 DEC Memo: sharif sent a ttf ltr On 2/24/05.06/21/05-SR: Spoke with Stuart Smoller of Andrews Building Corp. who is the managing agent now for the building. They are going to convert the oil heating system to gas burn heating system. So, tank will be abandoned and documentation will be sent to DEC.10.06.05 //Sharif- rec'd tank test failure report from Eastmond and Sons Boiler. The fillline and the return line failed. Apparently, oil leaked through the pipeline and contaminated the surrounding environment. Needs subsurface investigation around the tank. Tried to contact Mr. John Wellmann of Andrews Corp.212-529-5688* 276. He is on vacation. 12/21/05 Sharif//I spoke with Rene Lewis of EastMond. He said they pumped out the tank, cleaned it and later on they found oil water mix coming into the tank. So they installed a monitoring well to identify if any oil has escaped from the tank to the surrounding environment. They checked the well again and found only water coming into the well, a sample was taken from the well. Contaminated soil around the return line was

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Hazardous Waste Summary:

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D004
Waste name: ARSENIC

Waste code: D010
Waste name: SELENIUM

Waste code: D011
Waste name: SILVER

Waste code: F008
Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Rommel-----From
Property Shark, Owner of the Property Stephen J Swain Early
Lear President 400 East 52ND Street New York, NY 10022 and notice
address: Joel S Berman 1140 6TH Ave Fl 17 New York NY 10036-5803 From
Reverse phone directory phone number for Stephen is (212) 308-1062.
this number is not working number. Spoke with Mr. Gomez, super at
building. as per him building owner is Mr. Joel Berman. Right now
owner is in California for two weeks. Super will give my number to
owner as he denied giving owner's number. Phone number on report for
Mr. Berman is out of service. 03/03/06-Hiralkumar Patel. Got Mr.
Berman's number (212-583-0005) from super. Left message for Mr.
Berman. Received call from Mr. Berman. as per him, they don't have any
records on oil spill. and he doesn't know anything. he told me that
the building is on solid concrete. as he is from law firm he was
talking legal language. he is blaming DEC for
harassment. 03/08/06-Hiralkumar Patel. spoke with super and property
has 3000 gal of tank. they have permit from fire department. got pbs
registration certificate from super. PBS# 2-603898. as per PBS
certificate, this tank was installed on Nov. 1st 1998 and spill
happened on Oct. 7 1998. from PBS registration, mailing address for
owner is: General Partner of 115 W 27th Street Co 1140 Ave of the
Americas 17th Floor New York, NY 10036 From Reverse Phone Directory, the
address for phone number 212-583-0005 is as follow which was
confirmed by Mr. Berman also. send letter at this address: 780 Third
Ave New York, NY 10017-2024 Berman's FAX no.:
212-583-0072 03/09/06-Hiralkumar Patel. CSL sent out to Berman by mail
and by fax. (forgot to send pbs registration form and
instruction) 03/14/06-Hiralkumar Patel. Received fax from Mr. Berman.
"...The company has no record of the petroleum release which we
believe was no more than a minor ordinary oil delivery spill which
occurred when our supplier/delivery company inadvertently overfilled
the tank. the fill port is outside the building and whatever minor
amount spilled would have been on the sidewalk. we have no notice of
any violation. if you could please supply me with a copy of the
violation, including the name of the delivery/supplier company, it
may be helpful in resolving this matter expeditiously" Discuss with
Jeff. he is suggesting to take site visit. Left message for Mr.
Berman. visited site. spoke with Mr. Gomez, super at site. there is no
odor in boiler room as well as in tank vault. tank is partially
buried in concrete and tank is enclosed in concrete vault. but
concrete vault is opened at one side. water was flowing out from tank
vault. few oil stains on concrete floor in boiler room, but very
little. poor concrete floor in boiler room. water was standing all
over floor. little shine on top of water in sump. no leaking from
boiler. suggested following to Mr. Berman afterwards:- repairing of
floor in boiler room.- keeping area clean and dry- replacing old
corroded pipings to/from tank.- closing tank vault as it is being
used as secondary containment. they can keep small window at elevated
level to get access to tank. and as this tank in concrete vault, tank
test every five years.- updating PBS records with current address,
phone number and product information, as PBS records shows #2 oil in
use. but as per super they are using #4 oil all the time.- submitting
tank test results and copy of invoices for every work done. as i
discussed with Mr. Berman, he is agree to all above suggestions. the
company who did tank test will replace those pipings. he will submit
tank test results and copy of invoices for any work done. i asked him
to call me with contractor's name and number who will work to close

tank access and repairing of floor. Got copy of work proposal from Petroleum to Owner. Spoke with Joe Ostrowski (718-624-4842) and he told me that the whole system failed in tank test. now they are waiting to get permission from owner for isolation test. Mr. Joe doesn't know how bad the leak was as the person, who did tank test, was not there. Left message for Mr. Berman. Spoke with Mr. Berman. i told him about tank test failure as i spoke with Joe at Petroleum. Mr. Berman was upset as contractor gave test results directly to me without concerning hiring person. i have asked Mr. Berman to work out on further testing of individual parts to find out leaking portion of system. asked him to call back with date on which they plan for isolation test. 03/21/06-Hiralkumar Patel. Left message for Mr. Berman. Received call from Mr. Berman. he was blaming me for harrasing him. he told me that Petroleum has done individual test and found problem at vent pipe. i have asked him to send me copy of report. he will call back tomorrow. 03/24/06-Hiralkumar Patel. REceived certified mail receipt. 04/06/06-Hiralkumar Patel. Received letter from Mr. Berman. received contract copies which was signed by Joe Ostrowski from Petroleum and by Mr. Berman. as per contract copies, petroleum has proposed following work:- will open manhole cover on one 3000 gal fuel oil storage tank- pump out all existing fuel, water and sludge from bottom and sides of tank.- pressure test all lines-suction, return, vent and fill to make sure they are not leaking.- men will enter tank and squeegee clan all remaining sludge and residue- examine tank shell for signs of deterioration and make a full report to person in charge.- if a line fails test, we will then plug up bad lines and perform "tank only" tank test to make sure tank is good.- all sludge will be disposed of to a legal facility- seal tank making a watertight closure.- excavate concrete, remove old fill line and vent line- install 40 ft of new 3" fill line from tank top to outside the building wall.- install 50 ft of new 2" vent line with vent alarm- re-cement area. 04/07/06-Hiralkumar Patel. Received letter from Mr. Berman. this includes copy of tank test results. result shows tank only passed in test. 04/18/06-Hiralkumar Patel. Spoke with Mr. Berman. he has got bill from Petroleum. once he pay it, he will get final report and will forward it to Department. Mr. Berman will be out of office for this whole week now. 05/02/06-Hiralkumar Patel. REceived tank test results which shows whole system passed the test. based on site visit and tank test result, case closed.

Date form received by agency: 02/25/2000
Site name: AMBIENT LABS
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Violation Status: No violations found

FINDS:

Registry ID: 110004561527

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D011
Waste name: SILVER

Violation Status: No violations found

Hazardous Waste Summary:

Waste code: D007
Waste name: CHROMIUM

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007
Waste name: CHROMIUM

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D011
Waste name: SILVER

Waste code: F007
Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS

Waste code: F009
Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Spiller Address: Not reported
 Spiller City,St,Zip: NY
 Spiller County: 999
 Spiller Contact: ANTHONY MILANESE
 Spiller Phone: (718) 402-5107
 Spiller Extention: Not reported
 DEC Region: 2
 DER Facility ID: 422874
 DEC Memo: 9/6/12-Vought-Primary off-hours responder. Called Anthony Milanese (East Coast Petroleum Ph:(718)402-5107) Fax:(718)402-4336) and left message to return call to Vought. Vought received call back from and spoke to Milanese and tank is a 20,000-gallon #2 AST. Vought spoke to John and leak was dry leak and tank was emptied and potential source was removed. No visible signs of oil. Entire system failed test and failure was due to faulty manwway gasket and gasket and inspected and possibly repaired and tank retested. Milanese will callback with owner info for TTF letter and PBS# as no PBS registration in database and building may have alternate address. Vought received callback from Milanese who noted that AST was in contact with the concrete as well and that the fillport was capped to prevent deliveries until repair is completed. Milanese also noted that site was registered under PBS #2-056227 and that mailing address on PBS Registration was correct address for owner. Spill assigned to DEC Demeo as site is TTF for PBS site. Vought prepared TTF letter with cc to East Coast for signature by Demeo and mailing address of letter was:Penn Tower, LLC132 West 31st StreetNew York, NY 10001Attn: Toby TenenbaumPh:(212)564-1521Demeo signed letter and Vought added to E-docs, sent to East Coast via Fax and original mail to Penn Tower. Spill assigned to DEC Demeo as TTF at PBS site.

DER Facility ID: 250692
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "DEMEMO"Hole in tank caused spill onto basement floor. No sumps or drains impacted. NYFD responded stopped leak and contained spill. Owner is Athena (718)271 8452. Remainder of oil cleaned from basement floor using absorbents. Owner reports problem not due to hole in tank but a failed suction line. Repairs completed.

Remarks: spill from hole in tank onto basement floor. fd on scene attempting to plug hole but still leaking

DEC Memo: 3/7/07 - Sharif spoke with Jill Guerra(GCI),She told me that they have done some borings at the site and found slight svoc contamination,no vocs.She'll fax the report to DEC case manager Raphael Ketani.3/7/07 - Raphael Ketani. The site is called Chelsea Towers and had a 5,000 gal. #6 fuel oil tank. This tank was closed and removed. The PBS case is #2-234028.I received the FAX with the results for the 3 soil samples. Ms. Guerra said that each sample came from a crawl space under the basement. I asked Ms. Guerra whether any of the soil samples showed discoloration. She said none looked discolored. There were no VOC hits for any sample. SB-3 had several SVOC hits, but none were above the TAGM limits. SB-4 had 11 SVOC hits with chrysene and benzo(a)pyrene exceeding the limits. However, these 2 analytes were only 2 and 3 times their respective limits.Based upon the analytical results, I am closing the spill case.3/13/07 - Raphael Ketani. Ms. Guerra sent me a Phase II Subsurface Investigation report dated 3/2/07. The report had a narrative, a diagram of the sampling sites, pictures of the crawl itself, and analytical results and radon testing results. According to the report's narrative, the radon levels were below the EPA standard.2/26/09 - Raphael Ketani. Bill Candiloros, board member of the Chelsea Gardens co-op, called to find out what the TAGM limits mean. He said that the co-op is planning to build apartments in the basement and he added that they have all of the DOB permits to do so. However, some of the residents are fighting the plan by saying that there is still toxic contamination in the basement. They are pointing to the levels of heavy metals in the soil results and the fact that there is residual oil in the soil. I told Mr. Candiloros that the spill was closed because the soil analytical results showed that the oil contamination was at or below the TAGM limits. He asked about the metals. I told him that the Spills Unit doesn't deal with the metals. I asked him whether there is a solid concrete floor in the basement. He said that there is. I directed him to Unit A of DER here in Region 2. I told him to discuss the metals with them. 3/5/09 - Raphael Ketani. Jack Chen (917) 378-9372, a tenant in the building, called. He said that he is concerned about his health. He said that construction is taking place in the basement of the building where there has never been a dirt floor. He said that the workers have been jack hammering out the bedrock and creating a lot of dust. Mr. Chen added that the soil was found to have lead and mercury and that a lot of dust has been created and he has been breathing it in. He said that he has developed asthma from the dust. Mr. Chen wanted to know how toxic the metals in the dust were to him. I told him that Spills doesn't deal in metal concentrations and to talk to Unit A of the DER. I gave him their number.Later, Mr. Chen sent me the following e-mail with a picture of a New York Times article regarding the construction and seven additional pictures (see E-docs):Mr. Ketani:Thank you again for taking the time out to speak

with me today. As discussed, attached please find photos of the cellar site where the building is excavating to construct apartments. These photos were taken about 10 minutes ago. The site used to have much more dirt. The level where it's at today is after about 6 months of excavation, digging and jackhammering of bedrock. If you will find it useful I can probably retrieve photos of the site in its original condition about a year or two ago. To repeat our conversation today: 1. The area being excavated has never, ever had a cement floor. It is my understanding based on publicly available documents that the building is trying to convert the cellar space into a basement and thus needed to excavate. 2. The area subject to the construction still does not have any concrete floors. 3. Residents on the first floor have been subjected to dust from the soil for about the last 6 months. We became alarmed when we received a copy of the soil report and saw the elevated levels of lead and mercury. I believe, and my doctors agree, that I developed asthma because of the dust. We have also taken a couple of photos showing where the original finished basement with the concrete floor ends and where the soil and excavation site begins. I also attach a PDF copy of a New York Times article where a current board member, a former board member and the architect are quoted discussing the excavation, how the cellar space was untouched and unfinished and about excavating the bedrock. Thank you for your time. I will give Ms. Jane O'Connell a call later today as you suggested. If you would like any further information regarding this site or the project, please do not hesitate to email me or call me at 917.378.9372. Regards, Jack Chen

EPA Region: 02

Classification: Conditionally Exempt Small Quantity Generator

Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste: No

Mixed waste (haz. and radioactive): No

Recycler of hazardous waste: No

Transporter of hazardous waste: No

Treater, storer or disposer of HW: No

Underground injection activity: No

On-site burner exemption: No

Furnace exemption: No

Used oil fuel burner: No

Used oil processor: No

User oil refiner: No

Used oil fuel marketer to burner: No

Used oil Specification marketer: No

Used oil transfer facility: No

Used oil transporter: No

Registry ID: 110008001152

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110019578205

Environmental Interest/Information System

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR

Spiller Extention: Not reported
DEC Region: 2
DER Facility ID: 24612
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "M TIBBE"6/8/05 - Project transferred to TLGibbons in Central Office, Albany8/16/05 - Spoke with Brenden Keany, Mutual Redevelopment Houses, Inc., (212) 675-3200. Spill reported 5/23/96 by CDM during removal of twelve (12) 20,000 gal. #2 and #6 fuel oil USTs. The large fuel usage was for a cogen plant which generates electricity for ~3,000 people. After removing tanks and cleaning, went to dual fuel system, reinstalling only six 20,000 gal. #2 fuel oil USTs. Spoke with David Marabello (732-225-7000), CDM project manager during spill. He said that they excavated to the lateral and vertical limits possible, using shoring, without compromising structure of building. Southern portion of excavation encountered bedrock. Sixteen post-excavation samples were collected and evaluated for VOCs and SVOCs. All samples greater than 10 feet bgs. Elevated levels of VOCs and SVOCs were encountered in several samples, however, according to 10/2/98 CDM tank closure report, levels not indicative of gross tank failure, rather indicative of chronic spills over time. While some sporadic elevated levels of petroleum remain, everything that was reasonable to be done, was done. Close spill.

Remarks: OLD TANK APPEARED TO HAVE FAILED. TANK IS BEING REMOVED, CONTAMINATED SOIL WAS FOUND DURING REMOVAL PROCESS. INVESTIGATION IS UNDERWAY AT THIS TIME.

DEC Memo: 11/05/14-Hiralkumar Patel.alternate address: 314-322 West 30th Streetno other spills found.PBS #: 2-332607. as per PBS record, the site has one 6,000 gal #6 oil AST in vault, in-service, installed in Jan. 1965.as per NYC DOB record, a permit application was approved on 01/23/14 for replacement of oil burner with gas/oil burner and change of fuel oil grade from #6 to #2 oil.Chelsea Town LLC. **property owner**c/o Hoffman Management300 West 55th Street, Suite 2SNew York, NY 10019Attn.: Mark HoffmanPH. (212) 247-4975email: mhoffman@hoffmgt.com11/06/14-Hiralkumar Patel.9:20 AM:- spoke with Chris at All Boro. the tank was emptied out and cleaned as part of grade conversion from #6 to #2 oil. prior to filling up the tank with #2 oil, tank system was tested which failed. immediately, technician conducted an isolation test of tank only and it failed. technician found crack in epoxy coating inside the tank. All Boro will do further investigation. Chris mentioned that 15% of the tank is in contact with surface. 9:42 AM:- sent TTF letter to Mr. Hoffman requiring report submission by the end of 12/19/14. letter emailed to Mr. Hoffman and Chris.**report due on 12/19/14.**

Hazardous Waste Summary:

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Violation Status: No violations found

FINDS:

Registry ID: 110004567781

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSLEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D022
Waste name: CHLOROFORM

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT

kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Owner/Operator Summary:

Owner/operator name: RITE AID
Owner/operator address: Not reported
Not reported
Owner/operator country: US
Owner/operator telephone: Not reported
Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: 04/01/1995
Owner/Op end date: Not reported

Owner/operator name: RITE AID OF NEW YORK INC
Owner/operator address: HUNTER LANE
CAMP HILL, PA 17011
Owner/operator country: US
Owner/operator telephone: (717) 761-2633
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: 04/01/1995
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Date form received by agency: 11/04/2011
Site name: RITE AID #4195
Classification: Conditionally Exempt Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET,

WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007
Waste name: CHROMIUM

Waste code: D009
Waste name: MERCURY

Waste code: D010
Waste name: SELENIUM

Waste code: D024
Waste name: M-CRESOL

Waste code: P001
Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste code: P075
Waste name: NICOTINE, & SALTS

Waste code: D001

DER Facility ID: 74076
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIPPLE"SIERRA REALTY COPR. PLANS TO ISOLATE AND RETESTMIKE DELPERCIO FROM LIEBLICH AT 718-585-5200 DOING WORK11/15/2000 SITE VISIT REQUESTED UPON ARRIVAL AT SITE THE EXCAVATION REVEALED 8"+- OF PRODUCT IN THE DIRT EXCAVATION,THE FILL LINE WAS REMOVED, AND THE TANK WAS STILL IN SERVICE.THEY WERE TOLD TO CLEAN THE PETROLEUM, ISOLATE AND RETEST THE TANK, REMOVE FROM SERVICE IMMEDIATELY IF IT DID NOT TEST TIGHT.KEEP THE DEC APPRISED OF THE PROGRESS.1/9/03 Roux env. cleaning tank to observe if there is any additional product. wells have shown no product.// will update DEC when info is gathered9/28/04 tipple called Josh Levine....Clean wells soon, and I would like to witness the last baling next quarter.10/20/05 - Raphael Ketani. I spoke to Joshua Levine at Roux (rooo) Associates ((631) 232-2600)regarding the site. He said Sierra Realty Management is the owner of the property. He said the UST was punctured repeatedly and used as a receptacle for collecting the oil and water. Once it was no longer usefueled, it was abandoned in place with foam. A new AST was put in it's place. Mr. Levine will call me back regarding the status of the site. There is no PBS case for the site, even though they abandoned one tank and installed another. I will send them a letter instructing them to register the two tanks and close the abandoned one.10/25/05 - Perry Parker of Sierra Realty called me today to tell me that the 10,000 gal. active tank had been registered and that the 11,200 gal. one had been closed. Mr. Parker sent me the paper work showing the tank closure and registration. The PBS case is #2-045187.12/2/05 - Raphael Ketani. Joshua Levine called to say that the 11,200 gal. tank was abandoned in place and that the owners got a certificate from the FDNY. He wanted to set up a conference call with Perry Parker to discuss what contamination was found and where the owners go from here. He suggested 12/5 at 3 PM. I agreed.12/5/05 - Raphael Ketani. I had the conference call with Joshua Levine and Perry Parker. Mr. Levine gave me a chronological run-down of how the remediation and oil recovery went since the inception of the spill. Mr. Levine mentioned that no product had been seen in the monitoring wells on 6/11/04 and 7/20/04. However, on 10/04 about a foot of product was found and bailed. On 12/04 Roux went back and bailed product. Mr. Levine added that on 11/11/05, about 30 inches of oil was found in well MW-2, which is at the location of the former UST. All of the other wells had been dry or didn't have product. I asked Mr. Levine how much product had been recovered. He said about 500 gals. I told Mr. Levine a system or method has to be used to continue to recover product. He agreed and said he would send me a letter stating how they will recover the remainder of the oil and proceed with the method. 1/23/06 - Raphael Ketani. I called Mr. Levine regarding any progress in finding a redesign that will allow for more oil recovery. He said that they will redrill MW-2 and enlarge it from a 1" diam. well to a 2" diam. well. He said that Zebra Environmental will do the drilling on 1/27/06. 4/3/06 - Raphael Ketani. Today I received a progress report letter dated March 30, 2006, from Roux Associates, Inc. Several inches of #6 oil is still appearing in MW-2A and MW-5. They will try to recover more oil later. 03/21/07 - Spoke with Mr. Levine of Roux. I requested submission of the Final Spill Closure report to evaluate merits of spill closure Mr. Levine is

S104782219

requesting. V. Brevdo 02/01/08 - Mr. Lavine of Roux telephoned and advised that he is sending spill closure work plan and it is dated 02/01/08 which will describe hot spots soil excavation and free product recovery surrounding the closed in place 11,000 gallon No. 6 oil UST. VB08/21/08 Review of the Spill Closure Summary Report prepared by ROUX and dated July 21, 2008 indicates the following: The excavation and offsite disposal of localized petroleum impacted soil and free product adjacent to the abandoned 11,000-gallon No. 6 oil UST within the subbasement of 875 Sixth Avenue, Manhattan, New York has been completed. Excavation sidewall and bottom end-point samples were collected from two separate excavations. No soil samples exceeded the TAGM 4046 RSCOs for VOCs and only one SVOC, chrysene, was detected in excess of the RSCOs from three of the 10 end-point samples. A total of 45 drums of petroleum-impacted soil and rock was excavated and disposed of offsite as nonhazardous waste. In addition, seven drums of free product/water mixture were disposed offsite as non-hazardous waste. The excavations were backfilled with 6 cubic yards of clean offsite sand. Free-product has been removed to the extent practicable. No free product has returned to the two monitoring wells, MW-2A and MW-5, since the February 2008 excavation and restoration. There is no indication of offsite migration of free product since the historic spill was contained within the bedrock depression directly surrounding the UST. The post-remediation water sample collected from MW-2A contained no exceedances of the AWQSGVs. This Spill Closure Report provides documentation of the remedial activities conducted to close out NYSDEC spill number 0006542. On behalf of Sierra Realty, Roux Associates has requested closure of NYSDEC spill number 0006542. Based upon review of the Spill Closure Summary Report and taking into consideration aforementioned findings, I decided it is appropriate to close spill. Spill is closed on August 21, 2008 (VB)

Remarks:

WILL AWAIT ACTION FROM DEC.

Remarks: section of tunnel inspected for evidence of gasoline seeps. M.J. Hinton Region 9, on temp assignment to R212/31/2001 Randy Austin reported that the Transit Authority had gotten back to him after doing an inspection earlier this month in the subway tunnel in the area of this property. No problems were found. A letter dated Dec 24, 2001 from Andy Rudko of AKRF described the excavation. A phase 1 report and phase 2 letter were received Dec 26, 2001. A Site Remediation Report was submitted in 1999. Gasoline tanks and associated contam soil were removed from the SW corner of the property in 1999. Contaminated soil was also removed from the north side of the property. The entire site was excavated for construction of a high-rise. The owner is Chelsea Assoc LLC, 1050 Franklin Ave, Garden City, NY 11530. SMM.
PERFORMED AIR PRESSURE TEST, BROKEN FITTING, REPLACED FITTING, RETESTED & STILL FAILED, WILL DIG UP TANK.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KRIMGOLD"12/9/2003. Allen Frankel (212-961-9252, cell 646-221-7447) from Galdon Envir. called. His co. is a consultant for RP. They retained Trade-Winds to perform the cleanup. Believes that only narrow area adjacent to the Con Ed vault under a sidewalk and limited to the building foundation wall has been affected. Trade-Winds will utilize a "Guzzler" to remove contaminated soil. A field work should commence on 12/09/03. YK.12/09/03. CSL has been sent.12/10/03. J.Krimgold @ site. Spoke to A. Frankel and Mike (Trade-Winds). Narrow trench ~ 1.5' wide and 5' deep across the sidewalk was excavated. Cannot excavate wider due to the bedrock. Removing contaminated soil along ConEd vault. Source of the spill, faulty fill line, has been removed. No oil was observed in the vault.2/6/04. Spoke to Alan Frankel. Final report should be submitted to DEC on Feb. 19, 2004. YK.3/18/04. Letter report was submitted for the Departmental review. NFA letter 3/23/04. YK.7-26-05. See Spill 0503379 for a possible repeat.

Remarks: PIPE HAS A LEAK, CON ED VAULT ADJACENT TO APARTMENT BLDG. ALSO REPORTED PBS#23-276693. TOMORROW, WILL CLEAN UP. WILL ROPE OFF SIDEWALK, AND DO SAMPLES

 DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN"Notes:by Rorriguezcalled ray lara of petroleum tank cleaners. he stated that there was a overfill of 30 gallons of oil to the address. The tank gauge was not working. Cleaning the spill right now. Ray Zolker from Hess. 800-437-7265. left a message for him to call.12/05/2002 Tipple at od desk was called by Hess to request spill numbers 0209070 and 0209079 (since both numbers were issued for the same incident) be referenced to as one number. Tipple closed out # 0209079 and referenced the spill to 0209070. GAUGE ON TANK NOT WORKING 800-437-7265. 212-964-7712. RAY ZOICKER (HESS).12/20/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. -QA12/21/06: Called Mr. Rubin (Super of Co op building) at (212)242-7191 he said this spill is cleaned up long time ago. He said to call property Manager regarding documents of the spill.Called Ms. Yvonne (Property Manager) at (212)319-5000 and talked about the information of the spill. She said this spill is cleaned since long time ago. She will send me closing confirmation letter to close the spill. -QA01/03/06: Called Ms.Yvonne and said to take end point soil sample to find out the contamination in soil of spill area. -QA02/05/07: Called Ms. Yvonne at (212)319-5000 and reminded her to take soil samples for

closing this spill. -QA06/11/07: Mr. Issac Mungra (Eastmond Company) sent me a report of one soil sample on dated May 30, 2007, which he took 2 ft. under the pipe line in the garden. He also sent a diagram in which he has shown the location of the sample. Soil sample is clean. -QA 06/21/07: I visited Spill site, checked fill port, vent line in the garden area and inside the basement. I didn't see any odor or any stain in the area. I have not found any sign of contamination in this area. This spill is clean (see photos in e-doc). After discussion with Mr. Jon Kolleeny (supervisor), I closed this spill. -QA

"DEMEO"6/11/2003 Sangesland spoke to property manager. She says the old tanks were above ground and were removed. New tanks were installed (above ground also) and new lines run.A.L. Eastmond did all of the tank work.Sangesland asked her to send in a letter requesting closure and to attach photos of the new tanks, statement that there was no contamination and copies of documents proving a new tank was put in.All of this will be sent to Tim DeMeo. 6/18/03 TJDReport from Rudd Mgmt. reviewed. Demeo contacted RUDD and requested a copy of Enginnering report (Velocity) and statement from Mgmt. company that no contamination was found. Mgmt. Company to forward requested documents.6/20/03 TJDRudd Mgmt. submitted requested information. No further action required.

Remarks: the tank failed the test and is also leaking. this tank is alsolisted as 24th street tank. request call back in am on 9/05/02it is tank 2. tank 1 was not leaking.

S105997450

authority to deliver 3,000 gal. At 2,100 gal. oil shot out the vent line. After the spill, further searching of the records at Castle showed this building got a delivery for 3,500 gallons on Friday. According to Jim Carey (718-579-3410) at Castle Oil, approx 20-25 gal shot out the vent line and onto the adjacent building and sidewalk (no dirt, or drains were impacted). In addition, approx 50 gallons spilled from the top of the tank (manway? broken gauge opening?) Spill pooled around the tank in the basement. Area around the tank was filled with boxes of clothing which has absorbed a major portion of the oil. No sump or drains are impacted. 11AM- Castle Oil has hired Petroleum Tank Cleaners (718-624-4842) to do the clean up. Issac of PTC will send a crew over ASAP. 11:45AM- Sangesland spoke with Felix Silva building super (212-448-9498) He said PTC just pulled up and was unloading gear. "Robert" from Castle Oil is on site and said the spill was only from the vent line. Oil spilled out of the vent line and poured 20-30 gal down an adjacent "gateway" directly into the basement. He said the tank and tank room are separate and did not appear to be impacted. 3PM Issac at PTC says the job is 80% done. All oil was removed from basement floor. Floor was painted cement, so the floor was easy to clean up. PTC will return tomorrow with a steam cleaner to finish up on the sidewalk and the basement wall. 12/3/2002 PTC says all work was done. Spill Closed - OK'd by Vought delivered too much fuel. cleanup crew enroute.

DEC Memo:

12/06/05: This spill transferred from J.Kolleeny to S.Kraszewski.02/06/06: This spill transferred from S.Kraszewski to Q.Abidi.03/17/06: SK Reviewed Site Assessment Report completed on Nov. 30, 2000 by State Environmental Services, Inc. One 30K tank, which stored #2 Fuel Oil was removed. Six post-excavation samples were taken from the pit and submitted for laboratory analysis. About 900 tons of soil was removed and disposed of.All soil samples were tested for VOCs and SVOCs. None of the samples detected any VOC contaminants. All samples recorded exceedances of the same SVOC compounds: Benzo(a)anthracene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(g,h,i)perylene, Chrysene, Dibenzo(a,h)anthracene. The concentrations ranged from 1950 ppb to 498 ppb, which are relatively low. Four of the six samples had SVOC exceedance concentrations of 1000 ppb or less. No samples were taken from the fill lines or fill port. Report lacks a site plan with area of excavation and sample locations. No lab analysis summary table provided either. SK spoke with Chris Sawyer from NYCHA Fuel Oil Remediation. I informed him that they would need to take soil samples from the former fill lines and fill port area. Chris said that Harborview Houses would be included when performed additional soil borings.Sent Chris Email requesting additional soil borings along the fuel lines and next to the fill port. - SK04/04/06: This spill Transferred from Q. Abidi to Koon Tang.07/03/09: J.kann - spill transferred to J.Kann. Site assessment report submitted on 2/5/07. Investigative work plan submitted in March 2009. Additional wells to be installed to evaluate groundwater at the site, which is acceptable. One comment was sent on 7/3/09 to GF "- A second round of groundwater sampling is proposed one month after the initial sampling is performed. What is the reasoning behind this? Typically two or more months is used."09/15/09: J.kann - Sampling to be performed two months after initial sampling. Work Plan approved via email on 7/6/09.2/4/11: J.kann - SAR received on 12/3/10 and edoced.5/24/12: J.Kann - SAR under review. NYCHA requests closure. Will review entire file for Chelsea Houses.6/13/12: J.kann - requested in an email of 5/30 that NYCHA gauge the wells at the site before I present to the closure panel. NYCHA sent well gauging data and photo on 6/12 indicating that a product sheen is present in MW5. A response email was sent to NYCHA on 6/13.10/17/12: J.Kann - requested a follow-up from NYCHA regarding whether or not there is measurable product in MW-5 and/or if a absorbent sock is still present.5/17/13: J.kann - followed up with NYCHA. They will go out and gauge MW-5 the weeeek of May 20.8/26/13: J.Kann - visited site on July 31st. Observed the removal of sock and gauging of on site wells. No product in all wells. Sock visibly clean (photo). NYCHA indicated that the sock has been clean for several months. Based on observations, the spill will be considered for closure.8/27/13 J.Kann - completed review of file. Spill closed. Following summarizes site:-30,000 gallon UST removed in 8/2000. -890 tons of contaminated soils removed in 2000-investigation done in 2006 along fill lines and by fill port (DEC request)-some PAHs detected in grab groundwater sample in 2006-5 permanent wells installed in 2010-All gw under TOGS with the exception of MW-5 (3 minor VOC compound exceedences)-Slight sheen subsequently detected in MW-5. Absorbant sock placed in well.-Minor impacts on sock in 2012.-No oil detect on absorbant sock in 2013.-Confirmed no product sheen in well during site visit of 7/31/13.NFA. Email sent to NYCHA on 8/27/13 requesting wells be decommissioned.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KRIMGOLD"2/5/99 Spoke to Joe Ostrowski from Eastman. They recovered a total of 1100 gallons - 300 gallon on floor and 800 gallon still in tank. As per Joe, tank is wrapped in concrete and oil is probably still between steel and concrete. Sump immediately next to tank - unk if oil discharged to sewer. Eastman set up temp tank. Three manholes on sidewalk of 24th Street open right to the boiler room. Building is located between 6th and 7th Avenues and spans the block between 23rd and 24th Streets. 2/10/99 Met Ralph (super) and Rudy Sorocco (Bob Sussman's associate) at the site. Oil was fairly well cleaned up. Very faint odor. They are collecting bids to remove old tank and install a new tank. They will keep me apprised of tank closure scheduling. Tank probably installed in the 20's. Sump pump is directly south of the failed tank. Sheening on standing water in sump. According to Ralph, the sump pump only goes on when the slop sink (located within 5 ft of the sump) is used. Areas of concern: There is a trench across the entire floor that appears to have a soil bottom and behind the tank seems to be soil where the leak was first detected. Told Rudy Sorocco that borings will be required to determine the impact to the subsurface and that this can be done in conjunction with the tank replacement.2/12/99Spoke to Robert Sussman. Sent him letter with requirements as well as contractors list.3/22/99On site, couldn't observe floor, standing water, little product (1/4abpad). As per Niel, eastman, he surmised that the tank rotted out from the bottom since there was no saddle or dunnage, He will break through in area of tank and grab soil sample, and clean out trench and grab compo soil sample and 8021 8270.3/29/99Spoke to Niel, he said they brought a hammer drill with a 12" reach to collect samples through the concrete floor and trench. He said the concrete floor was more than 12" thick and was clean. He said the trench was 12" of clean brick. He will submit a narrative of Eastman's findings and submit it to my attention. 01/26/04Reassigned from Rommel to Austin02/17/04: Reassigned from AUSTIN to KRIMGOLD.5/7/04. J.Krimgold spoke to AL Edmond. They have no records saved regarding this site. However, confirmed that no contamination was found during floor drilling. NFA.

