 DEC Remarks: DEC Sigona sent letter to GRL Property investors on 11/26/99 requesting that
 the leaking vent pipe be capped and the existing 1 inch vent line be replaced
 with a properly si ed vent pipe to the front of the building. In addition, the
 DEC will request that another precision tightness test be performed to confirm
 that there is no leak in the system.
 Spill Cause: DEC Sigona requested that tank testor report this spill to hotline

pipng runs and remote fills. One groundwater sample was collected. Active construction going on. Endpoint samples did show TAGM exceedences. Site is DEP E site and vapor barrier will be installed. Groundwater at 12' below grade. Groundwater samples were below TOGS and therefore no passiveventilation system. Site will be excavated down to bedrock over most of site. Minor PAH exceedences attributable to fill material. One soil sample had 63000ppb naphthalene. Additional soil excavation required at area of excavation. After excavation for foundation is complete sidewall samples and bottom groundwater samples will be collected. Dewatering will occur for building construction. Groundwater samples show minor PAH and MTBE exceedence. See also spills 0506800, 0507015. Two additional 550-gallon USTs discovered. DEC requires: soil endpoint samples and groundwater samples upon reaching limits of excavation for foundation. 10/18/05-Vought-Site visit by Vought on 10/14/05. Onsite was Jessica Ferngrem(Gannett Fleming) and Jerome Kung (Verizon 646-483-6554). Also on site were owners of 607 West 47th Street (Felix Guralnik) See also spill #. Free product coming from under 607 West 47th Street and flowing into groundwater in excavcation of adjacent Verizon site. Site visit to 607 West 47th street showed waste oil tanks in very poor condition and numerous puddles of waste oil on garage floor. DEC required Verizon: 1)collection of one endpoint soil sample from sidewall under 607 West 47th st 2)submission of analyticals of free product sample 3)regular interrmittent sampling of dewatering effluent as remedial method 4)submission of PBS registration. NYCDEP discharge permit obtained by Verizon. Vought called Joel Rogers and left message that he will be faxeda copy of the letter. Vought also faxed copy to Ferngrem and emailed to Kung. 11/28/05-Vought-Received message from Rogers that hydraulic line ruptured. Vought returned call and line broke from construction equipment. Spill on perched water onbedrock and will be cleaned using adsorbent pads and boom. No further action on this minor spill required. 05/05/06-Vought-See also closed spill #0507015 at same location. 05/17/06-Vought-Spill transferred from DEC Vought to DEC Ketani as perDEC Austin. 6/22/06 - Raphael Ketani. I spoke to Ms. Jessica Ferngrem ((516) 669-1504)of Gannett Fleming. She said they are almost ready to send DEC the closure report. She said that the wall of the neighboring building was waterproofed. [This spill is downgradient from a garage (605 W. 47 St.) with 2 waste oil tanks and sloppy housekeeping.] 7/10/06 - Raphael Ketani. I spoke to Ms. Ferngrem. She said the closure report will probably be sent in August. Right now it is being reviewed by the client. 8/17/06 - Raphael Ketani. I tried to reach Ms. Ferngrem, but could only leave a voice mail. 9/6/06 - Raphael Ketani. Ms. Ferngrem left me a message requesting my mailing address. I sent her a message back with the correct address. 9/15/06 - Raphael Ketani. The following tanks were removed from the site: 3000 gal., 5000 gal., five 550 gal., and a 275 gal. However, there are no PBS records or registrations for the site. I finished reviewing the September 2006 UndergroundStorage Tank and Spill Closure Report. There were moderate to extremely high concentrations of SVOCs at some of the boring locations. Most of these locations are associated with tanks that have been removed or their piping,though a few are not. 9/18/06 - Raphael Ketani. I spoke to Ms. Ferngrem about the need to register the tanks and about the very high SVOC concentrations at some of the former tank locations. She said that the soils at the tank locations looked clean, but staff in her office couldn't figure out why the results were so high. She just figures there was urban fill mixed in. I told her that these high sites were at the former locations of the tanks. She said that the soil looked clean and that all of the soil was removedanyway and delivered to a facility that takes very contaminated soil. She said she will send in a PBS registration form. 9/20/06 - Raphael Ketani. Nick Lombardo of the PBS Unit came over to me to discuss the PBS registration for the site. He said that Ms. Ferngrem had told him that the site

Map ID
 Direction
 Distance
 Distance (ft.)
 Elevation Site

MAP FINDINGS

Database(s) EDR ID Number
 EPA ID Number

CONSTRUCTION SITE (Continued)

S107410446

is registered. He showed me a PBS registration for the neighboring property, 610-630 W. 48 Street. He said that Ms. Ferngren told him this was the same property as the new owners had combined both 617-623 and 610-630, and planned to build on both. The registration for 610-630 is #2-344818 and shows all of the tanks listed in the September 2006 Underground Storage Tank and Spill Closure Report as closed and removed, and even lists other tanks not indicated in the report for 617-623. I spoke to Ms. Ferngren and told her DEC would prefer that the form list 617-623 as this is where the majority of the tanks came from. She asked whether both addresses can be listed on the registration form. I spoke to Mr. Lombardo and he said that she should get Verizon to submit a letter to DEC requesting that both addresses be listed. I relayed the message to Ms. Ferngren. She agreed to do this. Based upon the Underground Storage Tank and Spill Closure Report and the PBS registration #2-344818, I am closing the spill case. END DECRemark - 0506652

DEC Remarks: On March 12, 2001, DEC Sigona called David Nickerson and requested a copy of the report left Message on voice mail). On June 5, 2001, DEC Sigona received the results of soil investigation for tank installation, dated June 1, 2001. DEC s comments regarding the results of a site investigation performed by Parsons Engineering Science, Inc. PES) at the above referenced site. The results of the investigation report, dated June 1, 2001 reveal the presence of petroleum contamination which exceed recommended cleanup levels in the DEC s Technical Administrative Guidance Memorandum TAGM) Determination of Soil Cleanup Objectives and Cleanup Level s, dated January 24, 1994. The results of laboratory analysis for soil collected from test borings Nos. SB-1,

Map ID

Database(s)
EDR ID Number
EPA ID Number

GREYHOUND FACILITY (Continued)

S103941004

SB-2, SB-4, SB-5 and SB-6 all exceed the level recommended for the cleanup of semi-volatile petroleum contamination. The level of volatile petroleum compounds evident in the soil sample collected from soil boring No. SB-3 exceed the cleanup level of all tentatively identified compounds, which cannot exceed 10 ppm. The level of p-Isopropyl toluene found in the soil sample was detected at 11 ppm. However, the laboratory reported a detection limit for benzene and MTBE at 0.94 ppm and 19.0 ppm respectively, which exceed the required detection limit acceptable to this Department. The levels of petroleum vapors recorded by field soil testing ranged from non-detectable to as high as 1140 ppm in soil boring No. SB-3. The PES investigation did not include the installation of groundwater monitoring wells or collection of any groundwater samples. The depth of the soil borings ranged from 3 feet to 10 feet below grade and indicated the presence of materials, including, wet fill material, concrete, gravel, sand and refusal. A Geoprobe™ drill was used to collect the samples and was unable to penetrate some of the refusal at the site. The DEC recognized that the PBS facility was being upgraded to replace two aboveground 2,000 gallon diesel storage tank and piping systems with two new 6,000 gallon aboveground tanks. Moreover, the existing tanks passed inspections and tests for tightness following the closure and removal activities, and did not appear to be a direct source of the contamination. Rather, the consultant suggests that the contamination was likely the result of background contamination from historic fill material placed on the site. While this may provide a plausible explanation for the elevated levels of semi-volatile petroleum hydrocarbons or Polynuclear Aromatic Hydrocarbons (PAHs), it does not explain why there were elevated levels of volatile organic compounds (VOCs). The DEC is concerned that the presence of these VOCs may be the result of gasoline or diesel fuel spills on the parking lot area. Based upon these results the baseline site assessment performed, DEC requires additional investigatory and remedial actions pursuant to the requirements of 6 NYCRR Part 611 and Article 12 of the NYS Navigation Law. All areas with elevated VOC contaminated soils must be remediated. In this regard, GL has at least two options, A and B, as follows: A) If GL chooses to further assess the extent of petroleum contamination prior to remediation, then you must sample soils and/or groundwater around and below the boring sample location SB-3. The assessment must conform to DEC's Spill Prevention Operations Technology Series SPOTS 14) Site Assessments at Bulk Storage Facilities, dated August 1, 1994. B) If GL chooses to remediate the petroleum contamination prior to assessment, then you must excavate site soils around boring sample location SB-3. GL must then collect and analyze endpoint soil and samples below and/or groundwater around the excavation every 15- 20 linear feet, in accordance sampling guidelines referenced in DEC's SPOTS 14. In either event, GL should evaluate the quality of soils that are immediately surrounding the former boring location SB-3 for compliance with TAGM) Determination of Soil Cleanup Objectives and Cleanup Levels, dated January 24, 1994. GL should be advised to further document the nature of the fill material throughout the upper ten feet layer of the property, referenced by PES. All of the petroleum contaminated soils must be excavated and disposed off-site in accordance with 6 NYCRR Part 364. Polynuclear Aromatic Hydrocarbons (PAHs) - The report notes the presence of PAHs. We concur that these chemicals appear to be from fill material previously brought to the site. The concentration of PAHs in the various samples taken at the site have not been demonstrated to be hazardous waste. It is suggested that you maintain a two-foot thick cover of clean soil or an equivalent protective layer of concrete or asphalt be placed on all areas where soils exceeded TAGM levels for PAHs at the Site. Wherever surface soils exist, you should place a clean 2 foot layer of soil. Any material brought to the site should not be a material that would be considered a regulated solid waste under 6 NYCRR Part 360. Any clean soil cover which is placed on the site

S103941004

should be properly landscaped to effect soil erosion control. This would effectively provide a protective layer to further eliminate the possible risk to human health from any subsurface soils that do not meet TAGM soil cleanup levels. GL must implement the required remedial actions to address the VOC contamination, and submit the results of the required confirmatory laboratory testing referenced in item No. 1, by April 1, 2002. In addition, GL should include a description of any additional actions taken to prevent possible exposure to PAHs in the subsurface soils at this site.

Remark: Caller was calling for greyhound they got the results back in december and found petroleum constituents in the soil. call the complaint.

EPA Waste Codes Addendum

Code	Description
D001	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
D008	LEAD

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/20/2007	Source: EPA
Date Data Arrived at EDR: 05/03/2007	Telephone: N/A
Date Made Active in Reports: 07/05/2007	Last EDR Contact: 05/03/2007
Number of Days to Update: 63	Next Scheduled EDR Contact: 07/30/2007
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/20/2007	Source: EPA
Date Data Arrived at EDR: 05/03/2007	Telephone: N/A
Date Made Active in Reports: 07/05/2007	Last EDR Contact: 05/03/2007
Number of Days to Update: 63	Next Scheduled EDR Contact: 07/30/2007
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/20/2007	Source: EPA

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

Number of Days to Update: 56	Next Scheduled EDR Contact: 08/20/2007
	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/27/2007	Source: EPA
Date Data Arrived at EDR: 03/21/2007	Telephone: 703-412-9810

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 03/21/2007	Source: EPA
Date Data Arrived at EDR: 04/27/2007	Telephone: 703-412-9810

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/14/2007	Source: EPA
Date Data Arrived at EDR: 03/20/2007	Telephone: 800-424-9346
Date Made Active in Reports: 04/27/2007	Last EDR Contact: 06/04/2007
Number of Days to Update: 38	Next Scheduled EDR Contact: 09/03/2007
	Data Release Frequency: Quarterly

RCRA: Resource Conservation and Recovery Act Information

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/13/2006	Source: EPA
Date Data Arrived at EDR: 06/28/2006	Telephone: (212) 637-3660

	Data Release Frequency: Varies

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients--States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 04/04/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/04/2007	Telephone: 202-566-2777

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 12/31/2005	Source: Department of Energy
Date Data Arrived at EDR: 11/08/2006	Telephone: 505-845-0011

ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 02/21/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/03/2007	Telephone: 202-564-5088
Date Made Active in Reports: 05/14/2007	Last EDR Contact: 06/22/2007
Number of Days to Update: 41	Next Scheduled EDR Contact: 07/16/2007
	Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 06/15/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 09/17/2007
	Data Release Frequency: No Update Planned

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

STATE AND LOCAL RECORDS

NY HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

NJ SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

NJ ISRA: ISRA Database

The ISRA process begins with determining if the Act applies to your type of business and transaction. The provisions of ISRA only apply to industrial establishments. What is an industrial establishment? The term "industrial establishment" refers to the type of business operations and transactions that would subject a facility to review under ISRA.

An industrial establishment must meet each of the following three criteria: The place of business or real property at which such business is conducted, having a North American Industry Classification System (NAICS) code listed in N.J.A.C. 7:26 B - Appendix C subject to the specified exceptions and limitations. The place of business must have been engaged in operations on or after December 31, 1983; and The place of business must involve the generation, manufacture, refining, transportation, treatment, storage, handling, or disposal of hazardous substances or hazardous wastes.

NY RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

NJ HWS RE-EVAL: Site Re-Evaluation Report

The locations were removed from the Known Contaminated Sites list for a variety of reasons. Some of the sites were taken off the list because they were inactive, some were not assigned a case worker and some were no longer contaminated. Inspectors from the DEP are now undertaking a full re-evaluation of each of the locations statewide. That includes visual and environmental tests to see whether contamination still exists.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Historical Auto Stations: EDR Proprietary Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Proposal No. 07-51048
June 13, 2007

Mr. Andrew Bank
Senior Vice President
Twining Properties
535 Fifth Avenue
New York, NY 10017

**Re: Environmental Site Assessment Services
509 west 38th Street
New York, New York**

Dear Mr. Bank:

LandAmerica Assessment Corporation (LAC) is pleased to present this proposed scope of work and quotation for Environmental Site Assessment Services for the above referenced project.

QUALIFICATIONS

LandAmerica Assessment Corporation (LAC) is a full service real estate due diligence firm specializing in property condition assessments, construction and environmental assessments associated with commercial real estate acquisition, finance and surveillance.

As a national provider of real estate assessment services, **with over 500 environmental and engineering professionals in 47 states**, LAC is relied upon by numerous institutional lenders, mortgage bankers and real estate investment trusts throughout the country to provide environmental site assessments (ESA), physical condition assessments (PCA), and probable maximum loss (PML) evaluations as part of due diligence. In addition, LAC provides construction progress monitoring services nationwide. LAC's clients have come to expect more than just timely, cost effective, quality services. LAC becomes part of our client's team.

LAC offers the highest level of professional experience available today in the assessment industry. Our Professionals average 10 years of hands-on experience conducting in depth evaluations of physical and environmental risk associated with real property. At LAC, our senior professionals don't just review the reports; they personally perform every step of the assessment process. We believe the accuracy of the data collected from on-site inspections and regulatory reviews is the foundation of our conclusions and your business decisions.

SCOPE OF SERVICES

It is our understanding that Twining Properties is requesting an Environmental Site Assessment (ESA) for the New York, New York property. LAC proposes to perform an ESA in general accordance with ASTM Standard E1527-05, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and the All Appropriate Inquiry (AAI) Rule (40 CFR Part 312). Provided below is a summary of the scope of work proposed.

Proposal No. 07-51048

The Phase I Environmental Site Assessment will consist of the following components.

Historical Research

A historical search of previous uses of the subject property will be performed. This may include a review of Sanborn Fire Insurance Maps, city directories, historic topographic maps, construction permits, and planning and zoning department files. If available, aerial photographs may be obtained from public or private sources. Aerial photographs provide additional information on the sequential development of the site and its use over time. This also facilitates the evaluation of how areas now covered by buildings and parking lots were used in the past.

Regulatory Record Search

Areas of environmental concern in the immediate vicinity of the subject property, as well as potential conditions on the subject property will be evaluated to assess the potential existence for subsurface contamination that may impact the subject properties. This will be accomplished by reviewing available federal, state and local regulatory agency databases. The search distances will be consistent with the ASTM Standard E1527-05. In addition, the local and county health departments will also be contacted regarding potential concerns in the immediate vicinity of the subject property.

Property Visit

A property visit will be performed consisting of a reconnaissance of the property. The purpose of this property visit is to make observations of existing property conditions, activities and type of land use. The property visit will include interviews with the property owner, property manager, maintenance personnel and tenants, if available. The property visit will evaluate areas of potential environmental concern, such as soil staining, chemical storage areas, underground storage tanks, and similar concerns.

Preliminary Asbestos Evaluation

Efforts will be made to identify the presence of the most obvious and common ACM. The potential for the presence of friable ACM will be evaluated based on the age of the improvements, dates of renovation and other relevant information. Appendix G of the USEPA Guidance Document: *Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials* (the Green Book) will be used as a guide in identifying suspect materials. It should be noted that asbestos may still be utilized in some non-friable products, such as sheet vinyl flooring, vinyl floor tiles, floor tile mastic, joint compound, asbestos-cement board and roofing materials, as these materials may still be manufactured and installed in the United States. This preliminary evaluation is not designed to comply with the survey requirements of the Asbestos Hazard Emergency Response Act (AHERA), 40 Code of Federal Regulations (CFR) Part 763, National Emission Standard for Hazardous Air Pollutants (NESHAP) 40 CFR 61, Occupational Safety and Health Administration (OSHA) 29 CFR Part 1926.1101, or other local, state or federal regulations, but has been conducted per accepted industry practices to satisfy the scope of work of the rating agencies and/or lenders.

Radon, Lead Based Paint, Wetlands and Flood Zones

LAC will evaluate the potential for elevated radon concentrations in the subject buildings based on the state or EPA rating of the area in which the subject property is located and an evaluation of the building construction. Radon sampling is not included in this scope of work. The potential for lead based paint will be evaluated based on the age of the subject buildings and the condition of the material will be documented in

Proposal No. 07-51048

the report. A document review will be performed to evaluate potential wetlands and flood zones at the subject property. Potential wetland areas or flood zones will be discussed in the report. Please note that wetland delineation is not part of this scope of work and only potential wetland areas or areas documented on wetland inventory maps will be discussed.

Area Reconnaissance

A visual survey of adjacent and nearby properties will be conducted to determine the potential that current or prior off-property activities may result in an environmental impact.

Geologic and Hydrogeologic Conditions

A characterization will be made of the subject property and the regional geologic and hydrogeologic conditions. This will be accomplished by a review of published geologic and hydrogeologic information, USGS topographic maps, USDA soil surveys, and other available information.

ESA Report

This ESA will be conducted to identify, to the extent feasible, recognized environmental conditions in connection with the Property.

This assessment will be performed in general accordance with ASTM Standard E1527-05, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and the All Appropriate Inquiry (AAI) Rule (40 CFR Part 312). As defined by AAI, the *User* (Twining Properties) of the report bears certain responsibilities to qualify for CERCLA liability protection. Twining Properties must provide LAC with the following information. This information will be requested in a *User Questionnaire* provided at the time of engagement. Failure to return the attached *User Questionnaire* to LAC may compromise liability protection.

1. Searches for recorded environmental cleanup liens, deed restrictions and use limitations recorded on the property.
2. Consideration of "specialized knowledge" of the subject property and adjoining properties
3. Consideration of the relationship of the purchase price to the value of the property, if not contaminated.

A report will be prepared for the property summarizing the information and data obtained during the assessment for the subject property. Should the results of the studies reveal evidence for the potential for environmental concerns; a recommendation will be made for additional investigation activities. Photographs will be taken during the property visit to document field conditions on the day of the property visit. The findings of this report will be proprietary and will not be released without client permission.

FEES

LAC proposes to perform the above services for a Lump Sum of
of receipt of invoice.

Payment is due within 30 days

SCHEDULE

LAC will provide a draft copy of the reports within 15 business days of the signed proposal.

Proposal No. 07-51048

ASSUMPTIONS

- You will arrange for access on the Property for LAC personnel.
- You will complete and return the *User Questionnaire*.
- You will facilitate the completion prior to the site visit of a Document Request and Disclosure form by a person with knowledge of the Property.
- You will arrange for a person knowledgeable about the Property and its operations to accompany LAC personnel and arrange for safe access to the roof and interior areas.

TERMS AND CONDITIONS

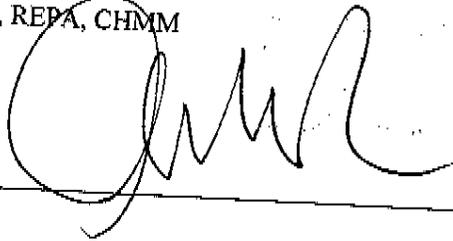

All services will be performed pursuant to this proposal and LAC's Standard Terms and Conditions. If you would like to authorize LAC to proceed with the scope of services, please sign this proposal and return via fax to me at 732-942-2911.

On behalf of LAC, I would like to thank you for the opportunity to provide this proposal for assessment services. Please do not hesitate to call me at 732-942-6200 if you have any questions.

Very truly yours,

LANDAMERICA ASSESSMENT CORPORATION

Eugene A. Belli
 Eugene A. Belli, REPA, CHMM

LANDAMERICA ASSESSMENT CORPORATION

TERMS AND CONDITIONS FOR STANDARD CONSULTING SERVICES AGREEMENT

A. ENTIRE AGREEMENT. This Agreement is the offer of LandAmerica Assessment Corporation (LAC) to perform the consulting services described in the section of the Proposal entitled Scope of Work, and subsequent work as authorized by change orders to the Proposal, under the terms and conditions expressed herein. The Proposal number of the Proposal referenced in this Agreement is provided at the end of this Agreement. By signing this agreement, the Client accepts the terms and conditions of the Agreement as written herein, and authorizes LAC to proceed. This Agreement supersedes all prior proposals or negotiations not referenced herein between the parties and are expressly conditional upon the Client's agreement to the terms and conditions of this Agreement. These terms and conditions will apply to any contract or purchase order document issued by the Client for these services, whether or not it is expressly incorporated. Any inconsistencies between any term hereof and any term set forth in any contract or purchase order issued by the Client shall be resolved in favor of the terms and conditions hereof. This Agreement may not be modified except in writing, and agreement to any modification must be indicated by the signature of both parties.

B. SERVICES TO BE PERFORMED. The services to be performed are described in the section of the Proposal entitled Scope of Work. Except as specified elsewhere herein, LAC shall furnish all technical and professional services, including labor, material, supplies, equipment, transportation, accommodation, subsistence and supervision of LAC personnel, to perform all tasks set forth in the Scope of Work within the target schedules. In providing these services, LAC is an independent contractor and all persons employed in connection herewith shall be LAC's employees and not employees of the Client.

C. COMPENSATION. Charges for professional services shall be invoiced and paid in accordance with the Lump Sum Price or the Fee Schedule contained in the Proposal.

D. INVOICING AND PAYMENT. Invoices for LAC's services shall be submitted to Client at time of report delivery. Payment shall be made within thirty (30) days of presentation of the invoice. Payments made after thirty (30) days shall be subject to a charge equal to one and one-half percent (1 1/2%) per month (as limited by state law) in addition to the invoice amount. Should any invoice be in dispute, only that portion of the invoice in dispute may be held in abeyance until the dispute is resolved. LAC reserves the right to suspend or terminate service upon reasonable notice for the non-payment of invoices.

E. CONFIDENTIALITY. LAC agrees that it will not publish or make known to others results or information obtained from the performance of these services without approval in writing from the Client except as required by federal, state and local laws or judicial or government orders concerning the reporting of potential dangers to public agencies. LAC shall have no liability to Client or any third party for notifications or reports made in accordance with such laws or orders and Client shall defend, indemnify and hold LAC from and against any and all claims, demands, liabilities and expenses, including reasonable attorney's fees, incurred by LAC in connection with such notifications or reports.

F. INDEMNIFICATION. LAC agrees, to the fullest extent permitted by law, to indemnify and hold the Client harmless from any damage, liability or cost (including reasonable attorney's fees and costs of defense) to the extent caused by LAC's negligent acts, errors or omissions in the performance of professional services under this Agreement and those of his or her subconsultants or anyone for whom LAC is legally liable.

The Client agrees, to the fullest extent permitted by law, to indemnify and hold LAC harmless from any damage, liability or cost (including reasonable attorney's fees and costs of defense) to the extent caused by the Client's negligent acts, errors or omissions and those of his or her contractors, subcontractors or anyone for whom the Client is legally liable and arising from the project that is the subject of this Agreement.

To the maximum extent permitted by law, the Client agrees to limit LAC's liability for the Client's damages to the sum of \$50,000 or LAC's fee whichever is greater. This limitation shall apply regardless of the cause of action or legal theory pled or asserted.

G. ASBESTOS AND LEAD INVESTIGATIONS. The client acknowledges that the act of sampling suspect asbestos or lead-containing building materials may affect, alter or damage the mechanical equipment and/or building components at, in or upon the site. LAC shall not be liable for any effect, alteration or damage arising out of the act of sampling. LAC will exercise reasonable efforts to limit damage to the Site. The cost of restoration of the Site because of any such damage has not been calculated or included in LAC's fees.

H. SAMPLES. LAC may discard all soil, rock, water, asbestos, and other samples sixty (60) days after receipt of sample or at the expiration of the holding time of the test method employed. Client may request, in writing, that any such samples be retained beyond such date, and in such case LAC will ship such samples to the location designated by Client, at Client's expense. LAC may, upon written request, arrange for storage of samples at LAC's offices, at mutually agreed storage charges. This is the only notice of intention to discard samples that will be given.

I. TERMINATION. This Agreement may be terminated at any time by mutual consent or by notice by either party in writing. In the event of termination for any reason prior to completion of the assignment, LAC reserves the right to complete such analyses and records as are necessary to place its files in order and, where considered by LAC as necessary to protect its professional reputation, to complete a report on the work performed to date. A termination charge to cover the cost hereof shall be made. In addition, the Client shall compensate LAC for all work performed prior to such termination in accordance with the Fee Schedule in the Proposal.

J. DISPUTES AND ARBITRATION. Any controversy or claim arising out of, or related to, this Agreement, the breach thereof, or the coverage of this arbitration provision shall be settled by arbitration which shall be conducted in the state of California in accordance with the Commercial Arbitration rules of the American Arbitration Association as such rules shall be in effect on the date of delivery of demand for arbitration. The arbitration of such issues, including the determination of the amount of any damages suffered by either party hereto by reason of the acts or omissions of the other, shall be to the exclusion of any court of law except for enforcement of an arbitrated award. The decision of the arbitrators, or a majority of them, shall be final and binding on both parties and their respective successors and assigns. Each party shall pay the fees of its own attorneys, and the expenses of its witnesses and all other expenses connected with the presentation of its case. The costs of the arbitration, including the cost of the record or transcripts thereof, if any, administrative fees, fees of the arbitrators, and all other fees and cost shall be borne as determined by the arbitrators.

K. APPLICABLE LAW. This Agreement and any contract or purchase order issued by Client accepting this offer shall be governed by, subject to, and construed in accordance with the laws of the state of California. Client has read this Agreement, understands it, and agrees to be bound by its terms.

L. NON-WAIVER. The failure of either party to exercise any right or remedy hereunder or to take any action permitted on a breach by the other party shall not be deemed a waiver of such right or remedy or of any other rights or subsequent breach of a like or different nature.

M. SEVERABILITY. The provisions of this Agreement are severable. The invalidity of any part of this Agreement shall not invalidate the remainder of the Agreement or the remainder of any portion hereof.

EDR City Directory Abstract

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening report designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. SUMMARY

- ***City Directories:***

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2000. (These years are not necessarily inclusive.) A summary of the information obtained is provided in the text of this report.

This report compiles information by geocoding the subject properties (that is, plotting the latitude and longitude for such subject properties and obtaining data concerning properties within 100.32 Feet of the subject properties). There is no warranty or guarantee that geocoding will report or list all properties within the specified radius of the subject properties and any such warranty or guarantee is expressly disclaimed. Accordingly, some properties within the aforementioned radius and the information concerning those properties may not be referenced in this report.

APPENDIX G

QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

RAMESH CHALLAPALLI

Professional Associate

Education: MA, Geology; Brooklyn College,
City University of New York

Licenses/Registrations: AHERA - Certified Asbestos Inspector
NJDEP-UST Subsurface Investigator
40-Hour OSHA Certified

Years of Experience: 13

Summary of Professional Experience

With a Master's degree in Geology and more than 13 years of experience with major national consulting firms, Mr. Challapalli has proven expertise in all facets of environmental consulting, project management, hiring and training of engineering staffs. The majority of the work has been in association with an owner or lender to establish liability management practices, and effectively address the stringent due diligence requirements with property transfer.

Mr. Challapalli has conducted several 100 Phase I Environmental Site Assessments of commercial, industrial, educational, and multi-family residential properties throughout the Northeastern United States. He has worked on a wide variety of subsurface environmental investigations to determine the presence and extent of contamination in soil and groundwater. Mr. Challapalli also has extensive project/client management experience with site assessments, asbestos abatement and environmental remediation projects.

For a national environmental consulting firm, Mr. Challapalli worked as a Senior Project Manager; where his responsibilities included but were not limited to proposal writing, project management, report writing and review. His work included environmental site assessments; limited and comprehensive surveys, sampling, and project management of abatement for asbestos; survey and sampling for lead-based paint; lead-in-drinking-water and radon gas emissions.

Finally, Mr. Challapalli's diversity across public, private, government and industrial environments is a valuable asset to LAC's Professional Associate team in the Northeastern United States.

Melissa Dahl

Project Manager

Education: Bachelor of Science Degree in Environmental Science

Licenses/Affiliations: AIHA, American Institute of Industrial Hygiene

Years of Experience: 7 years

Summary of Professional Experience

Having over 7 years experience in the consulting field, Ms. Dahl has performed Environmental Site Assessments throughout east coast for large developers and lending institutions. She has also managed numerous Brownfields Development projects and has performed air sampling, domestic water sampling, groundwater monitoring well development, and other soil and groundwater investigation projects.

Prior to joining LandAmerica Assessment Corporation, Ms. Dahl managed all due diligence projects as part of the Site Assessment division for a well known engineering company, Taylor Wiseman & Taylor (TWT). Other responsibilities included business development, proposal preparation, management of staff, project estimating, project budget management, and developing project work plans and asbestos Operations and Maintenance (O&M) programs.

Ms. Dahl has successfully managed single and multi-site environmental due diligence projects encompassing a broad range of property types including, retail, office, industrial (ROI), hospitality, assisted living and special use. She was integral to the due diligence process for commercial mortgage backed securities (CMBS) conduit programs initiated by Home Savings of America. She has interfaced directly with bank loan officers, regulatory agencies, environmental analysts and numerous borrowers on subjects including environmental compliance and liability as well as contracting and scope of work issues. Ms. Dahl's major projects included large-scale loan portfolio due diligence assessments, subsurface soil and groundwater investigations and underground storage tank removals

Ms. Dahl has also served as Project Manager for hazardous material compliance audits and OSHA audit investigations. She was responsible for QA/QC oversight and successfully developed and implemented several project-tracking database programs to ensure strict scope of work and due date compliance.

EUGENE A. BELLI, REPA, CHMM

Vice President

Education: B. A. Geography Environmental Management & Analysis/Cartography, Environmental Science Minor, Rutgers University, New Brunswick NJ, 1986
M.S. Environmental Science, New Jersey Institute of Technology, Newark, NJ, 1996

Registration(s): Certified Hazardous Material Manager, Institute of Hazardous Material Managers
Registered Environmental Property Assessor, Reg. No. REPA 1002,
AHERA Building Inspector, Certification No. 006933
AHERA Management Planner, Certification No. 006931
NYS Department of Labor Asbestos Inspector/Management Planner AH-01-22084
New Jersey Department of Environmental Protection UST Closure and Subsurface Evaluations, Cert. No. 0009743
OSHA 29 CFR 1910.120 40-Hour Health and Safety Training
OSHA 29 CFR 1910.120 8-Hour Refresher Training
OSHA 29 CFR 1910.120 Confined Space Entry Training

Years of Experience: 21

Summary of Professional Experience

Mr. Belli, has over 21 years of experience in the due diligence industry, including serving as an environmental manager of a regional and international bank (Constellation Bank and Chemical Bank). He has managed over 3,000 environmental site assessments for residential, commercial and industrial properties throughout the continental United States. Many of the assessments completed on industrial sites were performed in accordance with New Jersey's Industrial Site Recovery Act (formerly known as the Environmental Cleanup Responsibility Act [ECRA]). In addition to due diligence assessments, Mr. Belli has also managed and performed compliance audits, underground storage tank management and closure activities, remedial investigations and cleanups.

During Mr. Belli's banking and consulting career, he has been intimately involved with bulk and portfolio sales as well as conduit lending. Mr. Belli is a Registered Environmental Property Assessor, a Certified Hazardous Materials Manager, an AHERA Building Inspector/Management Planner and is a Licensed New Jersey Underground Storage Tank Subsurface Evaluator.

Mr. Belli previously served as a Department Manager for ENSR. His responsibilities included QA/QC for the Mid-Atlantic Region and the development of a department which included environmental, engineering and asbestos services.

TECHNICAL SPECIALTIES

- Due Diligence Environmental Site Assessments
- Industrial Facility Site Characterization
- UST Management, Closure, Investigation, Remediation, System Upgrades
- Remedial Investigations/Feasibility Studies
- Groundwater Monitoring and Sampling
- Asbestos Surveys And Management
- Remedial Design and Implementation
- Project Management
- Subsurface Investigations
- Compliance Audits
- Solid And Hazardous Waste Management
- Subsurface Investigations
- Expert Testimony

REPRESENTATIVE PROJECT EXPERIENCE

- Responsible for management and quality control of due diligence projects for the Mid-Atlantic Region's Real Property Services Team. Responsibilities included managing a department and performing quality assurance/quality control reviews of site assessments, asbestos and lead surveys, underground storage tank closures and management programs and subsurface investigations.
- Developed, managed and provided senior review on several multi-site due diligence portfolios ranging from 20 to 206 sites. Due diligence activities included performing Phase I Environmental Site Assessments, Asbestos Surveys, Lead Based Paint Surveys, Underground Storage Tank Testing, Water Testing and Subsurface Investigations. In addition, remediation cost estimates and scoring sites was required. These services were provided for international banks, real estate investment trusts (REITS) insurance companies and investment firms. Many of the portfolios were later securitized and reports were submitted to various rating agencies and investors.
- Developed and managed a national underground storage tank compliance program consisting of 235 facilities for Federal Express Corporation. The management program consisted of tank testing, installation of corrosion protection and leak detection systems, spill/overflow prevention devices and permitting.
- Team leader for an Underground Storage Tank compliance Audit consisting of 178 tanks at Andrews Air Force Base. The program consisted of upgrading underground storage tanks to meet federal and state regulatory requirements and perform contamination investigations where discharges were detected. Work included retrofitting tanks in the Air Force One Presidential Complex.
- Responsible for the overall development and implementation of multi-phased environmental investigations to delineate contamination and to design NJDEP-approved cleanup plans for site remediation. Such investigations were performed for due diligence, required under New Jersey's Environmental Cleanup Responsibility Act (ECRA) or New Jersey's Pollution Discharge Elimination System (NJPDES). Management responsibilities included developing and maintaining project budgets, timetables, and the acquisition and coordination of required project personnel and resources.
- Developed and managed an ECRA groundwater and soil investigation for an Amoco Bulk Storage Terminal in Carteret, New Jersey. This investigation was designed to characterize the site and provide data for the development of a remediation plan.
- Performed a Preliminary Assessment of a multi-tenanted facility in Eatontown, New Jersey and prepared Initial Notice, Negative Declaration, and De Minimus Quantity Exemption filings.
- Performed numerous Preliminary Assessments, Site Investigations, Remedial Investigations, and Remedial Action Workplans for sites under New Jersey's Industrial Site Recovery Act and its predecessor ECRA. Areas of concern at sites consisted of, leaking PCB transformers, leaking underground and above ground storage tanks, drum storage areas, dry wells, fill area, landfills, and building interior sampling and decontamination.
- Managed multiple portfolios for banks and real estate investment trusts (REITs) for due diligence investigations. Many of these portfolios were securitized.
- Developed and managed a subsurface investigation for Southern Natural Gas at one of their compressor stations in Louisiana. The investigation consisted of soil and groundwater sampling at a site along the Mississippi River.
- Developed and managed a due diligence investigation including a subsurface investigation for Texas Eastern in an urban area of New Jersey. The investigation included the evaluation of historic fill in an area where a new pipeline was to be installed.

- Developed and managed a Remedial Investigation under New Jersey's Industrial Site Recovery Act (formerly ECRA) for a former textile mill in Paterson, New Jersey. The site was to be converted to residential apartments and commercial tenant space. Soil and groundwater contamination at the site consisted of pesticides, petroleum constituents and chlorinated solvents. Following submission of the Remedial Investigation Report to the NJDEP, a Deed Notice and a Classification Exception Area was granted allowing the development to proceed. Also performed building interior sampling to evaluate potential risks to future residents.
- Performed underground storage tank closures and abandonment activities in New York City and the five boroughs for Federal Express and other commercial clients. Work included abandonment of 10 underground storage tanks in the basement of a former US Postal Services Facility in Manhattan and upgrading tanks at JFK International Airport.
- Provided expert testimony on behalf of Home Depot, for an underground storage tank spill site in Brooklyn, New York.
- Performed a Site Investigation, Remedial Investigation and developed a Remedial Action Workplan for a site in Kenilworth, New Jersey. The site consisted of a former pond that was historically filled with contaminated material. Successfully executed a Declaration of Environmental Restriction and designed and constructed engineering controls consisting of a two foot soil cap for the property.
- Developed a remedial investigation for a Brownfield development project in Newark, New Jersey. Work also included the remediation of approximately 30 buried 55-gallon drums from the site.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
Commercial Building
509-517 West 38th Street
New York, New York

EXECUTIVE SUMMARY

Langan Engineering & Environmental Services (Langan) has completed a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 509-517 West 38th Street in New York, New York, hereinafter referred to as the "Site."

The objective of this Phase I ESA was to determine if there was evidence of past/current releases or the imminent threat of a future release of hazardous substances on or near the property based on visual observations and a review of available records and historical information. The findings of this Phase I ESA as per American Society for Testing Materials (ASTM) Standard Practice E1527-05 and the United States Environmental Protection (USEPA's) All Appropriate Inquiry (AAI) Rule are based on a site inspection conducted on 10 October 2007, a review of State and Federal environmental databases, a review of prior reports, and correspondence with local and state agencies as they concern the Site and surrounding area. Aerial photographs and historic topographic maps of the Site were also obtained and reviewed in our effort to ascertain further pertinent information.

This assessment revealed the following with regard to environmental conditions noted at the Site:

Former Dry Cleaning Operations

In the 1990s, the Site formerly operated as a dry cleaning facility. Subsurface investigation activities performed subsequent to these operations identified contaminants indicative of dry cleaning operations in soil samples collected beneath the Site; however, concentrations were below the New York State Department of Environmental Conservation (NYSDEC) recommended soil cleanup objectives. No groundwater samples were collected as groundwater was not encountered above the shallow bedrock encountered at approximately

10-feet below ground surface. Accordingly, no further activities are recommended for these former operations.

Tanks

An inactive heating oil underground storage tank (UST) was identified in the garage area of the Site. A geophysical survey identified an additional anomaly indicative of a second UST. These potential USTs no longer operate at the Site. Subsurface investigation performed did not identify impacted soils in the vicinity of these inactive USTs. No information was available regarding the closure of these tanks. A Freedom of Information request was submitted to the New York City Fire Department (FDNY) regarding the status of these tanks; however, as of this date, no response has been received. Therefore, in the event the inactive UST(s) have not been properly closed, Langan recommends the UST(s) are closed in accordance with FDNY regulations.

Additionally, in 1995, an overfill of a UST was reported to the NYSDEC and Spill No. 9505232 was assigned to the incident. A cleanup was reportedly performed and Spill No. 9505232 was subsequently closed by the NYSDEC. As mentioned above, subsurface investigation activities performed in the vicinity of this UST and spill did not identify evidence of contamination.

The Site was formerly serviced by six (6) heating aboveground storage tanks (ASTs) situated in the basement of the Site. These ASTs were removed during a 2000/2001 gut renovation of the building and subsurface investigation activities performed in the vicinity of these former tanks did not identify evidence of contamination. However, according to the NYSDEC Petroleum Bulk Storage (PBS) Program Facility Information Report, the status of these tanks is identified as "Temporarily Out of Service." Accordingly, Langan recommends that an updated PBS registration be submitted to reflect the existing condition of these tanks as being removed.

Historic Fill

Soil at the Site is classified as historic fill consisting of silt, coarse sand, gravel, brick, and wood fragments. Historic urban fill exceeding NYSDEC Technical and Administrative Memorandum (TAGM) Recommended Soil Cleanup Objectives (RSCOs) are regulated in New York State for transportation and disposal. Excavated soil should be classified for waste characterization

parameters according to disposal facility requirements, transported under applicable regulatory permits, and disposed or recycled at a licensed facility. All soil removal operations should be conducted in accordance with NYSDEC solid waste regulations.

Little "E"

According to the New York City Department of Buildings (NYCDOB), the Site is zoned Little "E" for Hazardous Materials. The Little "E" designation indicates that site specific requirements determined by the New York City Department of Environmental Protection (NYCDEP), including a subsurface investigation, would need to be met prior to obtaining building permits from NYCDOB.

Based on these findings, no further action is proposed for the former dry cleaning operations, former ASTs or closed NYSDEC Spill No. 9505232. However, in the event the Site is to be redeveloped, a copy of this Phase I ESA and the Phase II Environmental Site Investigation report should be forwarded to the NYCDEP for evaluation of the Little "E" designation. Additionally, in the event historic fill materials beneath the Site are to be disturbed, they are to be handled and disposed of properly. Finally, in the event the inactive UST(s) have not been properly closed, Langan recommends the UST(s) are closed in accordance with FDNY regulations.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
Commercial Building
509-517 West 38th Street
New York, New York

1.0 INTRODUCTION

1.1 General

Langan Engineering & Environmental Services (Langan) has been retained by Twining Properties to complete a Phase I Environmental Site Assessment (Phase I ESA), in compliance with the American Society for Testing Materials (ASTM) Standard Practice E1527-05 and the United States Environmental Protection Agency's (USEPA) All Appropriate Inquiry (AAI) Rule for the property located at 509-517 West 38th Street, New York, New York, hereinafter referred to as the "Site."

1.2 Purpose and Scope

The purpose of this Phase I ESA is to identify Recognized Environmental Conditions in connection with the Site using the methodology recommended by ASTM and the AAI Rule. Specifically, the ASTM methodology is referred to as "*Standard Practice for Environmental Site Assessments; Phase I Environmental Site Assessment Process, Designation E1527-05*". The USEPA's AAI Rule was designed to establish federal standards and practices for conducting all appropriate inquiries. The AAI Rule, which incorporates the ASTM E1527-05 standard, is used to establish the innocent landowner defense under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and to provide additional liability protection for contiguous property owners and bona fide prospective purchasers.

For the purpose of this report, a Recognized Environmental Condition (REC) is defined as follows:

"The presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."

In general, the scope of this assessment consisted of reviewing readily available information and environmental data relating to the property; interviewing readily available persons knowledgeable about the site; reviewing readily available maps and records maintained by federal, state, and local regulatory agencies; and conducting a site visit. The specific scope of this assessment included the following:

- A site reconnaissance to visually characterize on-site conditions and evaluate the property's location with respect to adjacent property uses and natural surface features. In addition, the reconnaissance included the adjacent roads and readily accessible properties to identify potential environmental conditions on neighboring properties.

Site reconnaissance was conducted on 10 October 2007. It was conducted in a systematic manner focusing on the Site, as well as the immediate surrounding area.

- A review and interpretation of readily available historical documents, such as topographic maps, aerial photographs, tax maps, city directories, Sanborn Fire Insurance Maps, and atlases to identify previous activities on and in the vicinity of the property. A review of readily available environmental databases maintained by the USEPA, state, and local agencies within the approximate minimum search distance described within the Regulatory Review Section of this report provided by Environmental Data Resources, Inc. (EDR).
- A review of published radon occurrence maps to determine whether or not the subject site is located in an area with a propensity for elevated radon levels.

1.3 Limiting Conditions

No limited conditions were encountered as part of this Phase I ESA.

1.4 Limitations of the Assessment

This Phase I ESA was prepared in accordance with the Scope of Work described in Section 1.2, as well as our 28 September 2007 proposal. The work conducted by Langan is limited to the services agreed to with Twining Properties and no other services beyond those explicitly stated should be inferred or are implied.

The findings and recommendations presented in this report are professional opinions based solely upon Langan's visual observations of the Site and the immediate site vicinity, and upon Langan's interpretations of the readily available historical information, conversations with persons knowledgeable about the site, and other readily available information, as referenced in the report. These recommendations are intended exclusively for the purpose stated herein, at the site indicated, and for the project indicated.

This report is intended for the sole use of Twining Properties, 535 Fifth Avenue in New York, New York. The scope of services performed during this investigation may not be appropriate for other users, and any use or re-use of this document, or the findings, conclusions, or recommendations presented herein is at the sole risk of said user.

This study was not intended to be a definitive investigation of possible contamination at the Site. The purpose and scope of this investigation was to determine if there is reason to suspect the possibility of contamination at the site. No exploratory borings, soil or groundwater sampling, or laboratory analyses were performed at the property and, therefore, the conclusions set forth herein are made without the benefit of such investigation. This report is intended to be used in its entirety. No excerpts may be taken to be representative of the findings of this assessment.

Opinions and recommendations presented in this report apply to site conditions and features as they existed at the time of Langan's site visit, and those reasonably foreseeable. They cannot necessarily apply to conditions and features of which Langan is unaware and has not had the opportunity to evaluate.

Langan cannot act as insurers and cannot "certify" that a site is free of environmental contamination, and no expressed or implied representation or warranty is included or intended in our reports, except that our services were performed, within the limits prescribed by our client, with the customary thoroughness and competence of our profession.

1.5 Environmental Professional Declaration

Langan declares that, to the best of its professional knowledge and belief, that the personnel who performed this Phase I ESA meet the definition of *Environmental Professional* as defined in Subsection 312 10 of 40 Code of Federal Regulations (CFR) 312 and that they have the specific qualifications

based on education, training, and experience to assess a property of the nature, history, and setting of the Site. They have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Resumes outlining qualifications of the Environmental Professionals who performed this Phase I ESA are provided in **Appendix I**.

2.0 SITE DESCRIPTION

2.1 Property Location

The Site is located at 509-517 West 38th Street in New York, New York. The Site is bound to the north by commercial development along West 39th Street, to the south by West 38th Street and to the east and west by commercial development along West 38th Street. The approximate geographic coordinates of the Site are N 40° 45' 27.7" latitude and W 73° 59' 52.1" longitude. A Site Location Map is provided as **Figure 1**. The Site is identified on local tax maps as Block 710, Lot 22.

2.2 Surrounding Land Use

Surrounding land use is identified with commercial development. The following table summarizes the immediate surrounding properties.

Compass Direction	Adjacent Property/Properties
North	Automobile repair facility and commercial development, beyond is West 39 th Street
South	West 38 th Street, beyond is an undeveloped property which is to be improved with residential development.
East	DHL shipping/receiving/transportation facility, beyond is 10 th Avenue.
West	Automobile repair facility, rail line and commercial development.

With regard to the immediate surrounding area (i.e. one-eighth of a mile), nearby properties were identified during EDR's search of the required environmental

databases. These properties are further discussed in Section 4 of this report, which summarizes the findings of the environmental database search performed by EDR.

2.3 Physical Setting

2.3.1 Size and Shape

The Site is approximately 12,500-square feet in size and rectangular in shape.

2.3.2 Topography

The topography of the Site is essentially level and the topography of the surrounding area slopes to the west. According to the United States Geological Survey (USGS) Central Park, NY 7.5 Minute Series topographic maps dated 1995, the Site elevation is approximately 30-feet above mean sea level. See **Figure 1** for the USGS map.

2.3.3 Soils

According to a prior subsurface investigation reports, soils beneath the Site consist of historic fill materials and include sand with gravel, wood and brick.

2.3.4 Surface Waters and Groundwater

The nearest body of water is the Hudson River located approximately 1/2-mile to the west.

Depth to groundwater and flow direction can be ascertained by reviewing detailed groundwater investigation reports for the Site or nearby properties, which is beyond the scope of this Phase I ESA. However,

based on prior subsurface investigation, shallow groundwater was not encountered above bedrock which was encountered at approximately 10-feet below ground surface. Additionally, based on the topography of the surrounding area and proximity to the Hudson River, groundwater flow is suspected to flow to the west.

According to the EDR database, no public water supply wells were identified within a 1/2-mile radius of the Site.

According to the National Wetlands Inventory Map, no State or Federal wetlands located on the Site or surrounding properties.

Finally, the EDR Overview Map, which is based on the FEMA Flood Maps, indicates that the Site is not located in either the 100 or 500-year flood zones.

2.4 Property Description

The Site is improved with an approximately 50,000-square foot 3-story building which occupies the entire property. The building includes a partial basement with mechanical rooms and storage; ground floor with production studios, offices, reception area, equipment rental facility and garage; 2nd floor with storage and apartment; and, 3rd with recording studio. Refer to **Figure 2** for a Site Plan.

2.5 Current Property Use

The current use of the Site is a recording studio and music equipment rental facility.

2.6 Previous Property Use

According to prior reports, historic topographic maps, historic aerial photographs, and City Directories, the Site was identified with a series of structures from at least 1890 through sometime prior to 1911, when the previous improvements were razed and the Site was developed with the existing improvements. The Site operated with baking, dyeing and other commercial operations facility through the 1990s, when dry cleaning operations were performed at the Site. Sometime in the 1990s dry cleaning operations ceased and the building was gut renovated in 2000-2001. Since that time the Site has operated as a music recording studio.

3.0 HISTORICAL USE

3.1 Topographic Maps

Langan reviewed the USGS Central Park, NY 7.5-Minute Series topographic map, dated 1995, of the Site and surrounding area. The topographic map appears to identify the Site and surrounding area shaded in pink which denotes an urban area. To the north is the Lincoln Tunnel and to the south is a building denoted as Department of Education.

The topographic map does not identify any landfills or wetlands on or immediately adjacent to the Site. A USGS map is provided as **Figure 1**.

3.1.1 Historic Topographic Maps

A search of available historical topographic maps identified coverage for the years 1897, 1947, 1966, 1979 and 1995, which reference the Site. Copies of the historical topographic maps are provided in **Appendix A**. A brief summary of each map follows:

1897 – The Site and surrounding area are identified with urban development.

1947 – The Site and surrounding area are identified with urban development. A rail line is identified to the west of the Site.

1966 – The Site and surrounding area are shaded pink which denotes urban development. The Lincoln Tunnel is identified to the north and a rail line is identified to the west.

1979 and **1995** – No significant change in the Site or surrounding properties since the 1966 map.

3.2 Historical Maps

Sanborn Fire Insurance Maps (Sanborn Maps) constitute a database of prior site uses of real property for many cities and towns in the United States. The maps were originally created to assist insurance underwriters in understanding the potential for risk of structures requiring insurance; however, they are also useful for determining the previous uses of a property. As seen in **Appendix B**, Sanborn Map coverage for the years 1890, 1899, 1911, 1930, 1950, 1976, 1979, 1980, 1982, 1985, 1987, 1988, 1991, 1992, 1993, 1994, 1995 and 1996 was provided. A brief summary of each map follows:

1890 – The Site is improved with series of 2 and 3-story buildings along West 38th Street and garages along with northern portion of the Site. A structure identified a stable is observed on the northeastern portion of the Site. To the north are undeveloped lots and buildings along West 39th Street; to the south, beyond West 38th Street are a series of buildings; to the east are additional buildings; and, to the west is a stable.

1899 – No significant change in the Site or surrounding properties since the 1890 map; however, the structure identified on the northeastern portion of the Site is no longer identified as a stable.

1911 – All previous structures on the Site have been razed and the Site is developed with the existing improvements identified as Franco-Amer Baking Co. Surrounding properties are improved with increased commercial/light manufacturing development.

1930 – No significant changes in the Site; however, surrounding properties are improved with increased commercial/light manufacturing development.

1950 – The Site is no longer identified as the Franco-Amer Baking Co. and is identified with a boiler room, dye works and printing operations. Properties to the adjacent west have been razed and a rail line easement is identified. Additionally, to the north in the Lincoln Tunnel.

1976 – The Site is identified as a warehouse and storage. No additional significant changes in the surrounding properties noted since the 1950 map.

1979 – Properties to the west are improved with an auto repair facility. No additional significant change in the Site or surrounding properties noted since the 1976 map.

1980 to 1996 – No significant change in the Site or surrounding properties noted since the 1979 map.

3.3 Aerial Photographs

To meet prior use requirements of ASTM E 1527-05, historical aerial photographs, including the oldest available photograph (1943), were obtained from EDR (see **Appendix C**). The available years of map coverage for the

property consist of the years 1943, 1953, 1966, 1976, 1984, and 1994. A brief summary of each photograph follows:

1943, Scale 1" = 750' – The Site and surrounding properties are identified in an urban environment; specific features can not be discerned.

1953 Aerial Photograph, Scale 1" = 750' – No significant change in the Site or surrounding properties noted since the 1943 aerial photograph.

1966 Aerial Photograph, Scale 1" = 750' – No significant change in the Site or surrounding properties noted since the 1953 aerial photograph.

1976 Aerial Photograph, Scale 1" = 1,000' – Due to the poor quality of the aerial photograph, specific features can not be discerned.

1984 Aerial Photograph, Scale 1" = 750' – No significant change in the Site or surrounding properties noted since the 1966 aerial photograph.

1994 Aerial Photograph, Scale 1" = 750' – No significant change in the Site or surrounding properties noted since the 1984 aerial photograph.

3.4 City Directory

City directories have been published for cities and towns across the United States since the 1700s. Originally a list of residents, the city directory developed into a sophisticated tool for locating individuals and businesses in a particular urban or suburban area. Langan reviewed the City Directory Abstract obtained from EDR. A copy of the abstract is provided in **Appendix D**.

Based on a review, the Site was listed as a baking facility from 1923 through 1927. The Site was also listed as a dyeing & finishing facility from 1942 through 1956 and a paper/twine/shipping facility from 1958 through 1973. From 1978

through 1988, the Site was listed as an ice and food facility. Additionally, in 1993, the Site was identified as a cleaner. No additional listings were identified for the Site. Surrounding properties were listed with numerous commercial/light industrial operations including printers, studios, packing, trucking, textiles, scrap metals, auto repair, rubbish removal, etc. from 1920 through 1998.

3.5 Property Ownership

The Site is currently owned by Howard International Corporation. Howard International Corporation has owned the Site since May 1999. Prior to that time, the Site was owned by Haslemere Realty Corp.

Additionally, the results of the Environmental Lien Search conducted by EDR did not identify any liens or use restrictions associated with the Site. A copy of the Lien Search results is provided in **Appendix G**.

3.6 Interviews

According to the property manager, Mr. Simon Andrews, the Site was gut renovated in 2000\2001. Additional information obtained by Mr. Andrews is included in applicable sections of this report.

3.7 User Questionnaire

A User Questionnaire was provided to Mr. Andrew Bank, representative for the potential purchaser of the property. A copy of the completed User Questionnaire is provided in **Appendix J**.

4.0 REGULATORY REVIEW

The regulatory database information contained within the EDR is provided in **Appendix E**. The report is a listing of sites identified in select federal and state standard source

environmental databases within the approximate search distance specified by ASTM *Standard Practice for Environmental Site Assessments E1527-05*. Langan reviewed each environmental database on a record-by-record basis to determine if certain sites identified in the report are suspected to represent a negative impact to the Site.

The Site was identified in the environmental databases searched by EDR. Specifically, the Site is listed in the NY LTANKS (and NY Historical LTANKS), NY AST (and NY Historical AST), RCRA-SQG, FINDS, NY Manifest and NY Drycleaners databases. The following table lists the number of sites by database within the prescribed search radius appearing in the EDR report.

DATABASE REVIEWED	MINIMUM SEARCH AREA	NUMBER OF SITES WITHIN AREA
Federal National Proprieties List (NPL), Proposed NPL, and Delisted NPL	1 Mile Radius	0
NPL Recovery	On-Site	0
Comprehensive Environmental Responses, Compensation, and Liability Information System (CERCLIS) and CERCLIS designated "No Further Remedial Action Planned" (CERCLIS-NFRAP)	½ Mile Radius	1
Corrective Action Tracking System (CORRACTS)	1 Mile Radius	0
Federal Resources Conservation and Recovery Information System (RCRIS) Treatment, Storage, and Disposal (TSD) Facilities List	½ Mile Radius	0
Federal RCRIS Generators	¼ Mile Radius	53 (including the Site)
Federal Emergency Responses Notification System (ERNS) List	On-Site	0
Hazardous Material Information Reporting System (HRIMS)	On-Site	0
Engineering Controls Sites List (US ENG CONTROLS)	½ Mile Radius	0
Sites with Institutional Controls (US INST CONTROL)	½ Mile Radius	0
Department of Defense Sites (DOD)	1 Mile Radius	0
Formerly Used Defense Sites (FUDS)	1 Mile Radius	0
A List of Brownfields Sites (US BROWNFIELDS)	½ Mile Radius	0
Superfund (CERCLA) Consent Decrees (CONSENT)	1 Mile Radius	0
Records of Decision (ROD)	1 Mile Radius	0
Integrated Compliance Information System (ICIS)	On-Site	0
Land Use Control Information System (LUCIS)	½ Mile Radius	0
Clandestine Drug Labs (CDL)	On-Site	0

DATABASE REVIEWED	MINIMUM SEARCH AREA	NUMBER OF SITES WITHIN AREA
Radiation Information Database (RADINFO)	On-Site	0
Uranium Mill Tailings Sites (UMTRA)	½ Mile Radius	0
Open Dump Inventory (ODI)	½ Mile Radius	0
Toxic Chemical Release Inventory System (TRIS)	On-Site	0
Toxic Substance Control Act (TSCA)	On-Site	0
FIFRA/TSCA Tracking System (FTTS)	On-Site	0
Section 7 Tracking System (SSTS)	On-Site	0
PCB Activity Database System (PADS)	On-Site	0
Material Licensing Tracking System (MLTS)	On-Site	0
Mines Master Index File (MINES)	¼ Mile Radius	0
Facility Index System/ Facility Registry System (FINDS)	On-Site	The Site
RCRA Administrative Action Tracking System (RAATS)	On-Site	0
State Hazardous Waste Sites (SHWS)	1 Mile Radius	0
Voluntary Cleanup Program (VCP)	½ Mile Radius	3
State Landfills or Solid Waste Facilities (SWF/LF)	½ Mile Radius	3
Solid Waste Facility Directory (HIST LF)	½ Mile Radius	0
Underground Storage Tank List and Historical Underground Storage Tank (UST)	¼ Mile Radius	70
State Spills Database – Leaking Underground Storage Tanks (LTANKS)	½ Mile Radius	100 (including the Site)
Historic LTANKS	½ Mile Radius	81 (including the Site)
Chemical Bulk Storage Tanks (CBS)	¼ Mile Radius	3
Aboveground Storage Tanks (ASTs)	¼ Mile Radius	49 (including the Site)
Approved Class B Recycling Facilities (SWRCY)	½ Mile Radius	0
List of Major Facilities (Major Facilities)	½ Mile Radius	0
Spills and Historical Spills (NY Spills)	¼ Mile Radius	69
Engineering Controls	½ Mile Radius	1
Institutional Control	½ Mile Radius	1
Dry Cleaners List (DRYCLEANERS)	¼ Mile Radius	3 (including the Site)
Brownfields	½ Mile Radius	0
MANIFEST	¼ Mile Radius	50 (including the Site)

A search of Tribal Records (i.e. Indian Reserv, Indian Lust, and Indian UST) revealed no sites within the prescribed search radii.

A search of the EDR Proprietary Records (i.e. Manufactured Gas Plants, Historical Auto Stations and Historical Cleaners) revealed five (5) Manufactured Gas Plants within the prescribed search radii.

The EDR report identified 112 "Orphan Sites." Orphan Sites are those sites that could not be mapped or "geocoded" due to inadequate address information. Please refer to the EDR report (**Appendix E**) for a complete list of these Orphan Sites. While Langan could not confirm whether any or all of these sites were within the specified radii, it appears from the information supplied that none of these sites area located on or immediately adjacent to the Site.

A description of the databases reviewed by Langan is provided in the EDR report. An evaluation of sites identified within the prescribed search area is presented below.

4.1 Federal Databases

NPL

The NPL identifies sites designated for priority cleanup under the USEPA Superfund Program. No NPL, Proposed NPL or Delisted NPL sites were identified within the prescribed search radii.

CERCLIS

The CERCLIS contains information on abandoned, inactive, or uncontrolled hazardous waste sites, which may require cleanup. CERCLIS contains sites that are either proposed to be or are on the NPL. Also included are sites that are in the screening or assessment stages for possible inclusion on the NPL. A CERCIS-NFRAP site is one where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious

enough to require Federal Superfund Action or NPL consideration. There were no CERCLIS sites identified within the prescribed search radius; however, one (1) CERCIS-NFRAP site (Manhattan General Mail Facility, West 29th & 9 Avenue) was identified within the prescribed search radius. This facility is situated greater than ¼-mile to the south and not suspected to have impacted the Site.

CORRACTS

The Corrective Action Tracking System identifies hazardous waste handlers with RCRA corrective action activities. No CORRACTS sites were identified within the prescribed search radius.

RCRIS TSD Facility Report

The RCRIS TSD list includes selected information on sites that treat, store, or dispose of hazardous wastes as defined by the Resource Conservation and Recovery Act (RCRA). No RCRIS TSD facilities were identified within the prescribed search radius.

RCRIS Generators

Langan reviewed the list of sites which have filed notification with the USEPA in accordance with RCRA requirements. These sites include generators of hazardous waste regulated under RCRA. Under RCRA, hazardous waste generators are classified by the mass of hazardous waste generated in a calendar month into the following categories: Large Quantity Generator (LQG), greater than 1,000 kilograms (kg); Small Quantity Generator (SQG), 100 to 1,000 kg; and Conditionally-Exempt Small Quantity Generator, less than 100 kg. RCRIS Generators, while they represent some form of hazardous waste activity, are most significant if they are determined to have Class I Violations or to be non-compliant.

The EDR report identified 53 RCRA Generators within the prescribed search radius, including the Site identified as New York Valet Cleaners (a former tenant). This listing appears to be associated with the former dry cleaning operations.

There are no violations associated with this listing, rather that hazardous materials are used at these facilities.

Of the remaining 52 listings, seven (7) were classified as a LQG and the remaining 45 are classified as SQGs. 14 of the sites are located within one-eighth of a mile of the Site and the remaining 38 are located between one-eighth and one-quarter of a mile. A listing on this database does not indicate that a spill or hazardous discharge from these sites has occurred.

ERNS

The ERNS list records and stores information on reported releases of oil and hazardous substances. The EDR report did not identify the Site in the ERNS database.

HMIRS

The Hazardous Materials Information Reporting System contains hazardous material spill incidents reported to DOT. The EDR report did not identify the Site in the HMIRS database.

US ENG CONTROLS

The Engineering Controls Sites List is a listing of sites with engineering controls in place. The EDR report did not identify any US ENG CONTROLS sites within the prescribed search radius.

US INST CONTROL

The US INST Control database is a listing of sites with institutional controls in place. The EDR report did not identify any US INST CONTROL sites within the prescribed search radius.

DOD

The EDR Report did not identify any Department of Defense (DOD) sites within the prescribed search radius.

FUDS

The EDR Report did not identify any Formerly Used Defense sites (FUDS) within the prescribed search radius.

US BROWNFIELDS

The EDR Report did not identify any US Brownfields sites within the prescribed search radius.

CONSENT

Superfund (CERCLA) Consent Decrees sites are major legal settlements that establish responsibility and standards for cleanup at NPL sites. No CONSENT sites were identified within the prescribed search radius.

ROD

The Record of Decision (ROD) documents mandate a permanent remedy at an NPL site. No ROD sites were identified within the prescribed search radius.

ICIS

The Integrated Compliance Information System supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System. No ICIS sites were identified within the prescribed search radius.

LUCIS

The Land Use Control Information System (LUCIS) contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties. No LUCIS sites were identified within the prescribed search radius.

CDL

The Clandestine Drug Labs (CDL) database contains some records of where law enforcement agencies reported they found chemicals or other items that

indicated the presence of a CDL. No CDL sites were identified within the prescribed search radius.

RADINFO

The Radiation Information Database contains information about facilities that are regulated by the USEPA for radiation and radioactivity. No RADINFO sites were identified within the prescribed search radius.

UMTRA

The EDR Report did not identify any Uranium Mill Tailings (UMTRA) sites within the prescribed search radius.

ODI

The Open Dump Inventory defines an open dump as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria. The EDR report did not identify any ODI sites within the prescribed search radius.

TRIS

The Toxic Chemical Release Inventory System (TRIS) identifies facilities which release toxic chemicals to the air, water, and land in reportable quantities under SARA. No TRIS sites were identified within the prescribed search radius.

TSCA

The Toxic Substance Control Act (TSCA) identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory List. No TSCA sites were identified within the prescribed search radius.

FTTS

The FIFRA/TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act) / TSCA (Toxic Substance Control Act). The FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA, and EPCRA (Emergency Planning and

Community Right-to-Know Act). No FTTS sites were identified within the prescribed search radius.

SSTS

The Section Seven Tracking System (SSTS) requires all registered pesticide-producing establishments to submit a report to the EPA specifying the types and amounts of pesticides, active ingredients, and devices being produced. No SSTS sites were identified within the prescribed search radius.

PADS

The PCB Activity Database System (PADS) identifies generators, transporters, commercial storers and/or brokers and disposers of PCBs who are required to notify the EPA of such activities. No PADS sites were identified within the prescribed search radius.

MLTS

The Material Licensing Tracking System (MLTS) is maintained by the Nuclear Regulatory Commission and contains a list of sites which possess or use radioactive materials which are subject to NRC license requirements. No MLTS sites were identified within the prescribed search radius.

MINES

The Mines Master Index File contains all mine identification number issued for mines active or opened since 1971. No MINES sites were identified within the prescribed search radius.

FINDS

The Facility Index System/Facility Identification Initiative Program Summary Report contains both facility information and pointers to other sources that contain more detail. The Site was identified in the FINDS database as New York Valet Cleaners. The database points to the RCRA Generator database. Refer to the RCRA Generator section for a further discussion.

RAATS

The RCRA Administrative Action Tracking System (RAATS) contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. No RAATS sites were identified within the prescribed search radius.

4.2 New York State Department of Environmental Conservation Databases

State Hazardous Waste (SHW)

The EDR report did not identify any SHW sites within the prescribed search radius.

Voluntary Cleanup Program database (VCP)

The VCP database is a list of responsible parties, developers, local officials, or individuals working with the NYSDEC to remediate non-priority contaminated sites that pose no immediate threat to human health or the environment. Three (3) VCP sites were identified within the prescribed search radius. These three (3) sites are situated at least 1/8-mile from the Site and not suspected to have impacted the Site.

State Waste Facilities/Landfill (SWF/LF)

The EDR report identified three (3) SLF/LF sites within the prescribed search radius. These three (3) sites are situated greater than 1/4-mile from the Site and are not suspected to have impacted the Site.

HIST LF

The EDR report did not identify any Historic Solid Waste Facilities within the prescribed search radius.

Underground Storage Tanks (UST) Facility List

The EDR report identified 70 UST and Historical UST facilities within the prescribed search radius. Note that numerous listings were identified to be associated with some property addresses. The UST list is only an inventory of storage tanks and does not necessarily constitute a contamination condition. As such, we cannot determine if these registered storage tank sites have had a negative environmental impact on the Site.

Leaking Underground Storage Tanks Database (LTANKS)

The EDR report identified 100 LTANKS sites, including the Site, within the prescribed search radius. The Site was identified as Spill No. 9505232 and related overfilling of an UST. A cleanup was performed and the Spill No. 9505232 was closed by the NYSDEC.

Of the remaining 100 sites, none are situated on or adjacent to the Site; therefore, based on the distance, none of these sites are suspected to have impacted the Site.

Historic LTANKS Sites

This database is a list of regulated UST contaminated sites. The EDR report identified 81 HIST LTANKS sites, including the Site, within the prescribed search radius. As mentioned above, the Site was identified as Spill No. 9505232 and related overfilling of an UST. A cleanup was performed and the Spill No. 9505232 was closed by the NYSDEC.

On the remaining 80 sites, none are situated on or adjacent to the Site; therefore, based on the distance, none of these sites are suspected to have impacted the Site.

Chemical Bulk Storage Tank (CBS)

The EDR report identified three (3) CBS facilities within the prescribed search radius. A listing on this database does not indicate that a spill or hazardous

discharge from these sites has occurred, rather that hazardous materials are stored at these facilities.

Aboveground Storage Tanks (AST) Facility List

The EDR report identified 49 AST facilities, including the Site, within the prescribed search radius. The Site was identified with six (6) heating oil ASTs ranging in size from 275 to 2,000-gallons. The status of these AST is identified as removed and these ASTs were not observed during the Site inspection. Of the remaining 48 AST facilities, a listing on this database does not indicate that a spill or hazardous discharge from these sites has occurred, rather that hazardous materials are stored at these facilities.

Approved Class B Recycling Facilities (SWRCY)

The EDR report did not identify any SWRCY sites within the prescribed search radius.

Major Facilities

A major facility means all facilities, located on one or more contiguous or adjacent properties owned or operated by the same person, having a total combined storage capacity of 20,000 gallons or more for hazardous substances other than petroleum or petroleum products, or 200,000 gallons or more of hazardous substances of all kinds. There were no sites listed in this database that are located within the prescribed search radius.

NY Spills and NY Hist Spills

The Spills database lists initial notification information of hazardous material incidents, where there is land contamination, reported to the NYSDEC Environmental Action Line. The EDR report identified 69 incidents on the Spills and Hist Spills databases within the prescribed search radius including an adjacent property (522 West 38th Street). The Spill associated with the adjacent property has been closed by the NYSDEC. Of the remaining 68 incidents, none

are situated on or adjacent to the Site; therefore, based on the distance, none of these sites are suspected to have impacted the Site.

ENG CONTROLS

The ENG CONTROLS database lists sites that have legal documents that restrict the use of the property due to contamination. The EDR report identified one (1) ENG CONTROLS site within the prescribed search radius. This facility is situated at least ¼-mile from the Site and not suspected to have impacted the Site.

INST CONTROL

This database lists sites that have institutional controls providing notice that ground water contamination exists in a particular location above State standards. The EDR report identified one (1) INST CONTROLS site within the prescribed search radius. This facility is situated at least ¼-mile from the Site and not suspected to have impacted the Site.

Dry Cleaners

The EDR report identified three (3) Registered Dry Cleaners, including the Site, within the prescribed search radius. The listing for the Site is associated with Manhattan Cleaners a former Site operator. The two (2) remaining sites are situated approximately at least 1/8-mile from the Site and not suspected to have impacted the Site.

Brownfields Database

A search of the Brownfields database did not identify any sites within the prescribed search radius.

MANIFEST

The EDR search identified 50 Manifest sites, including the Site, within the prescribed search radius listed in the hazardous waste manifest data database. The listing for the Site is associated with the former dry cleaning operations.

The remaining 49 listings on this database indicate that hazardous wastes are generated at these sites; however, a listing on this database does not indicate that a spill or hazardous discharge from these sites has occurred.

Tribal Records

A search of the INDIAN RESERV (Indian Reservations), INDIAN LUST, and INDIAN UST databases identified no sites within the prescribed search radii.

EDR Proprietary Historical Databases

A search of these databases revealed no Historical Auto Stations or Historical Dry Cleaners within the prescribed search radii; however, five (5) former Manufactured Gas Plants were identified within the prescribed search radii. These five (5) facilities are situated at least ¼-mile from the Site and not suspected to have impacted the Site.

4.3 Local Regulatory Agency Interviews and File Reviews

Langan has submitted letters/forms to several government agencies requesting environmental information pertaining to the Site. Copies of correspondences and select responses are provided in **Appendix F**. Any correspondence received from these agencies will be provided if the response results in a change in any Langan findings or recommendation. The following is a list of agencies contacted by Langan:

- New York State Department of Environmental Conservation – Letter Request
- New York City Department of Environmental Protection – Fax Request
- New York City Department of Health – Fax Request
- New York City Fire Department (FDNY) - Letter Request

As of this writing, no pertinent responses have been received. Upon receipt of any significant findings, Langan will notify Twinning Properties and provide an addendum to this Phase I ESA.

Additionally, Langan reviewed information obtained on-line from the New York City Department of Buildings and Property Shark for the Site. Based on information obtained, the Site is designated as a Little "E" restricted site. Additional information obtained is provided in applicable sections of this report.

4.4 Prior Reports

As part of this Phase I ESA, Langan reviewed the following three (3) documents:

1. *Phase I ESA* dated July 20, 2007 prepared by LandAmerica Assessment Corporation on behalf of Twining Properties.

Based on this document, the Site was improved with a series of commercial structures from at least 1890 until sometime prior to 1903, when the previous structures were razed and the Site was developed with the existing improvements. Operations consisted of baking, dyeing and other commercial services. A dry cleaner operated at the Site from 1992 through 1997. The building was gut renovated in 2001-2002. Since that time Site operations include a music studio and an equipment rental facility.

The document also indicates that the building was formerly serviced by a heating oil UST, evidence of the UST (a fill pipe) remains. Additionally, in 1995 NYSDEC Spill Number 9505232 was assigned to an incident involving an overflow of the UST. Reportedly, approximately 150-gallons of No. 2 heating oil spilled into the sewer system. The spill was cleaned and the incident has been closed by the NYSDEC.

Additionally, the document indicated that based on the age of the building, asbestos containing materials are suspected to be present in the Site building.

2. *Report of Limited Phase II ESA* dated June 5, 1998 prepared by Law Environmental Consultants, Inc. on behalf of Vari-Lite International, Inc.

According to this document, five (5) 275-gallon ASTs, a vaulted tank and oil stained floors were observed in the western portion of the partial basement. Based on the presence of these tanks, as well as the former use as a dry cleaner, subsurface investigation activities were performed at the Site. Subsurface investigation activities consisted of advancing two (2) soil borings, using a hand auger, in the basement of the building. Soil borings were advanced to refusal on suspected bedrock encountered 1 to 2-feet below the basement. Groundwater was not encountered during these activities. Three (3) soil samples were collected from these soil borings and submitted for analysis of volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs). As the analytical results indicate, elevated concentrations of tetrachloroethene (PCE) and SVOCs were detected in the soil samples.

The PCE concentrations were detected well below their NYSDEC Technical and Administrative Guidance Memorandum (TAGM) Recommended Soil Clean-up Objectives (RSCO). SVOC concentrations were detected in excess of their NYSDEC TAGM RSCO; however, these contaminants appear to be indicative of historic fill materials typically encountered in New York City and not representative of a release or discharge at the Site.

3. *Letter Report* dated September 10, 1998 prepared by Soil Mechanics Environmental Services on behalf of William Rumsey Construction, Inc.

According to this document, the five (5) 275-gallon ASTs and vaulted tank have been removed and based on the presence of these former tanks, as well as the former use as a dry cleaner, subsurface investigation activities were performed

at the Site. Subsurface investigation activities consisted of advancing two (2) soil borings in the basement of the building. Soil borings were advanced to refusal on suspected bedrock encountered at approximately 2-feet below the basement. Groundwater was not encountered during these activities. Two (2) soil samples were collected from these soil borings and submitted for analysis of VOCs, Polyaromatic Hydrocarbons (PAHs) and leachable PAHs. As the analytical results indicate, elevated concentrations of VOCs and PAHs were detected in the soil samples, no elevated concentrations of leachable PAHs were detected in these soil samples.

The VOC concentrations were detected well below their NYSDEC TAGM RSCO. PAH concentrations were detected in excess of their NYSDEC TAGM RSCO; however, these contaminants appear to be indicative of historic fill materials typically encountered in New York City and not representative of a release or discharge at the Site. Further, additional analysis for the PAHs determined that the PAHs are not leachable.

Additionally, Langan is currently performing a Phase II Environmental Site Investigation for the Site. Based on the findings to date, one (1) inactive UST and a possible second UST was observed at the Site. Additionally, soil at the Site is classified as historic fill consisting of silt, coarse sand, gravel, brick, and wood fragments. Historic urban fill exceeding NYSDEC TAGM RSCOs are regulated in New York State for transportation and disposal. Excavated soil should be classified for waste characterization parameters according to disposal facility requirements, transported under applicable regulatory permits, and disposed or recycled at a licensed facility. All soil removal operations should be conducted in accordance with NYSDEC solid waste regulations.

5.0 SITE RECONNAISSANCE

The following section summarizes the results of Langan's 10 October 2007 site inspection with regard to recognized environmental conditions. Photographs taken as part of the site reconnaissance are provided in **Appendix H**.

The Site is improved with an approximately 50,000-square foot 3-story building with partial basement which occupies the entire parcel. The building includes a partial basement with mechanical rooms and storage; ground floor with production studios, offices, reception area, equipment rental facility and garage; 2nd floor with storage and apartment and 3rd with recording studio.

Heating and cooling for the building is provided by gas/electric fired HVAC units, no USTs are associated with these operations. Electric and gas are provided by local providers and potable water and sanitary sewer systems are provided by the municipality.

6.0 RADON

EDR also searched the State Database for New York radon levels. According to the EDR the Site and surrounding area classified as a tier three zone; this denotes an area where average indoor radon levels are less than 2 picoCuries per Liter (pCi/L). This concentration of radon is below the USEPA guidance level of 4 pCi/L.

7.0 FINDINGS AND CONCLUSIONS

7.1 Findings

The results of our Phase I ESA identified the following environmental concerns associated with the Site: Former Dry Cleaning Operations; Tanks; Historic Fill; and, Little "E."

7.2 Data Gaps

The following are data gaps were encountered by Langan during the performance of this Phase I ESA:

- No data gaps were encountered as part of this Phase I ESA.

7.3 Conclusions

Langan has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527 and the USEPA's AAI rule. Any exceptions to, or deletions from, this practice are described in Section 1 of this report.

This assessment revealed the following with regard to environmental conditions noted at the Site:

Former Dry Cleaning Operations

In the 1990s, the Site formerly operated as a dry cleaning facility. Subsurface investigation activities performed subsequent to these operations identified contaminants indicative of dry cleaning operations in soil samples collected beneath the Site; however, concentrations were below the NYSDEC recommended soil cleanup objectives. No groundwater samples were collected as groundwater was not encountered above the shallow bedrock encountered at approximately 10-feet below ground surface. Accordingly, no further activities are recommended for these former operations.

Tanks

An inactive heating oil UST was identified in the garage area of the Site. A geophysical survey identified an additional anomaly indicative of a second UST. These potential USTs no longer operate at the Site. Subsurface investigation performed did not identify impacted soils in the vicinity of these inactive USTs. No information was available regarding the closure of these tanks. A Freedom

of Information request was submitted to the FDNY regarding the status of these tanks; however, as of this date, no response has been received. Therefore, in the event the inactive UST(s) have not been properly closed, Langan recommends the UST(s) are closed in accordance with FDNY regulations.

Additionally, in 1995, an overfill of a UST was reported to the NYSDEC and Spill No. 9505232 was assigned to the incident. A cleanup was reportedly performed and Spill No. 9505232 was subsequently closed by the NYSDEC. As mentioned above, subsurface investigation activities performed in the vicinity of this UST and spill did not identify evidence of contamination.

The Site was formerly serviced by six (6) heating ASTs situated in the basement of the Site. These ASTs were removed during a 2000/2001 gut renovation of the building and subsurface investigation activities performed in the vicinity of these former tanks did not identify evidence of contamination. However, according to the NYSDEC PBS Program Facility Information Report, the status of these tanks is identified as "Temporarily Out of Service." Accordingly, Langan recommends that an updated PBS registration be submitted to reflect the existing condition of these tanks as being removed.

Historic Fill

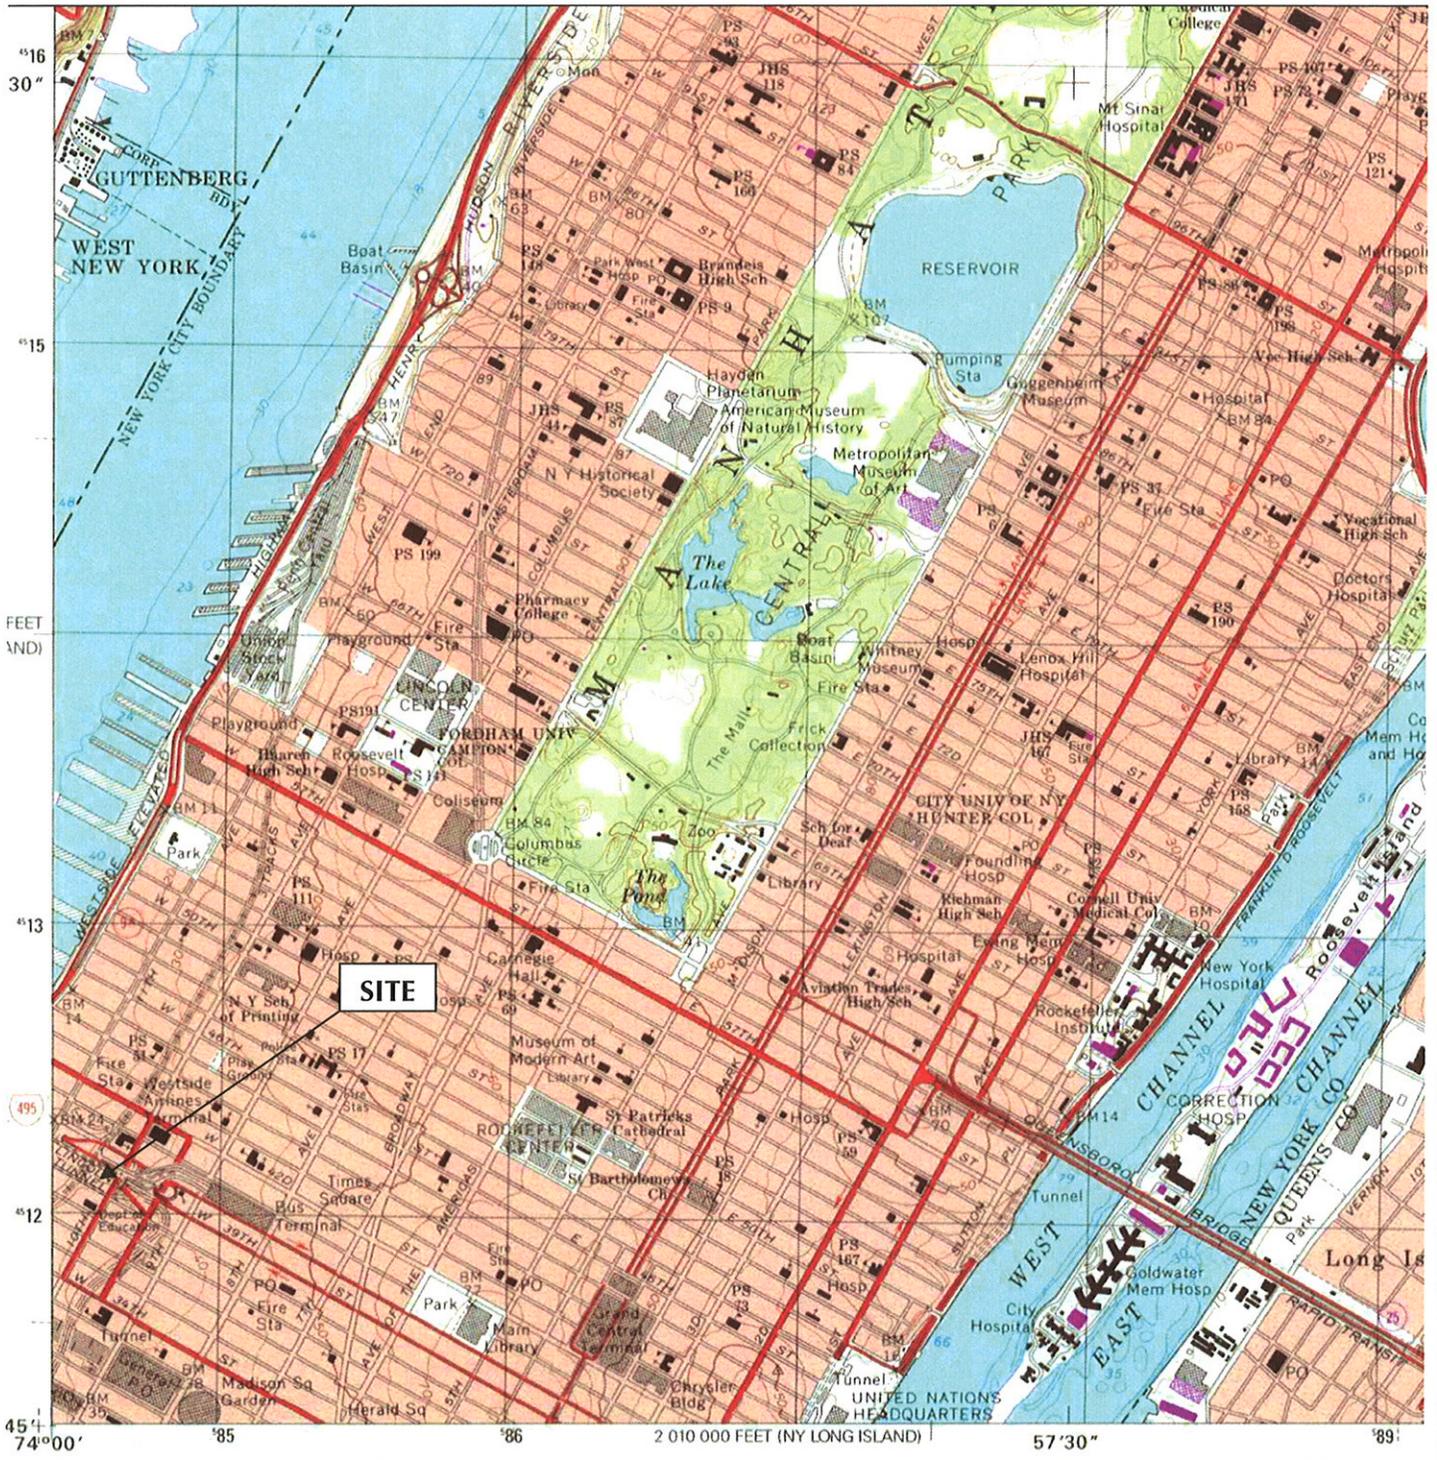

Soil at the Site is classified as historic fill consisting of silt, coarse sand, gravel, brick, and wood fragments. Historic urban fill exceeding NYSDEC TAGM RSCOs are regulated in New York State for transportation and disposal. Excavated soil should be classified for waste characterization parameters according to disposal facility requirements, transported under applicable regulatory permits, and disposed or recycled at a licensed facility. All soil removal operations should be conducted in accordance with NYSDEC solid waste regulations.

Little "E"

According to the NYCDOB, the Site is zoned Little "E" for Hazardous Materials. The Little "E" designation indicates that site specific requirements determined by the NYCDEP, including a subsurface investigation, would need to be met prior to obtaining building permits from NYCDOB.

Based on these findings, no further action is proposed for the former dry cleaning operations, former ASTs or closed NYSDEC Spill No. 9505232. However, in the event the Site is to be redeveloped, a copy of this Phase I ESA and the Phase II Environmental Site Investigation report should be forwarded to the NYCDEP for evaluation of the Little "E" designation. Additionally, in the event historic fill materials beneath the Site are to be disturbed, they are to be handled and disposed of properly. Finally, in the event the inactive UST(s) have not been properly closed, Langan recommends the UST(s) are closed in accordance with FDNY regulations.

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.'s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR City Directory Abstract

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening report designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Thank you for your business.

SUMMARY

- ***City Directories:***

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2000. (These years are not necessarily inclusive.) A summary of the information obtained is provided in the text of this report.

This report compiles information by geocoding the subject properties (that is, plotting the latitude and longitude for such subject properties and obtaining data concerning properties within 100.32 Feet of the subject properties). There is no warranty or guarantee that geocoding will report or list all properties within the specified radius of the subject properties and any such warranty or guarantee is expressly disclaimed. Accordingly, some properties within the aforementioned radius and the information concerning those properties may not be referenced in this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

FEDERAL RECORDS

CERCLIS-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 06/21/2007 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/13/2006 has revealed that there are 7 RCRA-LQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

STATE AND LOCAL RECORDS

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 07/31/2007 has revealed that there are 3 NY SWF/LF sites within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
CON-EDISON @ SERVICE CENTER	12TH AVENUE / 45TH STR	1/4 - 1/2 N	BA273	1137

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 07/11/2007 has revealed that there are 99 NY LTANKS sites within approximately 0.5 miles of the target property.

NY HIST LTANKS: A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

A review of the NY HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there

EXECUTIVE SUMMARY

are 80 NY HIST LTANKS sites within approximately 0.5 miles of the target property.

NY CBS UST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS UST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 2 NY CBS UST sites within approximately 0.25 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.25 miles of the target property.

NY SPILLS: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 07/11/2007 has revealed that there are 41 NY Spills sites within approximately 0.125 miles of the target property.

NY HIST SPILLS: This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

A review of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there are 28 NY Hist Spills sites within approximately 0.125 miles of the target property.

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the NY VCP list, as provided by EDR, and dated 05/01/2007 has revealed that there are 3 NY VCP sites within approximately 0.5 miles of the target property.

EDR PROPRIETARY RECORDS

EDR Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there are 5 Manufactured Gas Plants sites within approximately 1 mile of the target property.

Other Pertinent Environmental Activity Identified at Site

NJ-NJEMS (New Jersey - New Jersey Environmental Management System).
 The Department of Environmental Protection (NJDEP) manages large
 databases of environmental information in this integrated system.

RCRAInfo is a national information system that supports the Resource
 Conservation and Recovery Act (RCRA) program through the tracking of
 events and activities related to facilities that generate, transport,
 and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
 program staff to track the notification, permit, compliance, and
 corrective action activities required under RCRA.

 Oxygenate: False
 DEC Memo: Start DECRemark - 0208736 Prior to Sept, 2004 data translation this spill Lead
 DEC Field was "TIPPLE" 11/22/02 Rommel - duty officer Contaminated soil
 letter mailed requiring submittal of summary report before 1/15/02. 3:59
 Spoke to Henry GoldStrategic Environmental Solutions, Suite 1500, 118-35 Queens
 Blvd, Forest Hills, NY 11375 fax: 718-520-8306- who is working for the owner of
 the property, Fred Howard, Howard International, 500 W37th Street, NY, NY
 10018 in association with a pending property transaction. They encountered
 contaminated soil and what appears to be two 550 gallon (possibly diesel) USTs
 at the property. Mr. Gold believes that there was a Phase I Assessment
 completed (by another company) that indicated that either a garage or a car
 rental facility was previously located at this property. Henry will register
 the tanks prior to removal on Monday and will submit the results of the
 subsurface investigation to Michelle Tipple. 4/25/2003 Site Investigation
 and Tank Closure report submitted April 2003 by Strategic Environmental
 Solutions reviewed, NFA letter sent with caveat that health and safety plan
 necessary for future excavations on this property. 4/30/2003 SAME AS SPILL #
 0203762---BOTH#S CLOSED END DECRemark - 0208736
 Remarks: Start CallerRemark - 0208736 while doing a sub surface investigation
 contaminated soil was found & as they investigated they found 2 improperly
 abandoned tanks on the property that were not known about END CallerRemark -

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The Department of Environmental Protection (NJDEP) manages large
databases of environmental information in this integrated system.

RCRAInfo is a national information system that supports the Resource
Conservation and Recovery Act (RCRA) program through the tracking of
events and activities related to facilities that generate, transport,
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
program staff to track the notification, permit, compliance, and
corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID: Spill Tank Test: Tank Number: Tank Size: Test Method: Leak Rate: Gross Fail: Modified By: Last Modified: Test Method: DEC Memo:	Not reported Not reported Start DECRemark - 8906443 Prior to Sept, 2004 data translation this spill Lead DEC Field was "ROMMEL" 03/29/04 Transferred from James to Rommel 10/29/04 Reassigned from Rommel to Sun. 11/1/04 Sun sent a letter to Richard Saut, Environmental Manager of Penske, requiring by January 14, 2004 the following:1)Delineation of soil and groundwater contamination. A subsurface investigation to adequately characterize site hydrogeology and to completely delineate the full extent of petroleum contamination to soil and groundwater both on-site and off-site must be performed. 2)A Ssurrounding property sketch including layout and usage must be submitted to the Department, 3)The locations of former remote fills and dispenser island must be submitted to the Department, and 4)A PBS registration must be submitted immediately reflecting the former tanks and their subsequent decommissioning. 1/5/06: Called Richard Saut and left a message (610-775-6298) to ask for an update on what was required in 11/1/04 letter. 1/10/06: Spoke with Richard Saut and he said he would speak to his consultants and get back to me. 1/30/06: Left a message with Richard Saut to follow up. 3/15/06: Spoke with Matt of Groundwater Environmental Services (631-582-4187 x15, mschieferstein@gesonline.com). I sent him a copy of the additional delineation letter that was sent to Hertz. 5/19/06: Left voice message with Matt Schieferstein about overdue workplan. 6/21/06: Spoke to Matt Schieferstein of GES. Penske is doing research on this site and has not authorized GES to do any work. Spoke to Richard Saut of Penske. Richard Saut said that Hertz is responsible for this spill and forwarded DEC's letter to Virginia Carlson of Hertz. He forwarded me the correspondence between him and Virginia Carlson. 7/19/06: Sent Virginia Carlson an email to followup. 8/10/06: Owner according to propertyshark.com: 500 West 38 L.L.C. 290 Park Ave S New York NY 10010-5313 Sent delineation required letter to above address. Assessment required by 11/10/06. 8/16/06: Received phone call from Mindy Horowitz (212-675-3225) of Fleming Lee Shew, consultant for property owner. She will submit a workplan for remediation after a FOIL requestis reviewed. 8/17/06: Received email from Mindy Horowitz: We will begin our remedial investigation upon reviewing the previous investigations conducted at this site. We are simultaneously performing an investigation for the New York City Department of Environmental Protection, as this site has an "e" designation. Mindy Chassin Horowitz Project Manager Fleming-Lee Shue, Inc. 6 E32nd Street, 4th Floor New York, NY 10016 (212) 675-3225 (telephone) (212) 675-3224 (fax) mindy@flemingleeshue.com 11/6/06: Received and approved invesigation workplan. Four soil borings will be performed surrounding the former UST location. A soil sample from directly below the floor and from the interval with the highest PID reading willbe collected from each boring. The report noted the possible presence of a transformer and hydraulic lifts on the property. 11/14/06: Received call from Fleming Lee Shue. Soil borings installation is not possible because clearance in basement is too low. Borings will be installed following building demolition in early 2007. 12/4/06: Received letter indicating that delineation is not possible, will occur in early 2007 after building demolition. Assessment report submission due 3/30/07.4/3/07: Emailed Mindy Horowitz to followup on site status. 4/12/07: Received email from Mindy Horowitz:"We have contacted our

client to ascertain when the building will be demolished, allowing us to install the proposed soil borings. I will let you know as soon as I've heard something. Please call me with any questions." 5/2/07: Received email from Matthew Carroll : "The building at 493-497 Tenth Avenue is scheduled to be demolished next week, May 7 through May 11. The following week we will be conducting a site walkover to determine what type of drill rig we can use to collect the required samples around the tank. I will contact you when we have scheduled the sampling event." 5/24/07: Left phone message for Mindy Horowitz to follow up on site status. 6/4/07: Spoke to Matthew Carroll (matthew@flemingleeshue.com, Fleming-Lee Shue, Inc. 158 West 29th Street, 9th Floor, New York, NY 10001, T: 212-675-3225, F: 212-675-3224). Building was demolished. The subbasement has not been cleared. He is waiting for the subbasement to be cleared to identify tank location, and sample. END DEC Remark - 8906443

DEC Memo: Start DECRemark - 0506881 9/6/05-Vought-Desk Duty Officer-Sent out groundwater contamination letter to owner on spill report. Upon reception of report determination will be made whether gasoline or fuel oil contamination so project manager can be assigned. 4/26/06 - Austin - AKRF submitted a supplemental Phase 2 (dated 1/18/06), a RAP, and a HASP (both dated 3/1/06) for this site. Documents and project transferred to Ketani for review and follow up - end 4/26/06 - Raphael Ketani. Today I received the 11/9/05 Phase II Environmental SIR, the 1/18/06 Supplemental Phase II Environmental SIR, the 3/1/06 Remedial Action Plan and Construction HASP for the site. 4/27/06 - Raphael Ketani. Today, I sent out a letter approving both SIRs and the RAP. In addition, the letter stated that 2 additional groundwater monitoring wells should be installed and monitored for 2 rounds of sampling. Then a report must be issued with the results. 7/5/06 - Raphael Ketani. I tried to reach Mark Godick of AKRF (914) 949-7336 regarding progress at the site, but could only leave a message. 7/10/06 - Raphael Ketani. Mr. Godick called to say that they are still doing source removal, but the wells will probably not be installed until September when excavation will take place and be completed. I told Mr. Godick that would be fine. 8/17/06 - Raphael Ketani. I spoke to Mr. Godick at his NYC number (646) 388-9534. He said that they are not scheduled to remove the soil and excavate down to bedrock until some time in September. He said he will keep me posted. 9/7/06 - Raphael Ketani. I contacted Mr. Godick at his White Plains office. He said construction is delayed due to the need to get some NYC permits. However, he will let me know when they are ready to start. 11/13/06 - Raphael Ketani. I left a voice mail for Mr. Godick requesting information on progress made. Mr. Godick returned my call and said that everything is being held up by the lack of a construction contractor to do the digging and the rest of the work. There is a shortage of contractors. The new start date is now January or February 2007. 2/6/07 - Raphael Ketani. Mr. Godick called to say that construction will start sometime in the next 2 weeks at the site. The owners finally have a contractor for the work. 4/11/07 - Raphael Ketani. I reached Mr. Godick. He said that digging is still taking place at the site. They have removed almost all of the soil they need in order to construct the foundation. Now they are removing the contaminated rock. However, the rock is very hard and so progress is very slow. He said that they are digging and cutting down to 25 feet below grade and once all of the soil

and rock is removed, then the report will be submitted. 4/24/07 - Raphael Ketani. I visited the site after work hours. I could not get into the site, but took 3 pictures. Drilling and blasting is taking place at this time. Part of the site is very deep. Next to one building that is on West 39 Street they are drilling and blasting. The rock is granite and looks to be very hard. I did not see any signs of groundwater. 4/26/07 - Raphael Ketani. I tried to reach Mr. Godick to discuss the groundwater issue and the coming report, but could only leave a voice mail. Mr. Godick returned my call. We discussed the groundwater and report issues. I told him that the site doesn't seem to have any water and I asked whether he was using well points to keep it dry. Mr. Godick said that the site is completely dry naturally. He has not had any groundwater issues. He added that all of the soil and historical fill, and tanks were removed a while ago. He said he will send the site completion report, anyway, because he has to send it to DEP. I told him that would be good for our records. I told him DEC is closing its spill case today and that I will send DEP a letter just to keep them in the loop. He said to send the letter to Gary Heath, NYC DEP, 59-17 Junction Blvd., Flushing, NY 11373. I composed a draft closure letter and submitted it to Randall Austin, Chief Spills Unit Region 2, for approval. Based upon my site inspection on 4/24/07, the Phase II SIR, the Supplemental Phase II SIR, and my conversation with Mr. Godick today, I am closing the spill case. However, DEC is holding off sending the NFA letter until the closure report is received, as per Mr. Austin's instructions. 5/23/07 - Raphael Ketani. I tried to reach Mr. Godick to remind him to send the closure report, but I could only leave a voice mail. 6/25/07 - Raphael Ketani. I spoke to Mr. Godick and asked him where the closure report was. He said that they still haven't finished installing the vapor barrier. He added that once they're finished with this and the rest of the foundation work, then the closure report will be written and sent. END DEC Remark - 0506881 Start Caller Remark - 0506881 Contam. found during a phase 2 investigation. Suspected UST in that area. Groundwater was affected. Any kind of clean up will be pending the investigation. END Caller Remark - 0506881

 DEC Remarks: SPOKE TO CAPT ROZAS: CONTRACTORS WORKING IN FEB-BACK TO CLEAN APRIL BUT THEY LEFT OIL IN SUMP PUMP. ODOR IN BASEMENT.
 Remark: several weeks ago contractor working on boiler flushed the system from oil burner to tank and oil was dumped on cellar floor and into sump pit - fd members have complained about the odor and have reported it to their bosses

Test Method: Horner EZ Check I or II
DEC Memo: Start DECRemark - 0409846 ttf ltr sent 1/14/2005 2/14/2005 Received a letter from Morton Usdan (212-564-2006) saying that he hired a company to work on the tank. If it can be fixed, it will be. If not, it will be abandoned. 5/2/2005 Sangesland spoke to Mr. Usdan. He said PTC found a dry leak in the vent line and replaced the line. Tank was retested and passed, no contamination was visible. Sangesland asked Mr. Usdan to submit all of this in writing to DEC. 5/5/2005 Sangesland received a letter from Mark Salamack at Petroleum Tank Cleaners. Tank was originally tested and failed by another company. PTC emptied the 1500 gal tank, isolated the lines and the stickline and vent line were found to leak. The gasket was replaced and then the tank was tested alone and passed. All necessary piping was replaced and no contamination was found. Spill Closed END DECRemark - 0409846
Remarks: Start CallerRemark - 0409846 PBS No: 2-210420 END CallerRemark - 0409846

excavation and removal of 4 x 550 gallon USTs. The contents of 3 x 550 gallon USTs was found to contain a mixture of gasoline and water. 1 x 550 gallon UST contained water only. The excavation was being performed by Fenely & Nicol for Public Parking, Inc. The project was also supervised by DEC contractor EAR under PIN project for New York Auto Service which was impacting the Jacob Javits Center. Does not appear to be related to New York Auto Service spill or have an impact on the Javits Center. 2/24/05-Vought-Spoke with Phillip Rizzuto (973-470-25510) who is agent for property owners. Rizutto asked for status of Tank Closure Report review and Vought required that a copy be sent to DEC for review. Spill transferred from Rommel to Vought. 3/16/05-Vought-Reviewed Tank Closure Report(Fenley & Nicol - Angel Ramirez) dated 1/18/01 and received on 3/2/05. Project was prepared for: Mr. Phil Rizzuto Classic Sanitation Corporation 99 Route 3 Clifton, NJ 07014 Removal and closure of one (275-gallon) fuel oil AST and four (550-gallon) gasoline USTs. Subject site is used as a public parking garage. Three (550-gallon) gasoline USTs were removed from the north-east front of the interior of the building(Tank Area 1) and one (550-gallon)gasoline UST was removed from southwest of Tank Area 1. Depth to groundwater at site estimated to be 20 feet below grade and flow to the west. "Inspector Anthony Sigona of the NYSDEC was present at the time of the excavcation to inspect the tanksand excavated area". "The bottom and sidewalls of the excavation consisted of Manhattan Schist and bedrock". "...it was discovered that soil above the tanks exhibited evidence of gasoline contamination". All product lines were removed and disposed. Soil were analyzed for 8260/8270 TCLP as per Sigona. Soil analyticals only showed on minor exceedence of naphthalene at 11ug/L (Guidance value is 10ug/L). No PID readings were detected. Report recommends No Further Action. Spill closed by Vought due to one minor TAGM 4046 Soil Cleanup Objective exceedence. END DECRemark - 0010648

Remarks: Start CallerRemark - 0010648 DURING TANK REMOVAL SOIL CONTAMINATION HAS BEEN DISCOVERED. CONTAMINATION IS ON TOP OF TANKS. AREA TO BE EXCAVATED AND FURTHER SAMPLING/TESTING TO BE DONE. NO CALL BACK REQUESTED. CALLER HAS BEEN IN CONTACT WITH REGION 2 OFFICE. END CallerRemark - 0010648

DEC Field was "ROMMEL" 5/14/01 TJD Reviewed summary report detailing tank removal and associated contaminated soils. Spoke w/Paul Ciminello of Ecosystems Strategies, Inc. to discuss report including: insufficient sampling & missing analytical data. Mr. Ciminello stated a new building is being constructed at the site and additional work may not be possible. Awaiting revised report. 12/9/03 TJD Spill reassigned Demeo >>> Rommel 3/14/05 - Mr. Charles G. Merritt sent a letter w/ a 2001 tank closure report and request for a spill closure, as per Randy Austin. I called Mr. Merritt back and told him that Tim DeMeo in DEC has reviewed the report and DEC requires additional data to make a determination for closure. (KST) 3/14/05- Spill reassigned to I. Islam by KST. 4/18/05- Mailed a letter to Mr. Merritt asking for a revised Investigation Summary Report after thorough investigation by June 30/05. It's noted here that Ecosystems Strategies, Inc. (ESI) was the previous consultant who prepared the Summary (Tank Closure) Report and was retained by The Producing Co., 145W 45th St., NY, NY and the current consultant is Merritt Consulting Engineers, Inc., retained by a Bank who financed to Dev. the property. - II. 6/8/05- Attorney John Curran (at 212-508-6717) called to extend the June 30/05 deadline for submission of the required ISR by one more month. Advised him to send us a formal request for time extension. - II 6/22/05- Received letter (dt. 6/14/05) from the Attorney requesting formal time extension for required submittal until Aug. 19/05. He also mentioned in the letter that the entire site is now developed with a new 15-story building for which foundation excavation removed residual contaminated soil, if any. However, time extension has been approved and asked to submit a site-specific technical report prepared by a NYS P.E along with drawings, plans, etc. in support of their claim by the extended deadline. - II 8/29/05- Reviewed the Technical Analysis Report dt. August 12, 2005 prepared by Galdun Frankel (G. F.) Env'tl. on the previously prepared UST Removal report by ESI in Feb. 2001 and re-submitted by Merritt Engineering dt. March 9, 2005. Based on the information provided and analyses made by G.F. Env'tl., it is believed that the petroleum contamination did not extend beyond the underlying bedrock and the foundation excavation of the building-in-place approx. 20' deep has removed any staining or residual surface contamination of the bedrock, and GW was not encountered. As such, the spill case is hereby closed. - II END DEC Remark - 0011844

Remarks: Start Caller Remark - 0011844 2 550 GALLON TANKS WERE REMOVED ON TUESDAY & CONTAMINATION WAS NOTICED UNDER THE CONTAINMENT UNIT TODAY - SOIL HAS BEEN REMOVED & STOCK PILED ON SITE TO BE REMOVED EARLY NEXT WEEK END Caller Remark - 0011844

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Start DECRemark - 9610133 Prior to Sept, 2004 data translation this spill Lead DEC Field was "VOUGHT" 10/25/00 - REASSIGNED FROM O'DOWD TO SANGESLAND. 12/2/2003 Transferred from Sangesland to Rommel. 1/8/04-Vought-Spill transferred from Rommel to Vought. 4/8/04-Vought-Spoke with Mathew Schieferstein (Anson Environmental 631-351-3555). Recently contracted by owners. Tradewinds were former contractor. Three monitoring wells onsite were abandoned. No groundwater analyticalson file. Vought approved Geoprobe samples at former well locations. Groundwater will be sampled for 8260/8270 and will take deepest dry soil samples or the highest PID. DEC will see report by 6/15/04. 9/23/05-FILE TRANSFERRED FROM VOUGHT TO OBLIGADO 2/2/06 - Obligado - called Anson Environemntal, Mathew Schieferstein no longer works there. Company was bought in 7/04. No recollection of this project. Will call back with any information they can dig up. 2/3/06 - Obligado - Receivedcall from Fritzzy Gros-Daillon at Anson Environmental. She said Anson in 2004 recommended geoprobing to owners however the Owners never approved work. No work was ever done. 10/16/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Called Steven Rosen Baum (212)687-3440 and left message to call me back. -QA 05/15/07: Called Mr. Steven Rosenbaum at (212)972-0902 to discuss regarding spill. He was not there left message to call me back. -QA 06/19/07: Called Ms. Fitzi Mazzola(Anson Environmental) at (631)351-3555 to discuss regarding present status of the spill. She said that she will find out about the information of spill with in three four days and then she will call me back. -QA END DECRemark - 9610133
Remarks: Start CallerRemark - 9610133 underground storage tanks each 550 gal have caused soil contamination over a period of 10 yrs-tanks were tested for tightness and

corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

GASETERIA (Continued)

1001482964

subsurface water line broke beneath 10th avenue near the northwest side of the site. Water entered the basement of the adjoining building along with some gasoline." DEC required installation of six monitoring wells on Gaseteria property. Gasoline vapors detected in sewers in building across 10th Avenue. This subsurface investigation consisted of eight soil borings and installation of two additional monitoring wells. Three pump islands serviced by 12 (550-gallon) gasoline USTs and one (2000-gallon) diesel UST. Local topography slopes to the north. Groundwater at depth of 7-9' below grade. Bedrock is 7-11' below grade and slopes downward toward the northwest and southwest corners of site. Groundwater "suspected to flow northward". All wells onsite were set "firmly on bedrock" and "there is not sufficient information available to determine specific groundwater flow". No free product detected in wells. Groundwater appears to flow from 10th Ave towards the USTs. Report recommends groundwater monitoring with possible additional delineation. No soil samples submitted for analysis nor were screened via PID. Letter from DEC to Gaseteria-7/12/90. Letter from DEC (Sigona) to Gaseteria (Oscar Porcelli) requesting subsurface investigation work plan to be approved by the DEC to investigate the presence of gasoline vapors. Plan must be received by the DEC by 7/17/90. Odor complaints in January 1990 and again in July 1990. Sigona performed site visit on 7/13/90. Fax to DEC-7/17/90. Letter from Environmental Management Services to DEC (Sigona) proposing: 1) investigation of subsurface utilities as potential pathways 2) determination of groundwater flow direction 3) groundwater monitoring 4) installation of six soil borings along western margin of station and installation of two additional monitoring wells. Letter from DEC to Gaseteria-1/5/95. Letter from DEC (Sigona) to Gaseteria (Angel Chang) requiring "cleanup and removal of discharge". Letter also required immediate steps to abate seepage into basement of 403 W 40th Street. Response from Gaseteria required to DEC by 1/15/95. Letter from Gaseteria to DEC-1/20/95. Letter from Gaseteria (Chang) to DEC (Sigona) stating that Gaseteria will: 1) "divert the flow of surface water away from the south wall of the building" 2) install a SVE system in the basement alongside of the south wall between the concrete floor and the building foundation. Gaseteria does not believe "there is a need to install new groundwater monitoring wells or to further develop existing wells.....since the problem appears to be surface related". Sample analyticals from basement of 480 10th Ave-8/96. Soil analyticals show 20664ppb ethylbenzene(sample 48334), 59164ppb xylene(sample 48334), 11000ppb naphthalene(sample 48334). Letter from DEC to Gaseteria-9/10/96. Letter from DEC(Rommel) to Gaseteria(George Esayan). "DEC in possession of analyticals from Clinton Housing(403 W. 40th Street)". Gaseteria required to sample two of the onsite monitoring wells for 8021/8270/lead. Letter from Clinton Housing Development Company-9/11/96. Letter from Clinton(Joseph Tuana) to DEC(Rommel) with copies of analyticals discussed above. Letter from Carl Sulfaro (attorney for Gaseteria) to DEC (Rommel)-9/20/96. Letter stating that Sulfaro "authorized EMS Environmental Services to take two samples of the onsite monitoring wells". Samples will be taken 9/27/96. Groundwater analyticals-10/10/96. Analyticals from MW5 by EMS showing 42.56ppb methylene chloride, 5549ppb benzene, 107.33ppb toluene, 1024.75ppb ethylbenzene, 393.15ppb xylene and 0ppb MTBE. Letter from Clinton(Kathy Prioleau) to DEC(Rommel)-11/11/96. On 10/27/96"strong fumes entered basement of 480 10th Ave". NYFD onsite. Letter requests that DEC relay information on "testing done at Gaseteria and UST inspection of Gaseteria". Letter from DEC(Rommel) to Gaseteria(Sulfaro)-11/25/96. Letter stating that requirements of fax dated 9/10/96 were not met because only one well was sampled and 8270/Lead analyses were not performed. Letter requires: 1) submittal of an investigation plan to delineate soil and groundwater contamination 2) source determination 3) installation of three additional monitoring wells 4) installation of an air sampling port on the exhaust line of

1001482964

the venting system and monthly sampling for benzene and THC. Letter states that "action must be taken within 45 days". Letter from DEC(Rommel) to Prioleau(Clinton)-11/26/96. Letter stated that "DEC was never notified" of odor complaints as 11/11/96 letter stated. Also attached to letter was copy of 11/25/96 letter from DEC to Gaseteria. Letter from Gaseteria(Sulfaro) to DEC(Rommel)-1/15/97. Letter stating that Gaseteria "would prefer to perform site investigation, soil removal and/or remediation as needed concurrent with excavation anticipated as part of Federal EPA UST upgrade mandate" and the work is expected to take place in "Spring 1997". Letter from DEC(Rommel) to Gaseteria(Roberto Porcelli)-7/29/98. Letter "serving as final notification of obligations regarding petroleum contamination and vapor incidents". On 6/28/03 petroleum contaminated groundwater infiltrated basement of 480 10th Ave due to heavy rains. This is the "seventh vapor complaint associated with Gaseteria since Jan 1990". Letter states that the "Department is allotting 30 days for Gaseteria to satisfy all requirements in DEC letter dated 11/25/96". Deadline of 8/31/98 given by DEC. Letter from Gaseteria(Seth Friedland) to DEC(Rommel)-8/13/98. Letter stating that "the June 1998 episode was caused by heavy rains and appears to be an isolated event" and that Gaseteria does not agree with Departments conclusions". Letter stated that the station will be taken out of service on 9/15/98, permanently close the USTs and reinstall upgraded USTs on the northern boundary of the site. Letter from DEC(Rommel) to Gaseteria(Roberto Porcelli)-8/28/98. Letter serving as a "reminder of 8/31/98 deadline". Letter from Gaseteria(Oscar Porcelli) to DEC(Rommel)-8/28/98. Letter stating that new USTs were ordered and that work will start the second week of September. Gaseteria intends to install four monitoring wells to replace those destroyed by station upgrade and will retain Environmental Management services to develop remedial plan. Letter from DEC(Rommel) to Gaseteria(Oscar Porcelli)-8/31/98. Letter confirming phone conversation where an agreement was reached that Gaseteria will comply with following requirements and complete the tank upgrade prior to 9/30/98. Letter also required that a workplan be submitted prior to 9/4/03 which included 1) completed delineation 2) soil and groundwater sampling plan for use during excavation activities 3) sampling of SVE emissions 4) installation of three monitoring wells into bedrock and 5) cleaning and proper disposal of oil in the building floor drains and all associated discharge points. Letter from Camin Cargo Control(Gaseteria's Enviro consultant) to Gaseteria-10/5/98. Letter from Camin(Patricia Badding) stating that a site investigation and report shall be prepared. Investigation with Geoprobe and subsequent installation of monitoring wells scheduled for 10/16/98. Soil samples will also be collected during excavation for new USTs. Venting system emissions will also be sampled. "Cleaning and proper disposal of any oil in the building floor drains and all associated discharge points is the responsibility of Gaseteria". Letter from DEC(Rommel) to Gaseteria(Oscar Porcelli)-10/8/03. Letter acknowledging receipt of Camin 10/5/98 proposal and requiring the following by 10/13/98: 1) Site plan with proposed boring locations 2) discussion of locations 3) discussion of endpoint sampling locations from UST excavation 4) discussion of delineation procedure 5) include MTBE with analyticals 6) collect groundwater samples from Geoprobe locations. Letter from Camin(Badding) to DEC(Rommel)-10/13/03. Submission of 1) site plan with ten boring locations 2) Collection of six endpoint soil samples from UST excavation 3) excavation and disposal of contaminated soil encountered during tank installation 4) Inclusion of MTBE analyticals 5) collection of groundwater samples(if encountered). Investigation Results from Camin(Badding) to DEC(Rommel)-11/6/98. Results of eight soil borings performed. Soil analyticals show 2149ppb MTBE(SB1), 526ppb benzene(SB2), 188ppb benzene(SB4), 212ppb benzene(SB5), 4576ppb MTBE(SB6), 1458ppb benzene(SB7), 29114ppb naphthalene(SB7), 187ppb benzene(SB8). Groundwater analyticals show 1239ppb benzene(SB4), 1975ppb benzene(SB5),

1001482964

5360ppb benzene(SB6). Subsurface Investigation Report Camin Bidding 908-523-0616 10/16/98). Investigation report including results above of eight soil borings performed. "There is approximately 2-4 inches of contaminated soil at the soil/bedrock interface in soil boring locations SB2, SB4, SB5, SB7 and SB8. Bedrock at depths of 6-11.5' below grade". "A sheen was detected on all samples"(groundwater). Venting system was samples on 12/11/98 via a vacuum canister attachment to vent. Removed dispenser island is the proposed location of new USTs. See analyticals above. Venting analyticals show 264ppm TPH and no other volatiles. Baseline Acquisition Assessment Report-10/10/02 Delta Environmental (Brad Fisher). Purpose was to establish baseline conditions priorto proposed lease and raze and rebuild of site by BP. One soil borings peformed in 4/02 to depth of 11.5'. Two borings drilled to 24.5' via air rotary and converted to temporary monitoring wells (MW1 and MW2). Delta recommends 1)gaseteria installpermanent monitoring wells to delineate contamination. "It is Delta's understanding that Gaseteria will retain the environmental liability of the subject site until spill closure has been obtained". At time of assessment three USTs on site (two 6000-gallon gasoline USTs and one 6000-gallon diesel UST) and four pump islands with six dispensers. Surrounding area is multiple story apartment buildings. "Groundwater is located within bedrock fractures at depths between approximately 12.5 and 13.5 ft bgs". Former USTs onsite which were CLOSED IN PLACE include two (6000-gallon) gasoline USTs in 1998 , one 6000-gallon diesel in 1999, ten 550-gallon gasoline USTs in 1998, one 550-gallon waste oil in 1998 and one 550-gallon fuel oil in 1996. Soil analyticals show 4570ppb xylenes(SB1) and 3970ppb isopropylbenzene(SB1) from depths of 10-11.5'. Groundwater analyticals show 148ppb benzene(MW1), 24800ppb MTBE(MW1) and 30.7ppb benzene(MW2). 10/21/2003-Vought-Reviewed site with DEC(Rommel). Sent Stipulation Agreement with the following requirements: 1)Groundwater delineation via installation of bedrock monitoring wells at former boring locations SB1, SB4, SB5, SB6, SB7 2)Monitoring of vapors and groundwater intrusion 480 10th Ave 3)current status of SVE system and submittal of historic and current SVE effluent samples for benzene analysis or collection of indoor air samples from 480 10th Ave. 10/24/2003-Vought-Called LuJuana Smith (212-967-1644) and left message and explained requirements of 10/21/03 letter. 10/27/2003-Vought-Received message from Steve Muller will be taking indoor air samples from 480 10th Avenue. Vought returned call to Muller (516-395-5957). 10/28/2003-Vought-returned call to Steve Mullerto discuss indoor air samples. Left message to return call to DEC. Left message for LuJuana Smith to call DEC. Vought spoke with Muller and okayed PID and stated that SUMA sample as per NYSDOH guidance was not necessary until 1)closure of SVE system or 2)PID indications of petroleum vapors followed by subsequent remediation. Vought also instructed Muller to check sumps. Vought spoke to LuJuana Smith who will be sending in FOIL Request for continuous updates on site. Vought also called Muller and gave him LuJuana's phone (212-967-1644) for access arrangements. 11/6/2003-Vought-Spoke with Steve Muller who was onsite. No PID readings and no olfactory evidence of petroleum and no groundwater infiltration into basement and no productin sump. Muller will produce summary letter and send to DEC. 11/7/2003-Vought-Received Summary Letter from Applied Geosolutions(Muller). Site visit performed on 11/6/03 and inspection of basement at 480 10th Ave. "AGS observed no olfactory detection of odors or vapors consistent with hydrocarbons related to gasoline". PID readings of 4.8ppm were attributed to moisture in basement. Small amount of standing water present near leaking hose. No signs of product in sump. Vapor abatement system unoperational during site visit. Photos of basement submitted with report show no free product or petroleum impact. 11/24/2003-Vought-Received signed STIP from Adam Good(Gaseteria) with revised Corrective Action Plan. 11/26/2003-Vought-Spill transferred from Rommel to Vought. Vought received call from LuJuana Smith and

1001482964

she requested update. Vought faxed her copy of 11/7/03 report and letter sent to Gaseteria on 10/21/03. Vought submitted STIP for implementation to DEC Kunkel. 12/2/03-Vought-STIP implemented by Kunkel. Copy sent and faxed to Good and Muller. 12/17/2003-Vought-See closed spill 0301220 at same location. 9/14/04-Vought-New file review by Vought: Letter from Applied Geosolutions (Steven Muller 516-395-5957). "On November 6, 2003 Applied Geosolutions inspected the basement of 480 10th Avenue to perform vapor monitoring and to identify the presence of groundwater". "During the inspection AGS observed no olfactory detection of odors or vapors consistent with hydrocarbons related to gasoline. The air space was monitored with a portable PID indicating a measurement of 4.8 ppm... This detection is likely the result of low atmospheric pressure followed from periods of rain causing the basement to be damp." The basement floor did not indicate the presence of groundwater...". Line and Dispenser Upgrade Report (Delta Environmental Brad Fisher 914-765-8180). "This Line and Dispenser Report summarizes the results of pump island and product piping upgrade assessment activities conducted by Delta Environmental and Gasoline Installations on behalf of BP Products North America". Work performed included the removing and installing new spill containment boxes beneath each dispenser, removal and replacement of product piping and installation of electronic line leak detection systems. Soil analyticals only show minor TAGM 4046 SVOC exceedences attributable to fill. Subsurface Investigation Workplan (Applied Geosolutions)-July 2004. Bedrock at depth of 10' below grade and groundwater at depth of 12.5-13.5' below grade. Report proposes installation of four wells via air rotary followed by groundwater sampling. Groundwater flow direction not determined as of yet. 9/14/04-Vought-Sent letter to Gaseteria approving of Subsurface Investigation Workplan. Vought received message from Ljuanna Smith (212-967-1644) and returned call. Vought spoke to Smith and no indication of vapors was noted. Ms. Smith requested info on the applicability of the BCP program for 480 10th Avenue and Vought replied that was only available if HPD was willing to take responsibility of the spill and that she should call Albany for further information. Vought also suggested that she return the call to DEC on 11/14/04 which is when the workplan results are due to DEC. 9/17/04-Vought-Received fax from Applied Geosolutions (Muller). "466 10th Avenue-AGS is currently getting drilling quotes and will complete the Workplan within the 60 day time frame". 1/6/05-Vought-Reviewed Subsurface Investigation Summary Report (Applied Geosolutions) dated December 2004 and received on 1/3/05. Location north of USTs not possible due to concrete with rebar. Installation of three monitoring wells. Groundwater from 7-11' bgs and flow to the west. Groundwater analyticals show 48ppb xylene(MW1), 13ppb 1,2,4-trimethylbenzene(MW1), 17ppb 1,3,5-trimethylbenzene(MW1), 26ppb naphthalene(MW1), 1400ppb MTBE(MW1), 23ppb MTBE(MW2), and 20ppb MTBE(MW3). "The existing groundwater monitoring wells should be monitored on a monthly schedule and sampled on a quarterly schedule to document changes in groundwater elevation and contaminate concentration trends in order to develop and appropriate remedial strategy". DEC requires: 1) installation of monitoring wells on West 37th Street north northeast of site and downgradient from abandoned tankfield along 10th Avenue. 1/19/05-Vought-Meeting at DEC with ASR Tomasello. Will examine possibility of borings across 10th Avenue (may not be possible due to utilities) and also onsite adjacent to 480 10th Avenue. If onsite boring adjacent to 480 10th Avenue is not possible then boring will be installed on 37th Street. 2/17/05-Vought-Spoke to Muller and site visit scheduled for 2/24 at 10am to discuss possible well installation locations. 2/24/05-Vought-Site meeting with ASR Tomasello and no borings possible across 10th Avenue. Well will be installed onsite under canopy downgradient of abandoned tankfield. Well will also be installed on West 37th Street north northeast of site. Obligado- SITE TRANSFERRED FROM VOUGHT TO OBLIGADO 10/12/05 - Spoke with Tomasello ASR,

requests to talk about closure for sp0206783. 10/17/05- Obligado - File Review: Final Subsurface Investigation Report, dated June 2005. 4 monitoring wells installed at the site. Wells were installed into Bedrock down to 25 ft bgs. 3 wells installed in December 2004, one additional well installed in March 2005. Groundwater encountered at approximately 7 to 11 feet. No product encountered. Initial gw samples in Dec. 2004 show ND for Benzene in all wells, 1400 ppb MTBE (MW-1), 23 ppb MTBE (MW@), 20 ppb MTBE (MW-3), 48 ppb Xylene (MW-1). March 2005gw results show 140 ppb benzene (MW1), 2100 ppb MTBE (MW-1), 26 ppb benzene (MW-3), 16 ppb MTBE (MW-3). June 2005 results show 45 ppb benzene (MW-1), 11 ppb Ethylbenene (MW-1), 750 ppb MTBE (MW-1), 52 ppb benzene (MW4), 10 ppb toluene (MW-4), 170 ppb Napthalene (MW4), 55 ppb MTBE (MW4), 193 ppb xylenes (MW-4). 4Q05 Monitoring Report, dated 10/15/05. Ground water analyticals at show 20 ppb benzene (MW-1), 580 ppb MTBE (MW1), 23 ppb MTBE (MW-2), 21 ppb benzene (MW-3), 15 ppb MTBE (MW-3), 16ppb benzene (MW-4), 52 ppb ethylbenzene (MW-4), 140 ppb MTBE (MW-4). 11/14/05 - Obligado - Site visit with ASR Tomasello. Request to see at least 2 more quarters of monitoring at a minimum. 12/8/05 - Obligado - Will do a sensitive receptor survey. Continue monitoring. Only 2 quarters of data at MW4. 3/1/06 - Obligado - PPhone call with Chris/STeve, ask that site be monitored quarterly not monthly. 4/12/06 - Obligado - review 1Q06 monitoring report. BTEX ND to 33 ppb, MTBE ND to 800 ppb. 11/21/06 - Obligado - Reviewed Closure Petition/Sensitive Receptor Survey. Sent email to ASR denying NFA stating the following: "Due to historical vapor issues in the adjacent apartment, and the presence of benzene above guidance levels in ground water, the Department requires laboratory analyzed vapor samples from either the slab system (if operational) or indoor air samples to confirm no vapor intrusion. The Department also requires an additional round of ground water monitoring to confirm benzene and MTBE levels are still decreasing. NYSDOH Vapor Intrusion Guidance should be followed when collecting air samples available at http://www.health.state.ny.us/environmental/investigations/soil_gas/svi_guidance/index.html. Please submit the results of the additional investigation by January 21, 2007." 12/1/06 - Obligado - Steve Muller will be onsite today to collect additional data. END DECRemark - 8909614

DEC Memo: Start DECRemark - 0007141 Prior to Sept, 2004 data translation this spill Lead DEC Field was "ROMMEL" This spill case was reassigned from DEC (Sigona) to Rommel on 01/07/2004. 9/18/00 On site. Across the street from Javits Center. Former gas station. Removing old 550 tanks to install billboard. Concrete broken and piping exposed. As per owner, Ari Zubli, tanks temp closed with water 15 years ago by Mobil. No evidence of contamination. They will collect endpoint soilsamples and submit the a tank pull report to my attention. First tank they encountered was still filled with water. Structural borings performed by Scott Lewis Eng. Firm - Bedrock at 12 feet no water. Tanks not registered. Mailed PBS application and instructions. Spoke to Chief Mooney. When the FD was on site, they encountered explosive levels of vapors in piping and stopped work. They referred this to their buried tanks unit to follow up and ensure that the contractor is FD certified. DEC Sigona met with facility owners provided PBS application to register existing tanks 6 x 550 gallon and 1 x 2,000 gasoline USTs. The tanks were removed and excavation completed on Monday October 2, 2000. Environmental Assessment and Remediation (John Rochetta) documented the removal of the tanks under PIN Project investigation for Javits cleanup. EAR collected endpoint soil samples to fingerprint samples for comparison to used oil cleanup under 11th Avenue and West 37thStreet/West 36th Street. The material appeared to be gasoline and different from the material cleaned up by DEC state contractor Milro Associates. No used oil USTs were found during the excavation of the site. 08/19/05 Determination needs to be made whether all tanks at site removed. Next step- call property owner to determine whether tank closure report exists. LNK. 05/04/06-Vought-See spill #9709152 for three groundwater wells installed by NYS to see if possible upgradient contribution to site located at 450-454 11th avenue (Spill #9709152 PIN00334). EcoTest Groundwater Analyticals-6/2/04. Groundwater analyticals show: 30ppb benzene(MW1), 7ppb xylene(MW1), 6ppb isopropylbenzene(MW1), 8ppb n-propylbenzene(MW1), 21ppb 1,2,4-trimethylbenzene(MW1), 34ppb xylene(MW2), 38ppb 1,2,4-trimethylbenzene(MW2), 6ppb benzene(MW4), 8ppb benzene(MW6), 17ppb toluene(MW6), 110ppb ethylbenzene(MW6), 420ppb xylene(MW6), 320ppb 1,2,4-trimethylbenzene(MW6), 33ppb naphthalene(MW6), 480ppb benzene(MW7), 3600ppb toluene(MW7), 3800ppb ethylbenzene(MW7), 13000ppb xylene(MW7), 5500ppb 1,2,4-trimethylbenzene(MW7), 930ppb naphthalene(MW7). Wells MW6 and MW7 located on sidewalk of 456 11th ave show contamination consistent with gasoline. Vought called DEC Brand (project manager for Spill #0007141 at 456 11th Avenue)

Remarks: regarding dissolved groundwater contamination in MW7 and MW6 located on sidewalk of 456 11th Avenue. Martin indicated that spill was going to be transferred back to Region2 due to end of spill closure initiative in Albany. Martin indicated that he would put spill in Long Term list for transfer back to Region 2. 08/17/2006: As noted above, spill may be associated with adjacent spill 9709152. NYSDEC contact namechanged to Vought, spill transferred back to Region 2 for evaluation. M.Brand NYSDEC DER Albany. 4/25/2007 - Sangesland spoke to Mr. Zubli (property owner) the spills case needs to be reassigned to someone in the Remediation Group. Sangesland provided Mr. Zubli with a contact name/number for Vadim Brevdo-DEC Remediation. END DECRemark - 0007141

DEC Memo: Start DECRemark - 0108476 Prior to Sept, 2004 data translation this spill Lead
 DEC Field was "RODRIGUEZ" Con Ed e2mis #140357: Efrain Alvarado #18791,
 Substation Operator, reported at 10:38 hrs. that he found at 10:10 hrs. approx.
 6 ounces of dielectric fluid had leaked from A phase pothead of Feeder 38M44
 located in Transformer #4 vault at the West 42nd Street Substation. The street
 address of the substation is 521 West 41st Street. He was performing a station
 inspection when he discovered the spill. The dielectric fluid spilled onto the
 bluestone. The source of the spill is the transmission feeder 38M44 and the
 cause is a leak from "A" phase pothead. No private property affected. There was
 no fire involved. There was no sewer or waterway affected. There is oil filled
 equipment in the structure - transformer #4 and a dielectric-filled feeder in
 the structure or vault. There is no standing water and no sewer connection.
 Environmental Spill tag #S-00825 was installed. No samples taken. Prior PCB
 historical data for transmission feeder dielectric fluid is < 1.0 ppm. S/S
 Operator Alvarado placed absorbent pads down, removed the wet bluestone and
 placed a drip pan under the leak to contain it. The pothead is not presently
 leaking. An outage is required to make the necessary repairs. The cleanup was
 started at 10:15 hrs. and was completed at 10:33 hrs. by Efrain Alvarado
 #18791. CIG Mark Schlagel #18276 notified at 12:05 hrs. -POTHEAD GASKET
 "A" PHASE- LEAK REPAIRED OIL CONTAINED ON POTHEAD STRUCTURE- RE-TORQUED 3
 PHASES. On May 10, 2002 NYSDEC O'Connell and Foley, along with Con Ed
 Hanebuth, Susco inspected this leak and found that the leak had been repaired.
 There was no apparent staining on the bluestone associated with this incident.

 DEC Memo: Start DECRemark - 0306416 9/17/03 Paul Abernathy #02605, Substation Operator, reported at 14:08 hrs. that he found at :45 hrs. approx. 1 ounce of dielectric fluid had leaked from thM41-T in Transformer Vault #8 located at the West 42nd Street Substation. The street address is 521 West 41 Street. He was performing a station inspection when he discovered the spill. The dielectric fluid leaked from B phase pothead piping and spilled onto the barksdale switch piping stand and the bluestone. The piping stand was wet with oil but there was only a stain on the bluestone. The source of the leak is B phase barksdale piping and the cause is a leak from the flange. There was no fire or smoke involved and no sewer or waterway was affected. There was no injuries related to the spill and no weather conditions contributed to the hazards of the spill. No private property was affected. There was no standing water. Environmental spill tag #S-01284 was installed. No samples were taken since this isa known oil - dielectric fluid. Cleanup was started at:00 hrs. and is presently in progress. R. Pellegrino #38620 CIG Ron Elliot #81653 was notified at:47 hrs. R. Pellegrino #38620 END DECRemark - 0306416
 Remarks: Start CallerRemark - 0306416 1 oz spill - spill to another pipe and bluestone - spill is being cleaned up at this time - leak from a switch END CallerRemark - 0306416

DEC Field was "O'CONNELL" NOTE: This is the "Master Spill Number" for Transformer #10. It is to remain open until all repairs on this equipment and remediation are completed. (JHO, 3/24/06) Con Ed e2mis #137021 (master): Frank Versaggi #11945, Substation Operator found at 13:50 hrs. approx. 1/2 gallon of transformer oil had leaked from the selector compartment of transformer #10 onto the concrete pad and bluestone at the West 42nd Street Substation. It appears that the leak is coming from the selector compartment door. No samples taken due to generator knowledge and previous PCB history which indicates < 1.0 ppm as per lab sequence #99-09978. Substation maintenance on location and started the cleanup at 14:00 hrs. All State Power Vac was called in to remove the contaminated bluestone. On May 10, 2002 NYSDEC O'Connell and Foley, along with Con Ed Hanebuth, Suscoinspected this leak and found that the leak had not been repaired. This continues to leak into containment. e2mis no. 151992 (sub): 2/5/04 @ 11:45 hrs. Joe Pitre #12477, Senior Substation Operator found at 10:00hrs. approx. 2 1/2 gallons of transformer oil leaked from the selector compartment of Transformer #10. He discovered the leak coming from one of the steel cover plates on the Selector compartment. He believes that the plate is loose. The oil leaked onto the concrete pad and the bluestone. Approx. 1/2 gallon leaked onto the bluestone. Prior PCB historical data indicated less than 1.0 ppm as per lab sequence #03-05654, dated 7/8/03. The cleanup was started at 10:15 hrs. by Substation maintenance personnel. Update: 2/5/04 Joe Pitre #12477 reported at 13:08 hrs. that the cleanup was completed at 12:10 hrs. Substation maintenance is presently investigating how to repair the leak. END DEC Remark - 0101078

-- W 42 ST SS -- TRANSF OIL ON BLUESTONE G. Araujo 17838 SSO reports: P. Fusco
SSO foundspill approx 1 qt oil and 4 gal water in bluestone under transformer
#6. Pigs and pads placed. Sample taken, cleanup started. Estimated
completion time 13:00 No impact to sewer or waterway. Incident reported to
Juan Mejias 44729 Manhattan Control Center. 04/18/00 17:25 ---- at the request
of David Perez "ERT" this report was called into C.I.G, S.Romero# 09880 @
17:25hrs 04/18/00. ===== INSERTED FROM E MAIL RECEIVED .. ZOELLER, 11940 ,
4/19/00 From: Perez, David A. Sent: Tuesday, April 18, 2000 3:31 PM To:
Zoeller, Richard; First, Louis W. Jr.; Pasquale, Frank Cc: dl - Environmental
Response Team Subject: FW: Incident 129799 Gents. This spill was called in
to the number 9. However, the spill was not called in the CIG orERT and
consequently not to the DEC. Rich, Lou, can you gentlemen help, on your end in
finding out what happened to make sure it does not happen again. Please let me
know. Note, it may also be that there may be a miscommunication and the spill
wasthought to be deminimus. Albeit, it is not because it went into soil. In any
case, the DEC called requesting information. Note a correction? The date of
the spill was January 31, 2000 not January 31, 1999. -----Original
Message----- From: Perez, David A. Sent: Tuesday, April 18, 2000 1:37 PM To:
Wallace, William Cc: dl - Environmental Response Team; Dessen, Eric M.
Subject: Incident 129799 Bill, yesterday 4-17-00, I received a call from Jane
O?Connell requesting that she be faxedseveral E2MIS reports. One of the reports
was E2MIS 129799. The report was generated from a spill to Bluestone at the
West 42nd Street Substation. According to the E2MIS this incident occurred on
January 31st 1999, Today, I again received a call from Jane O?Connell
requesting a DEC number for the spill. However, I checked both the ERT and CIG
logs. There is no record of this spill. The E2MIS report does indicate that it
was reported to the Manhattan Number 9 control Center. It appears that through
some miscommunication the spill was never reported to CIG. Consequently, it was
never reported to the ERT or the DEC Hot Line and a DEC spill number was never
generated. One thing that is very peculiar is that Jane knew of the spill

(Continued)

S104650602

albeit the DEC may have never received a report of the spill. (i.e. no spill number was issued by the DEC.) Please note that according to both the CIG and ERT logs there were numerous burnouts during this particular evening. It could be that the number 9 was very busy and the spill fell through the cracks?
From: Pellegrino, Robert Sent: Tuesday, May 02, 2000 11:19 AM To: Giasi, Anthony Cc: Pellegrino, Robert /Subject: RE: Late Notifications: Week Ending April 23, 2000 Re: E2MIS #129799 -This incident was reported on Jan. 31, 2000 while we were in a storm contingency. #9 was processing approximately 120 outage tickets (PSC reports) that day. The control center was in storm contingency mode the last week of January and the first week of February.] I interviewed the #9 supervisor whose name appears in the incident report. He looked at the report and stated that it was not the normal way he would have written the report or signed off on it. He recalls that since he was busy handling so many outages that day, he probably "handed off" the environmental incident to someone else in the control center. That person neglected to notify CIG perhaps thinking that CIG was already notified and all he had to do was document the spill. The establishment of the environmental desk in our control center will rectify this type of situation. Station Supervisor G. Toto performed an inspection on 29-NOV-2000 and returned the following with regards to this transformer: 129799 TR6 Clean Up completed - No Leaks Observed. On May 10, 2002 NYSDEC O'Connell and Foley, along with Con Ed Hanebuth, Susco inspected this leak and found that the leak had been repaired. There was no apparent staining on the bluestone associated with this incident. S. Hanebuth - 85259 END DECRemark - 0000727

Material Name: TRANSFORMER OIL
Case No.: Not reported
Material FA: Petroleum
Quantity: 2.00
Units: Gallons
Recovered: 0.00
Resource Affected: Soil
Oxygenate: False
DEC Memo: Start DECRemark - 0100034 Prior to Sept, 2004 data translation this spill Lead DEC Field was "FOLEY" Con Ed e2mis #136215: This incident was originally entered under the incorrect site (136215/Manhattan Substations). 4/02/01 15:25 hrs Paul Abernathy #02605, Substation Operator, reported at 14:47 hrs. that L. D'Angelo #06780, Substation Safety Rep., found at 13:45 hrs. approx. 2 gallons of dielectric fluid had leaked from Transformer #7 located at the West 42nd Street Substation. The dielectric fluid that spilled was mixed with approx. 1 gallon of water. Transformer #7 is associated with Feeder 38M43-T. According to the station operator the leak is coming from the transformer through the outer shell. The leak was originally thought to be coming from the primary bushing. Absorbent pads are in front of the primary bushing area of the transformer but the leak appears to be coming through the outer shell of the transformer. It is not certain at this time what caused the spill. The dielectric fluid spilled onto the transformer pad and the bluestone. Spill tag #000776 was installed. No sample taken. Environmental Desk recommended to the Station Operator that samples be taken since it was not certain what the source of the oil was. Previous PCB historical data of the transformer oil is < 1.0 ppm as per lab sequence #99-09976, dated 9/13/99. Initial cleanup action started at 14:15 hrs. by Joe LoForte #53441 and Gerry Husbands #16179. Cleanup Supervisor is Gerry Toto #39043. Con Ed e2mis #137019: All State Power Vac was contracted to remove the contaminated stone around the base of the transformer pad. Containment is in place an repairs are pending. Update 05/11/2001 On May 10, 2002 the transformer was inspected by DEC O'Connell and Foley along with Con Edison Hanebuth and Susco. There was still an active leak on the bank which was contained. In additon a small leak (3-4 drops) was found at the base of the Tap Changer Shaft. The oil had fallen onto a peice on conduit on top of the concrete pad. The new leak was immediately cleaned up. END DECRemark - 0100034
Remarks: Start CallerRemark - 0100034 bushing leaked causing a spill to the blue stone. pending results END CallerRemark - 0100034

 DEC Memo: Start DECRemark - 0100193 Prior to Sept, 2004 data translation this spill Lead DEC Field was "FOLEY" Con Ed e2mis #136306: While performing a station inspection at the West 42nd Street Substation, SSO, Sr. Env. Specialist, S. Hanebuth - 85259, discovered a leak of approximately 16 ounces from the secondary throat on Transformer #2. The oil leaked onto the concrete pad and onto the bluestone. The spill was cleaned up and absorbents were placed underneath the secondary throat. The leak rate is 1 drop per hour. Tag Number 000357 was placed near the secondary throat. There was no release to sewers or waterways, no fire or smoke. No samples were taken. Unit is less than 50 ppm PCB (LSN 95-05859 and 98-14326). There was no property damage. On May 10, 2002 NYSDEC O'Connell and Foley, along with Con Ed Hanebuth, Susco inspected this leak and found that the leak had not been repaired. This continues to leak into containment. END DECRemark - 0100193

WEST 42 SUBSTATION (Continued)

S106125730

Remarks: that he found at 09:20 hrs. approx. one (1) gallon of transformer oil had spilled onto the concrete pad and bluestone from a 55 gallon drum located at the West 42nd Street Substation. The street address of the substation is 521 W. 42nd Street. The drum was in place as an engineering control collecting oil leaking from the secondary throat of Transformer #5. There was water and oil in the 55 gal drum. The water froze in the drum causing the drum to crack, which in turn spilled the water and oil onto the concrete pad and bluestone. Only approx. 1 quart of oil spilled onto the bluestone and the remainder spilled onto the concrete pad. The source of the spill is the oil from transformer #5 and the cause is a leak from a cracked steel drum. No sewer or waterway was affected. No samples taken since there is generator knowledge of the spill. Prior PCB historical data is less than 1.0 ppm as per lab sequence #03-05654, dated 7/8/200. The initial cleanup action was started at 09:20 hrs. Maintenance will use Citrus Clean to clean up the spill and they will put the cracked drum into another containment drum. The affected bluestone will be removed and disposed of properly. The S/S Operator will call back when the cleanup is completed. 13:08 hrs. that the cleanup was completed at 11:20 hrs. The active spill will remain open under the original incident. This spill from the secondary containment can be closed out. and END DECRemark - 0312312
 Start CallerRemark - 0312312 A DRUM WAS BEING USED AS AN ENGINEERING TOOL COLLECTING OIL THAT WAS LEAKING TRANSFORMER #5 WATER IN DRUM FROZE CRACKING THE DRUM. SPILLED UNTO BLUESTONE AND CONCRET PCB IS LESS THAN 1PART PER MILLION, NO SMOKE, FIRE, WATERWAYSOR [PRIVATE PROPERTY.. CON ED #151982 END CallerRemark - 0312312

DEC Memo: Start DECRemark - 9910851 Prior to Sept, 2004 data translation this spill Lead
DEC Field was "O'CONNELL" See spill # 9900735.
Con Ed e2mis #129283: 12/13/99 09:50 S. Tercovich(Station Opr)reports
contractorsworking at w. 42 station in transformer vault # 3 on feeder 38m 43
found unknown oily sludge while excavating bluestone. There was no signs of oil
on top of bluestone before digging. Substance was found after (2)4'x4'x3' deep
excavation was dug. Have 1/2 yard of sludge with 2-pts water...Substance in
bluestone...Did not enter waterway or sewer...Sample taken for pcb & id...Spill
tag #s-01142 installed...Pads installed...Clean up pending lab results.
15-DEC-1999 The reason for the excavationof the bluestone is for the
inatallation of conduit and grounding wires for future equipment (circuit
switchers). The contractor was directed to excavate to a depth of approximately
5 feet. The excavation work has continued. The bluestone is being accumulated
for disposal as oily waste. A representative from our Remediation group and the
Env. Specialist will meet the DEC at the station to look at this incident and
determine the extent of the cleanup. Lab Sequence Number: 99-12780-001
SAMPLETYPE: OIL PCB 5 PPM EQUIPMENT : SW TEST PIT -002 SAMPLE TYPE: OIL PCB 7
PPM EQUIPMENT : NE TEST PIT We have also identified the substance as some
type of dielectric fluid. Lab Sequence Number: 99-12781-001 See also LSNs:

DEC Memo:	Start DECRemark - 0513410 163029. 2-21-06 10:25. W Varela # 15759 Sub Station Operator calls at 10:15 to report that while doing a site inspection at the W 42 St Sub-Station he discovered approx 16 ounces of oil on the concrete pad and in the blue stone below Transformer # 9. He states that the oil appears to have leaked from the Tap changer upper gear box. A clean up was started and Environmental tag # 005322 was hung. No fire or smoke was involved and no injuries were reported. Weather conditions did not contribute to the hazard of the spill and no waterways or sewers were affected. There is no standing water. No sewer connections. No concrete or earthen sump. No visual water movement or substantial cracks. There is oil filled equipment and a dielectric filled feeder in the structure. No private property was affected and the substance is owned by Con-Ed. Notified J Moran # 01182 at CIG at 10:25 hrs. Logged by: G Anelli 14059 UPDATE 2-21-06 12:44. As per T Regan # 07430 ERT rep this spill has been changed from a 24 hr demin to a spill lubricating oil. logged by G Anelli 14059. 2-21-06. I visually inspected the spill and found that cleanup has been completed and engineering controls have been placed. C. Browne, 04843 END DECRemark - 0513410

DEC Memo: Start DECRemark - 0101399 Prior to Sept, 2004 data translation this spill Lead DEC Field was "O'CONNELL" Con Ed e2mis #136872: This incident was originally entered under the incorrect site (136872). A duplicate report has been created under the correct site(137319). On 5/5/01 at 18:17 Linwood Smith #38549 reports that at 17:45 Eric Galloza of substation maintenance was filling an auxiliary cooling tank & found that a hose had come loose, and approximately 1 gallon of dielectric fluid had leaked onto the concrete pad & the bluestone. they are in the process of cleaning it up and will call back when completed. I had also asked them if they had the history of the PCB results & he was going to check. They hung a tag # S00818. No samples were taken. Mr. Smith also told me that the problem with the hose has been corrected. On May 10, 2002 NYSDEC O'Connell and Foley, along with Con Ed Hanebuth, Susco inspected this leak and found that the leak had been repaired. There was no apparent staining on the bluestone associated with this incident. END DECRemark - 0101399

 DEC Memo: Start DECRemark - 0503700 e2mis no 159461 J.Pitre#12477 reported the can on Capacitor Bank#1 had blown up, there was a spill of 16 oz. total, 12 oz. were in the metal compartment of the Capacitor Bank#1 and 4 oz. went in to a drain. J.Pitre#12477 does not know where the drain leads to, he is in the process of trying to find out. There was a release into a drain. A yellow environmental tag numbered #005428 was hung on Capacitor Bank#1. J.Pitre#12477 states that a drain block was put in place to prevent any further release into the drain and containment devices are in place to prevent leakage from the metal compartment. The cleanup is pending equipment deenergization and repair or replacement of the can. 06/28/05 10:17. J.Pitre#12477, notified the control center on 06/28/05 at 10:15hrs. to report that the drain is connected to a combined sewer. Logger : M.Casalta#12684. 6/28/05. As per my inspection. The operator noticed a sheen on the rainwater that went into the combined sewer drain. He put a drain blocker on the drain and put absorbent pads on the oil. The leaking capacitors were replaced with new ones and the oil was cleaned with pads and simple green. I inspected the drains and found no sign of oil. P.Keelan Closed. 9-1-05. George Breen END DECRemark - 0503700

 DEC Memo: Start DECRemark - 0303684 Con Ed e2mis #149157: On 7/8 @ 14:44 P Abernathy #

02605 of S/S Ops reported to me that while in the W 42 st Substation doing inspections he noticed a leak from Transfomer bank #9. This Unit is associated with High Feeder 38M45 on the 138 KV Feeders. Approx one gallon of dielectric fluid leaked onto the bluestone and the Transformer on that side of the Unit was wet dripping around the primary bushings. There is no active leak at this time. Weather did contribute as far the "Heat of the day is concerned". The source of the spill is the Transfomer and the cause is Equipment Failure. Environmental tag # s 00801 is used. The cleanup is in progress and has started at 14:40 on 7/8/2003. T. Garcia, #80482,Associate Specialist, SSO reviewed report on 7/8/2003 at 3:31 p.m. Awaiting feedback from station Supervisor regarding the completion of the cleanup. END DECRemark - 0303684

DEC Field was "O'CONNELL" NOTE: This is the "Master Spill Number" for
Transformer #3. It is to remain open until all repairs on this equipment are
completed. (JHO, 3/10/06) Con Ed e2mis #124334
(master): 04/20/99 07:35 C.JAWORSKY #47705 REPORTED THAT HE
FOUNDTRANSFORMER #3 ON FDR 38M43 LEAKING TRANSFORMER OIL FROM THE FINNS ONTO
BLUESTONE ITS CONTAINED AND HE PUT A PAN UNDER THELEAK TO CONTROL SAME AND PIGS
AROUND THE PAN NO IMPACT TO WATERWAY OR SEWER THE IS 1-DROP PER MIN. HE TOOK A
SAMPLE AND FOUND A SIGN HUNG #SOO285. THE CLEANUP WAS INITIATED BY THE
TRANSFORMER GROUP. THEY REMOVED THE AFFECTED BLUESTONE UNDER THE LEAK. SAMPLES
OF THE SOURCE AND THE BLUESTONE WERE TAKEN. LAB RESULTS SHOW THE OILS
CONTAINS <1 PPM PCBS Lab Sequence Number: 99-04026 BLUESTONE-TR # 3 M/B AREA
: W.42ND ST. S/S. 28-MAY-1999 AFTER 4-20 GALLON DRUMS OF BLUESTONE WERE
REMOVED, THE BLUESTONE UNDERNEATH STILL APPEARS STAINED. CONTAINMENT WAS SET UP
UNDER THE LEAK IN THE FORM OF TRAYS AND ABSORBENT PADS. THE CLEANUP OF ALL
STAINED BLUESTONE WILL BE MORE EXTENSIVE. THE TRANSFORMER GROUP WILL MAKE
ARRANGEMENTS TO COMPLETE IT. THE LEAK REPAIR WILL REQUIRE AN OUTAGE. NO
SCHEDULED DATE IS AVAILABLE AT THIS TIME. Station Supervisor G. Toto
performed an inspection on 29-NOV-2000 and returned the following with regards
to this transformer: 124334 TR3 No Leaks Observed. The incident status will be
changed to closed. During a staiton inspection on 04-APR-2001 is was evident
that the plug near the pump had begun to leak again. Contianment was placed

DEC Memo: Start DECRemark - 9912551 Prior to Sept, 2004 data translation this spill Lead DEC Field was "KRIMGOLD" 01/26/04 Reassigned from Rommel to Austin 02/17/04: Reassigned from AUSTIN to KRIMGOLD. 3/15/05. J.Krimgold reviewed a letter dated December 2, 2004 from AKRF. The letter stated that three tanks along with contaminated soil were removed from this site. However, post-excavation samples were not obtained and a new building was constructed at this site. AKRF was requesting a spill caseclosure. 3/1/5/05. J.Krimgold called AKRF and spoke to Andrew Rudko. Requested any supporting documentation showing that tanks and contaminated soil were indeed removed and disposed properly. 04/13/06- Case was transferred from Jake Krimgold to Koon Tang. END DECRemark - 9912551

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Remarks: Dec Sigona met with Dormitory Authority staffon July 17, 1995. Meeting included David Recino Dormitory Authority), E. Dowd Hunter College), Roy Fein ig Rose, Beaton Rose), R. Dib Aqua-X. Investigation found oil leak in tank. product leaked to soil and surrounding water table. Inspection of Con Ed vault outside of the building revealed 6 fuel was seeping into vault. Notified Con Ed who sent personnel to respond and document. Telephone call on 1/3/96 found that Woodward-Clyde was awarded bid to provide investigation of the spill. They will start advancing borings on the week of January 8, 1996. I requested that I could be present to observe the installation of monitoring wells. Roy Fein ig will be overseeing the work and I asked David Recino to have him call me ASAP to set up the drilling apointment.
Spill Cause: TANK WAS EMPTIED AND CLEANED DURING A TEST TODAY - THEY FOUND AN UNKNOWN AMOUNT OF OIL UNDER TANK. CALLED DAVID KATZEN, PREPARING TO ABANDON TANK - CLEANED OUT HTE TANK - DRILLED INSIDE THE TANK.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Type: Steel/carbon steel
Install Date: 04/97
Certified Date: 03/10/2000
CAS Number: 107211
Substance: Single Hazardous Substance on DEC List
Tank Location: ABOVEGROUND
Intrnl Protection: None
Extrnl Protection: Painted/Asphalt Coating
Pipe Location: Aboveground
Pipe Type: STEEL/IRON
Pipe Internal: None
Pipe External: 1
Pipe Containment: None
Tank Containment: Double-Walled
Leak Detection: Electronic,Fiberglass
Overfill Protection: High Level Alarm,Impressed Current
Haz Percent: 100
Total Tanks: 1
Tank Secret: False
Last Test: Not reported
Due Date: Not reported
Tank Error Status: No Missing Data

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Other Pertinent Environmental Activity Identified at Site

NJ-NJEMS (New Jersey - New Jersey Environmental Management System).
 The Department of Environmental Protection (NJDEP) manages large
 databases of environmental information in this integrated system.

RCRAInfo is a national information system that supports the Resource
 Conservation and Recovery Act (RCRA) program through the tracking of
 events and activities related to facilities that generate, transport,
 and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
 program staff to track the notification, permit, compliance, and
 corrective action activities required under RCRA.

Other Pertinent Environmental Activity Identified at Site

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Other Pertinent Environmental Activity Identified at Site

NJ-NJEMS (New Jersey - New Jersey Environmental Management System).
The Department of Environmental Protection (NJDEP) manages large databases of environmental information in this integrated system.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Other Pertinent Environmental Activity Identified at Site

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated

Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

VCP:

Program Type: BCP
 Site Code: 359020
 Assessment: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

**Actual:
 28 ft.**

Env Problems: There are eight 550 gallon USTs abandoned in-place on site. Two 4000 USTs have been removed. Groundwater is at approximately 20 to 26 feet deep. Bedrock is at approximately 17 to 24 feet deep. Suspected contaminants at this site are primarily from petroleum. These contaminants are impacting the soil and shallow groundwater. The bedrock aquifer does not appear to be contaminated. Of the 5 reported spills associated with this site, all are closed. The shallow groundwater contamination is basically from petroleum compounds, including MTBE. Metals contamination is not a problem at this site. Off-site contamination is not known. An investigation is needed to determine the necessary site remedial action.

Site Desc: The Site is located at 555 West 34th Street, also known as 400 Eleventh Avenue, between 10th and 11th Avenues in Manhattan, New York City, New York County. The property is identified as Block 706, Lot 1 in New York City's tax records and consists of a 37,800 square-foot (1.02 acre) rectangular-shaped two-story

building. The surrounding urban area consists primarily of retail and commercial business. Current use of this site is for commercial and industrial uses. Future use of this site will be for unrestricted use. The BCP Agreement was signed by the DEC on February 21, 2007. The Citizen's Participation Plan has been drafted and a remedial investigation work plan is to be developed.

Spoke with jeff Bohlen(516-807-8983). He will forward all necessary documents to DEC. 10.07.05 Sharif is currently reviewing the subsurface investigation report submitted by Envirotrac. 3/20/06- DEC Piper reviewed tank closure report. As per report and database, there are two historic spills at the property, 9007995 and 9314833. In 1994, two 4K gasoline UST's were removed, and two 3K gasoline UST were installed. Samples collected from the limits of the excavation detected petroleum impacted soils in the vicinity of these USTs. Additionally, 8- 550 gal USTs are located in the basement of the property. These tanks were allegedly closed along w/ the two 4K gal USTs. SVOC's were detected exceeding NYSDEC TCLP guidance values. Spills 9007995 and 9314833 were closed on 8/6/96 after receipt of tank closure reports for the 2 4K USTs and 8- 550 USTs. In June- August 2005, seven (7) MWs were installed on site. Lab analytical revealed VOC's, SVOC's, and metals above TAGM 4046. Note: the groundwater was determined to be slightly to moderately saline. From Jan 6- 11, 2006, Envirotrac removed the two 3K gasoline USTs that were installed in 1994 and constructed of double wall fiberglass. A total of six (6) endpoint samples were collected from the excavation. With the exception of the West sidewall in which 226 ppb of benzene was detected, no other VOC's were detected above TAGM 4046. Additional excavation was performed in the area of the two- 4K UST remote fills and the two- 3K UST remote fills. Analytical results suggest that VOC's were not present above TAGM 4046, however SVOC's were. In addition to the sampling performed in reference to the UST's, soil samples were collected at the base of the Truck Elevator Shaft where it was determined that VOC's and SVOC's were detected above TAGM 4046, due to a bad seal. To minimize any future impact, the seals were replaced and vegetable oil was used in place of pet. based hydraulic oil. As per the report, the property is currently in negotiations to be sold. This party reportedly plans on razing the building and excavating to bedrock. 45 feet bgs. In the meantime Envirotrac recommends quarterly sampling of the MW network. Referred to K. Tang 3/21/06 - reviewed the tank closure report. Soil and GW contamination is minimal, max GW VOCs is 200 ppb and only one side wall sample is slight above TAGM 4046. Spill closed.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NJ-NJEMS (New Jersey - New Jersey Environmental Management System). The Department of Environmental Protection (NJDEP) manages large databases of environmental information in this integrated system.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

Other Pertinent Environmental Activity Identified at Site

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

EPA ID Number

MOBIL OIL CORP SS #QDL (Continued)

1000253419

Percentage: 100.00
Tank Type Name: Steel/Carbon Steel/Iron
Tank Internal Protection: None
Tank Internal Protection 1: None
Tank Internal Protection 2: Not reported
Pipe Location Name: No Piping
Pipe Type Name: Galvanized Steel
Pipe External Protection 1: None
Pipe External Protection 2: Not reported
Tank Secondary Containment 1: None
Tank Secondary Containment 2: Not reported
Pipe Secondary Containment: Not reported
Tank Leak Detection 1: None
Tank Leak Detection 2: Not reported
Pipe Leak Detection 1: Not reported
Pipe Leak Detection 2: Not reported
Type Of Overfill Prevention 1: None
Type Of Overfill Prevention 2: Not reported
Dispenser Method: Suction
Spill Prevention: Not reported
Tightness Test Method: Testing Not Required
Date Tested: / /
Next Test Date: / /
Date Tank Closed: 11/01/86

Tank Number: 006
Tank Location Name: Underground
Tank Status: Closed - Removed
Tank Model: Not reported
Pipe Model: Not reported
Active Status: Inactive
Install Date: 12/01/62
Capacity Gallons: 550
Material Name: Gasoline
Percentage: 100.00
Tank Type Name: Steel/Carbon Steel/Iron
Tank Internal Protection: None
Tank Internal Protection 1: None
Tank Internal Protection 2: Not reported
Pipe Location Name: No Piping
Pipe Type Name: Galvanized Steel
Pipe External Protection 1: None
Pipe External Protection 2: Not reported
Tank Secondary Containment 1: None
