**ATTENTION: ALL CURRENT  
AND FORMER DDS CUSTOMERS**

*You are receiving this notice because you previously signed a contract with Digital Dispatch Systems Inc., now known as DDS Wireless International, Inc. (DDS)*

As you know, you must have either the CMT TPEP system or the VTS TPEP system installed and functioning in your vehicle by your vehicle's first regularly scheduled taxicab inspection on or after February 1, 2011.

In addition to offering installation of CMT hardware, CMT is also offering the option of a CMT/DDS Hybrid Solution (using the existing DDS hardware, supported by CMT software/systems). If you signed up with CMT, either of these solutions is acceptable to the TLC, and you have the option to choose either.