DEC Memo: TTF Letter sent - copy in eDocsPiper spoke with PTC. They explained owner wants to do repairs on his own and doesn't want to remove contaminated soil. CSL needs to be sent along with ttf.*****Anil-1204 Broadway LLC. 22 west 32nd st. 10000112/01/08-Zhune. I received a letter from 1204, Broadway Manhattan LLC. Enclosed are the letter from Effective Plumbing Corporation, the tightness test results both the failed and the passed test, and the invoices for the work performed. They say in the letter that on 9/3/08 PTC performed test again and tank passed tightness test. Originally on 6/30/08 PTC performed tightness test and the tank failed the test, the serviceman gave us recommendation to change fill line lines, which we did. We hired Effective Plumbing Corporation and completed the required work as recommended. there was no contamination or any kind of spill. The letters from Effective Plumbing Corporation say per our proposal we replaced the existing 2" vent line with 60 feet of 2" black pipe. We run the pipe from the tank up to the building side wall. We installed the 2" black pipe with all necessary coupling and fittings. Per our proposal we removed the old oil line and replaced the remaining 3" oil fill line from the new pipe connections to the oil fill tank. We installed 40 feet of black pipe and (19)-3" fitting. Case Closed

Remarks: Fill line connected to oil tank, as well as the feed line appear to be bad.

DEC Memo: Contact- Walter H 212-685-3389 There is a crack in the fill line, there is a sidewalk bridge over the fill line. There will be no more fills using the cracked line, PTC to conduct cleanup once the site is secure. 1/5/05 tippie sent letter requiring action. 1/6/04 tippie informed that Eastmond will be doing the fill line replacement only at this time. 08/03/06: This spill is transferred from Mr. Koon Tang to Q. Abidi. called Mr. Mark Salamick at (917)559-5519 he said he will find out information about the spill and he will call me back. Mr. Mark salamick called me back and said he has never done this job he said to contact FM Ring Management Company. Called Ms. Reeba at (212)765-1655 she said, she is working on it she will find the status of the spill and she will call me back. -QA 08/04/06: Recieved fax from Ms. Reba Dickstein (F.M. Ring Associates). Called Ms. Reba she said there was a minor problem Gauge messed up so Eastmond company changed the gauge. Therefore, the problem cured. -QA 08/10/06: Recieved a closing confirmation letter by fax from Ms. Reba Dickstein (F.M. Ring associates, INC.). She mentioned in her letter that oil fill line was replaced by Eastmond company. That is a freestanding line at the ceiling of the basement. Floor of the basement is concrete floor that is in good condition and without cracks. Therefore, According to the letter of Ms. Reba Dickstein this spill is closed. -QA

DEC Memo: 9/19/07 Called 212-593-9100 (# on FIR) and left message for Scott Ross (contact on FIR). Mr. Ross returned my call and left a message. I called him back and he said the tank was not tested. He confirmed that the tank is 2K (consistent with registration) and is not 5K as in the spill report. He said that the tank is a concrete wrapped tank. I called Mark Salamack of Petroleum Tank Cleaners (they did the test). I left a message and requested that he call me back. M. Salamack called me back and said the technician believes the failure is in the fill line. Also he told me the address was incorrect on the Spill Report. The address is 312 NOT 12. Sent ttf letter to:Ivy SteeleChelsea London Co.c/o Buchbinder & WarrenOne Union Square WestNew York, NY 10003Attn: Eva MatosCalled Ms. Steele at 212-243-6722 and left message to call me back. Eva Matos called me

back and told me the line failed and that PTC will be making the repairs. She also told me to send letter to her attention. I confirmed the mailing address with her. bf10/9/07 Received fax from Eva Matos Letter included an invoice from PTC showing that the tank was retested and passed. Also, the fill line and vent line were replaced. No mention of contamination. I called Ms. Matos back and left a message on her voice mail. I stated that a letter is needed from PTC regarding any contamination found. Phone: 646-637-9019. bf10/11/07 On 10/10/07, I received a letter by fax from Mark Salamack. Letter states that the failure was caused by a broken vent line. The fill line was compromised, but not broken. Both were replaced and no contamination was encountered. Tank was tightness tested on 9/27/07 and passed. NFA. bf10/15/07 On 10/12/07, received message from Eva. She requested a call back regarding whether or not I received letter from PTC. I called her back (646-637-9019) and told her that I received the letter. bf

Lara from Riteway Tank (718-855-7272) He said he remembers this tank and what happened at the site. His letter (attached in eDocs) says the tank initially failed the tank test because the manhole gasket was damaged. Replacement of the gasket resulted in a passing tank test. No contamination was found. 2 years later (1997) this tank was removed and replaced with a new tank. No contamination was found during this period either. Spill closed.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND" Sangesland responded to the site of a reported contaminated soil location. Owner of the site is excavating what was a parking lot in order to install footings for a new building. Upon excavation, the southwest corner of the property at 160 west 22nd St was found to have petroleum contaminated soil. After contacting DEC rep Mark Tibbe, it was determined that the property directly to the south (161 west 21st st) was a taxi company with an ongoing state PIN cleanup project. Mr. Tibbe stated that the parking lot at 160 west 22nd st did have 3 monitoring wells associated with the ongoing clean up. AKRF rep Mimi Sotiriou (212-340-9790) stated that all contaminated

Map ID

166 WEST 22ND STREET (Continued)

S102148346

Remarks: soil would be dug out, sorted, and shipped out with manifest for proper disposal. Since the contamination was only in the extreme southwest corner of 160 west 22nd st, directly adjacent to the property line of the taxi company and within 15 feet of the remediation equipment, it was clear where the source of the contamination was from. 11/1/2000 AKRF sent a letter to DEC stating that 228.75 tons of contaminated soil was removed from the site. AKRF stated that "Petroleum contaminated soil was removed from along the southwest border of the property until no petroleum-like odors were observed...." "...Soil was transported to Mt. Hope Recycling of Wharton, New Jersey" Since all contaminated soil was removed from this site, this spill number was closed out. IT SHOULD BE NOTED THAT EXISTING CONTAMINATION FROM THE PROPERTY AT 161 WEST 21ST STREET MAY HAVE AN IMPACT ON THE NEW BASEMENT WALL INSTALLED ON THE SOUTHWEST CORNER OF 160 WEST 22ND STREET. Spill closed 1/2/2001

DEC Memo: 10/10/95: This is additional information about material spilled from the translation of the old spill file: GASOLINE ODOR.see also 8701176, 8701597 (SP97155), 9400302, 9403442, 0006798.(also addresses 160 W 22nd St, 166 W 22nd St)3/18/04 Received phonecall from Kevin Kleaka, Impact Environmental. Excavation is planned for next Tuesday, 3/23. RAP was previously approved by M. Tibbe. DEC had requested 5day notification. Requested project manager return phonecall (631-269-8800 or cell 516-805-8892) when reassigned.(KMF)3/22/04Transferred from Tibbe to Foley. Rommel3/23/04 Spoke to K. Kleaka, Impact Env. Excavation to begin tomorrow. Tanks have been out since approx 1992-1994.3/31/05 Spoke to Scott Underhill, URS (518-378-8766). He was hired by Bank of NY to conduct a third party peer review. The bank is putting up funding for the development of the property.4/5/05 Received update from K. Kleaka, Impact Env. In 3/04, they excavated 340tons of gasoline impacted soil. On 2/14/05, endpoint sampling from 8 locations was conducted and analyzed by 8021. On 3/15/05, additional endpoints were collected from 3 locations and analyzed by 8021. Additional excavation to mitigate residual soil contamination on the northwestern portion of the site will be conducted in 4/05. Construction of building is now to include a second sub-level which will require removing 3-5 feet of bedrock (bedrock is at 17'bgs). GW is at 11-14'bgs. 4/13/05 Spoke to K. Kleaka, Impact Env. They have excavated down to bedrock across most of the site. Not much water is accumulating and have not had to dewater. Will schedule site visit and discuss possible modifications to the RAP.5/17/05 Site visit conducted with owner, Impact, URS and Bank of America. Currently chipping away at bedrock which is about 17'bgs. All soil removed. Almost no groundwater infiltration which is surprising since perched GW was detected at 11-14'bgs. Requested a water sample from the puddle in the NW corner of property. They are contemplating an ORC application. I recommended that if the GW was clean from the bedrock surface, that they not go ahead with ORC. If it is contaminated, they will do ORC pour and will need to monitor effectiveness. Well locations possible along W 21st. Inspected backyard of 166 W 22nd St which is about 8'bgs. Access for equipment, especially for bedrock drilling, would be very difficult but may be able to obtain perched gw samples. 6/6/05 Received results for three

grab samples taken from the standing water on site, collected on 5/18/05. BTEX ranged from ND to 2005ppb and MTBE from 128ppb to 1080ppb. Owner requested that the ORC application be eliminated from the RAP. 6/8/05 Email to K. Kleaka and K. Lalezarian. Required that the ORC application be completed along with effectiveness monitoring. Impact to submit revised RAP.9/9/05 Received revised RAP via email. During the period from 3/24/05 to 5/20/05, 3983 tons of petroleum impacted soil was excavated. It is expected that removal of all source materials will reduce the concentrations found on the perched watertable. However, to address the residual impacts, Impact Env. proposed ORC for bio-enhancement. It will be spread as a dry mixture and the natural formation will provide the water to activate the release. A 6mil vapor barrier and passive vent system will be installed. A MW will be installed along W 21st St. GW samples will be collected before and after the application, analyzed for VOCs and taking field measurements for DTW, pH and DO. Due to physical constraints, no wells are to be installed at 166 W 22nd St.9/9/05 Approved revised RAP. As discussed with K. Kleaka, the ORC will be applied in a slurry in dry areas and directly mixed with accumulated water in the wet areas.5/18/06 K. Kleaka, Impact Env, indicates a closure report will be submitted next week.5/25/06 Reviewed site closure report. The remediation activities completed on the site included the removal and disposal of 3,982.92 tons of petroleum impacted soil and construction fill, confirmatory endpoint soil sampling, certified laboratory analysis, bio-remediation of perched groundwater, and the installation of a vapor barrier in conjunction with a passive subslab ventilation system. After detecting contaminants in soil, all soils were removed to the bedrock surface. 450lbs of ORC was introduced following the detection of VOCs on the perched groundwater. Concentrations of total VOCs in perched water ranged from 165ppb to 3556ppb. MW-1 was installed in order to monitor the effectiveness of the bio-remediation. However, the well did not produce any water and therefore could not be sampled. It appears that the actions taken are protective of human health and the environment. PARKING LOT HAS UNDERGR. STOR. TANKS AT 155 WEST 21ST - POSS. COMING FROM THERE WOULD LIKE A CALL A.S.A.P.

DEC Region: 2
DER Facility ID: 322544
DEC Memo: 10/31/06 - Raphael Ketani. I went to the site today. The building houses offices of various companies and some wholesale stores. There were no odors in the lobby, which is directly above the tank room. I went down the stairs to the maintenance office where the tank room and boiler room are. This was the basement. I didn't smell any odors until I was at the bottom of the stairs. There was a slight odor and the basement was warm. The vapors measured about 1100 ppb with the PID meter. The boiler room was clean and had only a few very small spots from where the oil filters are changed. As I walked to the tank room the vapors got stronger. They were about 1300 ppb to 1400 ppb. I met the super, Frank Gutierrez (718) 497-3000. He let me into the tank room. Petroleum Tank Cleaners (718) 624-4842 had already emptied the tank and had been inside. There was oil on the floor and most of it was covered with absorbent. I estimated about 300 gallons of #6 oil had spilled. I did not see any drains or sumps in the room as I walked around the tank. There was no oil outside of the tank room in any direction. The floors outside of the tank room were solid with no cracks at all. Perhaps the floor in the tank room was the same way. The vapors in the tank room were 32 ppm. I told Mr. Gutierrez to keep the tank room door closed to keep the vapors to a minimum in the basement. He said he would do this. The people from PTC had come back. They were starting to set up temporary piping for the temporary 275 gallon tanks. The PBS case is #2-240419 and shows a 3,000 gal. tank with #6 oil. 11/13/06 - Raphael Ketani. I returned a message from John Benvegna (bin-ve~na) of Legget Brashers and Graham (914) 694-5711. He said he saw the tank room just recently and the tank had been removed, the absorbent cleaned up, and the vapors were low. He asked what DEC wanted in the way of an investigation and cleanup. I told him that if he can see the tank room floor and it looks to be in as good condition as the floor outside the tank room, then no investigation will be needed. I added that all the DEC would want is power washing of the floor, good ventilation, a small report describing the cleanup and incident, and a revised PBS form. He said he will do this. 3/1/07 - Raphael Ketani. I called up Frank Cassano of Ace Atlas (718) 497-3003/(917) 376-5416 to inquire as to the status of the cleanup and remediation, but could only leave a message. 3/6/07 - Raphael Ketani. I called up Mr. Benvegna and asked him about the cleanup. He said that LBG was not involved as they worked for the insurance company and the insurance company determined that Ace Atlas was not covered. He told me to contact Carmine Casale, the building manager from, Bernstein Real Estate(212) 594-1414, ext 413. I tried calling Mr. Casale, but could only leave a message. 3/7/07 - Raphael Ketani. Mr. Cassano called me back. He said he had spoken to Mr. Salamack and had been informed that the documentation regarding the cleanup had already been sent to DEC. I told him that we had nothing in our records. He said he would get back in touch with Mr. Salamack. 3/22/07 - Raphael Ketani. I received a FAXed closure report from Mr. Salamack. The report contained the cover letter describing the problem and cleanup, diagrams of the tank and the room, site map, plot plan, manifests for soil and tank removal, and end-point sample analytical results. I reviewed the closure report. There were 5 sets of sample data. All of the VOCs, except for one hit of naphthalene, were non-detect. Each set had many SVOC hits and some exceedences, specifically those of the benzo series and chrysene. The exceedences were typically several times the TAGM limit, but were still low

S108298747

concentrations. These low exceedences are more likely the result of ash and cinders that are mixed in with the fill soil that was originally in place. Based upon this closure report, I am closing the spill case.

Site Description:

Location: The site is located at 27-35 West 24th Street in the Borough of New York, New York. It is located on the northern side of West 24th Street. The site is designated as Block 826, Lot 19. Site Features: The site is a rectangular shaped parcel of land which measures approximately 9,000 square feet and is improved with one 11-story building with a basement. Current Zoning/ Uses: The building on site is used for office space and a restaurant/ bar on the first floor and part of the basement. The site has a zoning code of M1-6, which allows industrial and manufacturing. The current use of the site complies with the zoning code. Historic Uses: A former dry cleaning facility occupied restaurant/ bar space until approximately 1990. The former dry cleaning operations may have contributed to the known contamination found in soil and soil vapor. Site Geology and Hydrogeology: The subsurface lithology was homogenous throughout the site. The subsurface soil was noted to consist of urban fill material and brown coarse grain sand. No site-specific hydrogeological information is available concerning groundwater depth and flow direction. However, based upon data for sites in the surrounding area groundwater is anticipated to be encountered at 30 feet below the surface and is likely to flow in a westerly direction.

Env Problem:

Nature and Extent of Contamination: Chlorinated volatile organic compounds (VOCs) such as tetrachloroethene (PCE), trichloroethene (TCE), and cis-1,2-dichloroethene (cis-1,2-DCE) were detected in soil samples in two separate sampling events. TCE and PCE were detected in both sub-slab and indoor air samples during vapor intrusion sampling. No groundwater data is available. The presence of chlorinated VOCs in soil and soil vapor is most likely due to former operation of the dry cleaner, which commonly used chlorinated solvents for dry cleaning purposes. Previous investigations included a Phase I Environmental Assessment, a Phase II Subsurface Investigation, a Supplemental Phase II Investigation- Vapor Intrusion Sampling, as well as a Supplemental Phase II Investigation and Conceptual Design. Soil-A total of nine borings (SP-1 through SP-9) in a radial pattern extending from the sump were installed. Chlorinated VOCs were detected in soil samples collected from 0 to 4 feet. The maximum concentrations were as follows: PCE 5,990 ppm; TCE 94 ppm; and DCE 69 ppm. Soil Vapor-A vapor intrusion investigation was performed and included one indoor air quality sample (IA-01) and four sub-slab samples (SS-01 through SS-04) in the existing building. One ambient background sample (OA-01) was also collected to consider background influence. The

FORMER GUARDIAN CLEANERS (Continued)

S113916768

sub-slab concentrations were as follows: TCE 760 ug/m3 and PCE 6600 ug/m3. The NYSDOH guidance recommends mitigation based on these elevated detections. Significant Threat: NYSDEC and NYSDOH have not made a decision yet as to whether this site poses a significant threat to environment and human health.

Health Problem: As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns.

must be monitored to determine if any significant recharge of product occurs. Accurate readings of product thickness must be made, which may require using the gauging method used at South Jamaica Houses on May 19, 2014. In addition, during this 4 month time period, no absorbent socks should be placed in the wells. Data from this monitoring, along with recommendations, must be included in the 2014 3rd quarter monitoring report for these sites, which is due to the Department by October 1, 2014. In the event that a significant recharge is noticed in any of the wells during these 4 months, the Department must be contacted immediately (within 72 hours of gauging).

(Falvey) all UST's have been permanently closed on site. New 8K AST's are currently in operation at this facility. A total of (3) spill reports have been reported and closed at this facility since initial TTF report. Unknown what tank # failed the tightness test, however, all UST's are reported out of service. Due to proximity of the failure to the Hudson River if a significant petroleum discharge had occurred impacts to the adjacent surface waters would have been observed. No further action is required at this time. Spill is administratively closed.

Remarks: 550 GALLON TANK FAILED HORNER EZY CHECK WITH A LEAK RATE OF .179GPH, TANK #8, PARTIALLY PUMPED OUT TANK, WILL FINISH PUMPING TANK LATER TODAY.

Hazardous Waste Summary:

Waste code: NONE
Waste name: None

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES

DEC Region: 2
DER Facility ID: 284732
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND" Sent TTF letter to consultant: Maria Ramirez, GZA, 65 Willowbrook Blvd, Wayne, NJ 0747011/5/2003 Sangesland spoke with Maria Ramirez at GZA. She says the building is converting to natural gas and the 10,000 gal tank will be abandoned in place. Tank is below the basement floor under an electrical utility room. They cleaned out the tank and found holes in the top 1/3 of the tank. They will take borings through the bottom of the tank to determine if the area is contaminated. 12/4/2003 e-mail message from Maria Ramirez said the soil borings through the bottom of the tank would take place around 12/12/03. 12/11/2003 Sangesland reviewed a submittal from Maria Ramirez of GZA dated Nov 19, 2003. This outlined the the work discussed above and stated that 4 holes will be drilled through the bottom of the tank and samples will be collected for testing (if possible-it may be in cement). If the samples are clean, the tank will be abandoned in place with foam. 12/22/2003 Sangesland spoke with Fran Schultz of GZA about this site. They made 4 holes in the bottom and sides of this tank and hit cement. Water is entering the tank. To date approx 700 gal of water has entered the tank. They believe the water is from a broken water main. Sangesland asked GZA to test the water for VOC and SVOC. GZA said they would also test for Floride and Clorine to determine if this water is city tap water or groundwater. If the water samples come back clean, then GZA will prepare an arguement that the tank is in a subbasement vault. All records of the building (blueprints) are gone (they were in 7 World Trade Center). There are lots of utilities nearby. The tank is being abandoned in place. GZA will request closure of the spill number. 3/15/2004 Sangesland reviewed a report from Maria Ramirez of GZA. Based on the description of the tank location (below ConEd electrical equipment), the drilling of holes through the bottom and sides of the tank (all into cement), results of water tests on the water that came into the tank after drilling (no petroleum but did have Floride & Chlorine). Based on all of this information, the DEC will allow GZA to go ahead with abandonment of the tank. After proper abandonment is complete, GZA will submit a final report with a request for spill closure. 11/14/05 - Larry Alden - Reviewed file and concur with assessment of Sangesland (3/15/04). Reviewed PBS# 2-606121, which showed that 10,000-gallon tank was closed in-place on 7/8/04. With absence of any contamination, and tank subsequently closed, this spill can be closed.

Remarks: failed a tightness test but could not isolate a specific pipe - test was performed as part of a closure.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "M TIBBE"SEE ALSO 91-10075 & 92-13026.12/1/05- DEC Piper spoke w/ property manger. Charlie Reed, 499 Fashion Tower, LLC. 212.471.4351 in regards to status of the spill. I had discussed this with Mark Tibbe. Mark had informed me that the spill file has been transferred to ALbany. Piper had e-mailed DEC lead as to phone call from property manager.7/7/06 - Spoke with Charlie Reed concerning status of spill in which Reed indicated that the oil spill had been cleaned and signed off by the building managers. The spill case itself was due to a report of a oil vapor spreading into a subway line. However, since then no further reports have been made. Reed indicated he needed to gather his files and speak with current property manager Peter Nichols at 212-471-4351 concerning possibly closing the site. Johnathan Antonizio, NYSDEC8/9/06 - Additional steps needed to attempt to close site: Call Charlie Reed and/or Peter Nichols to gather files together. Would like to see documents to confirm oil spill cleanup. Since no reports of vapor smell since the time of the spill, site can be closed when documents are available. Johnathan Antonizio, NYSDEC-Albany10/29/10 - Austin - Reassigned from Antonizio in Albany to Patel in Region 2 for following up and closing - end12/07/10-Hiralkumar Patel.3:30 PM:- visited site. met Steve Corbo, building super. he is working on-site since 2007. site has one 7,500 gal #4 oil AST on saddles. tank is located inside a tank vault with access. tank vault is under the sidewalk of W 37th Street. during inspection, found monitoring well inside the boiler room, near the sump. Steve doesn't know purpose of well inside building.alternate addresses: 491-499 7th Ave, 154 W 37th StreetPBS #: 2-404861, 2-404888other spills: 9110075, 9213026spill #: 9110075 was reported on 12/22/1991 due to 1,000 gal #6 oil spill. case closed and referred to this open spill case.spill #: 9213026 was reported on 02/21/1993 due to tank overflow. case closed and referred to this open spill case.as per PBS #: 2-404861, site has one 3,000 gal #2 oil UST installed in Jan. 1925. tank was tested on 10/13/06.as per PBS #: 2-404888, site has/had following tanks:- one 7,500 gal #2 oil AST in contact with soil which was removed in Jan. 2002- one 7,500 gal #6 oil AST on saddles which was installed in Jan. 2002as per permit dated 11/21/96, permit was filed to replace two boilers and two oil burners with one boiler and one oil burner. changed oil grade from #6 to #4 and antisiphon valve was installed on oil supply line.as per permit dated 01/19/2000, permit was filed to install additional boiler.as per permit dated 11/26/2001, permit was filed to replace a 7,500 gal tank.Steve Corbo **building super**PH. (212) 967-8795499 Fashion Tower LLC. **property owner**c/o Savitt Partners LLC. **property management company**530 7th Avenue, Suite 401New York, NY 10018Attn.: Sal Robustelli **property manager**Ph. (212) 452-6051 (212) 944-8006email: srobustelli@savittpartners.com12/08/10-Hiralkumar Patel.12:42 PM:- spoke with Steve regarding another tank on property. Steve mentioned that building 491 has 3,000 gal tank wrapped in concrete. building 491 is along 7th ave, south of building 499. Steve mentioned that

building 499 is called north tower and building 491 is called south tower. 12:55 PM:- left message for property manager. reviewed documents available under spill #: 9110075.*****
*****1) 09/09/94: SL Green Real Estate sent letter to FDNY stating that tank is in satisfactory condition. this letter was based on letter from American Pipe and Tank Lining dated 09/02/94. American Pipe and Tank did pressure test and found no loss of pressure. 2) 01/31/96: Site Investigation Report prepared by Apex Environmental. abstract:- installed three borings through the building floor slab: two in the south tower boiler room and one in the eastern freight elevator shaft of the south tower- boring B1 was advanced, to 36 inches below surface, immediately south of a sump pit in the boiler room in the south tower- competent materials were encountered at depth of approx. 36 inches in boring B1 and B2- boring B2 was advanced, to 48 inches below surface, immediately west of the heating oil storage tank in the south tower boiler rom- building floor slab was noted to be approx. 19 inches thick in borings B1 and B2- boring B3 was advanced, to 43 inches below surface, in the eastern freight elevator shaft of the south tower- elevator shaft is located immediately west of the south tower boiler room- height of the elevator shaft floor is six inches higher than boiler room floor- building floor slab in elevator shaft was approx. 8 inches thick- competent material was encountered at depth of 24 inches- found heavy, black oil coating on barrel of core drill when removed from all three borings- found free product on water in boreholes B1 (about less than one inch), B2 and B3 (about 3 inches)- depth to the top of the product layer was recorded at 24 inches below surface in all borings- under the elevator shaft, observed a 10 inches void beneath the floor slab, 3 inches of solid material, then another 3 inch void- oil was observed to be flowing into borehole B3 from both voids- sump pit was observed in the floor at teh west end of the south tower boiler room- sump pit was approx. four ft square and appeared to contain a large volume of oil- black staining was obvious on the south wall fo the shaft, which is also the exterior building wall (towards building 485 7th ave)- fingerprint analysis of oils from B2, B3 and sump pit indicate that each sample was #6 oil 3) 03/11/96: letter from ERM summarizing spill history and site observations. abstract:- site occupies with two separate buildings with two separate boiler rooms- boiler room in north tower contains 7,500 gal #6 oil AST- boiler room in south tower contains 3,000 gal #6 oil UST <----- as per building employee who was present at the time of 1991 spill (spill #: 9110075): the 1,000 gal release occurred when a valve on the line between the fule tank in the south tower and the fuel tank int he north tower was left open. the line is used to transfer oil between the two tanks when necessary. outside contractor was called into to clean the spill. free standing oil was vacuumed up. some oil also spilled into the sump and sump was cleaned.- as per building employee who was present at the time of 1993 spill (spill #: 9213026): spill occurred during the filling of 3,000 gal tank in the south tower. employee estimated that up to 1,000 gal oil may have been spilled and that some of the oil was discharged through the tank vent into the trench adjacent to the building (which may be subway vents). outside company cleaned up the spill- an unidentified caller reported spill (spill #: 9406980) in Aug. 1994. as per building super, who was present at the time of spill, it was in Aug. 1994 that the NYC Transit Authority noted oil in a subway tunnel adjacent to

S102142464

building was using #6 oil and then switched to #4 oil. also, tanks in both north and south towers are no longer connected. as per Robert, tank/boiler room and elevator shaft are the two lowest points in entire basement. they stopped monitoring the site about four years ago as no more oil found in wells. he also mentioned that MTA cleans out their vents every two years to prevent drain plugs which cause water flooding in the south tower. Robert did not get any complaints from MTA for long time. found vent pipe in foundation wall towards the next door alley and fill port on sidewalk near the building foundation wall, on north side of the south tower entrance (on other side from the alleyway). alley is about 4.5 ft wide. after reviewing available information, changed address in spill report from 499 7th ave to 491 7th Ave. discussed with DEC Austin. based on available information, Austin asked for monitoring and sampling from existing wells in both towers and soil and groundwater investigation in alley at building 485. he also asked to find out location of pipe which was connecting two tanks in past. alternate addresses for building 485: 481-489 7th Ave, 155-163 West 36th Street no spill reports found at building 485. PBS for building 485: 2-606511. as per the PBS record, building 485 has one 10,000 gal #6 oil AST on legs. tank was installed in Oct. 1981. 3:32 PM:- left message for Robert Kelly, super of building 485. Robert Kelly **super of building 485**PH. (917) 295-2958 Gedula 26, LLC. and 485 Shur LLC. **owners of building 485**c/o Eretz Group **management company** 485 7th Avenue, Suite 717 New York, NY Attn.: Danny Talass Ph. (212) 714-2270 (212) 971-4000 email: jrose@eretzgroup.com 12/13/10-Hiralkumar Patel. 11:50 AM:- visited site. met Mr. Kelly at building 485. building 485 has one 10,000 gal #6 oil AST on legs. tank is in secondary containment. tank is location along 7th ave and almost in middle of basement. tank at building 485 is away from alley between the building 485 and building 491. as per Mr. Kelly, the tank is about 28 years old and he is working in the building for about 26 years. Mr. Kelly never observed any oil leak into the building from alley side. all the lines for tank are aboveground. fill box for the tank at the building 485 is in middle of the sidewalk, close to E 36th street. 12:11 PM:- left message for Mr. Robustelli. 12/14/10-Hiralkumar Patel. 11:55 AM:- left message for Mr. Robustelli. 12:28 PM:- received message from Mr. Robustelli. 12:31 PM:- spoke with Mr. Robustelli and informed him that based on available information, the Department requires further investigation in alleyway and monitoring/sampling of wells. 12:45 PM:- left message for Mr. Talass, property manager for building 485. 12:51 PM:- spoke with Mr. Kelly, super of building 485. he mentioned that the alley between two buildings is the community alley and serves five building in total. he mentioned that the alley doesn't belong to any particular building, but a combined property. 12/17/10-Hiralkumar Patel. 9:10 AM:- visited site. met Robert Facciola. Robert showed old pipe which was connecting tanks in both tower. old connecting pipe was running aboveground along ceiling. piece of old pipe found in northern wall of the boiler room, no top of the 3,000 gal tank. during visit, Robert opened valve on pipe installed in southern wall of the boiler room and this pipe goes under the alleyway. no oil or water came out of this pipe. Robert mentioned that they open this valve every six months. sometimes they get water, but no oil observed in last couple of years. inspected alley. vent pipe for the 3,000 gal tank is running aboveground along the foundation wall of the south tower. alley is about 4.5 ft wide in front, but about 15 ft wide in rear, but alley is full of stuff (AC units, storage

DEC Memo: DEC Piper spoke w/ Charles Rose. Assistant to the principal. As per conversation, they were getting ready for winter and noticed a leak. When the janitor inspected found approx 200 gal in vaulted area. Spill is contained and in vault. PTC to respond today and pump out remaining oil and oil on floor. No drains, sewers effected. PTC to contact DEC upon completion of emergency cleanup. School is not in session and no children are present. Odors present in basement only and not in school.9/11/06- DEC Piper spoke w/ Sister Kathleen, PTC had cleaned up emergency spill. Piper spoke w/ PTC, tank was above ground on concrete. Concrete was in good shape. School is going to replace tank. 6 drums of oil soaked speedy dry removed. CLOsed.
Remarks: TANK IS LEAKING IN THE TANK ROOM OF SCHOOL: CREW ENROUTE TO PUMP OUT TANK AND CLEAN UP SPILL: NO DRAINS EFFECTED:

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ZHAO/DO"12/19/02 - AUSTIN, DDO - TTF LETTER SENT1/11/06- DEC Piper spoke w/ Eugene Degan, (PRev. Owner Rep 845.294.7509) regarding tank test. He could not be sure though he thinks the tanks are still empty. He will look into this. Piper then contacted new owner Dov Hertz, Extell Group. 212.712.0633. He knows nothing and will have previous owner get info. Galden Frankel performed Phase I and II on property. Left message at GF requesting call back.1/18/06- DEC Piper spoke w/ property manager, Rob Scharf 212.712.6111. Stewart Dean Co. -212.695.3180. He will fax info. DEC Piper to review and inform Rob of additional work if warranted.2/6/06- DEC Piper spoke w/ Rob S. I explained to him that he was still in violation of PBS code. I have received analytical suggesting that there was no release at the site. The tank test results indicated a dry ullage leak. The tank is empty and still needs to be removed or closed in place. As per Rob, he will be sending in the new application this week. I instructed him to include a line item that that due to the razing of the building, that they will remove the tank when the activities have been completed. Afterwards, he will need to update the PBS records to insicate that the tank has been removed. Upon review of a limited phase II investigation of the site performed by Galden Frankel, of the six soil samples taken from various locations throughout the site, no elevated constituents were detected. However, three GW samples were collected. The results indicate 1,040 ppb of MtBE and slightly elevated levels of PERC and its byproducts. 5/15/06- DEC Piper. Referred to Remediation.5/31/06 - reviewed file: MTBE was detected without other VOCs usually present in a petroleum release. The MTBE is likely the leading edge of an off-site impact. Low level of CVOCs are also detected. These CVOCs are only detected in GW with no soil contamination or other sources on site. Spill is closed, no NFA issued since no remediation was ever conducted at site. - KST

nos. 0702185 and 0702402.08/16/07: Notified of this spill by Ryan Piper of spill response staff on 8/15/07; sent email to Jane Staten and Harvey Roberts of URS (DDC consultant handling long-term remediation of this site under DDC consent order), with cc to Afsar Samani of DDC, stating: "I've been informed by our Spill Response staff that spills are continuing to occur related to damaged fill line to gasoline UST at Midtown South. Initial spill (0613411) occurred in March '07 when gasoline was found in tank sump and nearby monitoring well. According to URS's system performance reports, Franklin Co. determined that tank's fill line was damaged, and they installed direct fill to tank to bypass damaged line. Do you know if Franklin plugged up old fill port when they installed direct fill? It appears that fuel deliveries continue to be made to old fill line, and product keeps showing up in tank sump and monitoring wells. On May 23rd, spill 0702185 was reported by NYPD because sump was filled with gasoline and Veeder Root alarm was going off. Today, another spill was called in (0705553) because of product in sump. Please take necessary steps to have old fill port blocked so it cannot be used anymore (or repaired so it won't leak) as soon as possible, and please also check out entire tank system to make certain it is damaged fill line that's problem, and that there are no other leaks in system. Please get back to me on this and let me know what actions have been taken to address this situation." Afterwards, spoke again with Ryan Piper, who suggested tank be taken out of service and emptied until problem is solved. Sent email to Afsar Samani of DDC, cc's to Jane Staten & Harvey Roberts of URS: "In light of ongoing problems with gasoline UST at Midtown South Precinct, I strongly suggest that tank be taken out of service and emptied until problem(s) with tank and piping has/have been addressed. If this is not practical because police have no alternative location to fuel their vehicles, then please take whatever steps are necessary to immediately rectify problem(s) with tank system. NYCDDC is conducting remediation at this site using SVE and groundwater extraction & treatment systems, and these ongoing spills of fresh gasoline to subsurface will set back remedial efforts for months, or more likely, years, so it is in DDC's interest to resolve this situation promptly. In addition, these releases are a violation of Environmental Conservation Law, as you are aware, and if they continue to occur, our spill responders may be inclined to call Environmental Conservation Officers to site to issue summons." On 8/16/07, received email from Afsar Samani of DDC: "Harvey informed me that vac-truck is scheduled to remove product from sump today. Also, NYPD subcontractor is going to be scheduled to repair fill line. URS is looking into this and will make all necessary action to make sure tank and fill port is tight." Then, received email from Jane Staten of URS: "I just spoke with Lt. Pete Polanco for an update on problems with gasoline tank at Midtown South Precinct. According to Lt. Polanco, NYPD tank contractor inspected fuel fill line this morning and found no problems with integrity of line. Therefore, Lt. Polanco believes that product in tank sump was caused by fuel delivery vendor. NYPD are expecting fuel delivery vendor at site this afternoon to discuss problem and also to remove gasoline currently in sump. I will keep you posted." I then sent email to Afsar Samani, with cc's to Jane Staten & Harvey Roberts of URS, Jerry Aliberti of DDC and Lt. Peter Polanco of NYPD: "Thank you for your response. Please be advised that no fuel deliveries should be made to gasoline tank at Midtown South until tank system has been tested to insure integrity of all elements

S105054624

of system. Documentation of tightness test results, and of any repairs made to fill line since problem was discovered in March 2007, must be submitted to NYSDEC before fuel deliveries can resume. This situation is high priority and NYPD should arrange for tightness testing immediately." Then, received phone call from Lt. Polanco of NYPD, who said repairs to damaged fill line were done in June and fill line was tightness tested and passed, and he believes current problem is due to fuel delivery vendor not hooking up vapor recovery line (truck is parked in street long distance from fill port, so there's long length of delivery hose). He said product will be removed from sump and fill line will be tested again. I asked him to submit documentation of repair work and tightness testing, and sent him email with my address. Then, I was cc'd on email from Afsar Samani of DDC to Lt. Polanco of NYPD: "We were informed by following correspondence from NYSDEC that gasoline tank over at Midtown South Police Precinct should not receive any more deliveries until a tightness test has been scheduled. Please let DDC know when you can arrange for your subcontractor to perform a tightness test on this tank. This is very crucial to remedial effort that URS is performing to clean up site on behalf of DDC." - J. Kolleeny08/21/07: Received fax on 8/20/07 from Lt. Polanco of NYPD fuel control unit, with letter from Energy Tank & Environmental Services dated 7/16/07 describing repairs to and pressure testing of fill line to gasoline UST (in eDocs). Sent same-day email response to Lt. Polanco, cc's to Afsar Samani & Jerry Aliberti (DDC), Jane Staten & Harvey Roberts (URS): "Thank you for faxed description of repair work to fill line of gasoline UST at Midtown South and diagram of site, tank and fill port, provided by Energy Tank & Environmental Services, Inc. However, these items do not completely satisfy my request for documentation of tank repairs and testing of fill line, and they raise additional questions. Page that describes repairs and subsequent pressure testing of line is dated 7/16/07. Is that date when repairs were done? I would like to see dated invoice for repair work in addition to this description. Description states that problem was with primary fill line, and that secondary line was intact, which allowed product to go into containment sump and not into ground. However, in March when this problem was first discovered, URS field personnel reported 5 feet of fresh gasoline in groundwater extraction well that had never had gasoline in it before, so somehow product did get into ground. If repairs were done on 7/16/07, why was gasoline again reported in containment sump on top of tank on August 15th (spill number 0705553)? You mentioned that this was caused by delivery person not hooking up vapor recovery line, yet our Petroleum Bulk Storage staff say this would not result in product appearing in sump. I would greatly appreciate it if you could provide additional documentation of repair work, and if NYPD would schedule a tightness test of all lines going into and out of tank, as well as a hydrostatic test of tank's containment sump. I would like to be informed in advance when these tests have been scheduled, so that I can attend." - J. Kolleeny 09/14/07: Visited site 9/10/07 to observe hydrostatic test of tank sump and tightness test of fill line. Mike Suppe of Fenley & Nichol on hand, said sump held water, more or less (slight drip along electric conduit extending from this sump to next sump at end of tank), for over 2 hours. He said no way to test fill line (it's about 2-3 feet long from "remote" fill port) without physically removing it, but he will test entire tank system. In discussions of how product could turn up in sump, I mentioned that

Lt. Polanco said it had to do with delivery person not hooking up vapor recovery line. Mike wasn't clear on how that would cause product to appear in sump. I called Lt. Polanco, who said by not hooking up vapor recovery during delivery, excessive back pressure was created, so when delivery hose was disconnected, product would back up and spill into overflow bucket, then drain to sump. Mike Suppe said this isn't possible, since any fuel spilled into spill bucket would drain back into fill line, then into tank (not sump). Mike suggested that temporary fill, which was used while remote fill line was awaiting repair, had not been properly capped once NYPD switched back to using remote fill, and poor threading on top of direct fill extension cylinder and improperly screwed-on cap for this extension, may have resulted in product spilling out capped off temporary fill, again related to back pressure from not hooking up vapor recovery (see photos in eDocs image folder). NYPD now has on-site a long hose to be used for vapor recovery, and reportedly there have not been any more problems with product appearing in sump after deliveries. Spoke with Mike Suppe on 9/11/07, who said tank system passed test. I discussed whole situation with Jane Staten of URS, who forwarded to me email from Harvey Roberts of URS (in eDocs) indicating temporary direct fill was installed by NYPD, not Franklin Co. as stated in URS's system performance reports for site. While this may explain why product was appearing in sump, none of this adequately explains how product escaped into ground and turned up in groundwater extraction wells and monitoring wells (for site cleanup under spill no. 9512583). Mike Suppe indicated if damaged fill line was unknown for a long time, sump could've filled up with gas during deliveries and overtopped inner rim of sump, and from there it could seep into ground. URS will continue to gauge nearby wells for product levels, and see if they continue to decrease. Harvey Roberts email also calls into question when exactly NYPD had repairs done to fill line. I contact Lt. Polanco again and asked for more detailed documentation of repair work, indicating date(s) and nature of work done. He said he would work on getting me that info. - J.
Kolleeny09/17/07: Received fax from Lt. Polanco, a revised version of earlier fax with statement by Energy Tank & Environmental Services regarding repair work on fuel fill line. Statement is still dated 7/16/07; it now states that they uncovered line on 7/5/07, reconnected and tested line on 7/6/07, reporting that line held pressure during backfilling, they then witnessed a fuel delivery on 7/9/07 with no leaks observed, so they re-surfaced area. - J.
Kolleeny01/04/08: On 12/19/07, sent email to Jane Staten of URS: "I recently asked you to ask your field personnel to check if gasoline is still showing up in tank-top sump after fuel deliveries at this site. Do you know if they've checked on this?" On 12/26/07, received email reply from Jane: "Our field technician checked tank sumps at Midtown South on 11/29/07. One sump was dry and other contained a little water. There was no evidence of gasoline." Based on no new reports of gasoline appearing in tank top sump, it appears problem(s) that caused this and related spills has (have) been addressed; OK to close spill. - J. Kolleeny

DEC Memo: 05/23/07-Vought-Duty desk officer. Vought spoke to Bob Laga(Fax 718-359-7865) and SVE and three groundwater wells onsite with SpillBusters installed and Franklin geologist performing weekly inspections of well and system. Franklin was contacted by NYPD that sump of UST was full of product and alarm for Veeder Root was going off. Franklin performed site visit and approximately 20-50 gallons of gasoline present in sump. Vacuum truck estimated time of arrival in two hours to recover gasoline. As per Franklin field geologist level of product in sump has remained constant (may indicate no loss to subsurface). No product in groundwater monitoring well immediately adjacent to tank with product in sump. Vought discussed site with DEC Krimgold and tightness test letter prepared by Vought and submitted to DEC Falvey for signature. Letter sent with one month due date to owner on PBS and cc to Franklin:NYCPDBuilding Maintenance

 DEC Memo: This site is already an active longterm remediation site - Spill #9512583As part of this remediation effort, there are existiting monitoring wells on the site that are tested periodically. Today, the geologist found 4 ft of gasoline product floating on the water table in a well that previously had nothing. The manway was checked and found to be full of gasoline as well. This was clearly an overfill from a recent delivery.Franklin and/or URS is working the long term cleanup of the site and has arranged for a vac truck to clear out whatever is possible right now. On a long term basis, the existing remediation system will be used to skim the free product from the water table and remove it from the site.This problem will now be addressed by the contractor through the existing long term spill number on file.

Remarks: MATERIAL IS CONTAINED IN SUMP: POSSIBLY DUE TO OVERFILL, BUT UNCONFIRMED AT THIS TIME:

DER Facility ID: 139881
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIPPLE"9/20/2004 Sangesland spoke to John Leddy to find out if this case could be closed out. Leddy said he was subcontracted to do the testing. He has NOT done any repairs and has NOT been hired to retest the tanks again. Sangesland called "Angel"(building super???) and got no answer 07/14/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Contacted to John Leddy he said he will find the data and he will send it to me. -QA07/19/06: Contacted Mr. Jerry William of Controlled Combustion Company. He said there is not any waste Manifest record and no soil sampling. They removed older tank and they have put in a new tank. He will fax me the supporting documents to close the spill. -QA07/20/06: Reviewed letter from Mr. Jerry William (General Operational Manager), Controlled Combustion Co. Inc. They removed the old oil tank and they installed a brand new 10,000 gallon oil tank. He mentioned in his letter that there were only very small oil stains on the floor, which were cleaned up. The letter also included a copy of the tank test failure report, and documents indicating that the old tank had been removed and replaced with a new tank. Based on the information provided by Mr. Jerry William, this spill is closed. -QA

Remarks: TEST METHOD WAS EZ THREE LOCATOR PLUS. TNAK IS ON LEGS, 95% VISABLE. THE DELAY IN REPORTING WAS DUE TO CONFUSION DUE TO WHO WAS GOING TO REPORT IT.

DEC Memo:

Tipple responded, oil impacted sidewalk, roadway along curb and Con-Ed transformer vault. Con-Ed advised of impact, surfaces cleaned, awaiting documentation. PBS# 2-15227707/31/06: This spill is transferred from Mr. Koon Tang to Q. Abidi.Called to Mr. Angelo Solimine (718)499-2900 and talk to Ms. Mili (Secretary) she will find information regarding spill and she will call me back. -QA08/15/06: Called Angelo solomine (T&S Trucking Co.)and talked to Mr. John Bari he said he will find out the report and he will fax me. -QA08/18/06: Recieved a closing confirmation letter from Mr. Eston Clare, Sr. Manager (T & S) Trucking Company in which he mentioned that approximate 10 to 15 gals of #6 oil due to defective gauge caused oil to spill while Delivery was being made. T & S Trucking Company sent their Spill Crew at that private residence same day. The Crew cleaned everything that had been stained. Based on the information DEC staff closed the spill. -QA
Remarks: faulty gauge oil came out of vent: oil went into coned vault and coned was notified: michele tipple was advised from dec:

DEC Memo:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ZHAO"1/21/2003 - Spill was found by managing office by 13:00. USA Tanks Inc was hired for clean up and crew arrived on site by 15:00. Spill Hotline was notified at 18:24. DLE was notified immediately. Zhao and ECO Russell Ritzel were responded to scene.- Evidence from the room wall can be found that #4 oil Spill floating in the boiler room was about 1.5" high and in the elevator pit about 5-8" high.- About 200 gallons free product was collected from boiler room and about 1.5" high free product still remaining in the elevator pit for collecting at the time of DEC arrival.- Tank had a tightness test last Friday (3 days ago) and it was failed. DEC was notified (Spill No. 0210483).- By Friday 1/17/03, product remained in tank was 2429 gallons during the test. After accident occur, there was a 950 gal oil remaining in the tank for a stable condition. In addition that about 100 gal consume per day. From there it was found that it's about 1200 gal oil release from the event.-Manifests for waste disposal has been requested. Further investigation is needed.2/7/2003 - Zhao called and spoke with Property manager Harlan Berger this morning since the requested documents has not been received. Zhao was informed that Langan Engineering and Environmental Services has been hired as consultant for this case. At 13:30pm, Zhao received work plan from Langan. At 2:00pm, Zhao explained the spill event and possible release to the environment and water systems to the consulting firm John Rhyner (212)479-5423 who work with joel Landes (212)479-5404, the manager, and has requested to perform a fully investigation including daily oil consumption(frequecy oil deliver receipts for December and January is requested by DEC), manifests for the initial clean up and follow ups, and conduct a floor condition inspection and soil boirings other than the work plan stated.5/12/2003 - Tank was removed last week. Landes will take GW samples today from both sumps.5/15/2003 - From Langen's investigation, tank room has been cleaned nicely, elevator's pump pump out water from the sump once per day. About one feet water accumulated in elevator. No sheen there. Inspection has been set up this friday morning. 5/27/2003 - Zhao and ECO Russell inspected this morning. Clean up is acceptable. One boring is required by DEC with soil samples and water sample.11/12/2003 - Final report received and reviewed. No further action is required except that PBS application for sub Mod. must be submitted before closing the spill.12/31/2003 - PBS sub. mod. application received.

DEC Memo: TTF was sent out to BROADWAY REAL ESTATE SERVICES 450-460 WEST 33RD STREET NEW YORK, NY 10043 ATTN: JAVIER CORRIPIO ** PBS 2-456721
**2/26/13 TJDFile review. Tank failed tightness test on 9/8/12 - initially reported as a wet leak. Tank was uncovered and corrosion was identified at tank top fittings and associated piping. Repairs were performed and a tank only (isolation test) was performed on 10/2/12 which passed. A complete system tightness test was then performed on 10/11/12, also with passing results. Contractor has provided the following statement in their closure report, "Throughout excavation operations, close inspections indicated neither visual nor olfactory evidence of petroleum contamination, confirming that there was no loss of product into the subsurface." all required closure documentation has been submitted and uploaded to EDOCS. No further action is required at this time.

DEC Memo: 02/03/06 Feroze talked with Mr. Minick (owner) 212-604-9898. He informed that there was a leak in the tank, they have closed the leak and pumped the oil out. It is above ground tank, floor is made of concrete. An environmental company is working for them. TTF is sent to :Mr. Minick440 west 22nd StreetNew york, NY 10011. 02/10/06 Mr. Minick called and told me that they will close the tank by PTC. He will submit DEC the documents soon.03/02/06 Feroze,: Mr.Minick told me that PTC has taken soil sample. He will submit soil analysis result and tank closer report to DEC soon.It was 275 gallon tank.03/10/06 Feroze received a certificate and soil analysis result. The result shows that VOC and SVOC are within accepable limit. They also submitted a manifest for removal of contaminated soil. The spill is closed.

Remarks: ruptured tank in basement:

See also PIN 4169, spill #s 8605682, 8606807, 9410208, 9410209.1/8/04
Reassigned from Tomasello to K Foley.06/20/06: Re-assigned from Foley
to Yau. (Yau)06/22/06: Prepared and sent an old spill letter to
property owner through certified mail. A site investigation report
(SIR) is expected to be due on 07/22/06. (Yau)06/27/06: Owner called
to inquire about the spill. Stated that he brought the property
recently (around 2002) and had no idea where is the spill was. Told
him that DEC will look into it and call him back with the exact
location of the spill. (Yau)08/02/06: Owner called to request an
update to the site. Told him that a review is underway. Found that
DEC had a PIN job for this site. Unsure whether the cleanup is
complete. If the cleanup is incomplete, the owner might have to re-do
the cleanup. Will call owner back as soon as review is completed.
(Yau)10/16/06 Reassign from Yau to Chanda
(Chanda)12/12/06-Vought-Spill reassigned from DEC Chanda to DEC
Vought.03/20/07-Vought-File review by Vought:See also open spill

showing well being bailed with free product thickness of
1".Registered CSL Letter sent by DEC Yau to Tenth Gas Inc (address as
per Property Shark).FOIL request from Brinkerhoff-8/18/06.Vought
called AG Bechard for status of PIN case. PIN case assigned to AG
John Nyhoff. Vought called Nyhoff and left message to return
call.3/20/07-Vought-See also closed spill numbers: 8605682, 9410208,
9410209 and 8302630(Open pin #). Vought spoke to DEC Krimgold who is
preparing Consent Order for PBS violations and requested to add
remedial requirements. Conference call with DEC Urda, AG Nyoff and AG
Riggi showed that approximately 354K still owed to AG for past
cleanup costs. Due to same ownership (Citigas) prior costs may be
included in Consent Order. Vought submitted CAP for below
requirements to DEC Urda. Riggi and Nyhoff also approved submission
of Final ISR and closure of spill as any new funds spent by the DEC
need a new PIN number since settlement already reached with old
responsible party. Vought called Snyder, summarized consent order and
left message to return call. 03/21/07-Vought-Left message for AG
Nyhoff to call Vought with status of PIN. Vought and DEC Urda spoke
with AG Nyoff and as per Nyoff default judgement was made against
former owner of property resulting in lean of approximately 354K.
3/26/07-Vought-Received ISR from Nyoff. Vought left message for Nyoff
to return call with which party was found responsible (Alex Goffman
or Westside Tripple Auto Repair).4/23/07-Final ISR submitted to DEC
Austin for review and spill closed by Vought.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/29/2014	Source: EPA
Date Data Arrived at EDR: 10/08/2014	Telephone: N/A
Date Made Active in Reports: 11/17/2014	Last EDR Contact: 01/08/2015
Number of Days to Update: 40	Next Scheduled EDR Contact: 04/20/2015
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/29/2014	Source: EPA

Date Made Active in Reports: 11/17/2014	Last EDR Contact: 01/08/2015
Number of Days to Update: 40	Next Scheduled EDR Contact: 04/20/2015
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810

Number of Days to Update: 13	Next Scheduled EDR Contact: 04/20/2015
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/10/2014

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/10/2014
Date Data Arrived at EDR: 07/02/2014
Date Made Active in Reports: 09/18/2014

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 09/18/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/19/2014	Telephone: 703-603-0695
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 12/03/2014
Number of Days to Update: 31	Next Scheduled EDR Contact: 03/16/2015
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 09/18/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/19/2014	Telephone: 703-603-0695
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 12/03/2014
Number of Days to Update: 31	Next Scheduled EDR Contact: 03/16/2015
	Data Release Frequency: Varies

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 08/29/2014	Source: Department of the Navy
Date Data Arrived at EDR: 10/09/2014	Telephone: 843-820-7326
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 11/17/2014
Number of Days to Update: 11	Next Scheduled EDR Contact: 03/02/2015
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/29/2014	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 09/30/2014	Telephone: 202-267-2180
Date Made Active in Reports: 11/06/2014	Last EDR Contact: 12/29/2014
Number of Days to Update: 37	Next Scheduled EDR Contact: 04/13/2015
	Data Release Frequency: Annually

State- and tribal - equivalent CERCLIS

SHWS: Inactive Hazardous Waste Disposal Sites in New York State

Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 11/18/2014	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 11/20/2014	Telephone: 518-402-9622
Date Made Active in Reports: 01/12/2015	Last EDR Contact: 11/20/2014
Number of Days to Update: 53	Next Scheduled EDR Contact: 03/02/2015
	Data Release Frequency: Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

VAPOR REOPENED: Vapor Intrusion Legacy Site List

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

Date of Government Version: 11/01/2014	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 11/19/2014	Telephone: 518-402-9814
Date Made Active in Reports: 01/12/2015	Last EDR Contact: 11/19/2014
Number of Days to Update: 54	Next Scheduled EDR Contact: 03/02/2015
	Data Release Frequency: Varies

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Facility Register

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 10/07/2014	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 10/09/2014	Telephone: 518-457-2051
Date Made Active in Reports: 11/04/2014	Last EDR Contact: 01/05/2015
Number of Days to Update: 26	Next Scheduled EDR Contact: 04/20/2015
	Data Release Frequency: Semi-Annually

State and tribal leaking storage tank lists

LTANKS: Spills Information Database

Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

Date of Government Version: 11/18/2014	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 11/20/2014	Telephone: 518-402-9549
Date Made Active in Reports: 01/13/2015	Last EDR Contact: 11/20/2014
Number of Days to Update: 54	Next Scheduled EDR Contact: 03/02/2015
	Data Release Frequency: Varies

HIST LTANKS: Listing of Leaking Storage Tanks

A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database. Department of Environmental Conservation.

Date of Government Version: 01/01/2002	Source: Department of Environmental Conservation

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

State and tribal Brownfields sites

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Land Records

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 08/01/2014	Source: Environmental Protection Agency

BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2011	Source: EPA/NTIS
Date Data Arrived at EDR: 02/26/2013	Telephone: 800-424-9346
Date Made Active in Reports: 04/19/2013	Last EDR Contact: 11/26/2014
Number of Days to Update: 52	Next Scheduled EDR Contact: 03/09/2015
	Data Release Frequency: Biennially

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers for Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

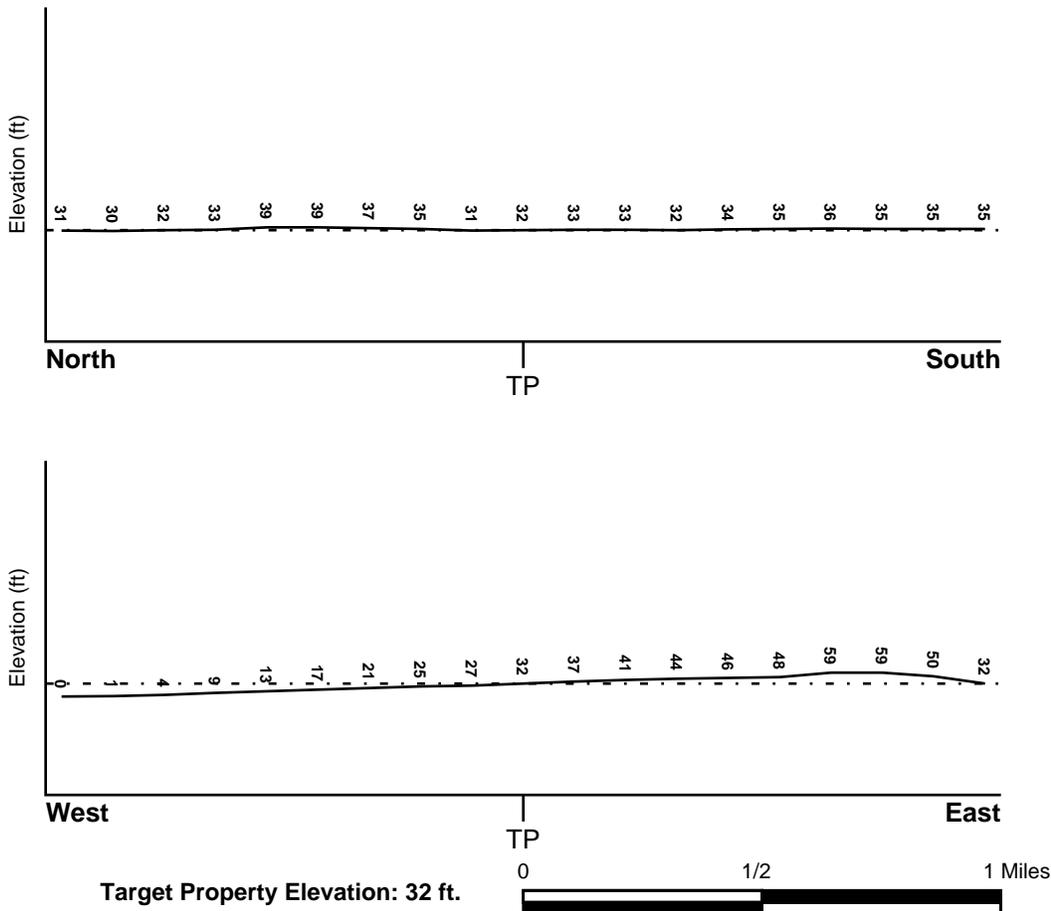

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile NW
Site Name:	MANHATTAN GENERAL MAIL FACILITY
Site EPA ID Number:	NY6180000352
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	not available. Saturated layers impacted by salt water intrusion are present in the overburden. It is generally inferred that the depth to the uppermost 'aquifer' is greater than 70 feet at the surface of the bedrock/sediment interface.
Hydraulic Connection:	Detailed hydraulic connection information is not available. Glacial till and outwash deposit sediments overlie the Manhattan Schist, the uppermost bedrock unit at the site. The surface elevation of bedrock decreases to the southwest of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Ordovician
Series: Lower Ordovician and Cambrian carbonate rocks
Code: OC *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinator soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

New York Public Water Wells

State Database: NY Radon

Source: Department of Health

Telephone: 518-402-7556

Radon Test Results

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600-10).

Search Radius: 0.333 Mile.

No Aquiflow sites reported.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND
 Soil Surface Texture: variable
 Hydrologic Group: Not reported
 Soil Drainage Class: Not reported
 Hydric Status: Hydric Status: Soil does not meet the requirements for a hydric soil.
 Corrosion Potential - Uncoated Steel: Not Reported
 Depth to Bedrock Min: > 10 inches
 Depth to Bedrock Max: > 10 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

EXECUTIVE SUMMARY

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

EXECUTIVE SUMMARY

SEARCH RESULTS

Unmappable (orphan) sites are not considered in the foregoing analysis.

 DEC Memo: Air emission issue. Buildings in NYC that burn #6 oil have no limits on emissions for the first 15 minutes of boiler startup. Black smoke is common and legal. Incomplete combustion until the boiler is hot.

MAP FINDINGS

UNKNOWN BUILDING, 7TH AVENUE AND 28TH STREET (NORTH EAST CORNER), MANHATTAN, NY (Continued)

Remarks: We received the following email concern(I will forward the attached pictures in another email)Hello,I would like to report that the building at the corner of 7th avenue and 28th street (North East corner) in Manhattan (New York City) was emitting very black smoke from its chimney form about 7-7:30 am this morning. The same thing happened yesterday morning at the same time. I believe that the black smoke shows a massive pollution and a problem with the exhaust system for that building. I have attached a few pictures. Thank you for investigating this issue. Let me know if you need any additional information.I look forward to hearing back from you.Thank you.Best regards,Olivier ANDRE, Esq.

 DEC Memo: 01/10/07-Hiralkumar Patel. visited site. met building super Ramon Vargas. site has 6000 gal #6 tank in concrete vault with access.
 could not see bottom of tank as tank sides are close to tank room

MAP FINDINGS

RESIDENTIAL BUILDING, 315 7TH AVE, MANHATTAN, NY (Continued)

wall and tank room has access from top. smelled heavy odors inside tank vault, in basement and little odor upstairs. oil stain on tank room walls. PBS #: 2-099309 as per Mr. Vargas, about two years ago, there was water leak in one of store upstairs which flooded basement and entire tank vault. and water went inside tank from manhole and pushed oil out of tank. this cause spill at that time and Eastmond responded and did cleanup. since then tank room has speedy dry, water and oil mixed around tank. Castle oil delivers oil at site and last oil delivery was on 12/29 for 2302 gallons. no oil stains found on wall, inside boiler room, which separating tank room and boiler room. there are 94 units in building. PTC was removing oil/dirt from area around tank. they haven't done any tank test yet. spoke with building manager Tim Smith. asked Mr. Smith to do tank system test immediately to check any leak in tank system. if leak found, need isolation test and if found any wet leak, oil has to be removed from tank immediately. Mr. Smith will contact PTC for immediate tank test. Ramon Vargas, Super of building Ph. (212) 645-8042 (O) (646) 262-0856 (C) Timothy D. Smith Fashion Place Management Corp. 1 Main Street North Bennington, VT 05257 Ph. (802) 442-5077 Fax (802) 442-5241 received call from Mark from PTC. he will finish tank test and will send test result by tomorrow noon. tank is located in such a way that no soil boring possible inside tank room. if required, can do soil boring outside tank room (in other part of basement). 01/11/07-Hiralkumar Patel. received call from Mark from PTC. they did tank system test and found wet leak. supply and return lines runs aboveground from tank to boiler room crossing wall in between. Mark told that he will empty out tank tomorrow morning. spoke with DEC Jacob. he suggested that as tank has #6 oil, it is ok if they empty that tank tomorrow, but it has to be empty out tomorrow. left message for Mr. Smith. received call from Mr. Smith. explained him that as tank system has wet leak, oil has to be removed from tank. Mr. Smith wants to run isolation test to check if lines has any problem. told Mr. Smith that test has to be done tomorrow and if any leak found in tank, tank has to be emptied out by end of tomorrow. no later than tomorrow. he will call Mark and check when they do isolation test. 01/12/07-Hiralkumar Patel. received call from Mark. he explained situation to Mr. Smith and now Mr. Smith agreed to empty out tank. tank will be empty by end

MAP FINDINGS

RESIDENTIAL BUILDING, 315 7TH AVE, MANHATTAN, NY (Continued)

of today. sent out letter to Mr. Smith requiring tank test, soil/groundwater delineation, endpoint samples and vapor barrier installation. letter faxed to Mr. Smith and to Mark at PTC. 1/11/07 - Austin - Temporarily assigned to Sangeland, in Patel's absence. 1/26/2007 Sangeland spoke to Ray at PTC. He said the tank was tested and failed. The tank was emptied and a temp tank set up. PTC is still working on cleaning out the vault. They have NOT yet started any work below the vault floor, but they have been approved to do this work. 02/12/07 - Hiralkumar Patel. received call from Mark. he took three soil samples through bottom of tank. based on test results, he is planning to abandon tank and tank room. asked Mark to fax soil results with site plan. received sample analyticals. no contamination found in sample. spoke with Mark. he told that concrete under tank is about 9 inch thick. he doesn't know which part of tank was failed in test. they removed most of contaminated materials from tank top. but due to very small space between tank and room wall, it is impossible to remove remaining material without removing tank. no space to drill for soil samples on side of tank. tank is located in tank vault in sub-basement. so instead of taking out tank, Mark was suggesting to close this tank and tank vault with cement/foam. asked Mark to submit investigation report with all details before closing tank and tank room. 02/20/07 - Hiralkumar Patel. received report from Mark. PTC removed contaminated debris from around tank and has emptied out tank as tank failed in isolation test. they took three soil samples through bottom of tank. during sampling, found concrete floor under tank of about 10 inch thick. samples taken at about one foot depth below concrete floor. no contamination found in samples. as per Mark, there is not enough space around tank to clean everything. based on tank location, no more cleanup is possible. no oil stains observed on wall, between tank and boiler room, in boiler room. no contamination found in soil sample. leftover contamination, if any, be considered as contained. no soil/groundwater affected. 02/21/07 - Hiralkumar Patel. received call from Mark. he asked about what material should use to abandon tank as well as tank room. discussed with DEC Jacob. he told that it is not required to fill tank with any inert material if tank is aboveground, to avoid putting more load on foundation. but tank has to be cleaned out and vapor free. he suggested to cut open tank

MAP FINDINGS

RESIDENTIAL BUILDING, 315 7TH AVE, MANHATTAN, NY (Continued)

from side and clean it. tank has to be stamped with closure date as required by law. left message for Mark with these suggestions and requirements. also mentioned him to notify DEC prior to closure and to register new tank which will be installed soon.spoke with Mr. Smith, property manager. he mentioned that they will not installing any new tank as they are switching to gas heating system. they will leave tank room and tank empty with door sealed and stamp of closing date on it. asked Mr. Smith to correct PBS record as record shows use of #2 oil while site was using #6 oil. also asked him to put closing date and send form to PBS unit.case closed. NFA sent to Mr. Smith with PBS Correction form. letter faxed to Mr. Smith and Mark at PTC.

MAP FINDINGS

PARKING LOT, 217-221 WEST 29TH STREET, NY, NY (Continued)

me.12/19/13 - Obligado - I called again and left a message to call back DEC. Matt called me back. A geophysical investigation was done. NO evidence of tank or fill port. There was an above grade hydraulic system for the carpark. A soil boring investigation also was completed. Elevated PID readings, widespread petroleum impacts found across the site. Carrol was doing work for the potential property developer: Developer: Ironstate Development 201-963-5200 Property Owner: 29 Park LLC 370 SEVENTH AVENUE 217 NEW YORK, NEW YORK, 10001 BBL: 00779 0028 He said he will email me a copy of the Phase II report within a couple weeks. Matt Carrol - mcarroll@tenen-env.com 2/18/14 - Obligado - I reviewed the Phase I and the RAP. This site has relatively low level petroleum impacts. The RAP proposes a complete dig out to below bedrock at 32 ft. The digout will require dewatering. The proposed development will be a 95 apartment building. The cellar will have a parking garage. The foundation floor will have a Grace Pre proof barrier. I emailed Matt that I had no comments on the plan as it will be a complete dig out and requested a copy of the Completion Report upon completion of the remediation. The site is in the OER cleanup program.

 DEC Memo: Case started as a TTF on March 13, 2012 On May 30, 2012 Sangesland spoke to property manager (Pedro Martin 212-868-3888). He said there is a 5,000 gal #6 tank that has some contamination issues (he didn't

MAP FINDINGS

know details). Owner hired Riteway Tank to deal with the problems. Sangesland sent an e-mail to both David at Riteway and Veronica Zhune to ask them to work together on this site. Unknown if tank is being repaired or closed/removed?5/29/2012 Sangesland got an e-mail from David Chan at Riteway. He said they just got a signed proposal back from the owner. They will move forward with additional sampling and work in the next few weeks. 7/6/2012 Sangesland received an e-mail from Riteway: Sampling was performed this past Monday we core drilled through the bottom of the tank to retrieve samples. The samples returned dirty (verified onsite via PID). Ground water is at the tank, as soon as we core drilled through the bottom, water rushed in. We are currently writing an action plan for Veronica. We propose to IMMEDIATELY cut/install perforations on the interior of the tank of various sizes and at various heights to minimize the spreading of the contamination and to aid in the migration of loose product back into the tank. We are working on a delineation proposal for the client. Due to the location of the tank (buried in the basement), To perform an accurate delineation may be extremely difficult, if not near impossible. Access to the area is limited, especially when trying to get "geo probe" equipment onsite.7/27/2012 - Sangesland sent this message to Riteway today after a site visit:Earlier today I inspected the basement of 245 West 29th St and discussed the project with Joe Ostrowski. Based on the inspection and discussion, the NYSDEC is requiring two tasks to be completed before the tank can be closed in place. 1) The NYSDEC requests that several additional holes be drilled in the sidewall of the buried tank to allow groundwater (and petroleum) to freely flow back into the tank. This liquid should be pumped out weekly for a period of 4-6 weeks. An inspection should be made of this liquid to determine what percentage is petroleum. 2) Two additional soil borings need to be drilled through the basement floor at a location approx 8 feet North of the buried tank and another 8 feet South of the buried tank down below the Groundwater level in the area. A soil sample should be taken at the Groundwater interface level and tested for VOC's and SVOC's per Methods 8260 & 8270. Based on the results of these two tasks, the NYSDEC may require additional work, or may close the case out and allow the existing tank to be closed in place. Please provide a short writeup of the results of this

investigation.Thanks,
SS*****
***** 10/26/2012 Sangesland spoke to David Chan at Riteway. He tried to take soil borings around the tank as requested. He hit refusal at about 6ft. He got minor "hits" on some VOCs. Slots were cut in the buried tank and they have pumped out several hundred gallons of water from the tank about 6 times over the last 1-2 months. Visual inspection of this water shows no oil. Riteway will return one more time to take a water sample and do a "sniff" test. If the sample smells at all, a sample will be sent to the lab.
*****11/27/2012
Sangesland spoke to David Chan at Riteway. He said they put slots in the existing buried tank and have pumped out groundwater from the tank several times over the last month. The water appears clean and there is no oil mixed in. Based on this information, DEC has approved closing the spill case and allowing the property owners to go ahead with closing this tank and constructing a new tank.
Remarks: test failure, no loss of product, tank has been pumped

color) mixed with approx. 40 gallons of water in vault V4466 located at 204 West 30 Street between 7th & 8th Ave. He was performing a vault inspection when he discovered the spill. This unknown substance or fluid was found mixed with the water in the concrete vault. Samples were taken by Bob Mahoney #97417 for PCB and Oil ID on a priority "E" basis. Samples will be taken to Astoria for analysis. Chain of Custody form will be delivered to site by the field supervisor. Initial cleanup action taken by placing absorbent pads down. UPDATE @ 18:26 hrs. Joe Cumberbatch, I&A Supervisor, reported at 15:36 hrs. that he arrived on location at 15:10 hrs. He also reported that Mr. Wong of the DEP left the site at 15:26 hrs. Mr. Cumberbatch inspected the vault and checked the capacity of the transformer, which he said was 362 gallons. The level was at 25 deg. C and apparently full. He stated that the unit would have to be pressure tested to verify no leaks. He inspected the vault and the oil level is good and there is no visual leaks. The substance appears to be cooking oil or restaurant waste. He also reported that the drain is clogged. Mr. Wong of the DEP observed that the drain was clogged. Prior PCB historical data indicates 9 ppm PCB. UPDATE 7/11/2001 @ 21:27 HRS Lab results for Lab Sequence # 01-07229-001, <1ppm PCB UPDATE 7/11/2001 @ 21:45 HRS Cleanup completed @ 20:30 HRS on 7/11/2001. Oil & water of approx 150 gallons picked up by Tanker and 1 bag of Industrial waste taken out. The structure was double washed and flushed using "Slix". The Environmental Tag # 20747 was removed. The Unit was pressure tested and found not to leak.

Remarks: found on 40 gals water. clean up pending

MAP FINDINGS

VAULT 5843, WEST 28TH ST / 156-60, MANHATTAN, NY (Continued)

FOD, reported to me that @ 01:15 HRS he discovered approx. 8 gallons of unknown oil and no water in V-5843. He was "shooting trouble" on feeder 13M45. Sewer/waterways cannot be determined to be affected, but there is a sump and according to Conduit plate 22-G-1 there is a connection through M-60881 which V-5483 has a connection to. There were no injuries related to this spill and weather conditions did not contribute to this spill. The source and cause of the spill are unknown at this time. No private property was affected. There is dielectric-filled feeder(s) in this structure. There were no substantial cracks observed in this structure. Two samples will be taken for PCB and ID. The Chain of Custody form used is # AA 27677. An Environmental Tag #33569 will be hung in the structure. No other cleanup action will be taken at this time. No standing except Trks loading/unloading Mon to Fri .6/25/2002 @ 02:06 HRS Notified CIG, spoke to McCarthy # 06416 @ 02:05 HRS 6/25/2002 & 03:30 HRS J Liguori # 14084. operating Supervisor of I&A south reported to me that he condemned the Unit in question because it would not hold pressure and removal will be pending. 6/25/2002 EPA # NYP 004 099 479 Transportation was faxed information and called to request an "OVER 50" tanker for partial cleanup and draining of Transformer in V-5843 on 6/25/02 @ 07:00 HRS 6/25/2002 06:34 OS Liguori I/A South reports additional adjacent vault 5661 13m49 will also be cleaned. The spill went through the weepholes into the adjacent vault. Mr. Liguori determined that no additional samples will be required as this came from the original spill for which samples have already been taken. Update: 06/25/02 Mr. Cumberbatch # 10660 Reports that at 11:25 hour's approx. 300 gallons of oil and water mixed was pumped into tanker from V-5843. Also reports that unit in V-5843 unit was drained and it was dry. (No oil in transformer) Total capacity of this unit is 396 gallons. He also reports that oil and water migrated via weep holes into adjacent V-5661, and down drain to V-1331 and out of sump, and into sewer. At 12:10 E/V desk was told that approx. 25 gallons went into sewer as per Mr. Cumberbatch. But after further investigation he reports that approx. 300 gallons went into sewer from V-1331. At 13:30 hours Mr. Cumberbatch informed Mr. Duke Of E.R.T of this information as well. As of 15:30 hours partial clean up has started in V-1331, next to be done will V-5661 also partial clean up. In

MAP FINDINGS

VAULT 5843, WEST 28TH ST / 156-60, MANHATTAN, NY (Continued)

V-5843 unit will have to be removed to do full clean up.6/25/02 19:54
J. Cumberbatch # 10660 I&A (cleanup) supervisor reptred that a tanker removed 200 gallons of water/oil mixture from the floor of vaults-5661, 1331. There was 4 drums of solid waste removed which contained oil soaked leaves and cleanup debris. A partial cleanup was done on these 2 vaults. They were doulde washed with riptide & rinsed with a flush truck. The reason being it was only a partial cleanup is that they can not get behind the units while they are in place. He is not sure when they will be able to remove the units to clean behind them because they are online. The cleanup crew was M Reiter # 27277, E. Mignone # 36975, M. Prystupa # 02394, J. Adorno # 19496, R. Ciulla # 8838906/27/02 03:47 E. Higgins # 18537 cable (cleanup) supervisor Reported that the cleanup was complete 100% at 03:15. All the debris was removed with the flush truck. The structure was double washed with slix & rinsed down with the flush truck. The cleanup crew was: J. Rotondi # 11602, G. Rosario # 11464, Platt # 13218.The spill tag # 33569 was removed.

burn heating system. So, tank will be abandoned and documentation will be sent to DEC.10.06.05 //Sharif- rec'd tank test failure report from Eastmond and Sons Boiler. The fillline and the return line failed. Apparently, oil leaked through the pipeline and contaminated the surrounding environment. Needs subsurface investigation around the tank. Tried to contact Mr. John Wellmann of Andrews Corp.212-529-5688* 276. He is on vacation. 12/21/05 Sharif//I spoke with Rene Lewis of EastMond. He said they pumped out the tank, cleaned it and later on they found oil water mix coming into the tank. So they installed a monitoring well to identify if any oil has escaped from the tank to the surrounding environment. They checked the well again and found only water coming into the well, a sample was taken from the well. Contaminated soil around the return line was removed and manifest will be sent to DEC along with closure report.03/15/06 Sharif Rahman- Rec'd waste disposal manifest, analytical result for the water sample from the well.VOC/SVOC non detect. Spill is closed.

message to return call to Vought. Vought received call back from and spoke to Milanese and tank is a 20,000-gallon #2 AST. Vought spoke to John and leak was dry leak and tank was emptied and potential source was removed. No visible signs of oil. Entire system failed test and failure was due to faulty manway gasket and gasket and inspected and possibly repaired and tank retested. Milanese will callback with owner info for TTF letter and PBS# as no PBS registration in database and building may have alternate address. Vought received callback from Milanese who noted that AST was in contact with the concrete as well and that the fillport was capped to prevent deliveries until repair is completed. Milanese also noted that site was registered under PBS #2-056227 and that mailing address on PBS Registration was correct address for owner. Spill assigned to DEC Demeo as site is TTF for PBS site. Vought prepared TTF letter with cc to East Coast for signature by Demeo and mailing address of letter was: Penn Tower, LLC 132 West 31st Street New York, NY 10001 Attn: Toby Tenenbaum Ph: (212) 564-1521 Demeo signed letter and Vought added to E-docs, sent to East Coast via Fax and original mail to Penn Tower. Spill assigned to DEC Demeo as TTF at PBS site.

REQUESTED UPON ARRIVAL AT SITE THE EXCAVATION REVEALED 8"+- OF PRODUCT IN THE DIRT EXCAVATION, THE FILL LINE WAS REMOVED, AND THE TANK WAS STILL IN SERVICE. THEY WERE TOLD TO CLEAN THE PETROLEUM, ISOLATE AND RETEST THE TANK, REMOVE FROM SERVICE IMMEDIATELY IF IT DID NOT TEST TIGHT. KEEP THE DEC APPRISED OF THE PROGRESS. 1/9/03 Roux env. cleaning tank to observe if there is any additional product.

wells have shown no product.// will update DEC when info is gathered 9/28/04 tipple called Josh Levine.... Clean wells soon, and I would like to witness the last baling next quarter. 10/20/05 - Raphael Ketani. I spoke to Joshua Levine at Roux (rooo) Associates ((631) 232-2600) regarding the site. He said Sierra Realty Management is the owner of the property. He said the UST was punctured repeatedly and used as a receptacle for collecting the oil and water. Once it was no longer usefue, it was abandoned in place with foam. A new AST was put in it's place. Mr. Levine will call me back regarding the status of the site. There is no PBS case for the site, even though they abandoned one tank and installed another. I will send them a letter instructing them to register the two tanks and close the abandoned one. 10/25/05 - Perry Parker of Sierra Realty called me today to tell me that the 10,000 gal. active tank had been registered and that the 11,200 gal. one had been closed. Mr. Parker sent me the paper work showing the tank closure and registration. The PBS case is #2-045187. 12/2/05 - Raphael Ketani. Joshua Levine called to say that the 11,200 gal. tank was abandoned in place and that the owners got a certificate from the FDNY. He wanted to set up a conference call with Perry Parker to discuss what contamination was found and where the owners go from here. He suggested 12/5 at 3 PM. I agreed. 12/5/05 - Raphael Ketani. I had the conference call with Joshua Levine and Perry Parker. Mr. Levine gave me a chronological run-down of how the remediation and oil recovery went since the inception of the spill. Mr. Levine mentioned that no product had been seen in the monitoring wells on 6/11/04 and 7/20/04. However, on 10/04 about a foot of product was found and bailed. On 12/04 Roux went back and bailed product. Mr. Levine added that on 11/11/05, about 30 inches of oil was found in well MW-2, which is at the location of the former UST. All of the other wells had been dry or didn't have product. I asked Mr. Levine how much product had been recovered. He said about 500

MAP FINDINGS

COMMERCIAL LOCATION, 875 6TH AV, MANHATTAN, NY (Continued)

gals. I told Mr. Levine a system or method has to be used to continue to recover product. He agreed and said he would send me a letter stating how they will recover the remainder of the oil and proceed with the method. 1/23/06 - Raphael Ketani. I called Mr. Levine regarding any progress in finding a redesign that will allow for more oil recovery. He said that they will redrill MW-2 and enlarge it from a 1" diam. well to a 2" diam. well. He said that Zebra Environmental will do the drilling on 1/27/06. 4/3/06 - Raphael Ketani. Today I received a progress report letter dated March 30, 2006, from Roux Associates, Inc. Several inches of #6 oil is still appearing in MW-2A and MW-5. They will try to recover more oil later. 03/21/07 - Spoke with Mr. Levine of Roux. I requested submission of the Final Spill Closure report to evaluate merits of spill closure Mr. Levine is requesting. V. Brevdo 02/01/08 - Mr. Lavine of Roux telephoned and advised that he is sending spill closure work plan and it is dated 02/01/08 which will describe hot spots soil excavation and free product recovery surrounding the closed in place 11,000 gallon No. 6 oil UST. VB08/21/08 Review of the Spill Closure Summary Report prepared by ROUX and dated July 21, 2008 indicates the following: The excavation and offsite disposal of localized petroleum impacted soil and free product adjacent to the abandoned 11,000-gallon No. 6 oil UST within the subbasement of 875 Sixth Avenue, Manhattan, New York has been completed. Excavation sidewall and bottom end-point samples were collected from two separate excavations. No soil samples exceeded the TAGM 4046 RSCOs for VOCs and only one SVOC, chrysene, was detected in excess of the RSCOs from three of the 10 end-point samples. A total of 45 drums of petroleum-impacted soil and rock was excavated and disposed of offsite as nonhazardous waste. In addition, seven drums of free product/water mixture were disposed offsite as non-hazardous waste. The excavations were backfilled with 6 cubic yards of clean offsite sand. Free-product has been removed to the extent practicable. No free product has returned to the two monitoring wells, MW-2A and MW-5, since the February 2008 excavation and restoration. There is no indication of offsite migration of free product since the historic spill was contained within the bedrock depression directly surrounding the UST. The post-remediation water sample collected from MW-2A contained no exceedances of the

AWQSGVs. This Spill Closure Report provides documentation of the remedial activities conducted to closeout NYSDEC spill number 0006542. On behalf of Sierra Realty, Roux Associates has requested closure of NYSDEC spill number 0006542. Based upon review of the Spill Closure Summary Report and taking into consideration aforementioned findings, I decided it is appropriate to close spill. Spill is closed on August 21, 2008 (VB)

Remarks: WILL AWAIT ACTION FROM DEC.

DEC Memo:	TTF Letter sent - copy in eDocsPiper spoke with PTC. They explained owner wants to do repairs on his own and doesn't want to remove contaminated soil.CSL needs to be sent along with tff. *****Anil-1204 Broadway LLC.22 west 32nd st. 10000112/01/08-Zhune. I received a letter from 1204, Broadway Manhattan LLC. Enclosed are the letter from Effective Plumbing Corporation, the tightness test results both the failed and the passed test, and the invoices for the work performed. They say in the letter that on 9/3/08 PTC performed test again and tank passed tightness test. Originally on 6/30/08 PTC performed tightnesss test and the tank failed the test, the serviceman gave us recommendation to change fill line lines, which we did. We hired Effective Plumbing Corporation and completed the required work as recommended. there was no contamination or any kind of spill.The letters from Effective Plumbing Corporation say pe our porpoasal we replaced the existing 2" vent line with 60 feet of 2" black pipe. We run the pipe from the tank up to the building side wall. We installed the 2" black pipe with all necessary couping and fittings.Per our proposal we removed the old oil line and replaced the remaining 3" oil fill line from the new pipe coonctions to the oil fill tank. We installed 40 feet of black pipe and (19)-3" fitting. Case Closed
Remarks:	Fill line connected to oil tank, as well as the feed line appear to be bad.

DOING PHASE I FOR THE PROPERTY OWNER.06/16/06: This spill is transferred from Mike Mulqueen to Mr. Koon Tang.3/10/2010 Sangesland received a letter from Anthony Lara from Riteway Tank (718-855-7272) He said he remembers this tank and what happened at the site.His letter (attached in eDocs) says the tank initially failed the tank test because the manhole gasket was damaged. Replacement of the gasket resulted in a passing tank test. No contamination was found. 2 years later (1997) this tank was removed and replaced with a new tank. No contamination was found during this period either. Spill closed.

RMP: Risk Management Plans

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

ERP: Environmental Restoration Program Listing

Standard Environmental Record Source: State and tribal Brownfields sites

Search Distance: 0.333 Mile

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

HIST SPILLS: SPILLS Database

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

2020 COR ACTION: 2020 Corrective Action Program List

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.25 Mile

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

EPA WATCH LIST: EPA WATCH LIST

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US BROWNFIELDS: A Listing of Brownfields Sites

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EDR MGP: EDR Proprietary Manufactured Gas Plants

Standard Environmental Record Source: Former manufactured Gas Plants

Search Distance: 0.333 Mile

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

Standard Environmental Record Source: Historical Gas Stations

Search Distance: 0.25 Mile

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

RECORD SOURCES AND CURRENCY

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW[®] Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW[®] Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

ATTACHMENT B
PHASE II REPORT

January 30, 2015

Mr. Daniel Moritz
Arker Companies
15 Verbena Avenue, Suite 100
Floral Park, New York, 11001

Re: **Phase II Subsurface Investigation Report**
211 West 28th Street, NY, NY 10001
Block 778, Lot No. 33

Dear Mr. Moritz:

Environmental Business Consultants (EBC) performed a Phase II Subsurface Investigation at the above referenced Site on January 26, 2015. The Phase II Subsurface Investigation was performed across the Site to determine if the subsurface had been negatively impacted by historic uses (printing operation and tool and die company) of the Site identified in a Phase I prepared by EBC in January 2015.

Property Description

The Site consists of one lot located on the north side of West 28th Street in the Chelsea Section of the Borough of Manhattan, City of New York, New York County, New York. The street address associated with the Site is 211 West 28th Street, New York, New York 10001 and is identified as Block 778 and Lot 33 on the New York City (NYC) Tax Map. The lot is rectangular with 24.87 feet of street frontage along West 28th Street, and extends to a depth of 98.75 feet, for a total area of 2,456 square feet.

Subsurface Investigation

The field work portion of the Phase II Subsurface Investigation was performed on January 26, 2015. The field work consisted of the installation of three soil borings (SB1-SB3) to a depth of four feet and three sub-slab soil vapor points (SS1-SS3) were installed across the Site. No ground water samples were collected to due access issues and depth to water is approximately 37 feet bgs.

Soil Borings

Three soil borings (SB1-SB3) were performed at the Site in the approximate locations shown on **Figure 2**.

Each location was sampled at the 0-2 foot interval utilizing a slap hammer after core drilling a hole in the concrete slab. Each location was then sampled at the 2-4 foot interval utilizing a stainless steel hand auger. Soil recovered from each boring was characterized by an experienced environmental technician and field screened for the presence of volatile organic compounds (VOCs) using a photo-ionization detector (PID). Two soil samples were retained from each soil boring location representing 0-2 and 2-4 feet below grade.

The soil samples were collected in pre-cleaned, laboratory supplied glassware, stored in a cooler with ice and delivered by laboratory dispatched courier to Phoenix Environmental Laboratories (Phoenix) of 587 East Middle Turnpike, Manchester, CT 06040, a New York State ELAP certified environmental laboratory (ELAP Certification No. 11301). Each soil samples were analyzed for volatile organic compounds (VOCs).

Soil characterized as a brown sandy historic fill material was encountered across the majority of the Site to a depth of approximately 2 feet below grade. The historic fill material layer was underlain by a native

grey silt. No physical or olfactory evidence of contamination was encountered within any of the soil borings. Soil boring logs are included in **Appendix A**.

Sub-Slab Soil Vapor Sampling

Three sub-slab soil vapor points (SS1-SS3) were installed by drilling a 0.5 inch diameter hole through the concrete slab using a hammer drill and drill bit at the locations shown on **Figure 2**. At each drilled location, a length of disposable polyethylene tubing was installed to a depth of approximately 2 to 3 inches below the concrete slab surface. The surface of the drilled hole was sealed with hydrated granular bentonite and a 1 foot square sheet of 2 mil HDPE plastic sheeting. Prior to sampling, each sampling location was tested to ensure a proper surface seal had been obtained. In accordance with NYSDOH guidance (NYSDOH Guidance for Evaluating Soil Vapor Intrusion in the State of New York, February 2005), a tracer gas (helium) was used as a quality assurance/quality control device to verify the integrity of the sampling point seal prior to collecting the samples.

Following verification that the surface seal was tight, one to three volumes (i.e., the volume of the sample probe and tube) of air was purged from the implant using a calibrated vacuum pump. After purging, a 6-liter Summa® canister, fitted with a 2-hour flow regulator, was attached to the surface tube of each of the six vapor implants. Prior to initiating sample collection, sample identification, canister number, date and start time were recorded on tags attached to each canister and in a bound field note book and sample log sheet (**Appendix D**). Sampling then proceeded by fully opening the flow control valve on each canister in turn. Immediately after opening the flow control valve on a canister, the initial vacuum (inches of mercury) was recorded in the field book and on the sample tag. When the vacuum level in the canister was between 5 and 9 inches of mercury (approx 2 hours), the flow controller valve was closed, and the final vacuum recorded in the field notebook and on the sample tag.

Sample Handling and Analysis

Collected samples were appropriately packaged, placed in coolers and shipped via laboratory dispatched courier for delivery to Phoenix Environmental Laboratories (Phoenix) of 587 East Middle Turnpike, Manchester, CT 06040, a New York State ELAP certified environmental laboratory (ELAP Certification No. 11301). Each soil sample was analyzed for volatile organic compounds (VOCs) by USEPA method 8260. The three soil vapor samples were analyzed for VOCs by USEPA method TO-15.

Results

Soil

Soil sample results are compared to compared to NYSDEC Part 375 Table 375-6.8(a) and (b) Soil Cleanup Objectives (SCOs) for Unrestricted Use and Restricted Residential Use on **Table 1**. A copy of the laboratory analytical report is included in **Appendix A**.

No VOCs were detected in any of the soil samples at a concentration above Unrestricted Use SCOs. However, the chlorinated VOC tetrachloroethene (PCE) (maximum of 2.2 ppb) was detected in two of the 2-4 foot interval soil samples at a concentration well below Unrestricted Use SCOs.

Soil Vapor

The laboratory results are summarized and compared New York State Department of Health (NYSDOH) Final Guidance on Soil Vapor Intrusion (October 2006) Matrix 1 and Matrix 2 values on **Table 2**. A copy of the laboratory analytical report is provided in **Appendix B**.

Soil vapor samples indicated petroleum related VOCs were present at low concentrations. Petroleum-related VOCs (BTEX) were detected at a maximum concentration of 40.29 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$). The chlorinated VOC tetrachloroethene (PCE) was detected in all three soil gas samples ranging in concentration from 0.43 $\mu\text{g}/\text{m}^3$ to 1.09 $\mu\text{g}/\text{m}^3$. Trichloroethene (TCE) was detected in one of the three soil vapor samples at 0.32 $\mu\text{g}/\text{m}^3$ (SG1). Carbon tetrachloride was detected within three of the three soil vapor samples (max of 0.05 to 0.07 $\mu\text{g}/\text{m}^3$) and 1,1,1-trichloroethane (TCA) was not detected in any of the soil vapor samples. All chlorinated VOC concentrations are below the monitoring level ranges established within the NYSDOH Final Guidance on Soil Vapor Intrusion.

Conclusions

Soil at the Site consists of a layer of historic fill material that was found across the majority of the Site to extend to a depth of approximately 2 feet below grade. No VOCs above Unrestricted Use SCOs were detected in any of the soil samples. Soil vapor samples indicated petroleum related VOCs were present at low concentrations. All chlorinated VOC concentrations in soil gas samples were below the monitoring level ranges established within the NYSDOH Final Guidance on Soil Vapor Intrusion. Based on the results, historical operations of a tool and die facility and printing facility have not impacted the sub-surface.

The Site has been assigned an E-designation (E-137) for Hazmat and Noise as part of the Hudson Yards rezoning completed by the City in January 2005 (CEQR 03DCP031M). An E-designation does not interfere with the present use of the Site; however E-designations do prevent the release of building permits subject to a detailed environmental review and release by the NYC Office of Environmental Remediation. Such release may require a full subsurface investigation, remedial and health and safety planning, implementation of a remedial program and documentation that the remedial program was completed during redevelopment of the property. Submission of a Remedial Investigation Report and a Remedial Action Work Plan documenting the procedures for proper handling and off-Site disposal of the historic fill material will be required by the New York City Office of Environmental Remediation prior to obtaining building permits from the New York City Department of Buildings.

The Noise E requires that any new building constructed on the property include a window wall system which will achieve a noise attenuation of 35 dBA to maintain a maximum interior noise level of 45 dBA. An alternate means of ventilation such as through the wall or central air conditioning will also be required to maintain a closed window condition. Satisfaction of the Noise E requires the submission of a Noise Remedial Action Plan and an Installation Report certified by a Professional Engineer or Registered Architect.

Please call if you have any questions or would like to discuss the project further.

Very truly yours,

Environmental Business Consultants

Chawinie Reilly
Project Manager / Industrial Hygienist

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

I attest that all media released by Phoenix Environmental Laboratories, Inc. have been received in good working condition and agree to the terms and conditions as listed on the back of this document.

Thursday, January 29, 2015

Attn: Mr. Charles B. Sosik, P.G.
Environmental Business Consultants
1808 Middle Country Rd
Ridge NY 11961-2406

Project ID: 211 W 28TH ST NY
Sample ID#s: BH67403 - BH67408

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

Comments:

This sample was not collected in accordance with EPA method 5035. NELAC requires the laboratory to qualify the volatile soil data as biased low.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

Comments:

This sample was not collected in accordance with EPA method 5035. NELAC requires the laboratory to qualify the volatile soil data as biased low.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

This report must not be reproduced except in full as defined by the attached chain of custody.

Comments:

This sample was not collected in accordance with EPA method 5035. NELAC requires the laboratory to qualify the volatile soil data as biased low.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

I attest that all media released by Phoenix Environmental Laboratories, Inc. have been received in good working condition and agree to the terms and conditions as listed on the back of this document.

Wednesday, February 11, 2015

Attn: Mr. Charles B. Sosik, P.G.
Environmental Business Consultants
1808 Middle Country Rd
Ridge NY 11961-2406

Project ID: 211 WEST 28TH ST NY
Sample ID#s: BH69266 - BH69271

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.
 B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected
 BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

Comments:

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

Pesticide Comment:

Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.
 B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected
 BRL=Below Reporting Level LOD=Limit of Detection MDL=Method Detection Limit

Comments:

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

Pesticide Comment:

Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.
 B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected
 BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

Comments:

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

Pesticide Comment:

Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.
 This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.
 B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected
 BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

Comments:

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.
 This report must not be reproduced except in full as defined by the attached chain of custody.

 BRL=Below Reporting Level LOD=Limit of Detection MDL=Method Detection Limit

Comments:

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.
 This report must not be reproduced except in full as defined by the attached chain of custody.

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

Enclosed are revised Analysis Report pages. Please replace and discard the original pages. If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

Comments:

This sample was not collected in accordance with EPA method 5035. NELAC requires the laboratory to qualify the volatile soil data as biased low.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

Comments:

This sample was not collected in accordance with EPA method 5035. NELAC requires the laboratory to qualify the volatile soil data as biased low.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.
 B* = Present in blank, a bias is possible.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected
 BRL=Below Reporting Level J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit

Comments:

This sample was not collected in accordance with EPA method 5035. NELAC requires the laboratory to qualify the volatile soil data as biased low.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

This report must not be reproduced except in full as defined by the attached chain of custody.

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.
