For Immediate Release

June 13, 2007

NEW DIGITAL CAMERA MODEL APPROVED

The New York City Taxi and Limousine Commission (TLC) today announced the approval of a new digital camera – the Cygnus Cygcam MMVI. This camera is approved for use in all TLC licensed vehicles that are eligible for digital camera use in lieu of a bullet-resistant partition, or for all other TLC licensed vehicles for use in addition to the required bullet-resistant partition.

The Cygnus Cygcam MMVI is manufactured in Staffordshire, England and is in wide use in the UK (over 6,000 units). The unit's exclusive installer in the United States is Alon Taximeter Inc. (P012), located at 11-06 Broadway, Astoria, N.Y. 11106.

The Cygcam joins previously authorized models the Honeywell Fareview, and VerifEye Mark IV.

A complete list of authorized camera installers may be accessed on the TLC web site (www.nyc.gov/taxi) through the "TLC News" or "Safety & Emissions" sections.

Recently-updated Partition and Camera Regulations may also be viewed on the TLC web site at:
