROVIDED SUCH FUTURE SWINGS OF THE DOOR WILL NOT OBSTRUCT THE MANEUVERING CLEARANCES REQUIRED AT THE DOOR OR DOORWAY.

6. FLEX-CLOSET. WHERE FRONT APPROACH, PULL SIDE MANEUVERING CLEARANCE IS REQUIRED AT A MANUAL SWINGING DOOR SUCH CLEARANCE SPACE MAY BE USED FOR A READILY REMOVABLE STORAGE CLOSET PROVIDED THAT:
 I. SUCH CLOSET IS SO CONSTRUCTED THAT THE FRONT APPROACH, PULL SIDE MANEUVERING CLEARANCE CAN BE RESTORED BY REMOVING THE CLOSET DOORS, FLOOR TRACKS, AND SHELVES USING COMMON HAND TOOLS AND WITHOUT ALTERATIONS TO THE FLOOR OR FLOORING, WALLS OR PARTITIONS; AND
 II. IN ANY DWELLING UNIT OR SLEEPING UNIT CONTAINING A FLEX-CLOSET, THE DWELLING UNIT OR SLEEPING UNIT MUST CONTAIN THE FOLLOWING ADDITIONAL CLOSETS:
 a. AN ACCESSIBLE NONFLEX CLOSET IN EACH BEDROOM EQUIVALENT TO AT LEAST ONE 4 FEET (1219 MM) WIDE BY 2 FEET, 6 INCHES (762 MM) DEEP AND 5 FEET (1524 MM) HIGH OR, IN AN EFFICIENCY APARTMENT, AT LEAST ONE SUCH CLOSET; AND
 b. AN ACCESSIBLE NONFLEX CLOSET IN CUBIC FOOTAGE TO THE FLEX CLOSET THAT IS LOCATED OUTSIDE OF BEDROOMS, KITCHEN OR BATHROOM.

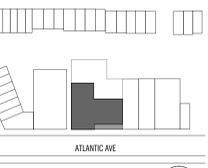

7. SUPPLEMENTAL TOILET AND BATHING FACILITIES. WHERE ONE TYPE A TOILET AND BATHING FACILITY IS PROVIDED IN A TYPE B UNIT IN ACCORDANCE WITH THE EXCEPTION IN SECTION 1107.2.2, THE DOORS AND DOORWAYS TO ALL OTHER TOILET AND BATHING FACILITIES IN THAT DWELLING UNIT SHALL NOT BE REQUIRED TO COMPLY WITH MANEUVERING CLEARANCES, BUT SHALL COMPLY WITH SECTION 1004.5.2 (USER PASSAGE DOORWAYS) OF ICC A117.1 AND SHALL PROVIDE CLEAR OPENING WIDTH OF 32 INCHES (813 MM) MINIMUM.

1107.2.5 TYPE B MULTISTORY UNITS IN R-2 OCCUPANCY. MULTISTORY DWELLING OR SLEEPING UNITS SHALL COMPLY WITH THE FOLLOWING:
 1. ONE OF THE STORIES WITH AN ACCESSIBLE ENTRANCE SHALL BE DESIGNATED AS THE PRIMARY ENTRY STORY TO THE UNIT;
 2. ALL ROOMS, SPACES AND DOORS ON THE PRIMARY ENTRY STORY SHALL COMPLY WITH SECTION 1107.2; AND
 3. ROOMS, SPACES OR DOORS LOCATED ON OTHER THAN THE PRIMARY ENTRY STORY, AND INTERIOR STORIES THERE TO, NEED NOT COMPLY WITH SECTION 1107.2 WHERE THE PRIMARY ENTRY STORY CONTAINS EQUIVALENT FUNCTIONAL FACILITIES.
 EXCEPTION: FUNCTIONAL FACILITIES IN COMPLIANCE WITH SECTION 1107.2 MAY BE LOCATED ON ANY STORY WITHIN THE DWELLING OR SLEEPING UNIT, PROVIDED THAT ALL ROOMS, SPACES AND DOORS LOCATED ON SUCH STORY CONTAINING SUCH FUNCTIONAL FACILITIES COMPLY WITH SECTION 1107.2. IN ADDITION, A TOILET FACILITY COMPLYING WITH SECTION 1107.2.2 SHALL BE PROVIDED ON THE PRIMARY ENTRY STORY, AND ONE OF THE FOLLOWING CONDITIONS SHALL BE MET:
 1. AN ACCESSIBLE EXTERIOR ELEVATOR IS PROVIDED TO CONNECT ALL SUCH STORIES OF THE MULTISTORY DWELLING OR SLEEPING UNIT; OR
 2. A STAIRWAY COMPLYING WITH SECTION 504 (STAIRWAYS) OF ICC A117.1 WITH A MINIMUM CLEAR WIDTH OF 36 INCHES (915 MM) IS PROVIDED WITHIN THE MULTISTORY DWELLING OR SLEEPING UNIT TO CONNECT ALL SUCH STORIES OF THE UNIT; OR
 3. AN ACCESSIBLE ROUTE COMPLYING WITH SECTION 402 (ACCESSIBLE ROUTES) OF ICC A117.1 IS PROVIDED WITHIN THE DWELLING OR SLEEPING UNIT TO CONNECT ALL SUCH STORIES OF THE UNIT.

MULTIPLE DWELLING NOTES

1. D26-12.01 PAINTING OF PUBLIC PARTS AND WITHIN DWELLINGS

- A. In the public parts of a multiple dwelling, the owner shall:
 (1) Paint or cover the walls and ceilings with wallpaper or other acceptable wall covering; and
 (2) Repaint or re-cover the walls and ceilings with wallpaper or other acceptable wall covering whenever necessary in the judgment of the department to keep such surfaces sanitary.

- B. In occupied dwelling units in a multiple dwelling, the owner shall:
 (1) Paint or cover the walls and ceilings with wallpaper or other acceptable wall coverings; and
 (2) Repaint or re-cover the walls and ceilings with wallpaper or other acceptable wall covering every three years, and more often when required by contract or other provisions of law.

C. The department may require a tenant of a dwelling unit in a multiple dwelling to repaint or recover the interior walls and ceilings of his dwelling unit with wallpaper or other acceptable wall covering if such walls and ceiling become unsanitary at any time within three years from the date of the last refinishing by the owner. However, if the tenant can show, to the satisfaction of the department or neglect of his own or of his family or guests, the department may require the owner to repaint or re-cover the same. This subsection does not relieve the owner from his duties under subsection (B) (2) of this section.

D. The owner and tenant of any dwelling unit in a multiple dwelling may, by voluntary agreement, provide that the owner need not repaint in such unit as required by subsection (B)(2) of this section for such additional period, not to exceed two years, as may be agreed upon. Such an agreement to extend the time for repainting shall not be valid unless it has been entered into not earlier than one month prior to the expiration of the three-year period, and shall not form part of any agreement of lease. The department may prescribe the form of such agreements, require them to be filed, and may make such other regulations as may be necessary to avoid abuse, and to further the purpose of this article. Notwithstanding any agreement, the department may, during the period for which repainting is deferred by agreement, order repainting by the owner in any dwelling unit when deemed necessary to keep the walls and ceiling of such unit sanitary. This sub-section shall not affect the applicability of sub-section (C) of this section during the three years after any repainting or re-covering.

E. Neither the owner nor a tenant of a dwelling unit shall place wallpaper or wall coverings upon a wall or ceiling in the public or tenant-occupied parts of a dwelling unless existing wallpaper or wall covering is first removed and such wall or ceiling is cleaned and repaired. However, if wallpaper or wall covering is in good condition, free from vermin and a coat of acceptable paint or sizing is applied, one additional layer of wallpaper or wall covering may be applied.

F. Nothing contained in the section shall be deemed to require the owner of a dwelling to cover with wallpaper or other acceptable covering a wall or ceiling not previously covered so covered by him. When a wall or ceiling of a dwelling unit has been decorated with paper, wood paneling, or other material over which paint normally is not applied, the owner shall be relieved of his obligation to repaint or re-cover such wall or ceiling so long as the same remains in a sanitary condition, in the judgment of the department. When the department requires redecoration of such wall or ceiling, material which he himself has applied before the owner is required to clean and repair and repaint or re-cover. However, if the owner or former tenant has applied paper, or wall covering, wood paneling, or other material, the owner shall be responsible for its removal before redecoration.

G. The owner of a multiple dwelling shall keep and maintain records relating to the refinishing of public parts and dwelling units showing when such parts were last painted, papered, or covered with acceptable material and who performed the work. Such records shall be open to inspection by the department and shall be submitted to the department upon request.

H. (1) The owner of a multiple dwelling shall remove or cover in a manner approved by the department. Any paint or other similar surface-coating material having a reading of .7 milligrams of lead per square centimeter or greater containing more than .5 percent of metallic lead based on the non-volatile content of the paint or other similar surface-coating material on the interior walls, ceilings, doors, window sills or moldings in any dwelling unit in which a child or children six (6) years of age or under reside.

(2) In any multiple dwelling erected prior to January 1, 1960 in which paint of other similar surface coating material is found to be peeling on the interior walls, ceilings, doors, window sills or moldings in any dwelling unit in which a child or child six (6) years of age or under reside, it shall be presumed that the peeling substance contains more than 0.5 percent of metallic lead based on the non-volatile content of the paint of other similar surface-coating material or having a reading of 0.7 milligrams of lead per square centimeter or greater.

(3) The existence of paint or other similar surface square-coating material having a reading of 0.7 milligrams of lead per square centimeter or greater or containing more than 0.5 percent of metallic lead based on the non-volatile content of the paint of similar surface-coating material on the interior walls, ceilings, doors, window sills, or moldings in any dwelling unit in a multiple dwelling in which a child or children six (6) years of age and under reside shall constitute a class C violation rebutted by the owner of the multiple dwelling. Such proof shall be in immediately hazardous violation and subject the owner of such multiple form and substance acceptable to the department or a court of dwelling to the penalties of such violation provided in article 51 of competent jurisdiction.

(4) The department shall transmit to the department of health a list of violations placed pursuant to this section by premises.

(5) The department shall establish procedures for the enforcement of this subdivision.

2. D26-13.03 RODENT AND INSECT ERADICATION: MANDATORY EXTERMINATION

A. The owner or occupant in control of a dwelling shall keep the premises free from rodents and from infestations of insects and other pests and from any condition conducive to rodent or insect and other pest life.

B. When any premises is subject to infestation by rodents or insects and other pests, the owner or occupant in control shall apply continuous eradication measures.

C. When the department makes the determination that any premises are infested by rodents, insects, or other pests, it may order such eradication measures as the department deems necessary.

3. D26-13.05 ELIMINATION OF HARBORAGES

A. All building material, lumber, boxes, cartons, barrels, containers, machinery, raw material, fabricated goods, junk, food, animal feed, and any other substances which may afford harborage or provide food for such rodents or insects and other pests shall be kept stored or handled by the owner and tenants of every dwelling in such manner as the department may require. The department may make orders to eliminate rat harborage to the person who is responsible for the conditions. The department shall uncover and inspect periodically all structural harborages which cannot be eliminated from dwellings.

4. D26-14.01 DEFINITIONS

- A. When used in this article:
 (1) Organic wastes shall mean all wastes produced by or from living organisms.
 (2) Inorganic wastes shall mean all wastes other than organic wastes, including discarded lumber, wood shavings, and furniture.
 (3) Household wastes shall mean all wastes, organic and inorganic, which are produced within a dwelling unit.

5. D26-14.03 RECEPTACLES FOR WASTE MATTER

A. The owner or occupant in control of a dwelling shall provide and maintain metal cans, or other receptacles jointly approved as to specifications by the department, the environmental protection administration and the department of health, for the exclusive use of each building, which shall be of sufficient size and number to contain the wastes accumulated in such building during a period of 72 hours. No receptacle shall be filled to a height so as to prevent the effective closure thereof and no receptacle shall weigh more than 100 pounds when filled. The receptacles shall be so constructed as to hold their contents without leakage. Metal cans shall be effectively provided with tight-fitting covers and other receptacles shall be effectively closed. When requested by the Environmental Protection Administration the owner or occupant in control shall separate and place in separate receptacles ashes, organic and inorganic wastes. Nothing contained in this subsection shall prevent the department of health from jointly approving as to specifications other systems for the disposal of waste or utilizing containers of larger size and different construction as may be appropriate for such systems.

B. Metal cans shall be kept within the dwelling or as required by the department until the time for removal of their contents when they shall be placed in front of the dwelling. When inside storage is required, receptacles of other materials shall be kept in a metal can or a rat-proof and fire-proof room until the time of their removal when they shall be removed from the metal can and be neatly stacked in front of the dwelling. After the contents have been removed by the Environmental Protection Administration, any receptacles remaining shall be returned promptly to their place of storage. Metal cans shall be kept covered at all times and shall be disinfected regularly and maintained in a sanitary condition. Yard sweepings, hedge cuttings, grass, leaves, earth, stone, or bricks shall not be mixed with household wastes.

C. Newspapers, wrapping paper, or other inorganic wastes which are likely to be blown or scattered about the streets shall be securely bundled, tied, or repacked before being placed for collection. Such materials shall be kept and placed for collection in the same manner as the receptacles.

6. D26-14.05 FREQUENCY OF COLLECTION WASTE MATTER FROM DWELLING UNITS IN MULTIPLE DWELLINGS

A. The owner of a multiple dwelling shall not allow the accumulation except in a lawful receptacle of ashes or any type of waster matter in any part of the premises.

B. In multiple dwellings where the owner provides dumbwaiter service, all waste matter shall be collected at least once daily and deposited in separate receptacles.

C. In multiple dwellings where no dumbwaiter service is provided, the owner shall provide between the hours of seven A.M. and ten A.M. or between five P.M. and eight P.M. daily:

- (1) A sufficient number of receptacles but in no event less than two within the dwelling or other area approved by the department which are accessible to the tenants. Such receptacles shall be removed promptly upon the expiration of the selected time period and taken to their place of storage; or

(2) A pick-up service at each dwelling unit to collect ashes and wastes for deposit in the receptacles referred to in section 26-14.03 of this article.

(3) The owner shall post and maintain a notice in a conspicuous place in the dwelling informing the tenants of the hour and method of collection. A new notice shall be posted and maintained within 48 hours preceding any change in such hour or method.

D. The tenant of a multiple dwelling shall dispose of waste matter in accordance with the method provided by the owner under subsection (B) or (C) of this section. The tenant shall not accumulate any waste matter in his dwelling unit so as to create a condition which is unsanitary or a fire hazard in the judgment of the department.

E. Subsections (B), (C), and (D) shall not apply to any multiple dwelling where regular incinerator services or other means of disposal approved by the department are provided. The tenant in such a dwelling shall dispose of waste matter in an incinerator or by such other approved means of disposal and shall not permit wastes to accumulate so as to create a condition which is unsanitary or a fire hazard in the judgment of the department.

7. D26-18.03 DRAINAGE OF ROOFS AND COURT YARDS

A. The owner of a dwelling shall grade and maintain the grading of all roofs, terraces, shafts, courts, yards, and other open spaces on the lot, and shall provide and maintain unobstructed drainage from these areas and spaces through a drain connected to a street storm-water main or combined sewer and street storm-water main. The department may permit the storm water from such areas to drain into a street gutter leading to a natural channel, water course, or dry well.

B. The owner of a dwelling shall provide and maintain drainage from all roofs to carry off storm water to prevent it from dripping to the ground, or from causing dampness in walls, ceilings, and open spaces.

C. The department may require the owner of a dwelling to surface that, with respect to private dwellings, the department may permit shafts, courts, yards, and other open spaces on the lot with the surfacing of such areas with bituminous aggregate or other concrete, and to pitch the surfaces of such areas towards a similar material.

D. The owner of a dwelling may plant grass, sod, shrubs, trees, and other vegetation in yards and courts, unless the department orders its removal because in its opinion such vegetation interferes with proper drainage, light, ventilation, or egress.

8. D26-19.01 DUTY TO PROVIDE ELECTRIC LIGHTING EQUIPMENT IN ALL DWELLINGS

A. The owner shall equip every dwelling for lighting by electricity. He shall provide and maintain light fixtures to provide lighting for all public parts in a dwelling, including the means of egress, for every room, water-closet compartment and bathroom in every dwelling unit, and for every fixture, the owner shall install and maintain such receptacle outlets as may be required by the electrical code, the owner may substitute an additional receptacle outlet for a required light fixture in living rooms other than kitchens.

9. D26-19.03 ELECTRIC LIGHTING FIXTURES IN CERTAIN PUBLIC PARTS OF DWELLINGS; FIXTURES AND LIGHTS REQUIRED

A. In every multiple dwelling and tenant-occupied two-family dwelling the owner shall provide electric lighting fixtures for every public hall, stair, fire-stair, and fire-tower on every floor, in accordance with the following requirements:

(1) If an incandescent lighting fixture is provided, it shall be capable of providing illumination of at least ten watts per 25 square feet of floor area or fraction thereof. Each lighting fixture shall be provided with one or more lights of a total of not less than 20 watts. Where, under this requirement, the number of watts per fixture would exceed 40, one or more additional fixtures shall be provided and shall be located as may be prescribed by the department, except where the distance from the fixture to the farthest intersecting wall does not exceed 20 feet.

(2) If a fluorescent lighting fixture is provided, it shall be capable of providing illumination of at least four watts cool white fluorescent light per 25 square feet of floor-area or fraction thereof. Each lighting fixture shall be provided with one or more lights of a total of not less than 20 watts. Where, under this requirement, the number of watts per fixture would exceed 40, one or more additional fixtures shall be provided and shall be located as may be prescribed by the department except where the distance from the fixture to the farthest intersecting wall does not exceed 20 feet.

(3) In every multiple dwelling hereafter erected, in addition to other lighting requirements, a sufficient number of incandescent or fluorescent fixtures shall be provided so that the distance between fixtures is not more than 30 feet and so that no wall is more than 15 feet distant from a fixture.

B. Notwithstanding any other requirement of this section, the department may require fixtures to be so located and additional fixtures to be installed, in order to assure that every part of every public hall, stair, fire-stair, or fire-tower is adequately lighted.

10. D26-19.05 LIGHTING TO BE PROVIDED AT NIGHT: OWNER'S RESPONSIBILITY

A. The owner of a multiple dwelling shall turn on all required lights in every public hall and stair at sunset every day and keep them on until sunrise the day following.

B. The owner of a multiple dwelling shall keep all required lights burning continuously: (1) In every fire-stair and fire tower; (2) In every stair and public hall where there is no window opening on a street, court, yard, space above a setback, or on a shaft; and (3) In every stair and public hall where there is a window which is in the opinion of the department does not provide adequate natural light.

C. The owner of the multiple dwelling shall provide electric light at all hours of the day and night in rooms or spaces in multiple dwellings in which laundry equipment is provided for the common use of the occupants whenever natural light is insufficient in the opinion of the department.

D. The owner of a multiple dwelling shall install and maintain in working condition a lighting fixture that can be turned on by a tenant or by the mail carrier directly over a mail box or other receptacle for mail if the natural light in the public halls is not sufficient to read the name on each mail box or receptacle.

E. The owner of a multiple dwelling shall not be responsible if any required light becomes extinguished and remains so if he can show to the satisfaction of the department or court that it became and remained extinguished without his knowledge or consent.

11. D26-19.07 LIGHTS NEAR ENTRANCE WAYS AND IN YARDS AND COURTS OF MULTIPLE DWELLINGS

A. The owner of a multiple dwelling shall install and maintain one or more lights at or near the outside of the front entrance way of the building which shall in the aggregate provide not less than 50 watts incandescent illumination or its equivalent for a building with a frontage in excess of 22 feet and front entrance doors with a combined width in excess of five (5) feet. The owner shall install at least two lights, one on each side of the entrance way, with an aggregate illumination of 150 watts incandescent illumination or its equivalent. If the minimum level of illumination is maintained, the owner may determine details of location, design, and installation of lighting fixtures, subject, however, to regulations of the department with respect to the minimum height above or distance from the entrance way of such fixtures, and the electrical and other safety of their installation. The lights required by this subsection shall be burning from sunset on each day to sunrise on the day following.

B. The owner of a multiple dwelling shall install and maintain in every yard and court, one or more lights of at least 40 watts of incandescent illumination or its equivalent, in such locations as the department may prescribe. The lights required by the subsection shall be kept burning from sunset on each day to sunrise on the day following.

12. D26-20.01 PEEPHOLES

A. In every dwelling, the owner shall provide and maintain a peephole in the entrance floor of each dwelling unit. Such peephole shall be located, as prescribed by the department, in such a place that the person in each dwelling unit may view from the inside any person immediately outside the entrance door.

13. D26-20.03 MIRRORS IN ELEVATORS

A. The owner of a multiple dwelling in which there are one or more self-service elevators shall affix and maintain in each such elevator a mirror which enables persons to view its interior before entering the same. The mirror shall meet such requirements as the department shall by regulation prescribe.

14. D26-20.05 LOCKS IN DWELLING UNIT DOORS

A. The owner of a dwelling shall provide a key lock in the entrance door to each dwelling unit and at least one key. In a Class A multiple dwelling such door shall be equipped with a heavy duty latch set and a heavy duty dead bolt operable by key from the outside and a thumb-turn from the inside.

B. Each dwelling unit entrance door in a class a multiple dwelling shall also be equipped with a chain door guard so as to permit partial opening of the door.

15. D26-21.01 MAIL SERVICE

- A. The owner of a multiple dwelling shall either
 (1) Arrange for mail to be delivered to himself, his agents, or employees for prompt distribution to the occupants; or
 (2) Provide and maintain approved mail receptacles and directories of persons living in the dwelling as provided by federal law.

16. D26-21.03 FLOOR SIGNS

A. the owner of a multiple dwelling more than two stories in height shall post and maintain a sign of sufficient size to be readily seen, which states that number of the floor, such signs shall be located in the public hall near the stairs and elevator, and within any stair enclosure.

17. STREET NUMBERS

A. The owner of a multiple dwelling post and maintain street numbers on the dwelling, which are plainly visible from the sidewalk in front of the dwelling, in accordance with section 82(3) -1.0 of the administration code and the rules and regulations issued by the Borough of Presidents there under.

18. D26-22.03 OBLIGATIONS OF OWNER

A. The owner of a multiple dwelling shall provide adequate janitorial services.

- B. In a multiple dwelling of nine or more dwelling units, the owner shall either:
 (1) Perform the janitorial services himself, if he is a resident owner; or
 (2) Provide a janitor; or
 (3) Provide for janitorial services to be performed on a 24-hour-a-day basis in a manner approved by the department.

C. The owner of a multiple dwelling or his managing agent in control shall post and maintain in such dwelling a legible sign, conspicuously displayed, containing the janitor's name, address (including apartment number and telephone number). A new identification sign shall be posted and maintained within five days following a change of janitor.

ZR 77-22(a); Floor Area Ratio; For Auality Housing buildings in R6 and R7 districts, the residential floor area ratio of the portion of the zoning lot fronting on and within 100 ft. of a wide street may exceed the maximum permitted residential floor area for the portion of the zoning lot by up to 20 percent, provided that the maximum residential floor area ratio for the zoning lot does not exceed the adjusted maximum floor area ratio applicable to such zoning lot.		
Adjusted maximum residential FAR = 4.27		
[(4.60 x 79.09% = 3.64) + (4.00 x 10.46% = 0.42) + (2.00 x 10.46% = 0.21)]		
20% Increase: 4.60 x 120% = 5.52 FAR x 10,050 sf. = 55,476 sf.		
		4.27 FAR x 12,714 sf. = 54,288 sf.
Max. Zoning Floor Area (ZFA) Permitted		
Within 100' of Atlantic Ave	4.27 x 12,714 sf.	= 54,288 ZFA
Floor Area Proposed (See Floor area schedules this sheet)		
		Total ZFA = 54056.15 SF
		Per ZR 23-952, for each 1 sf. of low income floor area provided, the floor area on the zoning lot may be increased by 1.25 sf., up to a maximum of 4.6 FAR. The maximum R7A/C2-4/H residential floor area is 46,248 sf (4.6 x 10,054 sf.). 20% of the maximum residential floor area must be affordable to generate the maximum FAR of 4.6, so 9,250 sf. of the R7A/C2-4/H portion must be low income floor area to generate the 4.6 FAR for this portion of the zoning lot.
		Total ZFA Provided = 54,056.15
		Affordable ZFA to generate ZFA 911-917 at Atlantic = 9,250
		Affordable ZFA to generate ZFA at 1 Clinton = 35,334
ZR 23-145 Lot Coverage		
Maximum Lot Coverage for Quality Housing Building		Per ZR 23-145, the maximum lot coverage in the R7A/C2-4/H and R7A/C2-4 portions is 65%. The maximum lot coverage in the R6B portion of the lot is 60%.
	R7A/C2-4 11,384 x 65% =	7,400 permitted / 7,317 (7) proposed / Complies
		R6B
23-22 Density		
Residential Floor Area Allowed		54,288 SF
Gross Area per Dwelling Unit		680 SF/DU
Permitted DU (73245.60/680)		80 UNITS
Proposed DU's		78 UNITS
ZR 23-47 Yard Regulations		
Front yard		= Not required
Side yard		= Not required but if provided must be 8'-0"
Rear yard		= 30' required complies See plot plan - this sheet
ZR 23-633 Height & Setback		
Note: Development will comply with Quality Housing		
Min Base Height	= 40 ft.	Complies See plans
Max Base Height	= 65 ft.	Complies See plans
Max Building Height	= 80 ft.	Complies See plans
Min Req Setback (Wide street)	= 10 ft.	Complies See plans
ZR 23-633(x)(3) Permitted Obstruction in certain districts (Dormer)		
Dormer allowed within required setback; aggregate width <60% of length of street wall; 1% per foot of height above maximum base height		
Dormer: Atlantic Avenue- 8th Floor		
Street wall width: 100'-2 1/2' = 100.19		
Actual Dormer Height: 15.00' = 15.00'		
Actual Dormer Width: 44'-11 1/4" = 44.96'		
Calculations		
Allowable dormer width @ Max Ht= 60% of street wall		
60 x 100= 60'-0" = 60.00'		
Dormer width shall decrease by 1% of the street wall width of the highest story entirely below the max base height.		
Dormer Reduction per vertical foot	1% of 100.19' = 1'	
Dormer Height above Max Base Ht	80.00-65.00= 15.00'	
Dormer Width Decrease Required	15.00x1' = 15.00'	
Max width of Dormer @ Max Dormer Height	60.00-15' = 45.00'	
6th Floor Dormer is in Compliance		44.96' < 45.00'
ZR 123-62 Permitted Obstruction to penetrate max height limit		
ZR 23-62(a) Elevator or stair bulkheads (including shafts and vestibules) not larger than 60 SF in area providing access to a roof, roof tanks and accessory mechanical equipment (including enclosures), other than solar or wind energy systems, provided that:		
1) Such obstructions shall be located not less than 10 feet from the street wall of a building

FLOOR AREA DEDUCTION NOTES

- CORRIDOR DEDUCTIONS AS PER ZR 28-41, DENSITY PER CORRIDOR, WHERE 50% OF THE SF OF THE CORRIDOR IS DEDUCTED FOR CORRIDORS SERVING LESS THAN 8 DWELLING UNITS ON THE STORY IN DISTRICT R7A. OTHER 50% OF THE SF OF THE CORRIDOR IS DEDUCTED AS PER ZR 28-25 FOR PROVIDING DAYLIGHT IN THE CORRIDOR WITH A WINDOW ADJACENT TO THE ELEVATOR.
- MECHANICAL DEDUCTIONS AS PER ZR 12-10 "FLOOR AREA" DEFINITION (B). DEDUCTED ARE FLOOR SPACES OCCUPIED BY HEATING, VENTILATION, AND AIR CONDITIONING EQUIPMENT, DOMESTIC WATER EQUIPMENT, EMERGENCY GENERATOR RELATED EQUIPMENT, FIRE SPRINKLER SYSTEM, MECHANICAL SHAFTS INCLUDING ENCLOSURE, PLUMBING AND GAS PIPE RISERS AND CHASES INCLUDING ENCLOSURE, ELECTRICAL SERVICE PANELS, CONDUITS, RISERS, CHASES AND RELATED EQUIPMENT.
- REFUSE DEDUCTIONS AS PER ZR 28-23. DEDUCTED IS TWELVE SQUARE FEET OF THE REFUSE STORAGE ROOMS PROVIDED ON EACH STORY WHICH HAS ENTRANCES TO DWELLING UNITS
- WALL DEDUCTIONS AS PER ZR 12-10 "FLOOR AREA" DEFINITION (12) FOR EXTERIOR WALL THICKNESS WHERE WALL THICKNESS WHICH EXCEEDS 8" CAN BE DEDUCTED PROVIDED THE ENVELOPE IS MORE ENERGY EFFICIENT THAN REQUIRED BY THE NYCCEC.
- INDOOR RECREATION SPACE AS PER ZR 28-32, NOT EXCEEDING 3.3% OF TOTAL RESIDENTIAL FLOOR AREA IN DISTRICT R7A, SHALL BE EXCLUDED FROM THE DEFINITION OF FLOOR AREA.

Project Information

Energy Code: 2014 New York Energy Conservation Construction Code
 Project Title: Kings County, New York
 Location: Kings County, New York
 Climate Zone: 4a
 Project Type: New Construction
 Vertical Glazing / Wall Area: 18%

Construction Site: 915 Atlantic Avenue, Brooklyn, NY 11238
 Owner/Agent: Sally Gilliland, Athena Housing Associates, LLC, 826 Broadway, 11th Floor, New York, NY 10003, 212-616-0420
 Designer/Contractor: Jonathan Marvel, Marvel Architects, 145 Hudson Street #304, New York, NY 10013, 212-616-0420

Building Area	Floor Area
1-Multifamily Residential	71760

Additional Efficiency Package
 High efficiency HVAC. Systems that do not meet the performance requirement will be identified in the mechanical requirements checklist report.

Envelope Assemblies

Assembly	Gross Area or Perimeter	Cavity R-Value	Cont. R-Value	Proposed U-Factor	Budget U-Factor
Roof 8" Plank with 4" insulation - Main Roof: Insulation Entirely Above Deck. [Bldg. Use 1 - Multifamily]	6864	---	20.0	0.048	0.039

(a) Budget U-factors are used for software baseline calculations ONLY, and are not code requirements.
 (b) 'Other' components require supporting documentation for proposed U-factors.
 (c) Fenestration product performance must be certified in accordance with NFRC and requires supporting documentation.

Envelope PASSES: Design 0.3% better than code

Envelope Compliance Statement
 Compliance Statement: The proposed envelope design represented in this document is consistent with the building plans, specifications, and other calculations submitted with this permit application. The proposed envelope systems have been designed to meet the 2014 New York Energy Conservation Construction Code requirements in COMcheck Version 4.0.1 and to comply with the mandatory requirements listed in the Inspection Checklist.

1. Required progress inspections. The following progress inspections and/or testing listed below in Table II shall be required when applicable to the scope of work. Energy Code sections cited in Tables II shall be understood to include the section, all subsections, all tables and, when ASHRAE 90.1 is used, appendices related to the cited Energy Code section.

2. Construction scheduling instructions. In accordance with Article 116 of Title 28 and Section BC 109, construction shall be scheduled to allow required progress inspections to take place, and that roofs, ceilings, exterior walls, interior walls, floors, foundations, basements and any other construction shall not be covered or enclosed until required progress inspections are completed or the progress inspector indicates that such covering or enclosure may proceed, at each stage of construction, as applicable.

3. Inspection or test failure. In accordance with Section BC 109.9 and ECC 104.2.3, where an inspection or test fails, the construction shall be corrected and must be made available for reinspection and/or retesting by the progress inspector until it complies. For additions and alterations, the applicant must clearly indicate what portions of the altered systems should be inspected and/or tested, and what inspection and/or testing may be outside the scope of the work.

4. Deferred submittals. Drawings showing design intent and performance criteria matching those in the energy analysis may be submitted as supporting documentation provided that, in accordance with Section 28-104.2.6 of the Administrative Code, the applicant lists such deferred submittals in the construction drawings and submits them for approval prior to installation or construction. If required, the energy analysis must be updated when deferred submittals are provided for approval.

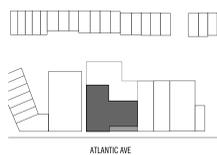

5. Energy Analysis of Constructed Conditions. In accordance with Section 28-104.3 of the Administrative Code and section ECC 103.4, if constructed work differs from the last approved full energy analysis, an as-built energy analysis shall be submitted to the Department, listing the actual values used in the building for all applicable Energy Code-regulated items and demonstrating that the building complies with the Energy Code. Such energy analysis shall be signed and sealed by a registered design professional. The progress inspector shall certify that to the best of his or her knowledge and belief the building as built complies with such signed and sealed energy analysis and construction drawings for energy code compliance: where no trade-offs have been used among disciplines, more than one registered design professional may sign and seal the elements of the energy analysis. The energy analysis shall be approved or accepted by the Department prior to sign-off.

TABLE II
PROGRESS INSPECTIONS FOR ENERGY CODE COMPLIANCE
COMMERCIAL BUILDINGS

IIA Envelope Inspections				IIB Mechanical and Service Water Heating Inspections				IIC Electrical Power and Lighting Systems			
Inspection/Test	Periodic (minimum)	Reference Standard (See ECC Chapter 6 or Other Criteria)	ECC or Other Citation	Inspection/Test	Periodic (minimum)	Reference Standard (See ECC Chapter 6 or Other Criteria)	ECC or Other Citation	Inspection/Test	Periodic (minimum)	Reference Standard (See ECC Chapter 6 or Other Criteria)	ECC or Other Citation
IIA.1 Protection of exposed foundation insulation: Insulation shall be visually inspected to verify proper protection where applied to the exterior of basement or cellar walls, crawlspace walls and/or the perimeter of slab-on-grade floors.	As required during foundation work and prior to backfill	Approved construction documents	903.2.1, ASHRAE 90.1 - 5.8.1.7	IIB.2 Outdoor air intakes and exhaust openings: Dampers for stair and elevator shaft vents and other outdoor air intakes and exhaust openings integral to the building envelope shall be visually inspected to verify that such dampers, except where permitted to be gravity dampers, comply with approved construction drawings. Manufacturer's literature shall be reviewed to verify that the product has been tested and found to meet the standard.	As required during installation	Approved construction documents; AMCA 5000	502.4.4; ASHRAE 90.1 - 6.4.3.4	IIC.1 Electrical metering: The presence and operation of individual meters or other means of monitoring individual apartments shall be verified by visual inspection for all apartments.	Prior to final electrical and construction inspection	Approved construction documents	505.7
IIA.2 Insulation placement and R-values: Installed insulation for each component of the conditioned space envelope and at junctions between components shall be visually inspected to ensure that the R-values are marked, that such R-values conform to the R-values identified in the construction documents and that the insulation is properly installed. Certifications for unmarked insulation shall be similarly visually inspected.	As required to verify continuous enclosure while walls, ceilings and floors are open	Approved construction documents	303.1, 303.1.1, 303.1.2, 502.1, 502.2; ASHRAE 90.1 - 5.5, 5.6 or 11, 5.8.1	IIB.3 HVAC, service water heating and pool equipment sizing and performance: Equipment sizing, efficiencies and other performance factors of all major equipment units, as determined by the applicant of record, and no less than 15% of minor equipment units, shall be verified by visual inspection and, where necessary, review of manufacturer's data. Pool heaters and covers shall be verified by visual inspection.	Prior to final plumbing and construction inspection	Approved construction documents	503.2, 504.2, 504.7; ASHRAE 90.1 - 6.3, 6.4.1, 6.4.2, 6.8, 7.4, 7.8	IIC.2 Lighting in dwelling units: Lamps in permanently installed lighting fixtures shall be visually inspected to verify compliance with high-efficacy requirements.	Prior to final electrical and construction inspection	Approved construction documents	505.5.3
IIA.3 Fenestration thermal values and product ratings: U-factors and SHGC values of installed fenestration shall be visually inspected for conformance with the U-factors and SHGC values identified in the construction drawings by verifying the manufacturer's NFRC labels or, where not labeled, using the ratings in ECC Tables 303.1.3(1), (2) and (3). Where ASHRAE 90.1 is used, visible light transmittance values shall also be verified.	As required during installation	Approved construction documents; NFRC 100, NFRC 200	303.1, 303.1.3, 303.3; ASHRAE 90.1 - 5.5; 5.6 or 11; 5.8.2	IIB.4 HVAC system controls and economizers and service hot water system controls: No less than 20% of each type of required controls and economizers shall be verified by visual inspection and tested for functionality and proper operation. Such controls shall include, but are not limited to: Thermostatic; Set point overlap restriction; Off-hour; Shutoff damper; Snow-melt system; Demand control systems; Outdoor heating systems; Zones; Economizers; Air systems; Variable air volume fan; Hydronic systems; Heat rejection equipment fan speed; Complex mechanical systems serving multiple zones; Ventilation; Energy recovery systems; Hot gas bypass limitation; Temperature; Service water heating; Hot water system; Pool heater and time switches; Exhaust hoods; Radiant heating systems.	After installation and prior to final electrical and construction inspection, except that for controls with seasonally dependent functionality, such testing shall be performed before sign-off for issuance of a Final Certificate of Occupancy	Approved construction documents, including control system narratives; ASHRAE Guideline 1; The HVAC Commissioning Process where applicable	503.2.4, 503.2.5.1, 503.2.11, 503.3, 503.4, 504.3, 504.6, 504.7; ASHRAE 90.1 - 6.3, 6.4, 6.5, 6.7.2.4, 7.4.4, 7.4.5	IIC.3 Interior lighting power: Installed lighting shall be verified for compliance with the lighting power allowance by visual inspection of fixtures, lamps, ballasts and transformers.	Prior to final electrical and construction inspection	Approved construction documents	505.5; ASHRAE 90.1 - 9.1, 9.2, 9.5, 9.6; 1RCNY §101-07(c)(3)(i)-(c)(4)
IIA.4 Fenestration and door assembly product ratings for air leakage: Windows and sliding or swinging door assemblies, except jute-built windows and/or doors, shall be visually inspected to verify that installed assemblies are listed and labeled by the manufacturer to the referenced standard. For curtain wall, storefront glazing, commercial entrance doors and revolving doors, the testing reports shall be reviewed to verify that the installed assembly complies with the standard cited in the approved plans.	As required during installation; prior to final construction inspection	NFRC 400; AAMA/NWMA/CSA 101/1.5.2/A440 ASTM E283, ANSI/DASMA 105	502.4; ASHRAE 90.1 - 5.4.3.2	IIB.5 Duct, plenum and piping insulation and sealing: Installed duct and piping insulation shall be visually inspected to verify proper insulation placement and values. Joints, longitudinal and transverse seams and connections in ductwork shall be visually inspected for proper sealing.	After installation and prior to closing shafts, ceilings and walls	Approved construction documents; SMACNA Duct Construction Standards, Metal and Flexible	503.2.7, 503.2.8, 504.5; ASHRAE 90.1 - 6.3, 6.4.4.2, 6.8.2, 6.8.3; 7.4.3	IIC.4 Exterior lighting: Installed lighting shall be verified for compliance with source efficacy and/or the lighting power allowance by visual inspection.	Prior to final electrical and construction inspection	Approved construction documents	505.6; ASHRAE 90.1 - 9.4.4, 9.4.5; 1RCNY §101-07(c)(3)(i)-(c)(4)
IIA.5 Fenestration areas: Dimensions of windows, doors and skylights shall be verified by visual inspection.	Prior to final construction inspection	Approved construction documents	502.3; ASHRAE 90.1 - 5.5.4, 5.6 or 11	IIB.6 Air leakage testing for high-pressure duct systems: For duct systems designed to operate at static pressures in excess of 3 inches w.g. (746 Pa), representative sections, as determined by the progress inspector, totaling at least 25% of the duct area, per ECC 503.2.7.1.3, shall be tested to verify that actual air leakage is below allowable amounts.	After installation and sealing and prior to closing shafts, ceilings and walls	Approved construction documents; SMACNA HVAC Air Duct Leakage Test Manual	503.2.7.1.3; ASHRAE 90.1 - 6.4.4.2	IIC.5 Lighting controls: Each type of required lighting controls, including: occupant sensors; manual interior lighting controls; light-reduction controls; automatic lighting shut-off; daylight zone controls; sleeping unit controls; exterior lighting controls shall be verified by visual inspection and tested for functionality and proper operation.	Prior to final electrical and construction inspection	Approved construction documents, including control system narratives	505.2, 505.2.2; ASHRAE 90.1 - 9.4.1, 9.4.1.2 (as modified by section ECC A102)
IIA.7 Projection factors: Where the energy analysis utilized a projection factor > 0, the projection dimensions of overhangs, eaves or permanently attached shading devices shall be verified for conformance with approved plans by visual inspection.	Prior to final construction inspection	Approved construction documents, including energy analysis	502.3; ASHRAE 90.1 - 5.5.4, 5.6 or 11	IIC.6 Exit signs: Installed exit signs shall be visually inspected to verify that the label indicates that they do not exceed maximum permitted wattage.	Prior to final electrical and construction inspection	Approved construction documents	505.4; ASHRAE 90.1 - 9.4.3	IIC.7 Tandem wiring: Tandem wiring shall be tested for functionality.	Prior to final electrical and construction inspection	Approved construction documents	505.3; ASHRAE 90.1 - 9.4.2
IIA.9 Building entrance vestibules: Required entrance vestibules shall be visually inspected for proper operation.	Prior to final construction inspection	Approved construction documents	502.4.6; ASHRAE 90.1 - 5.4.3.4					IID Other			
								IID.1 Maintenance information: Maintenance manuals for mechanical, service hot water and electrical equipment and systems requiring preventive maintenance shall be reviewed for applicability to installed equipment and systems before such manuals are provided to the owner. Labels required for such equipment or systems shall be inspected for accuracy and completeness.	Prior to sign-off or issuance of Final Certificate of Occupancy	Approved construction documents, including electrical drawings where applicable; ASHRAE Guideline 4; Preparation of Operating and Maintenance Documentation for Building Systems	303.3, 503.2.9.3; ASHRAE 90.1 - 4.2.2.5, 6.7.2.2, 8.7.2

GENERAL NOTES

SUBSURFACE UTILITIES ARE NOT GUARANTEED BY SURVEYOR. HIGH CAUTION RECOMMENDED AND VERIFICATION WITH PROPER CITY AGENCIES IS MANDATORY BEFORE COMMENCING ALL NEW WORK.

ALL SUBSURFACE AND OVERHEAD UTILITIES (AS TO SIZE, TYPE AND DEPTH) SHOWN ON THIS SURVEY ARE TAKEN FROM RECORDS OF GOVERNMENTAL AGENCIES AND UTILITY COMPANIES, UNLESS OTHERWISE NOTED AND SHOWN.

COVER OR DEPTH OF UTILITIES WHICH DERIVED FROM FIELD MEASUREMENTS SHOWN ON THIS SURVEY SHOULD BE VERIFIED WITH PROPER AGENCY PRIOR TO CONSTRUCTION OF PROJECT. INVERT ELEVATIONS ARE DERIVED FROM CITY AGENCY RECORDS WHEN NOT AVAILABLE BY FIELD SURVEY AND NOTED AS "PER RECORD" ON THE SURVEY.

ALL SUBSURFACE UTILITY AS TO LOCATION AND DEPTH, SHOULD BE RECHECKED AND LEGAL GRADES SHOULD BE VERIFIED WITH THE TOPOGRAPHICAL BUREAU, PREFERABLY IN WRITING BEFORE COMMENCING CONSTRUCTION.

THIS IS TO CERTIFY THAT THERE ARE NO STREAMS OR NATURAL WATER COURSES ON THE SURVEYED PROPERTY EXCEPT AS SHOWN AND/OR DESCRIBED ON THIS SURVEY.

ALL OPERATIONS OF UNDERGROUND FACILITIES AND ALL EXCAVATORS ARE OBLIGATED TO COMPLY WITH ARTICLE 36 OF THE GENERAL BUSINESS LAW AND WITH PROVISIONS OF INDUSTRIAL CODE PART (RULE NO. 35) BEFORE ANY EXCAVATION OR DEMOLITION IS COMMENCED. EVERY EXCAVATOR IS REQUIRED BY THESE LAWS TO GIVE ADVANCE NOTICE TO EVERY OPERATOR OF UNDERGROUND FACILITIES OF HIS INTENT TO PERFORM EXCAVATION OR DEMOLITION WORK IN THE SPECIFIED AREA.

ALL ELEVATIONS SHOWN REFER TO THE 1985 NAVD DATUM TO OBTAIN:
- NSVD 1929 DATUM - ADD 1.098 FEET
- BROOKLYN BOROUGH DATUM - SUBTRACT 1.447 FEET

EASEMENTS IF ANY ARE NOT SHOWN ON THIS SURVEY. NO INFORMATION PROVIDED TO SURVEYOR AT THIS TIME.

UNDERGROUND UTILITIES NOTES

UNDERGROUND, OVERHEAD AND GROUND LEVEL UTILITIES ARE NOT GUARANTEED AS TO ACCURACY, EXACT LOCATION, TYPE OR USE. ACTIVE OR INACTIVE VERIFICATION IS MANDATORY WITH MUNICIPAL AGENCIES, PUBLIC AND PRIVATE UTILITY COMPANIES PRIOR TO TAKING TITLE AND/OR DESIGN WORK. BOUNDARIES ARE NOT GUARANTEED UNLESS SO NOTED.

ALL OPERATIONS OF UNDERGROUND FACILITIES AND ALL EXCAVATORS ARE OBLIGATED TO COMPLY WITH ARTICLE 36 OF THE GENERAL BUSINESS LAW AND WITH PROVISIONS OF INDUSTRIAL CODE PART (RULE NO. 35) BEFORE ANY EXCAVATION OR DEMOLITION IS COMMENCED. EVERY EXCAVATOR IS REQUIRED BY THESE LAWS TO GIVE ADVANCE NOTICE TO EVERY OPERATOR OF UNDERGROUND FACILITIES OF HIS INTENT TO PERFORM EXCAVATION OR DEMOLITION WORK IN THE SPECIFIED AREA.

UNAUTHORIZED ALTERATION OR ADDITION TO THIS SURVEY IS A VIOLATION OF SECTION 7209 OF THE NEW YORK STATE EDUCATION LAW. COPIES OF THIS SURVEY MAP NOT BEARING THE LAND SURVEYOR'S INKED SEAL OR EMBOSSED SEAL SHALL NOT BE CONSIDERED TO BE A VALID COPY. GUARANTEES OR CERTIFICATIONS INDICATED HEREON SHALL RUN ONLY TO THE PERSON FOR WHOM THE SURVEY IS PREPARED AND ON HIS BEHALF TO THE TITLE COMPANY, GOVERNMENTAL AGENCY AND LENDING INSTITUTION LISTED HEREON, AND TO THE ASSIGNEES OF THE LENDING INSTITUTION. GUARANTEES OR CERTIFICATIONS ARE NOT TRANSFERABLE TO ADDITIONAL INSTITUTIONS OR SUBSEQUENT OWNERS.

GENERAL PARTITION NOTES

- TYPICAL STUD DEFLECTION SHALL BE L/240.
- PARTITIONS SHALL REST DIRECTLY UPON THE CONCRETE FLOOR CONSTRUCTION AND MAY EXTEND TO THE CONCRETE CONSTRUCTION OF THE FLOOR OR ROOF ABOVE.
- INCREASE GAUGE THICKNESS OR DECREASE STUD SPACING AS REQUIRED TO MEET DEFLECTION CRITERIA AND WHERE LIMITING HEIGHTS ARE EXCEEDED.
- PARTITIONS THAT RECEIVE TILE, GLASS, OR SUPPORT WALL HUNG EQUIPMENT SHALL HAVE A MAXIMUM DEFLECTION OF L/360.
- FOR STEEL VERTICAL REINFORCING SPACING SEE STRUCTURAL DRAWINGS.
- ALL PARTITIONS ARE CONSTRUCTED OF STUDS UNLESS DESIGNATED OTHERWISE.
- ALL FIRE RATED PARTITIONS SHALL HAVE FIRE RATED TYPE "X" GYP. WALL BD.
- ALL TOILETS, MECHANICAL ROOMS, WET COLUMNS AND SIMILAR WET AREAS SHALL HAVE WATER RESISTANT GYP. BD.
- ALL DRYWALL USED IN INTERIOR FURRING OF EXTERIOR WALL SHOULD BE MOISTURE & MOLD RESISTANT BOARD, TYPICAL.
- PROVIDE CONTINUOUS 2-HOUR RATED SHAFT WALL AT ALL SLAB OPENINGS INCLUDING, BUT NOT LIMITED TO, ELEVATOR SHAFTS, DUCT SHAFTS, OPEN NON-SLEEVED PIPE CHASES AND AS INDICATED ON THE FLOOR PLANS.
- PROVIDE CONTINUOUS 2-HOUR RATED WALL AT ALL STAIRS AND AS INDICATED ON FLOOR PLANS.
- PROVIDE 2-HOUR HORIZONTAL SHAFT WALL FOR ALL SHAFTS THAT DO NOT CONTINUE THE NEXT LOWER LEVEL AND WHERE SHAFT WALL DOES NOT ALIGN FROM FLOOR TO FLOOR.
- PROVIDE CONTINUOUS 2-HOUR RATED SHAFT WALL AT TRASH CHUTE.
- ALL WOOD USED IN PARTITIONS SHALL BE FIRE RETARDANT TREATED.
- FOR STUD SIZES AT EXTERIOR WALLS SEE EXTERIOR WALL SECTIONS AND DETAILS.
- SEE FIRE SEPARATION & EGRESS PLANS FOR EXTENT OF FIRE RATED PARTITIONS.
- PROVIDE NECESSARY BACKING FOR ALL WALL MOUNTED ITEMS INDICATED ON FLOOR PLANS, ELEVATIONS, AND IN SPECIFICATIONS.
- GC TO COORDINATE APPLICATION OF CONTINUOUS INSULATION & VAPOR BARRIER, TYPICAL.
- VERIFY CONTINUITY OF ALL FIRE RATED ASSEMBLIES.
- ALL DRYWALL PARTITIONS, FURRING AND SOFFITS IN AN EXTERIOR ENVIRONMENT SHALL RECEIVE 5/8" DENSE SHIELD, FIREGUARD (TYPE "X" WHERE SCHEDULED), FINISH BOARD, WITH A SUBLAYER OF 5/8" DENSE ARMOR PLUS FIREGUARD C, WHERE REQUIRED TO MEET FIRE RATINGS. SEE PLANS.
- ALL WALL TYPES TO PERFORM TO UL DESIGNATION IN COMPLIANCE WITH B.C. 720 (12)

INTERIOR PARTITION NOTES:

- FIRE-RATED PARTITIONS ARE IDENTIFIED ON FLOOR PLANS (SEE APPROPRIATE LEGENDS)
 - FIRE OR SMOKE RATED PARTITIONS SHALL BE CONTINUOUS FROM FLOOR PLANK TO UNDERSIDE OF STRUCTURE ABOVE
 - ALL OPENINGS (DOORS) AND PENETRATIONS (DUCTS, PIPES) SHALL BE RATED TO MAINTAIN THAT PARTITION'S RATING
 - FIRE OR SMOKE RATED PARTITIONS SHALL BE UL LABELED OR HAVE THE APPROPRIATE MEA OR BSA NUMBER, AND SHALL CONFORM TO THE BUILDING CODE REQUIREMENTS
 - ALL GWB FIRECODE "X" TO COMPLY W/ ASTM C-36
 - AT FIRE-RATED WALLS WHERE AN STC RATING IS REQUIRED, APPLY FIRESTOP SEALANT PRIOR TO ACOUSTICAL SEALANT
 - WALL BOARD TO BE GLASS-MAT, WATER-RESISTANT TILE BACKING BOARD ALL CERAMIC WALL TILE, PROVIDE 5/8" BACKER BOARD AT THREE WALL SURROUNDING BATHUB HEIGHT, TILE BACKER BOARD TO BE FIRE RATED AT FIRE RATED PARTITIONS
 - OUTER LAYER OF GWB TO BE WATER RESISTANT @ BATHROOMS, KITCHENS & JANITOR'S CLOSETS OR WHERE WATER IS USED
 - SPACE STL STUDS 12" O.C. @ KITCHEN CABINET LOCATIONS AND PROVIDE BLOCKING OR STEEL PLATE FOR BASE & WALL CABINETS AS REQ'D
 - PROVIDE 6" STEEL STUD PARTITION @ ELECTRIC PANEL LOCATION
 - AT NON-BEARING CMU, PROVIDE CONT. 1/2" THICK PRE-MOLDED COMPRESSIBLE FILLER UNDERNEATH PLANK (1" NARROWER THAN CMU WIDTH)
 - PROVIDE SEALANT AND BACKER ROD AT ALL SOFT JOINTS
- MASONRY REINFORCEMENT NOTES:**
- SEE STRUCTURAL DRAWINGS FOR BEARING WALL AND TYPICAL REINFORCEMENT NOTES AND DETAILS.
 - PROVIDE HORIZONTAL JOINT REINFORCEMENT 16" OC VERTICALLY TYPICAL AND 8" OC VERTICALLY AT PARAPETS
 - PROVIDE #4 REBAR FULL HEIGHT 8' OC (4' OC AT PARTITIONS GREATER THAN 8' HIGH) AND AT ENDS OF WALLS AND AT BOTH SIDES OF OPENINGS.
 - FULLY GROUT ALL CONCRETE MASONRY UNIT CELLS RECEIVING VERTICAL REINFORCEMENT.
 - PROVIDE TOP ANCHORS (SEISMIC CLIPS) 4' OC TYP EXCEPT WITHIN 4' OF 90 DEGREE PARTITION INTERSECTIONS.
 - PROVIDE SOFT JOINT WITH COMPRESSIBLE FILLER AND SEALANT BOTH SIDES AT TOP OF NON-BEARING PARTITIONS.
 - PROVIDE SEISMIC CLIPS AT ALL CMU WALLS, SPACED 4' MAX. ON CENTER, EXCEPT CLIPS ARE NOT REQ'D WITHIN 8' MAX. OF A CMU CORNER, TEE, OR RETURN.

GENERAL PLAN NOTES

- REFER TO A-020.0, A-021.0, A-022.0, A-023.0 AND A-024.0 FOR WALL TYPES
- TYPICAL APARTMENT ENTRY DOOR IS 'A1' U.O.N.
- TYPICAL BEDROOM AND BATHROOM DOOR IS 'B1' U.O.N.
- REFER TO G-000 FOR ABBREVIATIONS AND SYMBOLS
- REFER TO G-001 FOR GENERAL NOTES
- REFER TO G-003 FOR ACCESSIBILITY NOTES
- EXIT MARKINGS TO COMPLY WITH B0403.1.6
- ALL DOORS WITHIN EGRESS STAIRS AND CORRIDORS OR IN EGRESS PATH TO BE 2 HR RATED SELF CLOSING DOORS 90 MINUTE DOORS
- LOCATE THE HINGE SIDE OF ALL DOORS 4" FROM F.O. NEIGHBORING WALL U.O.N. - SEE DIAGRAM
- PROVIDE AUTOMATIC SHUT OFF VALVE WITH FLOOD SENSOR @ EACH WD UNIT WITH PAN UNDERNEATH
- ALL DOORS AT CELLAR AND STAIRS AT 3'-0" X 6'-8" HM DOORS + WELDED FRAMES - TYPICAL U.O.N.
- ALL LEVELS REFERENCE FINISH FLOOR ELEVATION LEVELS
- SEE A-500 SERIES FOR ENLARGED DIMENSION DRAWINGS OF STAIRS, ELEVATORS AND TRASH CHUTE
- ALL WALL PAINT TO BE EGGSHELL ENAMEL FINISH
- ALL PLAIN STACK CMU WALLS TO BE BLOCK FILLER AND PAINT ARCHITECT TO SELECT PALETTE FOR STAIRS
- RECESSED INTERCOM TO BE INSTALLED WHILE BRICK IS BEING INSTALLED.
- SPRAY INSULATION TO BE APPLIED TO UNDERSIDE OF PLANK AT CRAWL SPACE.

WireCrafters BICYCLE WALL RIDER

End Bicycle Clutter Once and For All.

Strong. Secure. Attractive...and Organized. The Bicycle Wall Rider from WireCrafters is the ideal way to provide stable, vertical bike storage on unused existing walls.

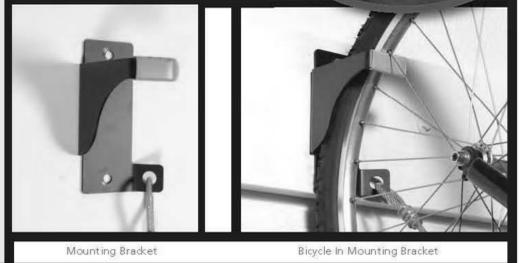

Easy to Store. Now your tenants have a quick and easy vertical way to store their bikes – and all you need is what you already have – wall space. The Bicycle Wall Rider from WireCrafters safely and securely hangs bikes vertically, accommodating virtually any bike. Made of 1/8" thick steel, finished in black enamel, with a protective, stain-resistant vinyl sleeve on the hanger to help prevent wheel rim scuffing or scratching, the Bicycle Wall Rider from WireCrafters gets bikes out of the way, once and for all.

- The Bicycle Wall Rider from WireCrafters...**
- Strong...made of heavy-duty 11-gauge (1/8" thick) steel.
 - Precision laser cut and formed.
 - Easily installs...two 1/2" round holes for wall mounting.
 - Ideal for residential, institutional and commercial use.
 - Heavy duty 1/4" vinyl-coated aircraft quality 5' cable is permanently connected to mounting base for securing stored bicycles. Cable has permanent loop at free end for user's lock. Clear vinyl coating on cable protects bicycle finish during use.

NOTE: For best results when mounting to sheetrock, a horizontal header board may need to be installed (not included). See installation instructions or contact your sales representative for more information about mounting on sheetrock.

Dimensions:
 Base Length: 8"
 Base Width: 3"
 Overall width including cable/lock eye: 4-3/4"
 Cable/lock eye: 3/4" round hole
 Arm projection from wall: 5-1/4"
 Arm width: 1"
 Arm length: 2"
 Arm length overall: 2-3/4"
 Optional Cable: 1/4" vinyl coated aircraft quality 5' long cable (must be ordered with the Bicycle Wall Rider from WireCrafters)

Mounting hardware not included.

WINDOW EXTERIOR / DOOR NOTES:

1. ALL WINDOWS AND DOORS GLASS TO BE CLEAR NON-TINTED.
2. PROVIDE TEMPERED GLASS FOR GLAZING UNITS WITHIN 18" OF FINISH FLOOR.
3. ALL WINDOWS SHOWN FROM EXTERIOR.
4. REFER TO ELEVATIONS FOR STOREFRONT LOCATIONS.
5. O.C. TO COORDINATE WINDOWS @ DOORS SWINGS WITH FLOOR ????
6. ALL WINDOWS TO BE CONSTRUCTED OF ALUMINUM FRAME WITH THERMAL BREAK, DOUBLE PANE, CLEAR, SHGC 0.40, UF 0.45. SEE ENVELOPE COMPLIANCE CERTIFICATE.
7. ALL WINDOWS @ DOORS TO COMPLY WITH NOISE CONTROL FOR E-183 DESIGNATED AREA.
8. PROVIDE DOOR CLOSURE IN THE INSIDE OF ALL DOORS @ GROUND FLOOR @ ROOF LEVEL.
9. ALL WINDOWS TO INCLUDE ALUMINUM THERMALLY BROKEN FRAMES.

COMPLIANCE WITH ZR 123-32:

WINDOWS TO BE RATED FOR NOT LESS THAN 35 OITC WHEN TESTED FOR LABORATORY SOUND TRANSMISSION LOSS ACCORDING TO ASTM E 90 AND DETERMINED BY ASTM E 1332.

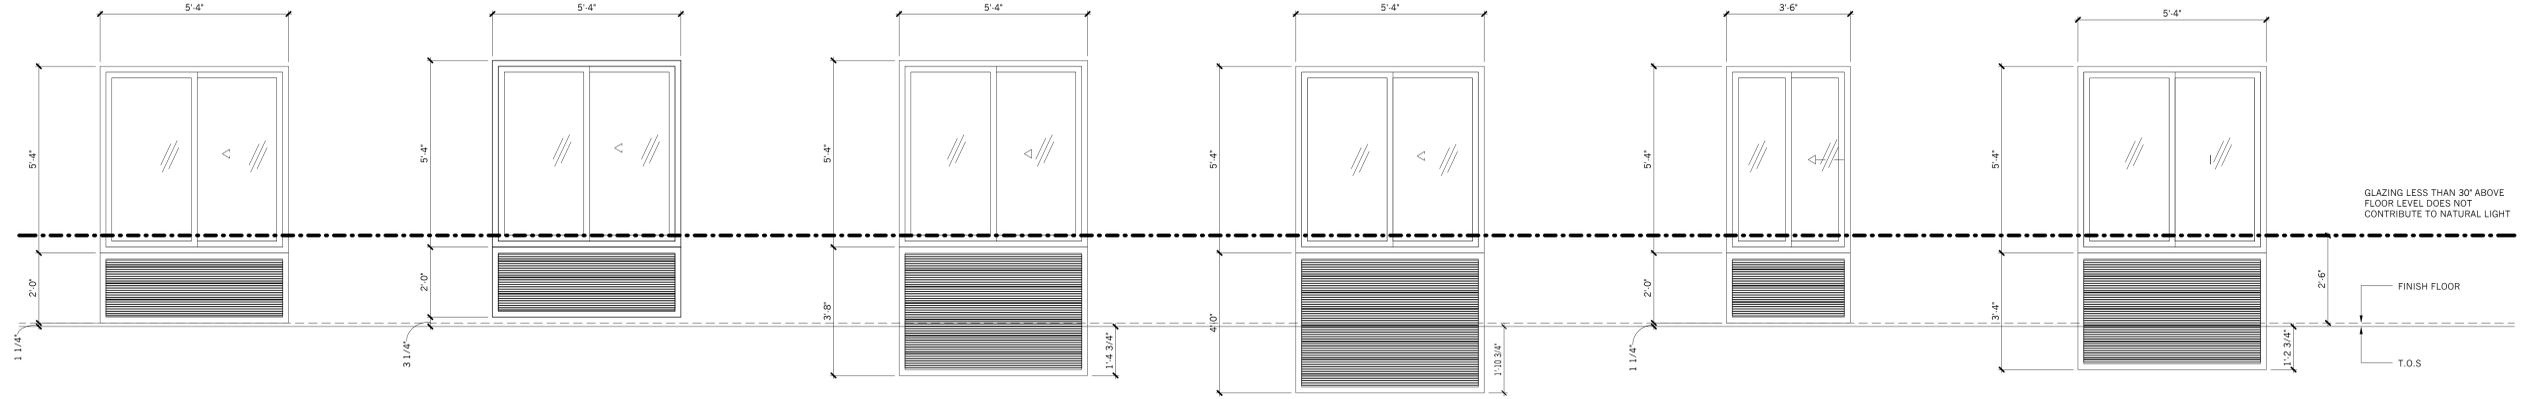

GENERAL NOTES:

- PROVIDE ALUMINUM WINDOWS OF THE PERFORMANCE CLASS AND GRADE INDICATED THAT COMPLY WITH AAMA/NWDA 101/1.S.2.
- PERFORMANCE CLASS: AW-100 FOR WINDOWS, SWD-HC FOR DOORS
- ACOUSTICAL OBJECTIVES: ALL WINDOW/DOOR SYSTEMS TO ACHIEVE STRICT PROJECT REQUIREMENTS OF MAXIMUM ALLOWABLE NOISE TRANSMISSION DELTA TO NEW YORK CITY ZONING RESOLUTION SECTION 123-32.
- ACOUSTICAL MOCK-UP TESTING IS A REQUIREMENT OF AND SHALL BE INCLUDED WITHIN THE BID REQUIREMENTS AS A SUPPLEMENTAL ATTACHMENT
- LABORATORY TESTING SHALL BE PERFORMED IN ACCORDANCE WITH ASTM E90 AT AN INDEPENDENT LABORATORY CERTIFIED/EXPERIENCED IN PERFORMING ASTM E90 TESTING OF WINDOW SYSTEMS.
- OITC RATINGS SHALL BE CALCULATED IN ACCORDANCE WITH ASTM E1332. TRICKLE VENTS AND EXTERIOR RECEPTORS SHALL BE INSTALLED AND IN THE "OPEN" POSITION FOR THE ACOUSTICAL TESTING

MATERIALS AND LAYOUT LEGEND

GENERAL NOTES

- REFER TO THE TOPOGRAPHIC SURVEY FOR EXISTING UTILITIES AND ELEVATIONS. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO DETERMINE THE EXACT LOCATION OF ANY UTILITY LINES AND PROTECT THEM.
- ALL BASE INFORMATION TAKEN FROM ARCHITECTURAL DRAWINGS PROVIDED BY MARVEL ARCHITECTS.
- FOR DRAINAGE STRUCTURES, PLUMBING FIXTURES, AND MECHANICAL CONNECTIONS SEE ENGINEERING DRAWINGS.
- FOR NOTES, DETAILS, AND HOOK-UP REGARDING ELECTRICAL ITEMS, SEE ELECTRICAL DRAWINGS.
- SEE STRUCTURAL DRAWINGS FOR INFORMATION ON ALL STRUCTURAL ITEMS.
- THE CONTRACTOR SHALL VERIFY ALL FIELD CONDITIONS AND FAMILIARIZE THEMSELVES WITH THE SITE PRIOR TO COMMENCEMENT OF WORK. IF ACTUAL FIELD CONDITIONS VARY FROM LAYOUT AND DIMENSIONS AS SHOWN ON THE PLANS, THE CONTRACTOR SHALL PERFORM THE WORK IN ACCORDANCE WITH EXISTING FIELD CONDITIONS. NOTIFY THE OWNER'S REPRESENTATIVE IN WRITING OF ANY DISCREPANCIES PRIOR TO CONTINUING WORK.
- IT IS ANTICIPATED THAT VARIOUS WORK FOR THIS CONTRACT SHALL BE PERFORMED SIMULTANEOUSLY. THE CONTRACTOR IS RESPONSIBLE FOR COORDINATING WORK BETWEEN SUB-CONTRACTORS AND UTILITY COMPANIES TO ENSURE COMPLETION OF THIS WORK IN A TIMELY AND WORKMAN LIKE MANNER.
- THE CONTRACTOR SHALL REFER TO THE SPECIFICATIONS.
- THE CONTRACTOR SHALL REPLACE ANY BROKEN OR DAMAGED SITE FEATURES, SUCH AS EXISTING CURB, SIDEWALK, FENCING, ROADWAY, ETC., CAUSED BY THE CONSTRUCTION AT NO ADDITIONAL COST TO THE OWNER.
- THE CONTRACTOR SHALL SECURE THE WORK AREA WITH APPROPRIATE BARRIERS OR FENCING AND MAINTAIN A SAFE AND SECURE CONSTRUCTION SITE.
- FOR ALL WORK AT STREET SIDEWALK AND CURBS, SEE THE APPROVED BUILDERS PAVEMENT PLAN.

LAYOUT NOTES

- ALL BASE INFORMATION PROVIDED FROM ORIGINAL ARCHITECTURAL DRAWINGS BY MARVEL ARCHITECTS.
- THE CONTRACTOR SHALL VERIFY ALL DIMENSIONS, GRADE ELEVATIONS, AND SITE CONDITIONS BEFORE STARTING WORK. ANY DISCREPANCIES SHALL BE BROUGHT TO THE ATTENTION OF THE OWNER'S REPRESENTATIVE.
- CUT PAVERS AROUND STRUCTURES AND AT WALLS WHERE REQUIRED AND AS SHOWN ON LAYOUT PLAN. FIELD CONDITION MAY REQUIRE ADJUSTMENTS TO PAVEMENT LAYOUT AND/OR ADDITIONAL ROWS OF CUT PAVERS IN ORDER TO AVOID SMALL PAVEMENT SLIVERS ALONG WALLS OR OTHER EDGES. CUT PAVERS SHALL NOT BE LESS THAN 8" ON ANY FACE DIMENSION. WHEN A CUT WOULD MAKE A PAVEMENT SLIVER LESS THAN 8" IN ANY DIMENSION, AN OVERSIZED PAVEMENT SHOULD BE USED AND SCORED TO CREATE A SUPERFICIAL JOINT WHERE THE JOINT WOULD HAVE OCCURRED IN THE PAVING PATTERN.

GRADING NOTES

- THE CONTRACTOR IS RESPONSIBLE FOR PROVIDING A 100% FULLY OPERATIONAL SITE DRAINAGE SYSTEM THAT CONDUCTS AND DISPOSES OF ALL STORM WATER RUNOFF.
- IN ALL CASES, PAVEMENT SHALL BE PITCHED TO DRAINS TO PREVENT PUDDING AND PONDING. THE CONTRACTOR SHALL PERFORM A DRAINAGE TEST OF ALL PAVEMENT TO INSURE POSITIVE DRAINAGE.
- ENSURE THAT TRUE LOW POINT IS AT LOCATION OF DRAINAGE STRUCTURE.
- THE CONTRACTOR SHALL PROVIDE TOPSOIL TO ACHIEVE FINISHED GRADES IN ALL PLANTED AREAS.
- REFER TO THE TOPOGRAPHIC SURVEY FOR EXISTING UTILITIES AND ELEVATIONS. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO DETERMINE THE EXACT LOCATION OF ANY UTILITY LINES AND PROTECT THEM.
- ALL NEW WORK SHALL MEET ADJACENT WORK FLUSH WITH SMOOTH TRANSITIONS AND NO TRIPPING HAZARDS.
- FOR ELEVATIONS OF NEW STREET SIDEWALK AND CURBS, SEE THE BUILDERS PAVEMENT PLAN.

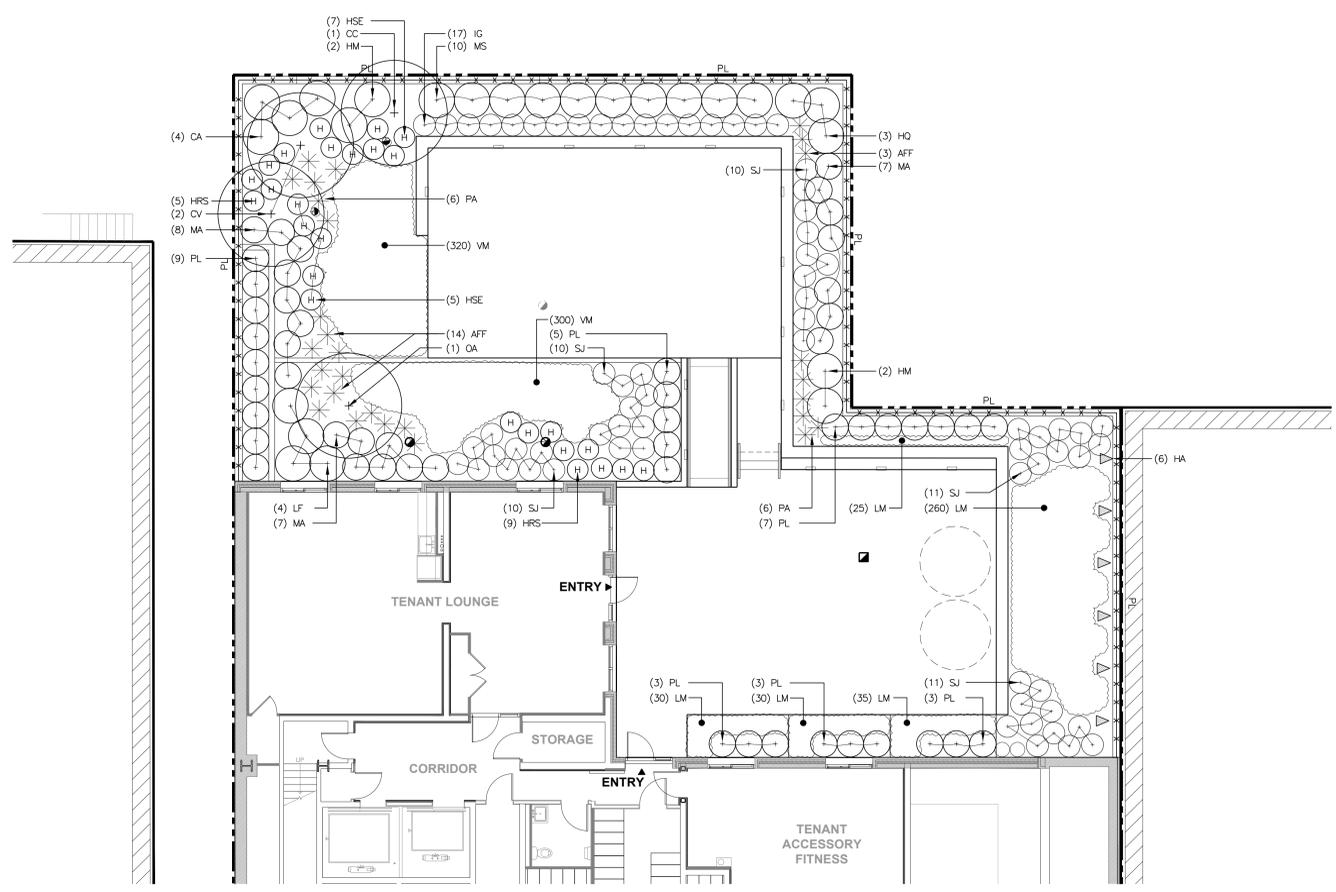

PLANTING NOTES

- ALL PLANT MATERIAL TO BE VIGOROUS, FREE OF INJURY OR DEFECTS. ALL PLANT MATERIAL TO BE TRUE REPRESENTATIVES FOR THEIR SPECIES.
- ALL B&B MATERIAL IS TO HAVE BALL/PLANT SIZE RELATIONSHIP AS SPECIFIED BY THE AMERICAN ASSOCIATION OF NURSERYMEN.
- ALL SHRUB BEDS, UNLESS OTHERWISE NOTED, SHALL BE MULCHED WITH 2" SHREDDED HARDWOOD BARK.
- TOPSOIL DEPTH REQUIREMENTS (UNLESS OTHERWISE DETAILED):
GROUNDCOVER - 9" MIN.
SHRUB BEDS, PERENNIALS, & GRASSES - 18" MIN.
MAJOR & MINOR TREES - SEE DETAILS.
- NO PLANT SUBSTITUTION WILL BE ACCEPTED UNLESS AUTHORIZED BY THE LANDSCAPE ARCHITECT.
- THE LANDSCAPE ARCHITECT MAY REJECT ANY PLANT MATERIAL WHICH DOES NOT REPRESENT SPECIES AS OUTLINED IN PLANT LIST.
- THE CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFYING QUANTITIES SHOWN ON THE PLANS. ANY DISCREPANCIES BETWEEN WHAT IS SHOWN ON THE PLANS & QUANTITIES IN THE PLANT LIST SHALL BE BROUGHT TO THE ATTENTION OF THE LANDSCAPE ARCHITECT. THE PLAN COUNT SHALL TAKE PRECEDENCE.

NOTE: THE DESIGN, DETAILS AND NOTES ARE IN COMPLIANCE WITH NYC BC SECTION 1613 - EARTHQUAKE LOADS.

GENERAL NOTES

GENERAL

- LOCATION OF ALL UNDERGROUND UTILITIES ARE APPROXIMATE. ALL LOCATIONS AND SIZES ARE BASED ON UTILITY MARK-OUTS, ABOVE GROUND STRUCTURES THAT WERE VISIBLE & ACCESSIBLE IN THE FIELD, AND THE MAPS AS LISTED IN THE REFERENCES AVAILABLE AT THE TIME OF THE SURVEY. AVAILABLE AS-BUILT PLANS AND UTILITY MARK OUT DOES NOT ENSURE MAPPING OF ALL UNDERGROUND UTILITIES AND STRUCTURES. BEFORE ANY EXCAVATION IS TO BEGIN, ALL UNDERGROUND UTILITIES SHOULD BE VERIFIED AS TO THEIR LOCATION, SIZE AND TYPE BY THE PROPER UTILITY COMPANIES.
- IF AN UNFORESEEN INTERFERENCE EXISTS BETWEEN AN EXISTING AND PROPOSED UTILITY OR STRUCTURE THE CONTRACTOR IS TO NOTIFY THE DESIGN ENGINEER SO THAT THE APPROPRIATE REVISIONS CAN BE MADE.
- THE CONTRACTOR IS TO ADHERE TO ALL APPLICABLE CONSTRUCTION SAFETY STANDARDS AS PUBLISHED IN THE CODE OF FEDERAL REGULATIONS 1926 AS AMENDED.
- NOTIFY LOCAL, STATE AND FEDERAL AGENCIES AS MAY BE REQUIRED FOR PROPOSED WORK.
- ALL EROSION CONTROLS (IF REQ'D) ARE TO BE SET IN PLACE PRIOR TO ANY LAND DISTURBANCES ON THE SITE.
- THE CONTRACTOR IS TO USE CAUTION WHEN WORKING NEAR OR UNDER OVERHEAD UTILITIES. THE CONTRACTOR IS TO NOTIFY THE UTILITY COMPANIES OF HIS INTENT PRIOR TO COMMENCEMENT OF ANY WORK.
- ANY DRAINAGE STRUCTURES, UTILITIES, DITCHES, GRASSED AREAS, PAVEMENT, CONCRETE OR CURBS DISTURBED DURING CONSTRUCTION SHALL BE RESTORED TO ORIGINAL OR BETTER CONDITION.
- THE CONTRACTOR SHALL BE SOLELY AND DIRECTLY RESPONSIBLE TO THE OWNER AND OPERATORS OF SUCH PROPERTIES FOR ANY DAMAGE, INJURY, EXPENSE, LOSS, INCONVENIENCE, DELAY, SUITS, ACTIONS OR CLAIMS OF ANY CHARACTER RESULTING FROM THE CONSTRUCTION OPERATIONS UNDER THIS CONTRACT.
- NEITHER THE OWNER, OFFICERS OR AGENTS OF THE BUSINESS SHALL BE RESPONSIBLE TO THE CONTRACTOR FOR DAMAGES AS A RESULT OF THE CONTRACTOR'S FAILURE TO PROTECT UTILITIES ENCOUNTERED IN THE COURSE OF PERFORMING WORK WHERE THE CONTRACTOR'S OPERATIONS COULD CAUSE DAMAGE OR INCONVENIENCE TO WATER, FIRE PROTECTION SYSTEMS, TELEPHONE, ELECTRIC SERVICES, SANITARY AND STORM WATER SYSTEM, THE OPERATIONS SHALL BE SUSPENDED UNTIL ALL ARRANGEMENTS NECESSARY FOR THE PROTECTION OF THESE UTILITIES AND SERVICES HAVE BEEN MADE BY THE CONTRACTOR.
- THIS PLAN AND APPLICATION ARE FILED FOR APPROVAL ONLY OF THE STATED WORK APPEARING ON THE APPLICATION FORM AND DETAILED ON THE ACCOMPANYING PLANS. ALL OTHER MATTERS ARE NOT TO BE RELIED UPON AND ARE NOT TO BE CONSTRUED AS BEING APPROVED OR IN COMPLIANCE WITH APPLICABLE CODES, RULES OR REGULATIONS. THESE MATTERS ARE SHOWN FOR INFORMATION PURPOSES ONLY.

SUGGESTED SHORING SEQUENCE OF CONSTRUCTION

- LOCATE EXISTING UTILITIES.
- PERFORM PRE-CONSTRUCTION SURVEYS OF ALL EXISTING NEIGHBORING PROPERTIES. DOCUMENT ALL CONDITIONS FOR RECORD PURPOSES.
- ERECT TEMPORARY CONSTRUCTION FENCE AT PROPERTY PERIMETER.
- PERFORM 1:1 SAFE SLOPE OF EXCAVATION AS INDICATED ON PLAN AND AS REQUIRED TO INSTALL TEMPORARY FOOT BLOCKS FOR USE AS TEMPORARY BRACING OF RAKERS AS INDICATED ON PLAN.
- INSTALL SOLDIER PILES WHERE INDICATED ON PLAN BY AUGERING IF NECESSARY. AND FILL WITH LEAN CONCRETE "ONE SACK MIX" (RATIO OF ONE SACK OF CEMENT PER CUBIC YARD OF SAND) INSTALL TIMBER LAGGING.
- AT THIS POINT, THE SITE IS EXCAVATED AND READY FOR NEW BUILDING CONSTRUCTION.
- PERFORM FOUNDATION WORK AS INDICATED ON STRUCTURAL DRAWINGS.
- PLACE CONCRETE FOR THE FOUNDATION WALLS AND SLABS.
- DO NOT PLACE ANY BACKFILL AGAINST FOUNDATION WALLS UNTIL FIRST FLOOR CONSTRUCTION HAS BEEN COMPLETED. ANY AREA OF WALL BACKFILLED FOR ACCESS MUST BE ADEQUATELY BRACED TO WITHSTAND EARTH PRESSURE AND CONSTRUCTION LOADS.
- CONTINUE WITH REMAINING BUILDING SUPERSTRUCTURE CONSTRUCTION.

ADDITIONAL SITE SHORING AND BRACING NOTES

- IF THE CONTRACTOR DETERMINES ALTERNATIVE SHORING EXCAVATION, OR BRACING SCHEMES ARE MORE SUITABLE FOR THIS WORK, PROPOSED METHODS ARE TO BE SUBMITTED TO THE ARCHITECT AND ENGINEER FOR REVIEW. ALTERNATIVE SHORING SCHEMES SHALL BE PREPARED BY A NEW YORK STATE LICENSED PROFESSIONAL ENGINEER, FAMILIAR WITH THE JOB SITE AND SITE CONDITIONS.
- TEMPORARY SOIL, CONSTRUCTION MATERIAL, OR EQUIPMENT SHALL NOT BE PLACED CLOSER TO THE EDGE OF THE EXCAVATION THAN A DISTANCE EQUAL TO 1 1/2 TIMES THE DEPTH OF THE EXCAVATION.
- EACH SIDE OF AN EXCAVATION OR TRENCH THAT IS 5'-0" DEEP OR DEEPER SHALL HAVE A SECURED WOOD LADDER EXTENDED 3'-0" ABOVE THE RIM AND AT 50'-0" O.C. OR A RAMP OUT OF THE TRENCH OR EXCAVATION.

SPECIAL NOTES ON RAILROADS PROTECTIVE LIABILITY INSURANCE

D900011

PIN X731.24

- Each policy of railroad protective liability insurance shall be issued with limits of:

BODILY INJURY LIABILITY **PROPERTY DAMAGE LIABILITY**

Single limit of \$ \$2,000,000 combined Bodily Injury Liability and/or Property Damage Liability for each occurrence with a \$6,000,000 Aggregate limit applying separately to each annual period.

- Before any work is started on the railroad company's right-of-way, the contractor shall furnish:

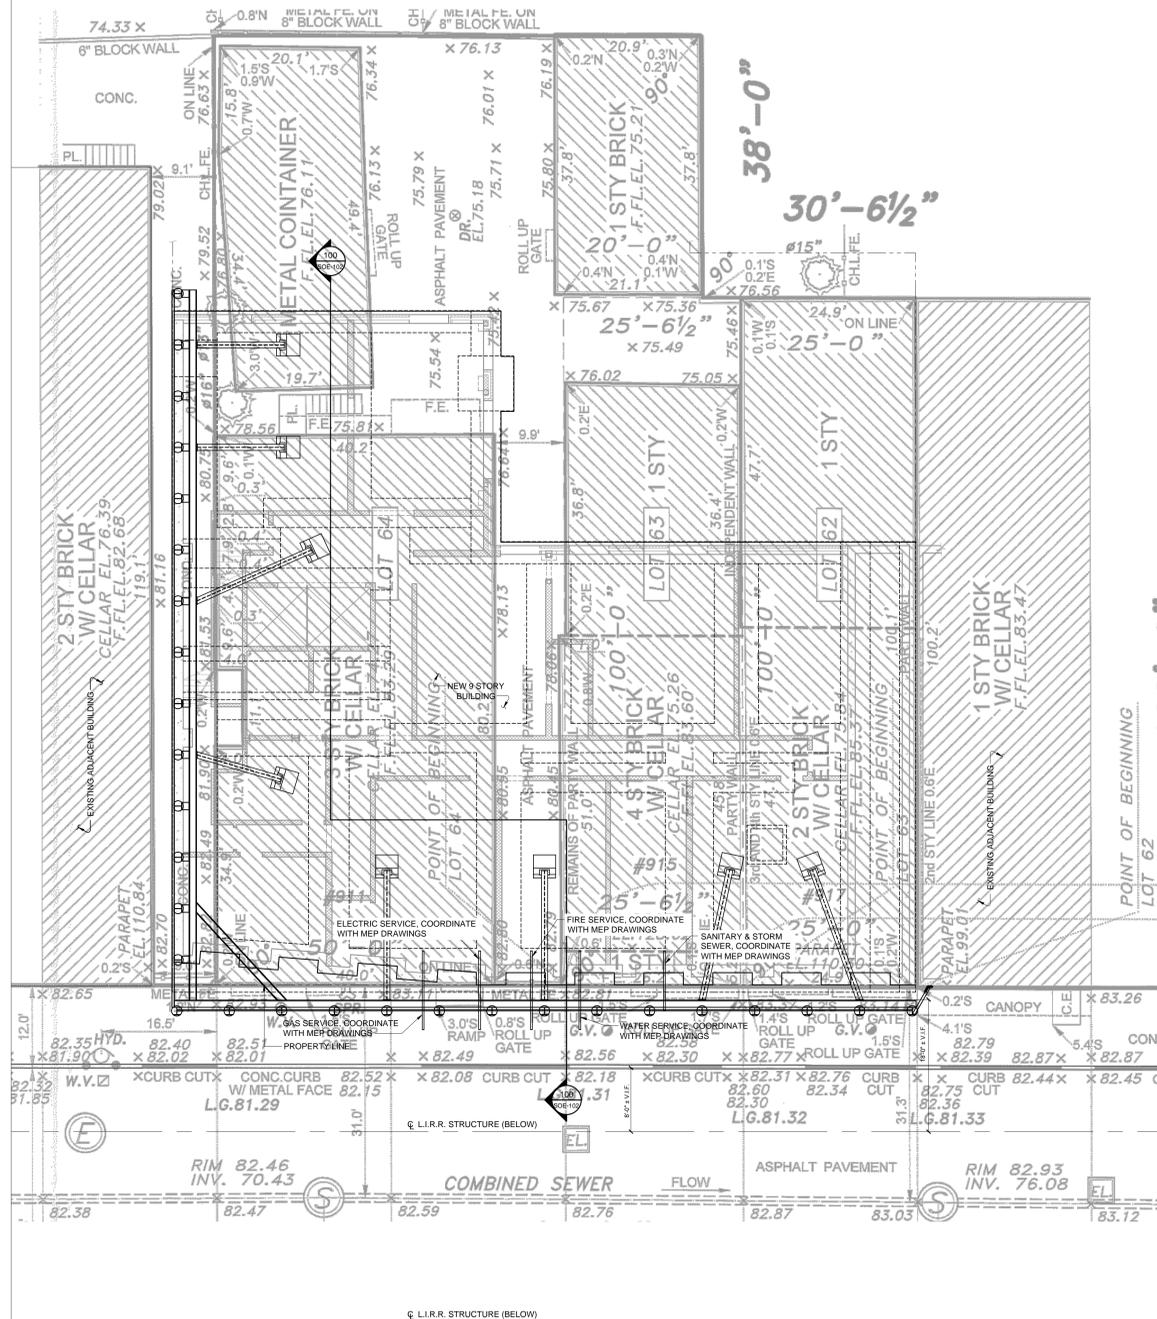

Owner/Operator: MTA/ Long Island Rail Road Co. / New York & Atlantic Railway Co.
Trackage Rights: New York & Atlantic Railway Co.

with a policy of railroad protective liability insurance taken out singularly in the name of each railroad company identified as an owner/operator above in each of the above lines. Said policy(s) shall be subject first to the approval of each named railroad company and the contractor shall also furnish each named railroad company with a copy of the New York State Department of Transportation's Form C-218, Certificate of Insurance for Construction and Reconstruction of State Highway Projects.

This Railroad Protective Liability Insurance Policy issued to the Company shall be in accordance with the U.S. Department of Transportation; Federal Highway Administration, *Federal-Aid Policy Guide*, 23 CFR Part 646 Subpart A dated December 9, 1991.

The Contractor shall procure and maintain at his own expense, and without expense to the State or Railroad, the above captioned Railroad Protective Liability Insurance. The policies shall not be changed or canceled until thirty (30) days written notice has been given to the Commissioner and the above listed Railroad(s).

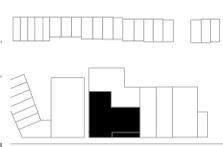

Because of railroad involvement, the Contractor's attention is directed to Section 105-09, WORK AFFECTING RAILROADS, in the current "Standard Specifications, Construction and Material Publication of the New York State Department of Transportation".

CELLAR / FOUNDATION PLAN

SCALE: 1/4" = 1'-0"

NOTES:

- FOUNDATION DESIGNED IS BASED UPON GEOTECHNICAL REPORT DATED 10/29/2015, PREPARED BY HALEY ALDRICH OF NEW YORK. ALL FOOTINGS ARE TO BEAR ON FIRM UNDISTURBED NATIVE SOIL OR ENGINEERED FILL WITH A MINIMUM ALLOWABLE BEARING PRESSURE OF 6,000 PSF. THE ALLOWABLE SOIL BEARING PRESSURE IS TO BE VERIFIED IN THE FIELD BY A NEW YORK LICENSED PROFESSIONAL ENGINEER. CONTRACTOR SHALL OBTAIN A COPY OF THE SOIL BORINGS AND RECOMMENDATIONS LETTER AS IT IS A PART OF THE CONTRACT DOCUMENTS.
- TOP OF CONCRETE SLAB ELEVATION AT CELLAR FLOOR = (71.00) UNLESS NOTED OTHERWISE ("..."). VERIFY WITH ARCHITECTURAL DRAWINGS.
- ("...") INDICATES ASSUMED TOP OF FOOTING / GRADE BEAM ELEVATION. UNLESS SHOWN OTHERWISE ASSUME TOP OF FOOTING = (70.08). FIELD VERIFY ACTUAL ELEVATION. SEE NOTE #1. IF SUITABLE BEARING MATERIAL IS NOT FOUND AT ELEVATIONS SHOWN, EXTEND FOOTINGS DOWN AS REQUIRED.
- VERIFY ALL DIMENSIONS, COORDINATES, AND ELEVATIONS WITH ARCHITECT.
- SEE S-400 SERIES DRAWINGS FOR GENERAL STRUCTURAL NOTES, SCHEDULES AND TYPICAL DETAILS.
- ADDITIONAL VERTICAL BARS SHOWN ARE SPACED AT 8" O.C. MAX. AND ALIGN WITH SHEAR WALL BARS SHOWN ABOVE.
- "..." REPRESENTS FINISHED GRADE ELEVATIONS. VERIFY WITH ARCHITECT.

Project Name: 911 ATLANTIC AVE.
Project Number: 911 ATLANTIC

Lab Number: L1524506
Report Date: 10/07/15

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Project Name: 911 ATLANTIC AVE.
Project Number: 911 ATLANTIC

Lab Number: L1524506
Report Date: 10/07/15

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Metals

L1524506-01: The sample has elevated detection limits for all elements, with the exception of mercury, due to the dilution required by matrix interferences encountered during analysis.

The WG826802-4 MS recoveries for aluminum (377%) and iron (1090%), performed on L1524506-01, do not apply because the sample concentrations are greater than four times the spike amounts added.

The WG826802-4 MS recoveries, performed on L1524506-01, are outside the acceptance criteria for chromium (126%), magnesium (25%), manganese (134%), nickel (70%) and sodium (126%). A post digestion spike was performed and yielded unacceptable recoveries for chromium (71%), manganese (71%), and nickel (73%); all other compounds were within acceptance criteria. This has been attributed to sample matrix.

The WG826802-3 Laboratory Duplicate RPDs, performed on L1524506-01, are outside the acceptance criteria for arsenic (40%), magnesium (34%), and nickel (52%). The elevated RPDs have been attributed to the non-homogeneous nature of the native sample.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCS D	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

Report Format: DU Report with 'J' Qualifiers

Project Name: 911 ATLANTIC AVE.
Project Number: 911 ATLANTIC

Lab Number: L1524506
Report Date: 10/07/15

Data Qualifiers

- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e., co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility

EPA 8260C: 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide) (soil), Methyl methacrylate (soil), Azobenzene.

EPA 8270D: Dimethylnaphthalene, 1,4-Diphenylhydrazine.

EPA 625: 4-Chloroaniline, 4-Methylphenol.

SM4500: Soil: Total Phosphorus, TKN, NO₂, NO₃.

Mansfield Facility

EPA 8270D: Biphenyl.

EPA 2540D: TSS

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water

EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

EPA 300.0: Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

EPA 332: Perchlorate.

Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water

EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1: Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F,**

EPA 353.2: Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4,**

SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.

EPA 624: Volatile Halocarbons & Aromatics,

EPA 608: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT,

Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

EPA 625: SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

Microbiology: **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

Project Number: 911 ATLANTIC AVE

Lab Number: L1524831
Report Date: 10/12/15

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Project Name: 911 ATLANTIC AVENUE
Project Number: 911 ATLANTIC AVE

Lab Number: L1524831
Report Date: 10/12/15

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Volatile Organics

L1524831-01 and -02: Any reported concentrations that are below 200 ug/kg may be biased low due to the sample not being collected according to 5035-L/5035A-L low-level specifications.

Metals

L1524831-01 and -02: The sample has elevated detection limits for all elements, with the exception of mercury, due to the dilution required by matrix interferences encountered during analysis.

The WG828106-4 MS recoveries for aluminum (0%), calcium (0%), copper (0%), iron (0%) and magnesium (232%), performed on L1524831-01, do not apply because the sample concentrations are greater than four times the spike amounts added.

The WG828106-4 MS recoveries, performed on L1524831-01, are outside the acceptance criteria for chromium (103%), nickel (80%) and potassium (103%). A post digestion spike was performed and was within acceptance criteria.

The WG828106-3 Laboratory Duplicate RPDs, performed on L1524831-01, are outside the acceptance criteria for aluminum (64%), arsenic (96%), barium (81%), calcium (110%), chromium (74%), cobalt (69%), copper (86%), iron (72%), magnesium (87%), manganese (90%), nickel (98%), potassium (91%), sodium (34%), vanadium (62%) and zinc (64%). The elevated RPDs have been attributed to the non-homogeneous nature of the native sample.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

Report Format: DU Report with 'J' Qualifiers

Project Name: 911 ATLANTIC AVENUE
Project Number: 911 ATLANTIC AVE

Lab Number: L1524831
Report Date: 10/12/15

Data Qualifiers

- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e., co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility

EPA 8260C: 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide) (soil), Methyl methacrylate (soil), Azobenzene.

EPA 8270D: Dimethylnaphthalene, 1,4-Diphenylhydrazine.

EPA 625: 4-Chloroaniline, 4-Methylphenol.

SM4500: Soil: Total Phosphorus, TKN, NO₂, NO₃.

Mansfield Facility

EPA 8270D: Biphenyl.

EPA 2540D: TSS

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water

EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

EPA 300.0: Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

EPA 332: Perchlorate.

Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water

EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC,

SM426C, SM4500NH3-BH, EPA 350.1: Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F,**

EPA 353.2: Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4,**

SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.

EPA 624: Volatile Halocarbons & Aromatics,

EPA 608: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

EPA 625: SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

Microbiology: **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

Project Number: 911 ATLANTIC AVE

Lab Number: L1526897
Report Date: 10/28/15

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Project Name: 911 ATLANTIC AAVE.
Project Number: 911 ATLANTIC AVE

Lab Number: L1526897
Report Date: 10/28/15

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Metals

L1526897-01 through -07, -09, -10, -12, -13 and -15: The samples have elevated detection limits for all elements, with the exception of mercury, due to the dilution required by matrix interferences encountered during analysis.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

Report Format: DU Report with 'J' Qualifiers

Project Name: 911 ATLANTIC AAVE.
Project Number: 911 ATLANTIC AVE

Lab Number: L1526897
Report Date: 10/28/15

Data Qualifiers

- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

Report Format: DU Report with 'J' Qualifiers

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility

EPA 8260C: 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide) (soil), Methyl methacrylate (soil), Azobenzene.

EPA 8270D: Dimethylnaphthalene, 1,4-Diphenylhydrazine.

EPA 625: 4-Chloroaniline, 4-Methylphenol.

SM4500: Soil: Total Phosphorus, TKN, NO₂, NO₃.

Mansfield Facility

EPA 8270D: Biphenyl.

EPA 2540D: TSS

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water

EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

EPA 300.0: Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

EPA 332: Perchlorate.

Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water

EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1: Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

EPA 624: Volatile Halocarbons & Aromatics,

EPA 608: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

EPA 625: SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

Microbiology: **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

Report Date: 11/05/15

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

Report Format: DU Report with 'J' Qualifiers

Project Name: 911 ATLANTIC AAVE.
Project Number: 911 ATLANTIC AVE

Lab Number: L1528078
Report Date: 11/05/15

Data Qualifiers

- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility

EPA 8260C: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene; Iodomethane (methyl iodide) (soil); Methyl methacrylate (soil); Azobenzene; Bromobenzene (aqueous).

EPA 8270D: Dimethylnaphthalene, 1,4-Diphenylhydrazine.

EPA 625: 4-Chloroaniline, 4-Methylphenol.

SM4500: Soil: Total Phosphorus, TKN, NO₂, NO₃.

Mansfield Facility

EPA 8270D: Biphenyl.

EPA 2540D: TSS

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water

EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

EPA 300.0: Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

EPA 332: Perchlorate.

Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water

EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1: Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

Report Date: 11/12/15

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Report Date: 11/12/15

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Volatile Organics

L1529172-01: Due to the matrix of the sample (foam generation during purging/analysis), the laboratory used Anti-Foam solution in the sample. The analysis was performed utilizing a compromised vial, with the client's authorization.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCS D	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

Report Format: DU Report with 'J' Qualifiers

Project Name: 911 ATLANTIC AVENUE
Project Number: 911A

Lab Number: L1529172
Report Date: 11/12/15

Data Qualifiers

- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility

EPA 8260C: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene; Iodomethane (methyl iodide) (soil); Methyl methacrylate (soil); Azobenzene.

EPA 8270D: Dimethylnaphthalene, 1,4-Diphenylhydrazine.

EPA 625: 4-Chloroaniline, 4-Methylphenol.

SM4500: Soil: Total Phosphorus, TKN, NO₂, NO₃.

Mansfield Facility

EPA 8270D: Biphenyl.

EPA 2540D: TSS

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water

EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

EPA 300.0: Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

EPA 332: Perchlorate.

Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water

EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC,

SM426C, SM4500NH3-BH, EPA 350.1: Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F,**

EPA 353.2: Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4,**

SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.

EPA 624: Volatile Halocarbons & Aromatics,

EPA 608: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

EPA 625: SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

Microbiology: **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**
